PREFACE.

The design of this book, and an outline of its contents, are set forth in the Introductory Chapter, and need not be further spoken of in this place.

The subject has hitherto received scant attention from competent English scholars. This book is, therefore, based mainly on the researches of German philologists, notably on the works of Förstemann, Zeuss, Diefenbach, Diez, Pott, Leo, Glück, Worsaae, and Buttmann. The works of Kemble, Guest, Hartshorne, Ferguson, Trench, Edmunds, Latham, Donaldson, and other English writers, have, however, been freely used as occasion served.

In previous Editions, all such literary obligations were acknowledged in the foot-notes. These notes it has no longer seemed needful to retain, but at the close of nearly every chapter a brief general reference to authorities has been inserted as an aid to students who may desire to work out for themselves, in greater detail, any special line of investigation. The Appendices, and other literary scaffolding, have likewise been removed, and the reader is now presented with results, apart from methods of research.
In thus recasting the work, the intention has been to fit it for the use of students and general readers, rather than, as before, to appeal to the judgment of philologers. The book has already been adopted by many teachers, and is prescribed as a text-book in the Cambridge Higher Examinations for Women; and it is hoped that the reduced size and price, and the other changes now introduced, may make it more generally useful than heretofore for Educational purposes.
CONTENTS.

CHAPTER I.
THE SIGNIFICANCY OF LOCAL NAMES.

Local names always significant, and possessed of great vitality—Some names descriptive—Their geological value—Others conserve ethnological and historical facts, or illustrate the state of civilization or religion in past times.

CHAPTER II.

NAMES OF RECENT ORIGIN.

CHAPTER III.

THE ETHNOLOGICAL VALUE OF LOCAL NAMES.

Local names are the beacon-lights of primeval History—The method of research illustrated by American Names—Recent progress of Ethnology—The Celts, Anglo-Saxons, and Northmen—Retrosession of the Slaves—Arabic Names—Ethnology of mountain districts—The Alps.
CHAPTER IV.
The Names of Nations.

Ethnic Names usually of obscure origin—Name of Britain—Many nations bear duplicate names—Deutsche and Germans—“Barbarians”—Welsh—Gaels—Aryans—Names of conquering Tribes—Ancient Ethnic Names conserved in those of modern cities—Rome—Ethnic Names derived from rulers—from geographical position—Europe—Asia—Africa—Ethnographic Names—“Warriors”—“Mountaineers”—“Low Coastlanders”—Names of extended signification—Greece—Italy

CHAPTER V.
The Phenicians.

Physical character of Phenician sites—Tyre—Sidon—Phenice—Phenician colonies in Crete, Cyprus, Sardinia, Corsica, Italy, Sicily, Malta, Africa, Spain, and Britain.

CHAPTER VI.
The Arabs in Europe.

The Empire of the Caliphs—Arabic Names in Southern Italy and Sicily—Tribes by which the conquest of Sicily was effected—Conquest of Spain—Tarifa and Gibraltar—The Arabic article—River names of Spain—Arabs in Southern France—They hold the passes of the Alps—The Monte Moro pass and its Arabic Names—The Muretto pass and Pontresina.

CHAPTER VII.
The Anglo-Saxons.

England is the land of inclosures—This denoted by the character of Anglo-Saxon Names which end in “ton,” “yard,” “worth,” “fold,” “hay,” and “bury”—Ham, the home—The Patronymic “ing”—Teutonic clans—The Saxon colony near Boulogne—The Saxon settlement in England began before the departure of the
CHAPTER VIII.

THE NORTHMEN.

CHAPTER IX.

THE CELTS.

CHAPTER X.

THE HISTORIC VALUE OF LOCAL NAMES.

Contrast between Roman and Saxon civilization, as shewn by Local Names—Roman roads—“Gates”—Bridges and fords—Celtic bridges—Deficiency of inis—Cold Harbour—Saxon dykes—
CHAPTER XI.

THE STREET- NAMES OF LONDON.

CHAPTER XII.

HISTORIC SITES.

CHAPTER XIII.

SACRED SITES.

Local vestiges of Saxon heathendom—Tiw, Frea, Woden, Thor, Balder—Celtic deities—Teutonic demigods—Wayland Smith—Old Scratch—Old Nick—The Nightmare—Sacred groves and temples—Vestiges of Slavonic heathendom—The Classic Pantheon—Conversion of the Northern nations—Paulinus at Goodmanham—“Llan” and “Kil”—The Hermits of the Hebrides—The local saints of Wales—Places of pilgrimage—The monastic houses
CHAPTER XIV.

PHYSICAL CHANGES ATTESTED BY LOCAL NAMES.

CHAPTER XV.

CHANGES AND ERRORS.

CHAPTER XVI.

WORDS DERIVED FROM PLACES.

CHAPTER XVII.

ONOMATOLOGY; OR, THE PRINCIPLES OF NAME-GIVING.

Dangers which beset the Etymologist—Rules of Investigation—Names in the United States—List of some of the chief components of Local Names.

INDICES.

Index of Local Names
Index of Matters

MAPS.

Chromolithographic Map of the settlements of the Celts, Saxons, Danes, and Norwegians in the British Isles and Northern France.
Sketch-Map shewing the distribution of Arabic Names in Spain and Portugal.
Sketch-Map of the Saxon colony in Picardy and Artois.
Sketch-Map shewing the Teutonic settlements in France.
Sketch-Map shewing the settlements of the Northmen in Normandy.

*s* In these Maps each dot represents the position of an ethnographic local name.
WORDS AND PLACES.

CHAPTER I.

THE SIGNIFICANCY OF LOCAL NAMES.

Local Names always significant, and possessed of great vitality—Some descriptive—Geological value of such names—Others conserve ethnological and historical facts, or illustrate the state of civilization or religion in past times.

Local names—whether they belong to provinces, cities, and villages, or are the designations of rivers and mountains—are never mere arbitrary sounds, devoid of meaning. They may always be regarded as records of the past, inviting and rewarding a careful historical interpretation.

In many instances the original import of such names has faded away, or has become disguised in the lapse of ages; nevertheless, the primeval meaning may be recoverable, and whenever it is recovered we have gained a symbol that may prove itself to be full-fraught with instruction; for it may indicate—emigrations—immigrations—the commingling of races by war and conquest, or by the peaceful processes of commerce:--the name of a district or of a town may speak to us of events which written history has failed to commemorate. A local name may often be adduced as evidence determinative of controversies that otherwise could never be brought to a conclusion.

The names of places are conservative of the more archaic forms of a living language, and they often embalm for us the guise and fashion of speech in eras the most remote.
topographic words, which float down upon the parlance of successive generations of men, are subject in their course to less phonetic abrasion than the other elements of a people's speech. Such words, it is true, are subject to special perils, arising from attempts at accommodating their forms to the requirements of popular etymological speculation; but, on the other hand, they are more secure than other words from the modifying influences of grammatical inflexion.

The name of many an ancient city, such as Tadmor, Sidon, or Hamath, seems as if it were endowed with an inherent and indestructible vitality: it is still uttered, unchanged in a single letter—*monumentum aere perennius*—while fragments of marble columns, or of sculptures in porphyry or granite, are seen strewing confusedly the desolated site.

What has been affirmed by the botanist as to the floras of limited districts, may be said, with little abatement, concerning local names—that they survive the catastrophes which overthrow empires, and that they outlive devastations which are fatal to almost everything besides. Invading hosts may trample down or extirpate whatever grows upon a soil, excepting only its wild flowers, and the names of those sites where man has found a home. Seldom is a people utterly exterminated,¹ for the proud conqueror leaves “of the poor of the land” to till the glebe anew; and these enslaved outcasts, though they may hand down no memory of the splendid deeds of the nation’s heroes, yet retain a most tenacious recollection of the names of the hamlets which their own ignoble progenitors inhabited, and near to which their fathers were interred.

Nineteen-twentieths of the vocabulary of any people lives only in the literature and the speech of the cultured classes.²

¹ In the historical books of the Old Testament, we have, incidentally, a proof of the large Canaanite element remaining after the Israelitish conquest of Palestine. We see the old Canaanite names struggling for existence with those imposed by the conquerors:—Kirjath Arba with Hebron; Kirjath Sepher with Debir; Keneth with Nobar; Luz with Bethel; Ephratah with Bethlehem.

² Of the 50,000 words in the English language, some 10,000 constitute the vocabulary of an educated Englishman, and certainly not 1,000, perhaps not more than 500, are heard in the mouths of the labouring classes.
But the remainder—the twentieth part—has a robust life in the daily usage of the sons of toil: and this limited portion of the national speech never fails to include the names of those objects which are the most familiar and the most beloved. A few score of “household words” have thus been retained as the common inheritance of the whole of the Indo-European nations;\(^1\) and the same causes have secured the local preservation of local names.

These appellations, which have thus been floated forward from age to age, have often, or they had at first, a descriptive import;—they tell us something of the physical features of the land. Thus it is that they may either give aid to the philologist when the aspect of the country remains the same—its visible forms standing in view as a sort of material lexicon of a tongue that has ceased to be vernacular; or, on the other hand, where the face of nature has undergone extensive changes—where there were formerly, it may be, forests that have been cleared, marshes that have been drained, coast-lines that have advanced seaward, rivers that have extended their deltas or found new channels, estuaries that have been converted into alluvial soil, lakes that have been silted up, islands that have become gentle inland slopes surrounded by fertile corn-flats;—in all such cases, instances of which will be adduced hereafter, these pertinacious names have a geological significance—they come into use as a record of a class of events, as to which, for the most part, written history is silent. In this manner—and the instances are many—the names of places become available as the beacon-lights of geologic history. In truth, there are instances in which local names, conserved in places where little or nothing else that is human has endured, may be adduced as evidence of vast physical mutations, side

\(^1\) The names of the numerals, of father, mother, and brother, of the parts of the body, of two or three of the commoner metals, tools, cereals, and domesticated animals, such as the cat, the mouse, and the goose, as well as the names of the plough, of grist, of fire, of the house, as well as some of the personal pronouns and numerals, come within this category. The analysis of words of this class gives us a clue to the relative epochs at which the Celtic, Romance, Slavonic, and Teutonic families separated from the parent stock, or from each other, and shows what progress had been made in the arts of life at the periods when each of these separations took place.
by side with the stone hatchets and the spear-heads of the drift of Abbeville, the canoes and anchors found in the alluvium of the Carse of Falkirk and Strathclyde, the gnawed bones of the Kirkdale Cavern, the glaciated rocks of Wales, the rain-dinted slabs of Sussex, and other massive vouchers in the physical history of the globe.

The picturesque or descriptive character of local names is, as might be anticipated, prominently exemplified in the appellations bestowed on the most striking feature in landscape—mountain peaks and ranges. Thus it is easy to perceive that, in every region of the world, the loftier mountains have been designated by names which describe that natural phenomenon, which would be most certain to impress the imagination of a rude people. The names of Snowdon, Ben Nevis, Mont Blanc, the Sierra Nevada in Spain, Snafell in Iceland, the Sneeuw Bergen at the Cape of Good Hope, the Sneehätten in Norway, Sneekoppe in Bohemia, and the Weisshorn, the Weissmies, and the Tête Blanche in Switzerland, as well as the more archaic or more obscure names of Lebanon, of Caucasus, of Hæmus, of the Himalaya, of Dwajalagiri, and of Djebel-es-Sheikh, are, all of them, appellations descriptive, in various languages, of the characteristic snowy covering of these lofty summits.

But there are many names which conjoin historical and physical information. Thus, when we learn that the highest summit in the Isle of Man is called SNAFELL, we recognise at once the descriptive character of the name, and we might be satisfied with simply placing it in the foregoing list. But when we discover that the name Snafell is a true Norse word, and that it serves moreover for the name of a mountain in Norway, and of another in Iceland, we find ourselves in presence of the historical fact that the Isle of Man was, for centuries, a dependency of the Scandinavian Crown—having been conquered and colonized by the Norwegian Vikings, who also peopled Iceland.

This is an instance of what we may call the ethnological import of names. The chief value of the science of geographical etymology consists in the aid which it is thus able to give us in the determination of obscure ethnological
questions. There are many nations which have left no written records, and whose history would be a blank volume—or nearly so—were it not that in the places where they have so-journed they have left traces of their migrations, sufficient to enable us to reconstruct the main outline of their history. The hills, the valleys, and the rivers are, in fact, the only writing-tablets on which unlettered nations have been able to inscribe their annals. The great advances in ethnological knowledge which have recently taken place are largely due to the decipherment of the obscure and time-worn records thus conserved in local names. The Celtic, the Iberic, the Teutonic, the Scandinavian, and the Sclavonian races have thus, and for the most part thus only, made known to us their migrations, their conquests, and their defeats.

To this subject—Etymology in its relations to Ethnology—several of the succeeding chapters will be devoted.

But we sometimes derive historical information in a still more explicit form from local names. They often preserve the memory of historic sites, and even enable us to assign approximate dates to certain memorable events. Thus, there is a meadow near Stamford Bridge which still goes by the name of Battle Flats. For eight centuries, this name has kept in its tenacious grasp the memory of the precise locality of the famous territorial concession which Harold, son of Godwine, made to Harald Hardráda, King of Norway, “seven feet of English ground, or as much more as he may be taller than other men.” And at the other extremity of the kingdom the name of the town of Battle, in Sussex, is the epitaph which marks the spot where, in less than a month, the English king lost his kingdom and his life.

The names of Messina in Sicily, of Carthagena in Spain, and of Miletus in Ionia, repeat the names of the mother-cities which sent out these colonies; and the name of Tripoli reminds us that there were three cities—Tyre, Sidon, and Aradus—which joined in establishing the new settlement.

The name of the Philippine Islands tells us of the reign in which the Spanish galleons steered from Peru across the Southern Sea. The name of Louisiana reminds us that, in the days of the Grand Monarque, France was the rival of Eng-
land in the colonization of the Western World; and the names of Virginia, of the Carolinas, and of Georgia give us the dates of the first foundation of England’s colonial empire, and of some of the chief successive stages in its progress. The word Londonderry speaks to us of the resettlement of the desolated city of Derry by the London guilds; while the names King’s County and Queen’s County, Philipstown, and Maryborough, commemorate the fact that it was in the days of King Philip and Queen Mary that the O’Mores were exterminated, and two new counties added to the English Pale.

There are materials of yet another class which may be collected from the study of ancient names. From them we may decipher facts that have a bearing on the history of ancient civilization. With regard, for example, to Saxon England, we may from local names draw many inferences as to the amount of cultivated land, the state of agriculture, the progress of the arts of construction, and even as to the density of the population and its relative distribution. In the same records we may discover vestiges of various local franchises and privileges, and may investigate certain social differences which must have characterised the districts settled respectively by the Saxons and the Danes. And we may collect enchorial vestiges of the heathenism of our forefathers, and illustrate the process by which it was gradually effaced by the efforts of Christian teachers.

We thus perceive how many branches of scientific, historical, and archæological research are capable of being elucidated by the study of names; and it is manifest that upon many grounds, the work of their Historical Interpretation is called for. The almost virgin soil of a rich field, which has never yet been systematically cultivated, presents itself before the labourer; and an industrious criticism, bringing into combination the resources of Geography, of Physical Description, of Geology, of Archæology, of Ethnology, of Philology and of History, may hope to reach results, more or less important, in each of these departments of knowledge; or, at all events, it cannot fail to indicate, for future exploration, some of the sites where lie buried the hidden treasures of the past.
CHAPTER II.

NAMES OF RECENT ORIGIN.

The peopling of the Eastern Hemisphere is an event of the distant past. The names upon the map of Europe have remained there, most of them for ten, many of them for twenty, centuries. To study them is a task full of difficulties; for they are mostly derived from obscure or unknown languages, and they have suffered more or less from the phonetic changes of so many years. But with the New World the case is different. The colonization of America has been effected during the modern historic period, the process of name-giving is illustrated by numerous authentic documents, and the names are derived from living languages. Just as the best introduction to the study of geology is the investigation of recent formations, abounding in the remains of still existing organisms, so we may fitly commence our present task by an examination of what we may call the tertiary deposits of America and Australia, which are still in process of formation; and we shall then be better prepared to explore the Wealden and other secondary formations of the Teutonic Period, and the still older primary Celtic strata—Silurian, Cambrian, and Devonian. We shall find that the study of the more recent names throws much light on those
natural laws which have regulated the nomenclature of Europe; and the investigation is, moreover, full of interest, from the numerous associations with the names of the bold conquistadors and the daring seamen whose enterprise has added another continent to the known world.

By means of the names upon the map, we may trace the whole history of the successive stages by which the white men have spread themselves over the Western World. We may discover the dates at which the several settlements were founded, we may assign to each of the nations of Europe its proper share in the work of colonization, and, lastly, we may recover the names of the adventurous captains who led their little bands of daring followers to conquer the wilderness from nature, or from savage tribes.

The name of Greenland is the only one which is left to remind us of the Scandinavian settlements which were made in America during the tenth century. The discoveries of Leif, son of Eric the Red, have been forgotten, and the Norse names of Vinland (Massachusetts), Markland (Nova Scotia), Helluland it mikla (Labrador), and Litla Helluland (Newfoundland), have been superseded, and now survive only in the memory of the curious.

Without disparagement of the claims of Leif Ericson to the discovery of the New World, we may regret that the names of the city of Columbus and of the district of Columbia form the only memorials of the bold Genoese adventurer; and we may wish that the name of the entire continent had been such as to keep constantly in memory the exploits of Christopher Columbus rather than of those of Amerigo Vespucci. Alexander von Humboldt has, indeed, vindicated Vespucci from the charge of trickery or forgery which Las Casas attempted to fasten upon him; and we must, therefore, regard the name of America as an unfortunate mistake rather than as an inglorious and successful fraud.

The deep religious feeling of the earlier voyagers is well illustrated by the names which they bestowed upon their discoveries. The first land descried by Columbus was the island of San Salvador. From day to day he held on, in

1 Cosmos, vol. ii. note 457.
spite of the threats of his mutinous crew, who threatened to throw the crazy visionary into the sea. With what vividness does this name of San Salvador disclose the feelings with which, on the seventieth night of the dreary voyage, the brave Genoese caught sight of what seemed to be a light gleaming on some distant shore; how vividly does that name enable us to realize the scene when, on the next day, with a humble and grateful pride, he set foot upon that NEW WORLD of which he had dreamed from his boyhood, and, having erected the symbol of the Christian faith and knelt before it, he rose from his knees and proclaimed, in a broken voice, that the land should henceforth bear the name of San Salvador—the Holy Saviour, who had preserved him through so many perils!

We cannot but reverence the romantic piety which chequers the story of the violence and avarice of the conquistadors. When unknown shores were reached, the first thought of those fierce soldiers was to claim the lands as new kingdoms of their Lord and Master, and to erect forthwith His symbol, the SANTA CRUZ, the VERA CRUZ, names which mark upon our maps so many of the earliest settlements of the Spaniards and Portuguese.

The name of SAN SEBASTIAN, the first Spanish colony founded on the continent of South America, forms a touching memorial of the perils which beset the earlier colonists. On disembarking from the ships, seventy of the Spaniards were killed by the poisoned arrows of the Indians; on which account the dangerous spot was put under the special protection of the martyr, who, by reason of the circumstances of his death, might be supposed to feel a personal and peculiar sympathy with those who were exposed to the like sufferings. So too the name of the LADRONES, the "Robbers' Islands," commemorates the losses of Magalhaens' crew from the thievish propensities of the natives; and the name of SIERRA LEONE, the "Lion's range," records the terrors of the Portuguese discoverers at the nightly roaring of the lions in the mountains which fringe the coast.

As in the case of many great men, there seems to have been a sort of mysticism underlying the piety of Columbus. On his third voyage he discerned three mountain-peaks rising
from the waters, and supposed that three new islands had been discovered. On a nearer approach, it was found that the three summits formed one united land—a fact which the admiral recognised as a mysterious emblem of the Holy Trinity, and therefore bestowed upon the island the name of **La Trinidad**, which it still retains. So the huge mountain mass of **St. Kitts**, bearing on its shoulder a smaller pyramid of black lava, took in the imagination of Columbus the form of the giant **St. Christopher** bearing on his shoulder the infant Christ.

The Spaniards were devout observers of the festivals of the Church, and this circumstance often enables us to fix the precise day on which great discoveries were made. Thus **Florida**, with its dreary swamps, is not the "Flowery Land," as it is sometimes thought to be; but its name records the fact that it was discovered by Juan Ponce de Leon on Easter Sunday—a festival which the Spaniards call Pascua Florida, from the flowers with which the churches are then decked. The island of **Dominica** was discovered on a Sunday—*dies Dominica*. **Natal** was discovered by Vasco de Gama on Christmas-day—*dies Natalis*. **The Virgin isles**, a numberless group, were discovered by Columbus on the day sacred to St. Ursula and the eleven thousand virgins. The town of **St. Augustine**, the oldest in the United States, was founded on St. Augustine's-day by Melendez, who was sent by Philip II. of Spain on the pious mission of exterminating a feeble colony of Huguenot refugees, who were seeking, on the coast of Florida, that religious liberty which was denied them in their native land. The log of the exploring expedition sent out by the Portuguese in 1501 is written on the Brazilian coast, and can be easily deciphered by the aid of the Roman calendar. The explorers reached S. Roque on Aug. 16th, Cape S. Augustin on Aug. 28th, Rio de S. Miguel on Sept. 29th, Rio de S. Jeronymo on Sept. 30th, Rio de S. Francisco on Oct. 10th, Rio das Virgens on Oct. 21st, Rio de Santa Lucia on Dec. 15th, Cape S. Thome on Dec. 21st, S. Salvador de Bahia on Dec. 25th, Rio de Janeiro on Jan. 1st, Angra dos Reis on Jan. 6th, and the Island of S. Sebastião on Jan. 20th.

The islands of **Ascension** and **St. Helena**, the river **St.
PURITAN NAMES.

Lawrence, and other places too numerous to mention, thus date the day of their discovery by their names.

A religious feeling equally intense with that which dictated the names bestowed by the Spanish discoverers, but very different in character, is evinced by the names which mark the sites of the earlier Puritan colonies in North America.

Salem was intended to be the earthly realization of the New Jerusalem, where a "New Reformation," of the sternest Calvinistic type, was to inaugurate a fresh era in the history of the world, and a strict discipline was to eradicate every frailty of our human nature from this City of the Saints. If the "Blue Laws" of the neighbouring town of Newhaven, given by Hutchinson, are authentic, they afford a curious picture of life in this Puritan Utopia. They enact, under severe penalties:—

"That no one shall be a freeman unless he be converted.

"That no one shall run on the Sabbath, or walk in his garden.

"That no one shall make beds, cut hair, or shave, and no woman shall kiss her children on the Sabbath.

"That no one shall make mince-pies, or play any instrument, except the trumpet, drum, and Jews'-harp.

"That no food or lodging shall be given to any Quaker or other heretic."

The laws of Massachusetts assigned the penalty of death to all Quakers, as well as to "stubborn and rebellious sons," and to all "children, above sixteen, who curse or smite their natural father or mother," and to persons guilty of idolatry, witchcraft, or blasphemy.

These laws, breathing the spirit of Christianity as understood by the Puritan exiles for conscience' sake, quickly bore their fruit. Roger Williams, a noble-hearted man, who, strange to say, had been chosen to be minister at Salem, dared to affirm the heresy that "the doctrine of persecution for cause of conscience is most evidently and lamentably contrary to the doctrine of Christ Jesus," and that "no man should be bound to worship against his own consent." For maintaining these heterodox opinions, which struck at the root of the New England system of polity, Williams had sentence of exile pronounced against him. He wandered forth into the snows of a New England winter: "for fourteen weeks," he says, "he
often, in the stormy night, had neither fire nor food, and had no house but a hollow tree."

The savages shewed him the mercy which his fellow-Christians had refused him; an Indian chief gave him food and shelter; but that wigwam in the far forest was pronounced to be within the jurisdiction of the Puritan colony, and the Apostle of Toleration, hunted even from the wilderness, embarked with five companions in a canoe, and landed in Rhode Island. With simple piety he called the spot where the canoe first touched the land, by the name of Providence—a place which still remains the capital of Rhode Island, the State which Williams founded as "a shelter for persons distressed for conscience."

The name of Concord, the capital of the State of New Hampshire, shews that some at least of the Puritans were actuated by feelings more in harmony with the spirit of the religion they professed; while Philadelphia, the City of Brotherly Love, tells a touching tale of the unbrotherly persecutions which filled the gaols of England with 60,000 Quakers—persecutions from which they fled, in the hope of inaugurating a Utopian era of peace and harmony.

All readers of Pepys' amusing Diary are familiar with the name of his colleague at the Admiralty, Sir William Penn. The funds which should have found their way into the naval chest were diverted to purposes more agreeable to the "merry monarch" than the purchase of tar and timber; and in consequence, the fortune which the Comptroller of the Navy bequeathed to his Quaker son was a claim on the royal purse for the sum of 16,000l. The money not being forthcoming, young Penn—who, much to the annoyance of his family, had embraced the tenets of the Quakers—obtained in satisfaction of his claims, a large grant of forest-land in North America, and led forth a colony of Quakers to found the new colony, called, after himself, Pennsylvania.

The name of Boston reminds us of the part of England from which the first Puritan settlers emigrated. They had, with much difficulty, escaped from the Lincolnshire coast—some of them having been apprehended on the beach for the crime of attempting to reach a country where they might worship
according to their consciences. Their first refuge was in Holland, from whence the *Mayflower* carried them to the shores of New England, and on the 11th of December, 1620, landed them on a desolate spot, five hundred miles from the nearest settlement of white men. To this spot they gave the name of **Plymouth**—a reminiscence of the last English land which they had seen as they passed down the Channel.

**Hoboken**, an Indian word, meaning the “smoke pipe,” was the name of a spot in New Jersey, at which the settlers met the Indian chiefs in council, and smoked the pipe of peace, while they formed a league of amity—too soon, alas! to be broken by the massacre of **Bloody Brook**, where many of the colonists were treacherously slain. Hoboken is one of the many Indian names which we find scattered over the map of the American continent, and which are frequently used to designate the great natural features of the country, the lakes, the rivers, the mountain ranges, and the chief natural territorial divisions.¹ Such are the names of the **Niagara**, the **Potomac**, the **Ottawa**, the **Rappahannock**, the **Susquehanna**, the **Mississippi**, the **Missouri**, the **Minnesota**, **Canada**, **Massachusetts**, **Connecticut**, **Arkansas**, **Wisconsin**, **Michigan**. The name of **Mexico** is derived from Mexitli, the Aztec war-god. **Tlascala** means “the place of bread.” **Hayti** is the “mountainous country.” The **Andes** take their name from the Peruvian word *anta*—copper. Local names are the only memorial of many once powerful tribes which have become extinct. The names of the **Alleghany** Range, the **Mohawk** Valley, **Lake Huron**, **Lake Erie**, **Lake Nipissing**, the City of **Natchez**, **Cherokee** County, the **River Ottawa**, and the States of **Kansas**, **Ohio**, and **Illinois** are all derived from the names of tribes already extinct or rapidly becoming so. Centuries hence, the historian of the New World will point to these names as great ethnological landmarks: they will have, in his eyes, a value of the same kind as that which is now attached to the names of Hesse, Devonshire, The Solway, Paris or Turin.

The name of **Virginia** carries us back to the reign of the Virgin Queen, and gives us the date of the exploits of those

¹ It will be shewn hereafter that rivers and mountains, as a rule, receive their names from the earliest races, villages and towns from later colonists.
hardy sailors, who cast into the shade the deeds even of the Spanish conquistadors. Not far from the scene of one of his ruinous enterprises, the most chivalrous, the most adventurous, the most farsighted, and the most unfortunate of Englishmen, has recently had a tardy tribute paid to him, in the adoption, by the Legislature of North Carolina, of the name of RALEIGH as the designation of the capital of the State in which Raleigh’s colony was planted. On RALEIGH ISLAND, at the entrance of Roanoke Sound, may still be discerned the traces of the fort around which the adventurers built the CITY OF RALEIGH, a place which has now vanished from the map. Of Raleigh’s other enterprises, more especially of his quixotic ascent of the Orinoco for four hundred miles in small open boats, no local name remains as a memorial.

The names of other heroes of the Elizabethan era are to be sought elsewhere. In the Northern Seas we find a record of the achievements of four brave Englishmen—Frobisher, Davis, Baffin, and Hudson. The adventurous spirit which actuated this band of naval worthies is shown in the declaration of Martin Frobisher, who deemed the discovery of the North-West Passage “the only thing of the world that was yet left undone by which a notable minde might be made famous and fortunate.” In command of two little barks, respectively of 25 and 20 tons, and accompanied by a small pinnace, FROBISHER steered for the unknown seas of ice, and, undaunted by the loss of the pinnace and the mutinous defection of one of his crews, he persevered in his enterprise, and discovered the strait which bears his name.

John Davis, with two ships respectively of 50 and 35 tons, followed up the discoveries which Frobisher had made. With a brave heart he kept up the courage of his sickly sailors, who were struck with terror at the strange sight of huge floating icebergs towering overhead, and at the fearful crash of the icefloes as they ground one against the other, and threatened the ships with instant destruction. When, at length, the wished-for land came in sight, it was found to be so utterly barren and inhospitable that the disappointed seamen gave it the name

1 CAPE FEAR commemorates the narrow escape from destruction of one of the expeditions sent out by Raleigh.
which it still bears—CAPE DESOLATION. But Davis persevered, and was rewarded by the discovery of an open passage leading to the North-West, to which the name of DAVIS’ STRAITS has been rightfully assigned.

Bylot and Baffin, with one small vessel, and a crew of fourteen men and two boys, eclipsed all that Davis had done, and ventured into unknown seas, where, for two hundred years, none dared to follow them. They discovered the magnificent expanse of water which is known by the name of BAFFIN’S BAY, and they coasted round its shores in hopes of finding some outlet towards the North or West. Three channels were discovered, to which they gave the names of Sir James LANCASTER, Sir Thomas SMITH, and Alderman JONES, by whose countenance and pecuniary assistance they had been enabled to equip the expedition.

The adventurous life and tragic fate of Henry Hudson would make an admirable subject for an historical romance. The narration is quaintly given in Purchas His Pilgrimes; but, fortunately or unfortunately, it has not, so far as I am aware, been selected as a theme by any modern writer. Hudson’s first voyage was an attempt to discover the North-East Passage to India. With ten men and a boy, he had succeeded in attaining the coast of Spitzbergen, when the approach of winter compelled him to return. In a second voyage he reached Nova Zembla. The next year he traced the unknown coastline of New England, and entered the great river which bears his name. His last expedition was rewarded by still greater discoveries than any he had hitherto effected. In a bark of 55 tons he attempted the North-West Passage, and, penetrating through HUDSON’S STRAIT, he reached HUDSON’S BAY, where his ship was frozen up among the icefroes. Patiently he waited for the approach of spring, although, before the ship was released, the crew had been reduced to feed on moss and frogs. After a while, they fortunately succeeded in catching a supply of fish, and prepared to return home, with provisions for only fourteen days. Dismayed at this prospect of starvation, the crew mutinied, and, with the object of diminishing the number of mouths to be fed, they treacherously seized their brave captain; and having placed in a small boat a little meal, a
musket, and an iron pot, they cast Hudson adrift, with eight sick men, to find a grave in the vast inland sea, the name of which is the worthy epitaph of one of the most daring of England's seamen. The names of these four men—Frobisher, Davis, Baffin, and Hudson—the world will not willingly let die.

The naval triumphs of the Elizabethan era are also associated, in the minds of Englishmen, with the exploits of Drake and Gilbert, although they have not been fortunate enough to give their names to seas or cities. Drake's almost fabulous adventures—his passage of the Straits of Magalhaens—his capture of huge treasure-ships with his one small bark—his voyage of 1,400 miles across the Pacific, which he was the first Englishman to navigate—his discovery of the western coast of North America, and his successful circumnavigation of the globe, form the subject of a romantic chapter in the history of maritime adventure.

But a still higher tribute of admiration is due to the brave and pious Sir Humphrey Gylberte, who, on his return from his expedition to Newfoundland, attempted to cross the Atlantic in his "Frigat," the Squirrel, a little vessel of 10 tons. Near the Azores, a storm arose, in which he perished. The touching account of his death as given in Hakluyt is well known, but it can hardly be repeated too often: "The Generall, sitting abaft with a booke in his hand, cried out to us in the Hind, so oft as we did approach within hearing, 'We are as neere to heaven by sea as by land,'—reiterating the same speech, well beseeing a soouldier resolute in Jesus Christ, as I can testifie he was. The same Monday night, about twelve of the clocke, or not long after, the Frigat being ahead of us in the Golden Hinde, suddenly her lights were out, whereof, as in a moment, we lost the sight, and withall our watch cryed the Generall was cast away, which was too true; for in that moment the Frigat was devoured and swallowed up of the sea."

Such were the gallant gentlemen and "souldiers resolute in Jesus Christ" who made the reign of Elizabeth illustrious.

The records of the progress of English colonization during the next reign are to be sought on the banks of the James River. On either side, at the entrance of this river, are Cape Henry and Cape Charles. Cape Charles was called after
"Baby Charles," and Cape Henry bears the name of the hopeful prince whose accession to the throne might probably have changed the whole course of English history. Elizabeth County, the scene of M'Clellan's campaign, and in which stands Fortress Monroe, was so called in honour of the sister of these princes—the hapless Winter Queen, the mother of Prince Rupert. Smith's Isles, near Cape Charles, and Smithfield, on the opposite side of the James River, are memorials of Captain John Smith, a man of rare genius and enterprise, to whom, even more than to Raleigh, the ultimate establishment of the English colony in Virginia is due.

Even in those days of wild adventure, Smith's career had been such as distinguished him above all his fellow-colonists in Virginia. When almost a boy he had fought, under Leicester, in that Dutch campaign, the incredible mismanagement of which has been so ably detailed by Mr. Motley. His mind, as he tells us, "being set upon brave adventures," he had roamed over France, Italy, and Egypt, doing a little piracy, as it would now be called, in the Levant. Coming to Hungary, he took service for the war with the Turks, against whom he devised many "excellent stratagems," and performed prodigies of valour in various single combats with Turkish champions, slaying the "Lord Turbashaw," also "one Grualgo, the vowed friend of Turbashaw," as well as "Bonny Mulgro," who tried to avenge the death of the other two.

After numerous adventures, for which the reader must be referred to his amusing autobiography, a general engagement took place, and Captain Smith was left for dead upon the field of battle. Here he was made prisoner, and sold into slavery at Constantinople. Being regarded with too much favour by his "fair mistresse," who "tooke much compassion on him," he was sent into the Crimea, where he was "no more regarded than a beast." Driven to madness by this usage, he killed his taskmaster, the Tymor, whose clothes he put on, and whose horse he appropriated, and thus succeeded in escaping across the steppes; and, after overcoming many perils, he at last reached a Christian land. "Being thus satisfied with Europe and Asia," and hearing of the "warres in Barbarie," he forthwith proceeded to the interior of Morocco, in search of new ad-
ventures. We next hear of him "trying some conclusions at sea" with the Spaniards; and at last, at thirty years of age, he found himself in Virginia, at a time when a great portion of the hundred colonists had perished, and the survivors were meditating the abandonment of what seemed a hopeless enterprise. Before long, Smith's force of character placed him at the head of affairs, which soon began to improve under the influence of his resolute and hopeful genius. But the position of responsibility in which he was placed could not put a stop to the execution of his adventurous projects. In an open boat he made a coasting voyage of some three thousand miles, in the course of which he discovered and explored the Potomac. On the occasion of one of these expeditions, his companions were all cut off by the Indians, and he himself, "beset with 200 salvages," was taken prisoner and condemned to die. Brought before the King of Pamaunkee, "the salvages" had fastened him to a tree, and were about to make him a target for the exhibition of their skill in archery, when he obtained his release by the adroit display of the great medicine of a pocket-compass. "A bagge of gunpowder," which had come into the possession of "the salvages," "they carefully preserved till the next spring, to plant as they did their corne, because they would be acquainted with the nature of that seede." Taken at length before "Powhattan, their Emperor," for the second time Smith had sentence of death passed upon him. "Two great stones were brought; as many as could, layd hands on him, dragged him to them, and thereon laid his head, being ready with their clubs to beate out his braines." At this juncture "Pocahontas, the king's dearest daughter," a beautiful girl, the "nonpareil of the country," was touched with pity for the white-skinned stranger; and, "when no intreaty could prevale," she rushed forward and "got his head in her armes, and laid her owne upon his to save him from death," and thus succeeded, at the risk of her life, in obtaining the pardon of the prisoner. Pocahontas was afterwards married to John Rolfe, "an honest and discreet" young Englishman, and from her some of the first families of the Old Dominion are proud to trace their descent.¹

¹ See The True Travels, Adventures, and Observations of Captain John
The State of Florida, as the name imports, was originally a Spanish colony. Louisiana, New Orleans, Mobile, and many other names, remind us that, in the reign of Louis XIV., France held firm possession of the Valley of the Mississippi, and stretched a chain of forts, by St. Louis, St. Charles, and the State of Illinois, to Fond du Lac and Lac Supérieur, the "Upper Lake" of the great chain of lakes, as far as Detroit, the "narrow passage" between the Lac St. Clair and Lake Erie. In Canada, the Habitans, as the French Canadians of the Lower Province are called, still retain the characteristics of the Normand peasantry in the time of Louis XIV., and French is still the vernacular over large districts. Here we are of course surrounded by French names. Quebec is a name transferred from Brittany, and Montreal is the "Royal Mount," so named by the Frenchman Cartier in 1535. Lake Champlain takes its name from Champlain, a bold Normand adventurer "delighting marvellously in these enterprises," who joined an Indian war-party, and was the first to explore the upper waters of the St. Lawrence and the Mississippi. Cape Breton was discovered, by mariners from Brittany, as early as the lifetime of Columbus. The name of Labrador was bestowed by the Portuguese slave merchants, on account of the strength and endurance of the hardy "labourers" whom they kidnapped on its coasts. The name of the State of Vermont shews that it came within the great French dominion, and the State of Maine repeats in the New World the name of one of the maritime provinces of France. But the genius of Lord Chatham wrested the empire of the New World from France; and Fort Du Quesne, the key of the French position in the Valley of the Ohio, under its new name of Pittsburgh, commemorates the triumphs of the great war-minister, and is now one of the largest cities in the United States.

The State of Delaware was "planted" in 1610 by Lord De la Warr, under a patent granted by James I. The further progress of colonization in this region is commemorated by the Smith in Europe, Asia, Africke, and America, London, 1629; and The Generall Historie of Virginia, New England, and the Sommer Isles, London, 1627—two most quaint and delightful, though possibly not strictly veracious, works.
Roman Catholic colony of Maryland, named after Henrietta Maria, Queen of Charles I.; and Baltimore, the chief city of the State, takes its name from Lord Baltimore, the patentee of the new colony, who thus transferred to the New World the Celtic name of the little Irish village from which he derived his title.

New Jersey, in like manner, was founded under a patent granted, in the reign of Charles II., to George Carteret, Lord Jersey; while Nova Scotia was a concession to Sir William Alexander, a Scotchman, who, with a band of his compatriots, settled there in the time of James II. Its recolonization in the reign of George II. is marked by the name of Halifax, given in honour of Lord Halifax, President of the Board of Trade.

The city of Charleston, Albemarle Sound, the rivers Ashley and Cooper, and the States of North and South Carolina, date from the time of the Restoration; and the people are justly proud of the historical associations which attach to many of the local names. Annapolis, the capital of Maryland, as well as the Rapidan and North Anna Rivers, bring us to the reign of Queen Anne; and Georgia, the last of the thirteen colonies, dates from the reign of George II. New Inverness, in Georgia, was settled by Highlanders implicated in the rebellion of 1745. Fredericksburg, the scene of a bloody battle in the civil war, and Frederick City, in Maryland, bear the name of the weak and worthless son of George II.

The Scandinavian colony of New Sweden has been absorbed by the States of Pennsylvania, Delaware, and New Jersey; but a few names, like Swedesboro' and Dona, still remain as evidences of a fact now almost forgotten.

The map of the State of New York takes us back to the reign of Charles II. The King's brother, James, Duke of York and Albany, had a grant made to him of the as yet unconquered Dutch colony of the New Netherlands, the two chief cities of which, New Amsterdam and Fort Orange, were

---

1 The name of the Carolinas seems to have been revived at this period, having been originally given at the time of the first colonization by the Huguenots in the reign of Charles IX. of France.
rechristened, after the Dutch had been dispossessed, by the names of NEW YORK and ALBANY, from the titles of the royal patentee. The names of the KATSKILL Mountains, STATEN Island, BROOKLYN (Breukelen), WALLABOUT Bay, YONKER’S Island, the HAARLEM River, and the villages of FLUSHING, STUYVESANT, and BLAUVELT,¹ are among the local memorials which still remind us of the Dutch dominion in North America.²

The Dutch colony in South America has had a greater permanence. NEW AMSTERDAM, FREDENBURG, BLAUWBERG, and many other Dutch names in the same neighbourhood, surrounded as they are by Portuguese and Spanish names, are an exhibition of the results of intrusive colonization, and are instructive analogues of obscure phenomena, which we shall hereafter find exhibited on the Continent of Europe.

CAPE HORN, or rather CAPE HOORN, as it should properly be written, is also a vestige of the early enterprise of Holland. The name is derived from Hoorn, a village on the Zuyder Zee, which was the birthplace of Schouten, the first seaman who succeeded in doubling the Cape. Before the time of Schouten’s voyage, the Pacific had been entered by the STRAITS OF MAGALHAENS, a passage between Tierra del Fuego and the mainland, which had been discovered by a man who, for genius, fertility of resource, and undaunted courage, deserves a place on the roll of fame beside Columbus, Cortez, Smith, and Hudson. Fernando Magalhaens was a Portuguese, engaged in the Spanish service, and was sent out to wrest from his fellow-countrymen the possession of the Moluccas, which, under the terms of the famous Papal Bull, were conceived to be included in the Spanish moiety of the world. Threading his way through the straits which bear his name, Magalhaens held on his way, in spite of the mutiny of his crews, the loss of one ship, and the desertion of another, and at last reached the Philippine Islands, where, during an attack by the natives, he

¹ We may add the names of Kinderhook, Haverstraw, Spuyten Duyvel, Watervliet, Roosevelt, Roseboom, Rosendale, Staatsburg, and Claverack.
² The word creek, which often appears in American river-names, appears to be a vestige of the Dutch dominion. Kreek is a common suffix in the Netherlands.
fell beneath a shower of spears. Torres' Straits bear the name of one of Magalhaens' lieutenants.

The Philippines and the Carolines bear the names of two Spanish monarchs, Philip II. and Charles II., under whose respective auspices the first were colonized and the second discovered. The Marquesas received their name in honour of the Marquis Mendoza de Cañete, who, from his Viceroyalty of Peru, equipped the expedition which led to the discovery. The island called Fernando Po was discovered by Fernao de Poo, a Portuguese noble. Juan Fernandez, a bold Spanish sailor, chanced upon the solitary isle which bears his name—an island which is chiefly memorable to Englishmen from having been, for four years, the abode of one of Dampier's comrades—Alexander Selkirk, whose adventures suggested to De Foe the inimitable fiction of Robinson Crusoe. The Bermudas, "the still vexed Bermoothes," alluded to in Shakespeare's Tempest, were discovered, at an earlier period, by another Spaniard, Juan Bermudez: they took the name of the Somers Islands, by which they were long known, from the shipwreck of Sir George Somers, one of the deputy-governors of Virginia.

We cannot complete the list of Spanish explorers without a mention of the name of Orellana, which, according to some maps, is borne by the largest river of the world. There are few more romantic narratives of adventure than the history of Orellana's voyage down the Amazons. In the company of Gonzales Pizarro he left Peru, and, having penetrated through the trackless Andes, he came upon the head waters of a great river. The provisions brought by the explorers having at length become exhausted, their shoes and their saddles were boiled and eaten, to serve as a condiment to such roots as could be procured by digging. Meanwhile the energies of the whole party were engaged in the construction of a small bark, in which Orellana and fifty men committed themselves to the mighty stream, which, in seven long months, floated them down to the Atlantic, through the midst of lands utterly unknown, clad to the water's edge with gigantic forest-trees, and peopled by savage and hostile tribes. Not content, however, with describing the real perils of the voyage,
or, perhaps, half-crazed by the hardships which he had undergone, Orellana, on his return to Spain, gave the reins to his imagination, and related wild travellers' tales concerning a nation of female warriors who had opposed his passage; and posterity has punished his untruthfulness by enshrining, in a memorial name, the story of the fabled Amazons, and letting the remembrance of the daring explorer fade away.

We find the records of Portuguese adventure in Bahia, Pernambuco, Bragança, and a host of other names in the Brazils, which were accidentally discovered by Cabral, who was sailing with an expedition destined for the East Indies. But the great field of Portuguese enterprise lay in the East, where the names Bombay, Macao, and Formosa attest the wide-spread nature of the commerce which the newly found sea-route to India threw into the hands of its discoverers. Their track is marked by such names as Saldanha Bay, Cape Agulhas, Algoa Bay, and Cape Delgado, which we find scattered along the southern coasts of Africa. The name of the Cape itself reveals the spirit of hopeful enterprise which enabled the Portuguese to achieve so much. Bartholomew Diaz, baffled by tempests, was unable, on his first expedition, to weather the cape which he had discovered, and he, therefore, named it Cabo Tormentoso—the Cape of Storms—a name which John, the sanguine and enterprising king, changed to the Cabo de Bona Esperanza, arguing the good hope which existed of the speedy discovery of the long-wished-for route to the realms of "Ormus and of Ind."

The Eastern route found by the Portuguese was soon followed by the Dutch. The names of the Mauritius and the Orange River were bestowed by them at the time when, under the Stadtholder Maurice, Prince of Orange, they were heroically striving against the colossal power of Spain. This death-struggle for freedom did not prevent them pursuing their discoveries in the Eastern seas: and at the lowest point of their fortunes, when all seemed likely to be lost, it was soberly proposed to cut the dykes and leave to the Spaniards the task of once more reclaiming Holland from the waves, and for themselves to embark their families and their wealth, and seek in Batavia a new eastern home for the Batavian nation.

From their colonies of Ceylon and Java, the Dutch fitted
out numerous expeditions to explore the then unknown Southern Seas. Carpenter, a Dutch captain, was the first to discover the northern portion of the Australian continent. His name is attached to the Gulf of Carpentaria; and the “great island” in the gulf bears the Dutch name of Groote Eylandt, which he gave to it. The earliest circumnavigation of the new southern continent was achieved by means of two vessels of discovery, which were equipped by Antony Van Diemen, the Governor of Batavia, and entrusted to the command of Abel Jansen Tasman. New Zealand and New Holland, the chief fruits of this expedition, had conferred upon them the names of two of the United Provinces; and on the discovery of a third large island, an attachment as romantic as a Dutchman may be supposed capable of feeling caused the rough sailor, if tradition speaks the truth, to inscribe upon our maps the name of the beautiful daughter of the Batavian Governor, Maria Van Diemen. In consequence of an ignorant prejudice, which was supposed to deter intending colonists, the name of Van Diemen’s Land, or Demon’s land, as it was called, has, after the lapse of two centuries, been changed to Tasmania, in honour of the sailor who preferred the fame of his mistress to his own.

We may here briefly enumerate a few remaining discoverers, whose names are found scattered over our maps. Dampier’s Archipelago and Wafer Inlet bear the names of William Dampier and Lionel Wafer, the leaders of a band of West Indian buccaneers who marched across the Isthmus of Darien (each man provided only with four cakes of bread, a fusil, a pistol, and a hanger), and who, having seized a Spanish ship, continued for a long time to be the terror of the Pacific. Kerguellen was an officer in the French service, who, in the reign of Louis XV., discovered the island called Kerguellen’s Land; while Jan Meyen, a Dutch whaling captain, has handed down his obscure name by his re-discovery of that snow-clad island cone, which forms such a striking frontispiece to Lord Dufferin’s amusing volume.

Behring, a Dane by birth, was sent by Peter the Great to explore the eastern shores of Asia. He crossed Siberia, and, having constructed a small vessel on the coast of Kamtschatka,
he discovered the strait which separates Asia from America. On his return from a second expedition, his ship was wrecked, and the hardy sailor, surrounded by the snows and ice of an Arctic winter, perished miserably of cold, hunger, and fatigue, on an island which bears his name.

At the instance of the British Government, Captain Vancouuer succeeded in surveying 9,000 miles of the unknown western coast-line of America. His name stands side by side with those of Hudson, Behring, Franklin, and Cook—the martyrs of geographical science; for the exposure and the toil which he underwent proved fatal to him.

Mr. Bass, a naval surgeon, in an open whale-boat manned by a crew of six men, made a voyage of 600 miles, which resulted in the discovery of Bass's Straits, which separate Van Diemen's Land from the Australian continent.

The discoveries of Captain Cook are so well known, that a brief reference to the names which he added to our maps may here suffice. He was despatched to observe the Transit of Venus in 1769. In this expedition he discovered the Society Islands, so named from the Royal Society, at whose instigation the expedition had been undertaken; as well as the Sandwich Islands, called after Lord Sandwich, the First Lord of the Admiralty, who had consented to send it out. In his second voyage, Captain Cook explored and named the coast of New South Wales, the New Hebrides, New Caledonia, Norfolk Island, and Sandwich Land.

We must not forget those Arctic explorers who, within the last half century, have added so largely to our geographical knowledge. The names of Mackenzie, Ross, Parry, Franklin, Back, Hood, Richardson, Dease, Simpson, Crozier, Maclure, Mcintosh, and Kane, perpetually remind those who examine the map of the Arctic regions, of the skill, the courage, and the endurance of the brave men who have, at last, solved the problem of three hundred years—"the only thing of the world yet left undone by which a notable minde might be made famous." Such names as Repulse Bay, Point Turnagain Return Reef, Point Anxiety, the Bay of Mercy, Fort Enterprise, Fort Providence, Fury Beach, and Winter Harbour recall to the memory of the readers of Arctic adven-
ture some of the most thrilling passages in these narratives; and, at the same time, they form a melancholy record of the difficulties, the hardships, the disappointments, and the failures which seemed only to braven the resolution and to nerve the courage of men whom all Englishmen are proud to be able to call their fellow-countrymen.

Mention has already been made of the Sandwich Islands and the Marquesas, as commemorating the names of statesmen who have been instrumental in furthering the progress of geographical discovery. Other names of this class—prime ministers, eminent statesmen, lords of the Admiralty, and colonial secretaries—are to be found in great profusion in the regions which have most recently been explored. We may instance the names of Melville, Hobart, Melbourne, Auckland, Baring, Barrow, Croker, Bathurst, Peel, Wellington, and Sydney. Port Phillip, Brisbane, the River Darling, and the Macquarie take their names from governors of the Australian Colonies, and Lake Simcoe from a governor of Canada. Boothia Felix, Grinnell Land, Smith's Sound, and Jones' Sound commemorate merchant princes who fitted out exploring expeditions from their private resources; while the names of King George, Queen Charlotte, the Prince Regent, King William, Queen Adelaide, Victoria, and Albert are scattered so lavishly over our maps, as to prove a serious source of embarrassment to the young student of geography; while, at the same time, their English origin testifies to the energy and success with which, during the last hundred years, every corner of the globe has been explored by Englishmen.
CHAPTER III.

THE ETHNOLOGICAL VALUE OF LOCAL NAMES.

Local names are the beacon-lights of primeval History—The method of research illustrated by American Names—Recent progress of Ethnology—The Celts, Anglo-Saxons, and Northmen—Retrocession of the Scævas—Arabic Names—Ethnology of mountain districts—The Alps.

Ethnology is the science which derives the greatest aid from geographical etymology. The names which still remain upon our maps are able to supply us with traces of the history of nations that have left us no other memorials. Egypt has bequeathed to us her pyramids, her temples, and her tombs; Nineveh her palaces; Judæa her people and her sacred books; Mexico her temple-mounds; Arabia her science; India her institutions and her myths; Greece her deathless literature; and Rome has left us her roads, her aqueducts, her laws, and the languages which still live on the lips of half the civilized world. But there are other nations which once played a prominent part in the world's history, but which have bequeathed no written annals, which have constructed no monuments, whose language is dying or is dead, whose blood is becoming indistinguishably mingled with that of other races. The knowledge of the history and the migrations of such tribes must be recovered from the study of the names of the places which they once inhabited, but which now know them no more—from the names of the hills which they fortified, of the rivers by which they dwelt, of the distant mountains upon which they gazed. As an eloquent writer has observed, "Mountains and rivers still murmur the voices of nations long denationalized or extirpated." Language adheres to the soil when the race by
which it was spoken has been swept from off the earth, or when its remnants have been driven from the plains which they once peopled into the fastnesses of the surrounding mountains.

It is mainly from the study of local names that we must reconstruct the history of the Sclaves, the Celts, and the Basques, as well as the earlier chronicles of the Scandinavian and Teutonic races; while from the same source we are able to throw great light upon the more or less obscure records of the conquests and colonizations of the Phoenicians, the Greeks, the Romans, and the Arabs. In many instances, we can thus convert dubious surmises into the clearest historical certainties.

The nomenclature of America, the nature of which has been indicated in the preceding chapter, may serve to explain the method by which etymological considerations become available in ethnological inquiries. Here we have a simple case, in which we possess documentary evidence as to the facts which we might expect to be disclosed by etymological investigations, and where we can thus exhibit the method of research, and at the same time test the value of the results to which it leads.

If we examine a map of America, we find names derived from a dozen languages. We first notice a few scattered Indian names, such as the POTOMAC, the RAPPANNOCK, or NIAGARA. These names are sparsely distributed over large areas, some of them filled almost exclusively with English names, while in others the names are mostly of Spanish or Portuguese origin—the boundary between the regions of the English and Spanish, or of the Spanish and Portuguese names, being easily traceable. In Louisiana and Lower Canada we find a predominance of French names, many of them exhibiting Normand and Breton peculiarities. In New York we find, here and there, a few Dutch names, as well as patches of German names in Michigan and Brazil. We find that the Indian, Dutch, and French names have more frequently been corrupted than those derived either from the English or from the Spanish languages. In New England we find names like SALEM and PROVIDENCE; in Virginia we find such names as JAMES River, Cape CHARLES, and ELIZABETH County. In many places the names of the Old World are repeated: we find a NEW ORLEANS, a NEW BRUNSWICK, a NEW HAMPSHIRE, and the like.
If we were entirely destitute of any historical records of the actual course of American colonization, it is evident that, with the aid of the map alone, we might recover many most important facts, and put together an outline, by no means to be despised, of the early history of the continent; we might successfully investigate the retrocession and extinction of the Indian tribes—we might discover the positions in which the colonies of the several European nations were planted—we might show, from the character of the names, how the gradually increasing supremacy of the Anglo-American stock must have enabled it to incorporate, and overlay with a layer of English names, the colonies of other nations, such as the Spanish settlements in Florida and Texas, the Dutch colony in the neighbourhood of New York, and the French settlements on the St. Lawrence and the Mississippi. We might even go further, and attempt to discriminate between the colonies founded by Puritans and by Cavaliers; and if we possessed a knowledge of English and French history, we might assign approximate dates for the original foundation of a large number of the several settlements. In some cases we might be able to form probable conjectures as to the causes and methods of the migration, and the condition of the early colonists. Our investigations would be much facilitated if we also possessed a full knowledge of the present circumstances of the country—if, for example, we knew that the English language now forms the universal medium of communication throughout large districts, which, nevertheless, are filled with Spanish or French names; or if we learned that in the State of New York the Indian and Dutch languages are no longer spoken, while many old families bear Dutch, but none of them Indian surnames. The study of the local names, illustrated by the knowledge of such facts, would enable us to reconstruct, in great part, the history of the country, and would prove that successive bands of immigrants may forget their mother tongue, and abandon all distinctive national peculiarities, but that the names which, on their first arrival, they bestowed upon the places of their abode, are sure to remain upon the map as a permanent record of the nature and extent of the original colonizations.

We shall hereafter investigate classes of names which present
a perfect parallelism to those in America. In the case of Spain, the Iberian, Celtic, Phœnician, Arabic, and Spanish names answer in many points to the strata of Indian, Spanish, Dutch, French, and English names which we find superimposed in the United States; while an isolated name like Sweedesboro', in New Jersey, may be compared with that of the town of Rozas, which stands upon the Gulf of Rhoda—names which have handed down the memory of the ancient Rhodian colony in North-eastern Spain. The phenomena of the Old World are similar to those presented in the New. In either case, from similar phenomena we may draw similar inferences.

This method of research—the application of which has been exhibited in the familiar instance of the United States, where the results attained can be compared with well-known facts—has of late years been repeatedly applied, and often with great success, to cases in which local names are the only records which exist.

Wilhelm Von Humboldt was one of the pioneers in this new science of etymological ethnology. On the maps of Spain, France, and Italy he has marked out, by the evidence of names alone, the precise regions which, before the period of the Roman conquest, were inhabited by those Euskarian or Iberic races who are now represented by the Basques—the mountaineers of the Asturias and the Pyrenees. He has also shown that large portions of Spain were anciently Celtic, and that there was a central zone inhabited by a mixed population of Euskarians and Celts.

By a similar process Prichard demonstrated that the ancient Belgæ were of Celtic, and not of Teutonic race, as had previously been supposed. So cogent is the evidence supplied by these names, that ethnologists are agreed in setting aside the direct testimony of such a good authority as Cæsar, who asserts that the Belgæ were of German blood. Archdeacon Williams, in like manner, has indicated the limits of the Celtic region in Northern Italy, and has pointed out detached Celtic colonies in the central portion of that peninsula. Other industrious explorers have followed the wanderings of this ancient people through Switzerland, Germany, and France, and have shown that, in those countries, the Celtic speech still lives upon the map, though it has vanished from the glossary.
In our country, this method has afforded results of peculiar interest and value. It has enabled us to detect the successive tides of immigration that have flowed in; as the ripple-marked slabs of sandstone record the tidal flow of the primeval ocean, so wave after wave of population—Gaelic, Cymric, Roman, Saxon, Anglian, Frisian, Norwegian, Danish, Norman and Flemish—has left its mark upon the once shifting, but now indurated sands of language. The modern map of our own islands enables us to prove that almost the whole of England was once Celtic, and shews us that the Scottish lowlands were peopled by tribes belonging to the Welsh and not to the Gaelic stock. The study of Anglo-Saxon names enables us to trace the nature and progress of the Teutonic settlement, and to draw the line between the Anglian and the Saxon kingdoms; while the Scandinavian village-names of Lincolnshire, Leicestershire, Caithness, Cumberland, Pembrokeshire, Iceland, and Normandy, teach us the almost-forgotten story of the fierce Vikings, who left the fiords of Norway and the vics of Denmark, to plunder and to conquer the coasts and kingdoms of Western Europe.

The same method enables us to investigate the obscure relations of the tribes of Eastern Europe, to mark the oscillations of the boundaries of the Sclaves and Germans, and even to detect the alternate encroachments and retrocessions of either race. Sclavonic names, scattered over Central and Western Germany, lead us to infer that, at some remote period, the Sclavonians must have extended themselves westward much beyond their present frontier of Bohemia, even as far as Darmstadt, where the River Weschnitz marks the extreme western limit of Sclavonic occupancy. For several centuries, however, the German language has been encroaching towards the east; and the process is now going on with accelerated speed. In Bohemia, where almost every local name is Sclavonic, and where five-and-twenty years ago few of the elder people knew any language but their Bohemian speech, we find that the adults are now universally able to speak German; and in half a century, there is every likelihood that the Bohemian language will be extinct. Farther to the north a similar process has also taken place. Proceeding from west to east, the River
Ethnological Value of Local Names.

Bomlitz, near Verden in Hanover, is the first Slavonic name we meet with. In Holstein, Mecklenburg, Luneburg, and Saxony—in East and West Prussia—in Brandenburg and Pomerania—we find numerous Slavonic names, such as Potsdam, Leipsig, Lobau, or Kulm, scattered over an area which is now purely German. These names gradually increase in frequency as we proceed eastward, till at length, in Silesia, we find that the local names are all Slavonic, although the people universally speak German, except on the eastern rim of the Silesian basin, where the ancient speech still feebly lingers. The phenomena, in fact, are analogous to those which are exhibited as we proceed from Somersetshire, through Devonshire, to Cornwall.

It will be manifest that this distribution of Slavonic names will greatly guide us in interpreting the obscure historical notices which make it probable that in the fifth and sixth centuries the Slaves took possession of the regions left vacant by the advance of the Teutonic nations towards the west and south; while in the seventh and eighth centuries the Germans began to recover the lost ground, and in the great struggle of the ninth and tenth centuries finally wrested from the Sarmatians Mecklenburg, Pomerania, Brandenburg, Silesia, Saxony, and part of Courland.

The names in Eastern Europe illustrate the maxim that Ethnology must always be studied with due reference to Hydrography. In rude times, the rivers form the great highways. The Rhine, the Danube, and the Elbe seem to have regulated the directions of the early movements of nations. And the distribution of Slavonic names proves that the Slaves must, originally, have descended by the valleys of the Elbe and the Mayn, just as the Germans descended by the valley of the Danube, where we find a wedge or elbow of German names protruding eastward into the Slavonic region. So, again, in Hungary we find that the central plains are occupied by the

---

1 Potsdam is a Germanized form of the Slavonic Potsdupimi. In the Aischthal, the presence of the Wends is denoted by names like Ratzenwinden and Poppenwind. In Württemberg, we find Windischgrätz and Winnenden; in Baden, Windischbuch; in Saxony, Windischhayn; in Brunswick, Wenden and Wendhausen; in Westphalia, Windheim and Wenden.
Magyar shepherds from the steppes of the Volga, while the original Slavonic population has been driven to the mountain region on either side. Still farther to the east we find the isolated Saxon colony of Siebenbürgen (Transylvania), where, surrounded on all sides by Slavonic, Magyar, and Wallachian names, we find cities called KRONSTADT, HERMANNSTADT, KLAUSSENBURG, ELISABETHSTADT, and MÜHLENBACH, which are inhabited by a population that has been transferred from the Lower Rhine to the Lower Danube. For seven centuries this little colony has retained, unchanged, its own peculiar laws, language, institutions, and customs. Siebenbürgen, in fact, presents a well-conserved museum of mediæval peculiarities—a living picture of Ancient Germany, just as in Iceland we find the language and customs of our Scandinavian ancestors still subsisting, without any material change.

We find similar phenomena in the west and south. Franche Comté, Burgundy, and Lombardy contain many disguised German names—evidences of ancient conquests by Germanic tribes, which have now lost their ancient speech, and have completely merged their nationality in that of the conquered races. In Alsace, which is now so thoroughly French in feeling and in language, the German names of the villages have suffered no corruption during the short period which has elapsed since the conquest under Louis XIV.

The Arabic names which we find in Asia, in Africa, in Spain, in Sicily, in Southern Italy, in Provence, and even in some valleys of the Alps, tell us of the triumphs of the Crescent from the Indus to the Loire. In some instances, these names even disclose the manner in which the Mahometan hosts were recruited for the conquest of Europe from the valley of the Euphrates and the borders of the Sahara; and we can trace the settlement of these far-travelled conquerors in special valleys of Spain or Sicily.

In mountainous regions, the etymological method of ethnological research is of special value, and yields results more definite than elsewhere. Among the mountains the botanist and the ethnologist meet with analogous phenomena. The lowland flora of the glacial epoch has retreated to the Grampians, the Carpathians, the Alps, and the Pyrenees; and in like
manner we find that the hills contain the ethnological sweepings of the plains. Mountain fastnesses have always formed a providential refuge for conquered tribes. The narrow valleys which penetrate into the great chains are well adapted to preserve for a time the isolation of unrelated tribes of refugees, to hinder the intermixture of race, and thus preserve from extermination or absorption those who should afterwards, at the right time, blend gradually with the conquerors of the plains, and supplement their moral and intellectual deficiencies.

Instances of this peculiar ethnological character of mountain districts will occur to everyone. The Bengalees, though they are in geographical contact with the hill tribes of India, are yet, in blood, further removed from them than from ourselves. Strabo informs us that in his day no less than seventy languages were spoken in the Caucasus, and the number of distinct dialects is probably, at the present time, nearly as large. Here, in close juxtaposition, we find archaic forms of various Georgian, Mongolian, Persian, Semitic, and Tatarian languages, as well as anomalous forms of speech which bear no affinity to any known tongue of Asia or of Europe.

In the Pyrenees we find the descendants of the Euskarians, who have been driven from the lowlands of France and Spain. The fastnesses of Wales and of the Scotch Highlands have enabled the Celts of our own island to maintain their ancient speech and a separate existence. An inspection of the map of the British Isles will show that the Peak of Derbyshire and the mountains of Cumberland retain a greater number of Celtic names than the adjacent districts; and the hills of Devonshire long served as a barrier to protect the Celts of Cornwall from Anglo-Saxon conquerors.

But Switzerland is the most notable instance of the ethnological interest attaching to a mountainous district. In a country only twice the size of Wales, the local names are derived from half-a-dozen separate languages, three or four of which are still spoken by the people, while in some districts almost every valley preserves its separate dialect. Thirty-five dialects of German, sixteen of French, five of Romansch, and eight of Italian are spoken in the several Swiss cantons. In the cantons of Neufchâtel, Vaud, Geneva, and in the western part
of the Valais, French is the prevailing language. In the northern and central cantons, which were divided among Burgundian, Alemannic, and Suevic tribes, various High German dialects are spoken;\(^1\) while in Canton Ticino, and in portions of the Grisons, Italian is the only language understood. The Romansch language, spoken in the upper valley of the Rhine, is a debased Latin, with a few Celtic, German, and, possibly, some Iberic and Etruscan elements. In the Upper Engadine we find the Ladino, another Latin dialect, distinct from the Romansch; while throughout the whole of Switzerland numerous Celtic names\(^2\) show traces of a still earlier wave of population, of which no other evidence remains. Not only has the region of the Alps been the immemorial abode of Celts, but there also we find indications of fragments of intrusive races—the meteoric stones of Ethnology. Thus, in the Valley of Evolena, there are traces of the former presence of a race of doubtful origin—possibly Huns or Alans, who long retained their heathenism. In some valleys of the Grisons there are names which suggest colonies from Southern Italy; for example, Lavin, which is apparently a reproduction of Lavinium, and Ardetz, of Ardea. There is reason for believing that the Rhätians of the Grisons and the Tyrol are the descendants of an ancient Etruscan stock;\(^3\) while other valleys in the Valais and the Grisons astound us by the phenomenon of Arabic names, for whose presence we shall presently endeavour to account.

On the Italian side of the Alps we find valleys filled with Sclavonic names, besides many isolated villages of Teutonic

---

\(^1\) German Switzerland is mainly Alemannic, French Switzerland is mainly Burgundian. In Berne, however, as well as in portions of Freiburg, Lutzen, and Argau, the Burgundians have retained their German speech.

\(^2\) For instance, in Canton Zurich we find that 2 cities, and 100 important rivers, mountains, and villages, bear Celtic names; while 3,000 homesteads, 100 hamlets, and 20 villages are Alemannic. The other names are of modern German origin.

\(^3\) The village-names of Tilisuna, Blisadona, Trins, Vels, Tschars, Naturns, Velthurns, Schluderns, Villanders, Gufdaun, Altrans, Sistrans, Axams, and others, have been thought to bear a resemblance to Etruscan names with which we are acquainted. Compare also the names Tusis and Tuscany, Rhétia and Rasenna.
colonists,¹ who still keep themselves distinct from their Italian neighbours, and who speak a German dialect more or less corrupt. The German-speaking villages are often surrounded by a penumbra of German local names, which prove that the little settlement must formerly have occupied a more extensive area than at present. It is difficult to say whether these intrusive populations did, at some remote period, cross the passes and take possession of the unoccupied Italian valleys, or whether they are fragments thrown off at the time of either the Burgundian or the Lombardic invasions, and which the isolation of the mountain-valleys has prevented from becoming Italianized. In the case of the valleys of Macugnaga, Gressonay, Alagna, Sermenta, Pommat, and Sappada, we may, perhaps, incline to the former supposition; while with regard to the Sette Comuni, near Vicenza, and the Tredici Comuni, near Verona, which still retain their Lombard-German speech, the latter hypothesis may be the more probable.²

We shall now proceed, in the six following chapters, to fill up some portions of the outline which has just been traced, and endeavour to decipher from the map of Europe the history of the conquests and immigrations of some of the chief races that have succeeded one another upon the stage.

¹ Thus in the valley of the Tagliamento, north of Venice, we find the Slavonic village-names GNIVA and STOLVIZZA, and the mountains POSGOST, STOLAC, and ZLEBAC.
² Local tradition makes them the remains of the Cimbrian horde which was overthrown by Marius in the neighbourhood of Verona.
CHAPTER IV.

THE NAMES OF NATIONS.

Ethnic Names are of obscure origin—Name of Britain—Many nations bear duplicate names—Deutsche and Germans—"Barbarians"—Welsh—Gaels—Aryans—Names of conquering Tribes—Ancient Ethnic Names conserved in those of modern cities—Ethnic Names from rulers—from geographical position—Europe—Asia—Africa—Ethnographic Names—"Warriors"—"Mountaineers"—"Lowlanders"—"Foresters"—"Coastlanders"—Greeks—Names of extended signification.

The names borne by nations and countries are naturally of prime importance in all ethnological investigations. They are not lightly changed, they are often cherished for ages as a precious patrimony, and therefore they stretch back far into the dim Past, thus affording a clue which may enable us to discover the obscure beginnings of separate national existence. But, unfortunately, few departments of etymology are beset with more difficulties, or are subject to greater uncertainties. Some of those ethnic names which have gained a wide application had at first a very restricted meaning, as in the case of Italy or Asia; others, like that of the Romans, may have arisen from special local circumstances, of which we can have only a conjectural or accidental knowledge; others, again, as in the case of Lorraine, may be due to causes which, if history be silent, the utmost etymological ingenuity is powerless to recover. It is only here and there that we find countries bearing names which have originated within the historic era, and the meaning of which is obvious. Such are the names of the United States;

1 The name of Roma is probably from the Groma, or four cross-roads at the Forum, which formed the nucleus of the city.
of Liberia, the "freed man's land;" Ecuador, the republic of
the "Equator;" the Banda Oriental, which lies on the "eastern
bank" of the Rio de la Plata, or River of the "Silver," which
gives its name to the Argentine Republic on the opposite
shore. But the greater number of ethnic names are of great
antiquity, and their elucidation has often to be sought in
languages with which we possess only a fragmentary acquaint­
ance. Frequently, indeed, it is very difficult—sometimes im­
possible—to discover even the language from which any given
ethnic name has been derived.

It is not needful to travel far for an illustration of the mode
in which this difficulty presents itself—the name of our own
country will supply us with an instance. The British
people, the inhabitants of Great Britain, are, we know, mainly of
Teutonic blood, and they speak one of the Teutonic languages.
None of these, however, affords any assistance in the explana­
tion of the name. We conclude, therefore, that the Teutonic
colonists must have adopted an ethnic appellation belonging to
the former inhabitants of the country. But the Celtic aborigines
do not seem to have called themselves by the name of Britons,
nor can any complete and satisfactory explanation of the name
be discovered in any of the Celtic dialects. We turn next to
the classic languages, for we find, if we trace the literary history
of the name, that its earliest occurrence is in the pages of
Greek, and afterwards of Latin writers. The word, however,
is utterly foreign both to the Greek and to the Latin speech.
Finally, having vainly searched through all the languages spoken
by the diverse races which, from time to time, have found a
home upon these shores—having exhausted all the resources of
Indo-European philology without the discovery of any available
Aryan root, we turn, in despair, to the one remaining ancient
language of Western Europe. We then discover how great is
the real historical significance of our inquiry, for the result
shows that the first chapter of the history of our island is in
reality written in its name—we find that this name is derived
from that family of languages of which the Lapp and the Basque
are the sole living representatives in Europe; and hence, we
reasonably infer that the earliest knowledge of the island which
was possessed by the civilized world must have been derived
from the Iberic mariners of Spain, who either in their own ships, or in those of their Punic masters, coasted along to BRITAIN, and thence crossed to BRITAIN, at some dim pre-historic period. The name Br-itan-ia may possibly contain the Euskarian suffix itan, the plural of an, the suffixed locative preposition, or sign of the locative case. We find this suffix, which is used to signify a district or country, in the names of most of the regions known to, or occupied by, the Iberic race. It occurs in Aqu-it-an-ia or Aquitaine, in Lus-it-an-ia, the ancient name of Portugal, in Maur-et-an-ia, the “country of the Moors,” as well as in the names of very many of the tribes of ancient Spain, such as the Cerr-et-an-i, Aus-et-an-i, Lal-et-an-i, Cos-et-an-i, Vesc-it-an-i, Lac-et-an-i, Carp-et-an-i, Or-et-an-i, Bast-it-an-i, Turd-et-an-i, Suess-et-an-i, and the Ed-et-an-i. The first syllable of the name, bro, or bri, is possibly a Celtic gloss (Brezonec, bro, a country, which appears in the names of the Allo-bro-ges and Pem-bro-ke), to which the Iberic etan was appended.

This illustration not only indicates the value of the results which may accrue from the investigation of ethnic names, but it will also serve to show how difficult it may often be to determine even the language from which the explanation must be sought.

In attempting to lay down general principles to guide us in our investigations, we have in the first place to deal with the remarkable phenomenon—an instance of which has just presented itself—that a great number of ethnic names are only to be explained from languages which are not spoken by the people to whom the name applies. Most nations have, in fact, two, or even a greater number of appellations. One name, by which the nation calls itself, is used only within the limits of the country itself; the other, or cosmopolitan name, is that by which it is known to neighbouring tribes.

Thus, the people of England call themselves the English, while the Welsh, the Bretons, the GaeIs of Scotland, the Irish, and the Manxmen, respectively, call us Saeson, Saoz, Sasunnaich, and Sagsonach. The natives of Wales do not call themselves the Welsh, but the Cymry. The people to the east of the Rhine call themselves Deutsche, the French call them Allemands, we call them Germans, the Sclavonians call them Niemiec, the Magyars call them Schwabe, the Fins call them Saksalainen,
the Gipsies call them Ssasso. The people whom we call the Dutch call themselves Nederlanders, while the Germans call them Holländers. The Lapps call themselves Sabme, the Fins call themselves Quains. Those whom we call Bohemians call themselves Czechs. The Germans call the Sclavonians, Wends, but no Sclavonian knows himself by this name.

The origin of these double names is often to be explained by means of a very simple consideration. Among kindred tribes, in a rude state of civilization, the conception of national Unity is of late growth. But it would be natural for all those who were able to make themselves mutually intelligible, to call themselves collectively, “The Speakers,” or “The People,” while they would call those neighbouring races, whose language they could not understand, by some word meaning in their own language “The Jabberers,” or “The Strangers.”

A very large number of ethnic names can be thus explained. Thus the Sclavonians call themselves either SLOWJANE, the “Intelligible men,” or else SRB, which means “Kinsmen,” while the Germans call them WENDS, which means “Wanderers,” or “Strangers.” The Basques call themselves EUSCALDUNAC, “Those who have speech.” The LELEGES are “The Speakers;” the Samojedes call themselves CHASOWO, the “Men;” the SABÆANS are also the “Men,” and the name of SHEBA or SEBA is referable to the same root. The Welsh call themselves CYMRY, the “People,” or “Compatriots;” the Getes or Goths are, perhaps, the “Kinsmen;” and the names of the Achæans, the Sacæ, and the Saxons have been thought to be of kindred meaning. The people who call themselves Dacotahs, are called SIOUX, or “Enemies,” by their neighbours the Ojibwas. The Esquimaux call themselves INNUIT, which means “our People.” The name ESQUIMAUX is the form given by French traders to the Chippeway or Cree phrase, ushke-umoog, the “Eaters of raw flesh.” The word KABYLE means the “Tribes.” The LETTS, LITHUANIANS, and possibly also the LATINS, are the “People.” All the Sclavonic nations call the Germans NIEMIEC, “Dumb men.” The earliest name by which the Germans designated themselves seems to have been TUNGRI,1 “Those who have

1 The QUADI are the Speakers. Cf. the Sanskrit wad, to speak, the Anglo-Saxon Cawde, and Welsh chwedd, speech, and the English quoth, and
tongues,” the “Speakers.” This name was succeeded by the term DEUTSCH, the “People,” the “Nation,” a name which still holds its ground. We have borrowed this national appellation of the Germans, but curiously enough we have, during the last two hundred years, limited its use to the DUTCH, a portion of the Teutonic race on which the Germans themselves have bestowed another name. But while the Germans call themselves the “People,” the name given to them by the French means the “Foreigners.” The French word ALLEMAND is modernized from the name of the Alemanni, the ancient frontier tribe between Germania and Gaul. The Alemanni seem to have been a mixed race—partly Celtic, partly Teutonic, in blood. The name is itself Teutonic, and probably means “Other Men” or “Foreigners,” and thus, curiously enough, the French name for the whole German people has been derived from a tribe whose very name indicates that its claims to pure Teutonic blood were disowned by the rest of the German Tribes. The English name for the same nation has been adopted from the Latin term, GERMANIA. It must have been from the Celts of Gaul that the Romans obtained this word, which seems foreign to all the Teutonic languages. The etymology has been fiercely battled over; perhaps the most reasonable derivation is from the Gaelic gairmean, “one who cries out,” and the name either alludes to the fierce war-cry of the Teutonic hordes, or more probably it expresses the wonder with which the Celts of Gaul listened to the unintelligible clash of the harsh German gutturals.

The Russians call the contiguous Ugrian tribes by the name TSCHUDES, a Slavonic word which means “Strangers” or “Barbarians.” The PHILISTINES are, probably, the “Strangers,” and if this be the true meaning of the name, it strengthens the supposition that this warlike people arrived in PALESTINE by sea during the anarchic period which succeeded to the Israel-

---

1 The al in Alemanni is probably the al in alius and Alsatia, or the el in elsé and Elsass, not the al in all. Thus the Alemanni are the “other men,” not the “all men” or “mixed men,” as is usually supposed. Compare the al in Allobroges.
itish conquest under Joshua, having been, as it seems probable, driven out of Crete by the Dorian conquest of the island. Similarly the Flemings are the “Fugitives.” The names of the African and Asiatic Kaffirs, of the Perizzites, and of the Ionians, are also nearly identical in meaning with those of the Philistines, the Allemands, and the Tschudes. The word Barbarian was applied by the Egyptians, and afterwards by the Greeks and Romans, to all who did not speak their own language. The root barbar may be traced to the Sanskrit varvara, a “foreigner,” or “one who speaks confusedly,” and, according to the opinion of the best scholars, it is undoubtedly onomatopoeian. So also in the case of the Hott-en-Tots we find a name which is supposed to have been given by the Dutch in imitation of the characteristic click of the Hottentot language, which sounds like a repetition of the sounds hot and tot. A similar onomatopoeian name is that borne by the Zamzummin, the Aborigines of Palestine.

Few ethnic names are more interesting than that of the Welsh. The root enters into a very large number of the ethnic names of Europe, and is, perhaps, ultimately onomatopoeian. It has been referred to the Sanskrit mlēch, which denotes “a person who talks indistinctly,”—“a jabberer.” 1 The root appears in German, in the form wal, which means anything that is “foreign” or “strange.” Hence we obtain the German words waller, 2 a stranger or pilgrim, and wallen, to wander, or to move about. A walnut is the “foreign nut,” and in German a turkey is called Wälsche hahn, “the foreign fowl,” and a French bean is Wälsche bohne, the “foreign bean.” All nations of Teutonic blood have called the bordering tribes by the name of Wälsche, that is, Welshmen, or “foreigners.” We trace this name around the whole circuit of the region of Teutonic occupancy. Wälschland, the German name of Italy, has occasioned certain incomprehensible historical statements relating to Wales.

1 The Sanskrit m often becomes w in Gothic; thus, from mlai, to fade, we have vlagian, to flag, welken, to wither, and the name of the soft mollusk called a whelk. According to this phonetic law, from the Sanskrit mlēch we obtain the German wack, walach, and Wälsch.
2 The word waller, a pilgrim, no longer survives in English except as a surname; but we retain the derivative, wallet, a pilgrim’s equipage. With wallen, to wander, are connected the words to walk, and to valse or wallis.
in a recent translation of a German work on mediæval history. The Bernese Oberlander calls the French-speaking district to the south of him by the name of Canton WALLIS, or Wales. WALLENSTADT and the WALLENSEE are on the frontier of the Romansch district of the Chur-walchen, or men of the Grisons. The Sclaves and Germans called the Bulgarians Wlochi, or Wolochi, and the district which they occupied WALLACHIA; and the Celts of Flanders, and of the Isle of WALCHEREN, were called WALLOONS by their Teutonic neighbours. North-western France is called VALLAND in the Sagas, and in the Saxon Chronicle WEALAND denotes the Celtic district of Armorica. The Anglo-Saxons called their Celtic neighbours the wELSH, and the country by the name of WALES. The village of WALES in the north of Derbyshire marks the place where the British population maintained its existence in the hills, while the flood of Saxon invasion poured onward to the west. CORNWALL was formerly written Cornwales, the country inhabited by the Welsh of the Horn. The chroniclers uniformly speak of North-Wales and Corn-Wales. In the charters of the Scoto-Saxon kings the Celtic Picts of Strath Clyde are called Walenses.

Entangled with this root wal, we have the root gal. The Teutonic w and the Celtic and Romance g are convertible letters. Thus the French Gualtner and Guillaume are the same as the English Walter and William. So also guerre and war, guard and ward, guise and wise, guile and wile, gaif and waif, gaude and woad, gaufre and wafer, garenne and warren, gault and eald, guarantee and arranty, are severally the Romance and Teutonic forms of the same words. By a similar change the root wal is transformed to gal. The Prince of Wales is called in French “le Prince de Galles.” Wales is the “pays de Galles,” and Cornwall is Cornouailles, a name which was also given to the opposite peninsula of Brittany. CALAIS was anciently written indifferently Galeys or Waley; and the name, as will presently be shown, most appropriately indicates the existence

1 Compare the Polish Wloch, an Italian, and the Slowonian Vlah, a Wallachian. From the same Sanskrit root we have the name of the BELOOCHS or Welsh of India.

2 Strictly speaking, Wales is a corruption of Wealhlas, the plural of wealth, a Welshman or foreigner.
of the remnant of a Celtic people surrounded by a cordon of Teutonic settlers.

This convertibility of the roots *gal* and *wal* is a source of much confusion and difficulty; for it appears probable that *gal* may also be an independent Celtic root,\(^1\) entirely unconnected with the Teutonic *wal*; for while the Welsh of Wales or Italy never called themselves by this name, it appears to have been used as a national appellation by the Gaels of *Cal-Etonia*\(^2\) and the Gauls of *Gall-lia*. *Gal-way*, *Done-Gal*, *Gall-oway*, and *Ar-gyle* are all Gaelic districts; and *Goello* is one of the most thoroughly Celtic portions of Brittany. The inhabitants of *Gall-icia* and *Portu-Gal* possess more Celtic blood than those who inhabit any other portion of the Peninsula. The Austrian province of *Gal-itz* or *Gall-icia* is now Slavonic, and the name, as well as that of Wallachia, is probably to be referred to the German root *wal*, foreign; though it is far from impossible that one or both of these names may indicate settlements of the fragments of the Gaelic horde which in the third century before Christ pillaged Rome and Delphi, and finally, crossing into Asia, settled in and gave a name to that district of *Gal-Atia*, whose inhabitants, even in the time of St. Paul, retained so many characteristic features of their Celtic origin.\(^3\)

So interlaced are these two primeval roots that it is almost hopeless to attempt to disentangle them.

Another root which is very frequently found in the names of nations is *ar*. This ancient word, which enters very extensively into the vocabularies of all the Indo-European races, seems primarily to have referred to the occupation of agriculture.

---

1 No satisfactory explanation from Celtic sources has, I believe, been offered. Mone says it is the "west." Pott derives it from *gwâl*, the "cultivated country." Zeusss thinks it means the "warriors." Dr. Meyer prefers the cognate signification of "clansmen." Celt is of course only the Greek form of *gael* or *gallus*.

2 This word possibly contains the root *gael*. If so, the Caledonians would be the Gaels of the duns or hills. The usual etymology is from *coil-dooine*, the "men of the woods."

3 *Galata*, near Constantinople, is regarded by Diefenbach as a vestige of the passage of the Galatian horde. It seems more probable that this name is Semitic, and should be classed with *kelat* in Beloochistan, *Alcala* in Spain, and *Calata* in Sicily. See Chapter VI.
The verb used to express the operation of ploughing is in Greek ἀνακόφω, in Latin ara, in Gothic arjan, in Polish orac, in old High German aran, in Irish araim, and in Old English ear. Thus we read in our version of Isaiah of “The oxen that ear the ground,” and the two great operations of ploughing and reaping are called in the Bible “earing and harvest.” A plough is ἀνακόφω in Greek, aratrum in Latin, ardr in Norse, and arad in Welsh; and the English harrow was originally a rude instrument of the same kind. The Greek ἀράμα, the Latin arvum, and the Polish oracz mean a field, or arable ground. Aroma was the aromatic smell of freshly ploughed land; while ἄρος and harvest reward the ploughman’s labour. The Sanskrit īrā, the Greek ἐρᾶ, the Gothic airtha, and their English representative, earth, is that which is eared or ploughed.¹

The Sanskrit word arya means an agriculturist, a possessor of land, or a householder generally; hence it came to denote anyone belonging to the dominant race—⁡the aristocracy of landowners—as distinguished from the subject tribes; and at length it began to be used as an ethnic designation, corresponding to some extent with the word deutsch, as used by the Germans.

The name of this conquering Arvanes race, which has gone forth to till the earth and to subdue it, is probably to be found in the names of IR-AN, HER-AT, AR-AL, AR-MENIA, and, perhaps, of IB-ER-IA, ER-IN, and IR-ÉLAND. The Ossetes in the Caucasus call themselves IR-ON. In the cuneiform inscriptions the Medes and Persians claim proudly to be Arvanes, and Darius styles himself an Arya of the Aryans. In languages which belong to

¹ Scores of related words might be collected from the Romance, Celtic, Slavonic, and Gothic languages. Tilled land being the chief kind of property, we have the Greek arbi, an inheritance. Since ploughing was the chief earnest occupation practised at an early stage of civilization, the root comes to take the general signification of any kind of work. Hence the Greek ἀρπων, the Latin ars, the German arbeit, the English errand; all of which deserve earnings and earnest money. It would not be difficult to trace the connexion of the Greek ἐρ-ερμός, τρι-ἐρ-ης and ὑπ-ἐρ-ἐτης, the Latin remus, the English oar, the Sanskrit aritra, a ship, as well as of urbs and orbis.

² The profession of arms being engrossed by the ruling race has caused the root, if indeed it be the same, to enter into a number of military terms—army, armour, arms, harness, hero, "Αρης"
the Teutonic branch of the Aryan stock, we find the root in the form ware, inhabitants. Burghers are those who inhabit towns, and a skipper is one who lives in a ship, as may be seen by tracing the words back to the Anglo-Saxon burhware, citizens, and the old Norse skipperi, a sailor. The Prussian landwehr is the levy en masse of the whole population, and not the landguard, as is often supposed. This word ware enters into the names of a great number of German tribes. It is Latinized into the forms uari, oari, and bari; and the w is sometimes changed into a g, in accordance with a phonetic law which has been already illustrated. Among the peoples of Central Europe are found the Ing-uari-i, the Rip-uari-i, the Chas-uari-i, the Chatt-uari-i, the Att-uari-i, the Angri-vari-i, and the Ansibari-i. The name of the Boi-oari-i is preserved in the modern name of ba-vari-a, the land of the Boii. The bulgari-ans were the men from the Bolg, or Volga, on the banks of which river there is another, or Great Bulgaria. King Alfred speaks of the moravi-ans under the name Marvaro, the dwellers on the river Marus or Morava. Hun-gari-a, or hun-gar-y, is the land formerly peopled by the Huns; and the name survives, though the Huns have been long dispossessed by Magyars and Sclavonians. wo-r-ester is a corruption of Hvic-waracaester, the castle of the inhabitants of the country of the Huicci. The men of Kent were the Cant-ware; and though this term is obsolete, it survives in the name of their chief town Canta wara-byrig, or cant-er-bury, "the burgh of the men of the headland," while the ordinary signature of the primate, Cant-uar, a contraction of Episcopus Cantuariensis, exhibits the Saxon root ware in a prominent form. Car-isbrook, in the Isle of Wight, is a name closely analogous to Canterbury. Asser writes the word Gwiti-gara-burg, "the burgh of the men of Wight." It will easily be seen how the omission of the first part of the name, and the corruption of the last part, have reduced it to its present form.

Another of these widely diffused roots is sætan, settlers, or inhabitants, and sæte or setna, the seat or place inhabited.

1 Compare the Sanskrit vīra, the Latin vir, the Celtic gwr and fir, the Gothic vair, and the Spanish varón, all which denote a man. From the low Latin, baro, a male, comes baron, and perhaps the Scotch bairn.
Alsätia, Alsace, or Elsass, is the “other seat,” the abode of the German settlers west of the Rhine, a district where, as we have seen, the names of places are still purely German. Holstein is a corruption of the dative case of Holt-sati, the “forest abode.” From the same root we get Somer-set and Dor-set. It would appear that the t in Wil-t-shire is also due to this root, since the men of Wiltshire are called in the Saxon Chronicle Wil-sætan, just as the men of Somerset and Dorset are called Sumorsætan and Dornsætan. We have also Pecsetan, men of the Peak (Derbyshire); Scrobsætan, the men of Shropshire or Scrubland; Cilternsætan, the men of the Chilterns; and Wocensætan, the people of the Wrekin or hill country of Exmoor.

Conquering tribes, numerically insignificant, when compared with the other elements of the population, have not unfrequently bestowed their names upon extensive regions. England, for instance, takes its name from the Angles, who only colonized a portion of the country. In the case of Scotland, we may believe that the Angles, the Norwegians, and the Cymric Celts severally constituted a larger element in the population than the Scots, yet this conquering Irish sept, which appears to have actually colonized only a portion of Argyle, has succeeded in bestowing its name upon the whole country. France takes its name from the Franks, a small German tribe which effectually a very imperfect colonization of a portion of Central France: the whole of Picardy, Normandy, Brittany, Burgundy, Languedoc, Guienne, and Gascony being excluded from their influence. Even so late as the time of Philippe Auguste, the term France did not comprehend either Aquitaine or Languedoc. Several of the old French provinces—Burgundy, Normandy, Picardy, and the Isle of France—preserve the names of the German tribes which conquered them. The eastern division of the Frank nation has left its name in the Bavarian province of Franken,

1 The mixed multitude of Greeks, Italians, Maltese, English, Germans, French, and other western Europeans who are found in the streets of Cairo and other cities of the Levant, all go by the name of Franks to this day, and Feringhee is in India the appellation of all Europeans. The cause of the supremacy of the Frank name in the East is probably due to the prominent position taken at the time of the Crusades by Godfrey of Boulogne, and the Franks of Northern France.
or Franconia, as we call it. We find the name of the Suevi preserved in Swabia; of the Rugii in the Isle of Rugen; of the Chatti in Hesse; of the Saxons in Saxony; of the Lombards in Lombardy; of the Huns in Hungary; of the Atrebatas in Artois; of the Pictones in Poitou; of the Cymry in Cumberland, Cambria, and the Cumbrey Islands at the mouth of the Clyde; of the Goths or Jutes in Catalonia, Jutland, the Isle of Gotland, and the Isle of Wight;\(^1\) and that of the Vandals possibly in Andal-usia.

The Celtic Boii, who left their ancient “home” in Bohemia (Boi-hem-ia, or Boi-heim) to Slavonic occupants, gave their name to Bae-ern, or Bavaria; and it has been thought that the name of Bologna in Italy is a mark of their inroad across the Alps. So the Slavonic and Hellenic districts under Moslem rule are called Turkey, from the Turkomans or Turks, who constitute only a small governing class;\(^2\) and it is singular that the Philistines, the “strangers” from Crete, who merely occupied a narrow strip of the sea-coast, should, through their contact with the western world, have given their name to the whole of the land of Palestine, in which they never succeeded in gaining any lasting supremacy.

The names of ancient tribes are also very frequently preserved in the names of modern cities. The process by which this has taken place is exemplified in the case of the Taurini, whose chief city, called by the Romans Augusta Taurinorum, is now Torino, or Turin; while the capital of the Parisii, Lutetia Parisiorum, is now Paris; and that of the Treviri, Augusta Trevirorum, has become Trier or Trèves.\(^3\) We have the name of the Damnonii in Devon, and a portion of

---

\(^1\) In the laws of Edward the Confessor the men of the Isle of Wight are called Guti, i.e. Jutes or Goths. We have also the intermediate forms Geat, Gwit, Wiht, and Wight.

\(^2\) The word Turk had a still wider signification in the sixteenth and seventeenth centuries, when it was used to denote all Mahomedans, as the word Saracens was in the twelfth century. Compare the collect for Good Friday—“All Jews, Turks, infidels, and heretics.”

\(^3\) Of course in cases of this kind it is impossible to say that the name of the city is not more ancient than the name of the tribe. The names Parisii or Taurini, for instance, may not be true ethnic names, but may have been derived from the name of their capital, the original name of which can only be dimly discerned through its Latin garb.
the name of the Durotriges is preserved in DOR-CHESTER, of the Huicci in W-ORCESTER, of the Iceni in IKEN and ICK-BOROUGH, of the Selgovæ in the SOL-WAY, of the Bibroci in BR-AY hundred near Windsor, of the Regni in Regne-wood or RING-WOOD in Hants, and of the Cassii of Cæsar in the hundred of CASHIO, Hertfordshire, and in CASHIO-BURY Park, which probably occupies the site of the chief town of the tribe. Many of these names have a certain ethnological value, inasmuch as they enable us to localize ancient tribes; and therefore a list of such probable identifications is subjoined at the end of this chapter.

The world-famous name of imperial Rome has been retained by various insignificant fragments of the Roman empire. The Wallachians, the descendants of the Roman colonists on the Danube, proudly call themselves ROMANI, and their country ROMANIA. The language of modern Greece is called the ROMAIC; that of Southern France is the ROMANCE; and that of the Rhaetlan Alps the ROMANSCH. The ROMAGNA of Italy preserves the memory of the bastard empire which had its seat at Ravenna; and the name of the Asiatic pashalics of ROUM and ERZEROU are witnesses to the fact that in the mountain fastnesses of Armenia the creed and the traditions of the Eastern Empire of Rome continued to exist long after the surrounding provinces had fallen under the dominion of the Turks; while for the European province of ROUMELIA was reserved the privilege of being the last morsel to be swallowed by the Moslem Cyclops.

Conversely the name of a city has often become attached to the surrounding region. The ROMAN EMPIRE must ever remain the chief instance of such an extension of meaning. This has also been the case with NEW YORK, with BERNE, SCHWYTZ, ZURICH, and others of the Swiss cantons, with SWITZERLAND itself, with several German States, such as HANOVER, BADEN, BRUNSWICK, and MECKLENBURG, and with a large number of the English counties, as YORKSHIRE, LANCASHIRE, and SALOP.

A few countries have taken their names from some ruler of renown. LODOMIRIA, which is the English form of the Sclavonic Vlodomierz, is so called from St. Vladimir, the first Christian Tzar. The two Lothairs, the son and the grandson of
Louis le Débonnaire, received, as their share of the Carolingian inheritance, a kingdom which comprised Provence, Switzerland, Alsace, Franche Comté, Luxembourg, Hainault, Juliers, Liège, Cologne, Trèves, the Netherlands, Oldenburg, and Friesland. This territory went by the name of the Regnum Lotharii, Lotharingia, or Lothier-regne; but by the incapacity or misfortune of its rulers the outlying provinces were gradually lost, so that in the course of centuries the ample “realm of Lothair” has dwindled down into the contracted limits of the modern province of Lorraine.

The most recent instance of a state called from the name of its founder is Bolivia; a name which remains as a perpetual reproach to the Bolivians, proclaiming the discords and jealousies which drove Bolivar, the liberator and dictator, to die in obscure exile on the banks of the Mississippi. Stet nominis umbra.

The name by which we know China belongs, in all probability, to the same category. It was during the reign of the dynasty of Thsin, in the third century before Christ, that the first knowledge of the Celestial Empire was conveyed to the West. That the form of the name should be China, rather than Tsina, seems to prove that our first acquaintance with the Chinese empire must have been derived from the nation in whose hands was the commerce with the far East—the Malays—who pronounce Thsina as China, just as the more ancient form SINA indicates transmission through the Arabs.

The names of America, Tasmania, Georgia, Carolina, and others of this class, have already been discussed.

Another class of names of countries is derived from their geographical position. Such are Ecuador, the republic under the Equator, and Piedmont, the land at the foot of the great mountain chain of Europe. Names of this class very frequently enable us to discover the relative position of the nation by which the name has been bestowed. Thus Sutherland, which occupies almost the extreme northern extremity of our island, must evidently have obtained its name from a people inhabiting regions still further to the North—the Norwegian settlers in Orkney. We may reasonably attribute to the Genoese and Venetians the name of the Levant, for to the Italians alone
would the eastern shores of the Mediterranean be the "land of the sunrise." In like manner the Greeks of Constantinople, who watched the sun rise over the mountains of Asia Minor, called the land ANATOLIA (the rising), a name which is preserved by the Turkish province of NATOLIA. The name of JEPAN or Jehpun is evidently of Chinese, and not of native origin, for it means the "source of day." The AMALEKITES, as well perhaps as the SARACENS, are the "Orientals;" BACTRIA comes from a Persian word bakhtar, "the east;" the Portuguese province of the ALGARBE is "the west;" and some scholars are of opinion that the name of ANDALUSIA is also from an Arabic source, and is equivalent to Hesperia, the "region of the evening." More probably, however, Andalusia is Vandalsia, the country of the Vandals.

The name of the DEKKAN is a Sanskrit word, which means the "South." The etymology of this word gives us a curious glimpse into the daily life of the earliest Aryan races. The Sanskrit dakshina (cf. the Latin dextera) means the right hand; and to those who daily worshipped the rising sun, the south would, of course, be the dakhina, or dekkan, "that which is to the right." 1

Hesychius tells us that EUROPE means Χώρα τῆς Δύσεως, the "land of the setting sun," and the etymology is supported by Kenrick and Rawlinson, who think that we have in this case a Semitic root applied by the Phcenicians to the countries which lay to the west of them. Archbishop Trench, on the other hand, supports the common explanation that the term εὐρώπη is descriptive of the "broad face" or profile, which the coast near Mount Athos would present to the Asiatic Greek.

The origin of the name of ASIA is also in dispute. Pott refers it to the Sanskrit ushas (cf. the Greek ἔως), and thinks that it means the "land of the dawn," and is, therefore, to be classed with such names as Levant, Anatolia, and Japan. On the other hand, much may be said in favour of the view that the word Asia was originally only the designation of the marshy plain of the Caýster 2—the Asian plain on which

1 Lassen derives the name from the Sanskrit deccan, peasants. ES SHAM, the local name of Syria, means "the left."
2 Ἀσία ἐν λαμώνι, Καῦστρον ἄμφι βεθρα. Homer, Iliad, b. ii. l. 461.
EPHESUS (ἐφ-εσ-ος) was built; and the root as or es may, perhaps, be referred to that widely-diffused word for water which, as we shall see hereafter, enters into the names of many rivers and marshes throughout the Indo-European region. As the dominion and the importance of the city of Ephesus increased, the name of this Asian district would naturally be extended to the surrounding region, and the Romans afterwards transferred to the whole country east of the Ægean the name which they found attaching to that Asiatic province with which they first became acquainted. The name of ASIA MINOR seems to have been invented by Orosius in the fifth century, when a wider geographical knowledge required the name of Asia as a designation for all the regions to the east of the Mediterranean.

The earliest name for the African continent was LIBYA. The root is, perhaps, the Greek word ἱβα (moisture)—an etymology which, inappropriate as it may seem, would indicate the fact that Africa was first known to the Greeks as the region from which blew the Libyan or “rain-bringing” south-west wind. The meaning of the word AFRICA, the Roman name of Libya, is very doubtful. The name seems to have originated in the neighbourhood of Carthage, and is probably Punic, at all events Semitic. It has been conjectured, with some show of probability, that it is derived from the ethnic designation of some tribe in the neighbourhood of Carthage, and whose name signified “the Wanderers,” in the same way that the NUMIDIANS, ancestors of the Berbers and Kabyles, were the νομιδες—Nomads, or wandering shepherd tribes. So also the Suevi or Swabians,¹ and probably the Vandals and the Wends, were the roving border tribes of ancient Germany. The root of these two names appears in the German word wandeln, and its English equivalents, to wander or wend. To this root may also be attributed the name of FLANDERS; as well, perhaps, as those of VINDELICIA and VENETIA. The name of the scots has been deduced from an Erse word, scuite, meaning “wanderers,” which is preserved in the English word scout. The name of the SCYTHIANS may possibly be allied to

¹ From schweden, to move. Grimm thinks the root is a Slavonic word meaning “free.” Leo prefers a Sanskrit root meaning “offerers,” and he believes that the practice of human sacrifice lingered long in the tribe
The ETHOGR PHIC of the Scots. The PARTHIA S are also the “wanderers” or strangers.

A few names of races are descriptive of personal appearance, or physical characteristics; and they therefore possess a peculiar value in the eyes of ethnographers.

The EDOMITES were the “red” men, the MOORS and the PHOENICIAN S 1 probably the “dark” men, and of still darker hue are the NEGROES, and the ETHIOPIANS or “burnt-faced men,” 2 quos India torret. The SOUDAN is the “country of the blacks.” We may compare the name of the Du-gall and Fin-gall, the “black” and “white” strangers from Scandinavia who plundered the coasts of Scotland, with that of the “Pale faces,” who have encroached on the hunting-grounds of the “Red men” of North America, and of the “Blacks” of the Australian continent. The Gipsies term themselves the ZINCALI or “Black men.”

Professor Leo thinks that the BOII are the “trim” or “neat” men, and he traces the name of the GOTHS or GETÆ to the Sanskrit word gata, which denoted a special mode of dressing the hair in the form of a half moon, which was practised by the devotees of Siva. The SIKHS were at first only a religious sect, and the name means the “disciples.” The KOOKAS are Sikh reformers, and derive their name from a peculiar noise which they make with their mouths.

The name of the Britons has been conjectured to be from the Celtic brith, paint, but it is not probable that any nation would have called themselves by such a name. The peculiarity might have struck a foreigner, but not a native. The same reasoning will lead us to reject Claudian’s etymology of the name of the painted Picts—nec falso nomine Picti. The PICTS,

1 From φοινικης, reddish-brown. Movers inclines to the opinion that Phoenicia is the “land of palms.”
2 ἀλατος, from alappa, to burn. Cf. Πέλος, the swarthy-faced. So the native name of Egypt, Chemi (Ham), means black. Hence through the Arabs we obtain chemistry and alchemy, the “Egyptian sciences.” The name EGYPT denotes the country which the Nile overflows. The root ary, which means “water,” appears in the name of the Aegean Sea. Mizraim, the Biblical name, means either “the two” banks, or more probably “the two” districts of Upper and Lower Egypt. So INDIA and SINDE are each the “land of the river.”
as well as the PICTONES of Gaul, are probably the "fighters," the name being traceable to the Gaelic peicta, or the Welsh peith, a "fighting man," a root related to the Latin word pugna. The men of the BALEARIC Isles are the "slingers," the TURKS are the "men with helmets," and the TATARS probably derive their name from a Turanian root, meaning primarily to stretch, and hence "to draw the bow," and to "pitch tents." The name of the COSSACKS is also Turanian, and means "mounted warriors." It has been thought that the SCYTHIANS are either the "shooters," or the "shield men," though it is more probable that the name Σκύθος is a corruption of Tschud, barbarian, a name which the Greek colonists on the Euxine may have heard applied by their Sclavonic neighbours to the barbarous tribes further to the north.

With regard to the SAXONS, the old etymology of Verstegan, broached two hundred years ago, has recently been revived and supported by competent scholars. There are good reasons for supposing that the name did not refer to any particular tribe, but was the designation of a military confederation composed of adventurers from various Low-German peoples, who were all distinguished by their use of the seax, a short knife-like sword, originally a stone knife, or celt, the name being derived from saiës, a stone, a word related to the Latin saxum. Similarly it has been supposed that the FRANKS were distinguished by the use of the france, franca, or framea, a kind of javelin; and the Langobards or LOMBARDS, by a long partisan or halberd. So the name of the ANGLES has been derived from angol, a hook, that of the GERMANS from the javelin called a gar, and those of the HERULI and the CHERUSCI from the Gothic heru, a sword. These etymologies are plausible, but by no means indisputable. They may, however, be supported by the analogous fact in the history of names that the Red men of North America called the early European settlers by words signifying "sword men" and "coat men."

The name of DAUPHINY is unique. Its origin is to be traced to the Dolphin, which was the heraldic bearing of the Counts of Albon, the feudal lords of the district. The name of this

---

1 Arndt derives the name of the Tatars from the Chinese Ta-ta, a barbarian, an onomatopeian word, like milch, and varvara.
cetacean, if traced to its source, proves, curiously enough, to be derived from a local name. The chief shrine of Apollo was at Delphi, and the animal, δελφίς, was sacred to the Delphian god.

The natural features of the country have supplied many ethnic names. From the Greek τραχός we obtain the name of Thrace, the "rugged country," as well as of Trachonitis, a sort of basaltic island in the Syrian desert—a scene of grand rocky desolation, where vast fissures and lines of craggy battle-ment call to mind the lunar landscape, as viewed through a powerful telescope, rather than any scene on the surface of the earth. Petra takes its name from the long sandstone parapets which gird the Wady Mouse; Albion is the "hilly land" of Scotland, and Albania is so called from the snowy range, whose peaks are seen, from the Ionian islands, glistening brilliantly in the evening sun. The Chorwats, or Croats, derive their name from the Slavonic gora, a mountain, a root which is found in the name of Carinthia, and also of the Carpathians, which were anciently called Chorwat, or Chrbat. Malaya means a mountain in the Turanian languages of India, and has given a name to the Malays. The Arcadians, the Greeks, the Doriants, the Thuringians, and the Tyrolese are the "Highlanders," while Attica is the "Promontory." The Avutes and the Amorites are the "dwellers on the hills," as distinguished from the Canaanites, or "Lowlanders," and from the Hittites and the Hivites, who were respectively the "men of the valleys," and the "men of the towns." The Poles are the "men of the plain," Volhynia is the "level country," Westphalia the great "western field," Holland is the "fen," Batavia (Bet-aw), the "good land," Brabant "the ploughed land," and Euboea

1 Grimm thinks the root is ḍoram rather than τραχός.
2 Trachonitis is the Greek translation of Argob, the Hebrew name.
3 The root is seen in the Latin arx, and the Greek ἀκρόν.
4 The same root is found in the Latin turris, and in the Tors of Devonshire and Derbyshire. The Tyrol, however, may take its name from a castle near Meran.
5 The root is found in ἀκρή and Athos.
6 From ollant, marshy ground.
7 Bet, the first part of this name, is the obsolete positive degree of better and best. Hence comes our word bad, which originally meant good, just as black originally meant white. The second syllable au, land, is seen in the word fall-ow, the exhausted or faling land.
8 Brabant, anciently Brach-bant, is from the old High German prach,
is the “well-tilled.” The Argives lived in the “tilled” plain of Argos, and the Latins are the men of the “broad plain” of Latium. Italy is the “land of cattle.” The Kurds are the “shepherds,” the Sarmatians are the “men of the steppe,” and the Arabs as well as the Bedouins are the “men of the desert,” as contrasted with the Fellahs or Fellahin, the “men of the cultivated ground.”

The Burgundians were the dwellers in burghs or fortified towns. The Tyrrhenians, or Etruscans, were the “tower-builders.” The Spartans were the dwellers in Sparta, the town of “scattered houses,” more loosely built than other Grecian cities, because unconfined by a wall. The Romans, as Mommsen thinks, were the “Foresters,” a meaning which, according to Wilhelm von Humboldt, attaches to the name of the Basques, the Biscayans, and the Gascons. The Caledonians are, probably, the “men of the woods,” Fife is the “forest,” Lycia and Corsica the “wooded.”

Pontus was the province on the Black “Sea.” Pomerania is a Slavonic term, meaning “by the sea.” The Celtic names of the Morini, of Armorica, of Moribans, of Moray or Murray, and of Glamorgan or Morgant, have the same significance. The Salian Franks, to whom is attributed the Salic law of succession, lived by the “salt” water at the mouth of the Maas. The Ionians are, perhaps, the “coast-men:” they ploughing. Bant means a district, as in the names of the Subantes, Tribantes, and Bucinobantes.

1 The root is seen in ἐργων.
2 From sara, a desert or steppe, and mat, a tribe or race. This root is seen in the names of the Jaxa-mate, Thisa-mate, Aga-mate, Chari-mate, and other Asiatic tribes.
3 From arabah, a desert, and badiya, a desert.
4 A word akin to lucus must have once existed in the Greek language. The Lacedæmonians are either the dwellers in the forest, or, more probably, the dwellers in the hollow or marsh.
5 From po, by, and more, the sea. So the Prusi, or Russians, are probably the Po-Rusi, the men near the Rusi, or Russians, or perhaps near the Russe, a branch of the river Niemen.
6 From mor, the sea, and gant, side.
7 From ἱππων, the coast. More probably they are the “wanderers,” from the Sanskrit root jā, which we find in the names of Ion, Hyperion, and Amphion.
were called also the Αἰγαλέοι, or the "Beachmen." The Ἀχαῖοι may be the "Seamen," and the Ἀεολιανοί the "mixed men." The Ἡλληνεῖς, if not "hill-men," may be the "warriors," whose martial prowess caused their name to be extended to the whole of the people whom we know by the name of GREEKS. This last name is a singular misnomer. It was derived from a small and unimportant Epirote tribe of "mountaineers"—the Græci, who, in blood, were probably not Hellenes at all, but Illyrians, and whose territory is not even included in the limits of the modern kingdom of GREECE. By the accident of geographical proximity the Romans became first acquainted with this tribe, and applied their name to the whole of Hellas; and the modern world has adopted this blunder from the Romans, and stamped it with the approval of its usage. Curiously enough the Greeks made a similar blunder with respect to Italy. ITALY, which means the "land of cattle," was the designation of that extreme southern portion of the peninsula which was best known to Greek mariners. Aristotle uses the word to denote a small portion of Calabria, and it was not extended to the whole peninsula till the time of Augustus. There are many similar cases of names of extended signification. The far-famed empire of Cathay takes its name from a petty village on the road to Cashmere, and the name of INDIA, and more remotely that of the West Indies, is derived from the river Indus, which was the eastern limit of the knowledge of Alexander and his Greeks. The names PERSIA and Parsee are to be traced to the small province of Fars, or Pars. The city of Tyre seems to have given its name to the whole of SYRIA, and we have already seen how the Philistines of the coast gave their name to Palestine, how the French name for Germany is derived from the border tribe of the Alemanni, and how in the cases of EUROPE, ASIA, and AFRICA, three names of limited local significance have come to denote the three continents of the old world.¹

CHAPTER V.

THE PHŒNICIANS.

Physical character of Phœnician sites—Tyre—Sidon—Phœnic—Phœnician colonies in Crete, Cyprus, Sardinia, Corsica, Italy, Sicily, Malta, Africa, Spain, and Britain.

The Phœnicians established a vast colonial empire. The Mediterranean coast-line of three continents was dotted over with their settlements, which extended beyond the pillars of Hercules, as far as the River Senegal to the south, and as far as Britain to the north. The causes of this development of colonial dominion must be sought, firstly, in the over-population of their narrow strip of Syrian coast, shut in between the mountains and the sea, and, secondly, in the spirit of mercantile enterprise with which the whole nation was imbued. As in the case of the Venetians, the Dutch, and afterwards still more notably of the English, the factories, which were established for commercial purposes alone, rose gradually to be separate centres of dominion. To protect themselves from the lawless violence of the barbarous tribes with whom they traded, the merchant princes of Tyre found themselves unwillingly compelled to assume sovereignty over the surrounding districts. The origin of the colonial empire of the Tyrians is curiously indicated by a physical characteristic which marks the sites of many of their settlements. These were placed, almost invariably, on some rocky island near the coast, or on some promontory connected with the mainland by a low isthmus. A position of this kind would usually afford the advantage of a natural harbour, in which vessels might find safe anchorage,
while the trading settlement would be secured from the attacks of the barbarous tribes which occupied the mainland. Tyre itself was probably at first only a trading colony sent forth from the mother city at the entrance of the Persian Gulf. The name TZUR, or TYRE, which means a "rock," characterises the natural features of the site—a rocky island near the coast—well suited to the requirements of a band of mercantile adventurers. The neighbouring city of Aradus stood also upon a littoral island. SIDON occupies a somewhat similar position, being built on a low reef running out to sea; and the name, which denotes a "fishing-station," suggests to us what must have been the aspect of the place in those prehistoric times when the first settlement was made. Not unfrequently the names of the Phœnician settlements thus indicate the circumstances of their foundation. Sometimes, as in the case of Spain, Malaga, or Pachynus, the names refer to the nature of the traffic that was carried on—more frequently, as in the case of Cadiz, Hippo, or Lisbon, we have a reference to the fortifications which were found necessary to protect the wealthy but isolated factory.

We find the name of the nation repeated in Cape PHINEKE in Lycia, also in Phœnix in Epirus, a place which now bears the name of FINIKI, and in five places called PHŒNICUS, severally in Cythera, in Messenia, in Marmarica, in Ionia, and in Lycia. Pliny also states that the island of Tenedos, as well as a small island near the mouth of the Rhone, was called PHŒNICE. The latter may probably be identified with one of the Hières islands, which would satisfy the conditions which the Phœnicians sought in their trading stations. One of the Lipari islands, anciently called Phœnicodes, now goes by the name of FELICUDI.

But the most interesting spot on which the Phœnicians have left their name is a rocky promontory on the southern coast of Crete, which possesses good harbours on either side. This place is called PHŒNIKI, and has been identified with the haven of Phœnix mentioned in the Acts of the Apostles. St.

1 Compare the name of BETH-SAIDA, the "house of fish."
2 It is possible that some of these places may be named from the palm-trees, "Φοινίκας," growing on them.
Luke says, “We sailed under Crete . . . and came into a place which is called the Fair Havens . . . and because the haven was not commodious to winter in, the more part advised to depart thence also, if by any means they might attain to Phenice, which is an haven of Crete, and there to winter.” With true maritime instinct the Phœnicians seem to have selected for the centre of their Cretan trade this sea-washed promontory, with its double harbour, now, as in the time of St. Paul, the best haven along the southern coast of the island.

Lebena, another harbour on the Cretan coast, is the “Lion promontory.” There is a Cretan Jordan flowing from a Cretan Lebanon. Idalia in Cyprus, now Dalin, is the “sacred grove.” Samos is the “lofty,” and the name of Samothrace contains the same root. From the Phœnician word sela, a rock, we derive the name of Selinus, now Selenti, in Cilicia—a town which stands on a steep rock almost surrounded by the sea. Tarsus, the birthplace of St. Paul, is “the strong.” Lampascus, now Lamsaki, near Gallipoli, is the “passage,” and seems to have been the ferry across the Hellespont.

Sardinia is full of Phœnician names. Cagliari, the chief town, was a Tyrian colony, and its Phœnician name Caralis, or Cararis, has suffered little change. Bosa still bears its ancient Tyrian name unaltered. Macopsisa, now Macomer, is the “town;” Othoca seems to be a corruption of Utica, the “old” town; and Nora, like so many other Phœnician settlements, was built upon a little island off the coast.¹

The name of Corsica, according to Bochart, means the “wooded.” The desolate forest-clad mountains of this island seem, however, to have had few attractions for the Phœnician merchants, since none of the towns bear names which, in their language, are significant.

At Cære, in Italy, there was a Tyrian settlement, which anciently bore the Phœnician name of Agylla, the “round town,” and in lower Italy we find the Phœnician names of Malaca, Sybaris, Crathis, Tempsa, Medma, and Hippo.

Cape Pachynus in Sicily was the “station” for the boats engaged in the tunny fishery. Catana, now Catania, is the

¹ Other Phœnician names found in Sardinia, are Cornus, Caba, Olbia Buccina, Cunusi, Charmis, and Sulchi.
“little” town. **Mazara**, which still preserves its ancient name, is the “castle,” and the familiar name of **Etna** is a corruption of **attuna**, the “furnace.” Many other ancient names attest the long duration of the Phoenician rule in this island.¹

Diodorus informs us that the Island of **Malta** was a Phoenician settlement; and this assertion is borne out by the name of the island, which means in Phoenician a “place of refuge.” Moreover at a place called **Hagiar Chem**—“the stones of veneration”—extensive remains of a Phoenician temple are to be seen. The site was explored about thirty years ago, when the outlines of the seven courts of the temple were traced, and the statues of the seven presiding planetary deities were disinterred. The Phoenician capital was, probably, near the south-eastern extremity of the island. Here is a deep bay, on the shores of which stand the ruins of a temple of Melcarth, the “city king.”² This word **cartha**, a city, appears in the Old Testament in the name of twelve places called Kirjath, as well as in that of **Carthage**, the great Tyrian colony in Northern Africa.³ **CARTHAGE**—Kart-hada, or Kartha-hadtha—the “New Town,” soon eclipsed in splendour and importance the older settlement of **Utica**,” “the ancient;” and before long she began to rival even the mother city of Tyre, and to lay the foundations of a colonial empire of her own.

**Spain** seems to have been first known to the Phoenicians as the land where the skins of **γαλή ταρτήσιαι**—martens, or perhaps rabbits—were procured, and the name Hispania or Spain appears to be derived from a Phoenician word **sapan**, or **span**, which denotes the abundance of these animals. Many of the Phoenician colonies in Spain seem to have been Tyrian rather than Carthaginian. **Escalona** is, probably, the same word as Ascalon; and **Magueda** is, perhaps, identical with

¹ We have Arbela, which also occurs in Palestine; Thapsus, “the passage,” Anesel, the “river head,” Amathe, the “castle,” Adana, Tabæ, Motuca, Mactorium, Ameselum, Bidis, Cabala, Inycon, and many more.

² The word Melek, a king, is found in all the Semitic languages. It is seen in the names of Melchizedek, Melchior, Abdu-l-malek, &c.

³ It appears also in the names of Cirta, Ta-carata, Cartili, Cartenna, Caralis, Carpi, Carepula, Medicara, Cura, Curum, Rusucurum, Ascurum, Ausocurro, Curubis, Garra, Medugarra, Tagara, Tagarata, &c. A suburb of Palermo anciently bore the name of Karthada.
Megiddo. Asido, now Medina Sidonia, was, as the name denotes, a colony of the Sidonians. Cadiz, as we learn from Velleius Paterculus, was founded before Utica, and consequently long before Carthage. The name Cadiz is a corruption of the ancient name Gadeira, and is referable to the Phœnician word gadir, an inclosure. The site presents the features of other Tyrian settlements—an island separated by a narrow channel from the main land. The same is the case at Cartagena, which is built on a small island in a sheltered bay. The name of Cartagena is a corruption of Carthago Nova or New Carthage; and we may therefore assign it to a Carthaginian rather than a Tyrian origin. Near Gibraltar there is another town named Carteia, anciently Carteia. The name of Malaga is derived from the Phœnician word malaca, salt. Hispalis, now Seville, was also a Carthaginian colony, and the name is deducible from a Phœnician word meaning a “plain.” The Tagus is the “river of fish,” and the root appears in the name of Dagon, the “fish god.” The name of Olisippo, which has been corrupted into Lisbon, contains the word hippo, the “walled” town, which occurs so frequently in Phœnician names. There were three cities called Hipponia in Africa, one of them celebrated as the See of the great Augustine, and two of the same name in Spain, as well as Oriippo, Belippo, Baesippo, Iriippo, and Lacippo, all on the Spanish coast. Tarraco, now Tarragona, is the “palace.” The name of Cordova, anciently Cortuba, may be derived either from coteba, the “olive press,” or from Kurtha Baal, the “city of Baal.” Belon, now Belonia, near Tarifa, as well, perhaps, as the Balearic Isles, contain the name of Bel or Baal, the deity whose name enters into the composition of so many Tyrian and Carthaginian names, such as Hannibal, Asdrubal, Maherbal, Ethbaal, Agebalos, Jezebel, Belshazzar, and Baalbec. There are many other places in Spain which seem originally to have been Carthaginian colonies, since

1 Hence the Ægades Islands near Sicily, and the Biblical names of Gedcr, Gedera, Gedor, and Gadara, the city of the Gadarenes.

2 See, however, p. 54 supra. Ebusus, now Ilica, means the “pine island,” and the Greek name Pitiusæ is merely a translation of the earlier Phœnician appellation. The Balearic Islands present many Phœnician names, such as Cinici, Cunici Bocchorum, Jamna, Mago, and Sanüera.
their names can be explained from Punic sources. Such are Toledo; Abdera, now Adra; Barcino, now Barcelona; Ebora, now Evora, the "ford"; Arci, now Arkos; and the River Anas, now the Guadiana.

Whether the Carthaginians reached the shores of Britain is uncertain. We have already seen that the Euskarian origin of the name makes it probable that the earliest knowledge of the island was obtained from Iberic traders; and it is certainly probable that the Carthaginians would follow in the tracks discovered by their Spanish subjects. It is a noteworthy circumstance that the almost unique physical characteristics of St. Michael's Mount, in Cornwall, conform precisely to the account given by Diodorus Siculus of the trading station from which the Phœnicians obtained their tin. We may mention, though we can hardly maintain the supposition, that the names of Marazion, the "hill by the sea," and Polgarth (root Kartha) are of Phœnician origin, and are records of the first intercourse of our savage ancestors with the civilized world.1

1 On Tyrian and Carthaginian names, see the erudite work of Bochart, Geographia Sacra pars posterior, Chanaan, seu de Coloniiis et sermone Phœnicum, and the more trustworthy works of Movers, Die Phœnizier, and the Article Phœnizien in Ersch und Gruber's Allgemeine Encyclopädie. See also Kenrick's Phœnicia; Olshausen, Ueber Phœnische Ortsnamen; Renan, Langues Sémítiques; and the valuable treatise of Gesenius, Scripture Linguæ Phœnicæ Monuments.
CHAPTER VI.

THE ARABS IN EUROPE.

The Empire of the Cailiphs—Arabic Names in Southern Italy and Sicily—Tribes by which the conquest of Sicily was effected—Conquest of Spain—Tarifa and Gibraltar—Arabic article—River-names of Spain—Arabs in Southern France—The Monte Moro pass and its Arabic Names—The Muretto pass and Pontresina.

The Arab conquests in the seventh and eighth centuries form one of the most remarkable episodes in the history of the world. At the time of its greatest extension, the empire of the Cailiphs extended from the Indus to the Loire. In the course of a single century they overran Persia, Syria, Egypt, Northern Africa, Spain, and the south of France. We find Arabic names scattered over the whole of this vast region; and it will be an interesting and profitable task to investigate these linguistic monuments of Moslem Empire, confining our attention more especially to those districts where Christianity has long resumed its sway.

In Southern Italy the dominion of the Arabs lasted hardly half a century, and consequently we cannot expect to find many Arabic names. Their chief conquests lay in the neighbourhood of the cities of Benevento and Bari, not far from which we find the doubtful Arabic names of ALIFE, ALFIDENA, and the river ALMARO.

In Sicily, where the Arab colonization was more extensive, and where their empire was more enduring than in Italy, we naturally find more abundant and less doubtful traces of their presence. The well-known name of MARSAL
means, in Arabic, the “Port of God.” Gebel, the Arabic name for a mountain, is still retained in the patois of the Sicilian peasantry, who prefer the mongrel term MONGIBELLO to the ancient Phoenician name of Etna. From the same root comes the name of the GIBELLINA—a mountain ridge in the Province of Trapani.

It would appear that the Arabs kept down by military rule a considerable subject population, for the island is covered with fortresses of their erection. The position of these we can often discover by means of the Arabic word kal’ah, or kal’at, a castle on a rock—a root which enters into the names of many Sicilian towns, such as CALTABALOTTA (Kal’at-a-bellotta, oak-tree castle), CALTAGIRONE (Kal’at-a-Girun), CALATASCIBETTA (Kal’at-a-xibetta), CALATAFINI (Kal’at-a-fieni), CALATAMISSETTA (castle of the women), CALATAVUTURA, CALTANISSETTA, CALATABIANO, CALAMONACI, and CATALAMITA.1

There are also in this island many Arabic names of villages and farms. The word menzil, a “station,” or “hut,” is found in MISILMERI (Menzil-Emir), and in MEZZOJUSO (Menzil-Yusuf). The most common of these Arabic prefixes is rahl, a “house,” which appears in the names of REGALUTO and RE-SULTANA. It occurs no less than one hundred and seven times, while kal’at is only found in twenty names, and menzil in eighteen. We have ras, a cape, in the names of RASICANZIR, the cape of swine; RASICALBO, the dog’s cape; RASACARAMI, the cape of vineyards; and RASICORO, or Cape Horn. In Palermo the two chief streets bear the Arabic names of the CASSARO, or “Castle Street,” and the MACCHEDA, or “New Street,” and we find many other Arabic names scattered here and there over the island, such as GODRANG, the “marsh”; CHADRA, and CADARA, the “green”; ALCARA, MISTRETTA, MUSSOMELI, GAZZI, MONTE MERINO; and a few personal names, such as ABDELALI and ZYET.

Several Arabic words are retained in the Sicilian patois, as saliare, to wonder; chammarro, an ass; hannaca, a necklace

1 Compare the names of KHELAT, the capital of Beloochistan, and of GALATA, a walled suburb of Constantinople. YEIKALE in the Crimea is Yeni Kal’ah, the “new fortress”—a name half Turkish and half Arabic.
The few Arabic words in Italian—such as alcova, a chamber, ammiraglio, an admiral, arsenale, an arsenal, and the vessels called carraccia and feluca—were probably introduced through the Spanish.

The mediaeval and modern names of Sicilian villages supply us with curious information as to the countries out of which was gathered the motley host that fought under the standard of the Prophet. In Sicily alone we find traces of tribes from Scinde, Mesopotamia, Egypt, Syria, and Spain. Thus, a fountain near Palermo, now called DENNISINNI, was anciently Ain es-Sindî, the fountain of Scinde. But the conquest of Sicily seems to have been effected, for the most part, by troops levied from the neighbouring continent of Africa. There are more than a dozen indisputable names of Berber tribes to be found in Sicily, chiefly in the neighbourhood of the Val di Mazara. Altogether there are in Sicily 328 local names of Arabic origin, and the distribution of these is remarkable, as showing the relative amount of Arab influence in different portions of the island. In the Val di Mazara there are 209 Arabic names, in the Val di Noto 100, and the Val Demone only 19.

In the islands of Sardinia and Corsica the Arab rule was brief, and we find no Arabic names, except AJACCIO, and, perhaps, ALGHERO and ORISTAN. But Malta is full of Arabic names. The word mirsah, a port, which is found in the name of Marsala, in Sicily, appears in Malta in the names of numerous bays and inlets, such as MARSA SCIROCCO, MARSA SCALA, MARSA MUSCETTO, and MARSA FORNO. The ravines commonly go by the name of vyed, or wied, a corruption of the Arabic word wadi. The hills have the prefix gebel, the fountains aayn, the wells bir, the castles cala, the houses deyr, the caves ghar, the villages rahal, the capes ras. From the map of the island it would be easy to collect scores of such names as AAYN IL KEBIRA, the great fountain; AAYN TAIBA, the good fountain; GEBEL OOMAR, the mountain of Omar; RAS EL TAFAL, Chalk Cape. In the neighbouring isle of Gozo we find the Arabic village-names of NADUR, ZEBBEY, GARBO, SANNAT, and XEUCHIA. Among the peasants of Malta and Gozo a corrupt Arabic patois still holds its ground against the Lingua Franca, the
Italian, and the English, which threaten to supplant it. Of the island of Pantellaria the Duke of Buckingham says, "The language spoken is a bad Italian, mixed up with a bastard Arabic. All the names of places, headlands, and points, are pure Arabic, and every hill is called gibel something."

In no part of Europe do we find such abundant vestiges of the Arab conquest as in Spain and Portugal. The long duration of the Arab rule—nearly eight centuries—is attested by the immense number of Arabic local names, as compared with the dozen or half-dozen that we find in Italy, France, or Sardinia, which were speedily reconquered.

The very names of the first invaders are conserved in local memorials. In September, A.D. 710, Tarif-Abú-Zar'ah, a Berber freed-man, effected a landing at a place which has ever since been called after him—TARIFA. He was quickly followed by Tarik-Ibn-Zeyad, a liberated Persian slave, who, at the head of a body of light horsemen, advanced, in a few weeks, some seven hundred miles across the peninsula, as far as the Bay of Biscay. This bold chieftain landed in the Bay of Algeziras, and he has left his name on the neighbouring rock of GIBRALTAR, which is a corruption of the Arabic name Gebel-al-Tarik, the "Mountain of Tarik."

The accompanying sketch-map, in which each dot represents an Arabic name, will serve to give a rough notion of how they are distributed throughout the peninsula. Though unfortunately, owing to the smallness of the scale, it has been impossible to indicate the position of more than a proportion of the names, yet it is easy to distinguish at a glance those districts where the Arab population was most dense. The Arabic names are seen to cluster thickly round Lisbon and Valencia; and in the neighbourhood of Seville, Malaga, and Granada, the last strongholds of the Moslem kingdom, they are also very numerous; but as we approach the Pyrenees, and the mountains of Galicia and the Asturias, these vestiges of Moslem rule entirely disappear, and are replaced by names derived from the Basque,

---

1 Algeziras means "the island." By the Arabic chroniclers it is called Jezirah al-Khadhra, "the green island." Algiers is a corruption of the same appellation, Al Jezirah, a name which has also been given to Mesopotamia—the peninsula between the Tigris and the Euphrates.
Celtic, and Spanish languages. Contrary to what might have been supposed, we find that the Arabic names in the immediate vicinity of Granada and Cordova are relatively less numerous than in some other places, as the neighbourhoods of Valencia and Seville. This is probably due to the forced eviction of the inhabitants of Granada under Ferdinand and Isabella, and the wholesale substitution of a large Christian population; whereas in the case of earlier conquests the Arab population, being allowed to remain till gradually absorbed, succeeded in transmitting the greater number of the local names.
An obvious feature which characterises the local nomenclature of Spain and Portugal is the prevalence of the Arabic definite article *al*, which is prefixed to a very large proportion of names, such as ALICANT, ALBUERA, ALMANZA, ALCALA, ALMAREZ, ALMEIDA, ALHAMBRA, and ALGOA. On the maps of the Peninsula published by the Useful Knowledge Society, there appear about two hundred and fifty names containing this prefix. Of these, 64 per cent. are found to the south of the Tagus, and only 36 per cent. to the north of that river.

The Spanish river-names beginning with *guad* are very numerous. In Palestine and Arabia this word appears in the form *wadi*, a "ravine," and hence a "river." The name of the GUADALQUIVIR is a corruption of Wadi-l-Kebir, the great river—a name which is found also in Arabia. We have also the river-names GUADALCAZAR, which is Wadi-I-Kasr, the river of the palace; GUADALHORRA, from Wadi-l-ghar, the river of the cave; GUADARRANKE, from Wadi-l-ramak, the mare's river; GUADALQUITON, from Wadi-l-kitt, the cat river; GUADALAXARA, from Wadi-l-hajarah, the river of the stones; GUAROMAN, from Wadi-r-roman, the river of the pomegranate-trees; GUADALAVAR, from Wadi-l-abyadh, the white river; GUADALUPE, the river of the bay; GUALBACAR, the ox river; GUADALIMAR, the red river; GUADARAMA, the sandy river; GUADALADIAR, the river of houses; and the more doubtful names of GUADAIRA, the muddy river; and GUADALAR, the river of the battle-field. We have also the GUADIANA and the GUADALETE, which embody the more ancient names of the Anas and the Lethe.¹

The name of MEDINA, which means "city," is found not only in Arabia and Senegambia, but also in the names of MEDINACELI, MEDINA SIDONIA, and three other Spanish cities. The word *kal'ah*, a castle, which we have traced in Sicily

¹ We find also the rivers Guadafion, Guadahenar, Guadajor, Guadalbarro, Guadalbullon, Guadalcanal, Guadalerce, Guadaleste, Guadalmellete, Guadalmedina, Guadalmeleria, Guaderriza, Guedadixira, Guadazamon, Guadazeleite, Guadamencas, Guadetefra, Guadarmena, Guadelfeo, Guadalmex, and Guadalcalon.
and Malta, is found in CALATAYUD, Job’s castle, in Aragon; CALAHORRA, the fort of stones, in Old Castile; and CALATRAVA, the Castle of Rabah, in New Castile. There are also half-a-dozen places called ALCALA, which is the same word with the definite article prefixed.

Such names as BENAVITES, BENIAJAR, BENARRABA, BENICALAF, BENIAUX, BENTARIQUE, and BENADADID, embody curious information as to the names of the original Arab settlers, for the first syllable of such names is the patronymic Beni, “sons,” and the remainder is a personal or tribal appellation.

But the great mass of Hispano-Arabic names are descriptive terms, relating to the artificial or natural features of the country. Such are the names TRAFALGAR (Taraf al-ghar), the promontory of the cave; ALBORGE, the turret; ALBUFEIRA (Al-bueyra), the lake; ALMEIDA, the table; ALCACOVA, the fortress (a common name); ALMANZA, the plain; ALPUXARRAS, the “grassy” mountains; ALMADEN, the mine; ALHAMBRA, the red; ALGARBE, the west; ARRECIFE, the causeway; ALMAZARA, the mill; ALCazar, the palace; ALDEA, the village; ALCANTARA, the bridge; and ALQUERIA, or ALCARRIA, the farm. ALMENA, the battlemented tower; ALMAZEN, the storehouse; and ALCANA, the exchange, are of interest as embodying the Arabic roots from which we derive respectively the familiar words minaret, magazine, and dogana or douane.

A competent and exhaustive investigation of the Hispano-Arabic names has never been attempted; and it would, undoubtedly, supply materials of value to the historian of the conquest.

Flushed by the ease and rapidity of their Spanish conquest, the Arabs crossed the Pyrenees, and spread their locust swarms over the southern and central regions of France, as far as Tours. In the neighbourhood of this city, in the year 732, Charles Martel gained one of the great decisive battles which have changed the current of the world’s history, and the almost total destruction of the Moslem host rescued Western Christianity from the ruin which seemed to be impending. After this event the fugitives seem to have retired into Provence, where they maintained a precarious sovereignty for some thirty years.
In the Department of the Basses-Pyrénées we find some vestiges of these refugees. At Oloron, a town not far from Pau, is a fountain called La Hour (ain) deous mouroous, or the fountain of the Moors; and in a neighbouring village, which bears the name of Moumour, or Mons Mauri, there stands a ruined tower called La Tour des Maures. Fontarabie, in the Department of the Charente Inférieure, marks a kind of oasis in the sandy desert of the Landes, and, like Fontarabia on the Bidassoa, may have been a station of the Arabs. In the patois of south-eastern France there are several words of Arabic origin, while, down to the seventeenth century, many families of Languedoc, descended from these Moors, bore the name of “Marranes.” In Auvergne also there is a pariah race called Marrons, whose conversion to Christianity has given the French language the term marrane, “a renegade.” After an interval of more than a century, the Moorish pirates, who had long infested the coast of Provence, established themselves (A.D. 889) in the stronghold of Fraxinet, near Frejus, and held in subjection a large part of Provence and Dauphiny. The Forêt des Maures, near Frejus, is called after them; and the names of Puy Maure and Mont Maure, near Gap, of the Col de Maure, near Château Dauphin, and of the whole county of the Maurienne, in Savoy, are witnesses of the rule in France of these Moorish conquerors. In the tenth century the Moors still held the Maurienne, and in the year 911, by a convention with Count Hugo of Provence, they crossed the Cottian Alps, and took possession of the passes of the Pennine chain, which they guarded for Count Hugo’s benefit, while they levied black mail on travellers for their own. In the years 921 and 923, and again in 929, the chroniclers record that English pilgrims, proceeding to Rome, were attacked by Saracens while crossing the Alps. The bishops of York, Winchester, Hereford, and Wells were among those who thus suffered. In the year 973 St. Majolus, Abbot of Cluny, was taken prisoner by these marauders at Orsières, on the pass of the Great St. Bernard, and he could only obtain his freedom by the payment of a ransom, which consisted of a thousand pounds’ weight of the church plate of Cluny.

Such are the few meagre historical facts relating to the Arabs
THE MONTE MORO.

in the Alps which we are able to glean from mediaeval chroniclers; fortunately, it is possible to supplement our knowledge by the information which has been conserved in local names. The mountain to the east of the hospice on the Great St. Bernard bears the name of MONT MORT, which there is reason for believing to be a corruption of Mont Maure. If this name stood alone, we might hardly feel ourselves justified in connecting it with the local traditions which refer to the Arabs in the Alps. We find, however, that the name MONTE MORO, the "Moor's Mountain," is attached to another pass which was much frequented in early times, before the great roads of the St. Gothard, the Simplon, and the Splügen had been constructed. Though no direct historical evidence of the fact exists, it seems impossible not to believe that this pass of the Monte Moro must have been held by these "Saracens," or "Moors."

In the first place, we find that a strong position, which commands the passage up the Val Anzasca on the Italian side of the pass, is called CALASCA—a name which is apparently derived from the Arabic kal'ah, a castle, which occurs in the Alcalas and Calatas of Spain and Sicily. The peak opposite Calasca is called PIZ DEL MORO. On the other side of the valley is the CIMA DEL MORO, beneath which lies the hamlet of MORGHEN. Crossing the Moro pass, the first hamlet we arrive at is placed on a mountain spur or terrace, which commands the view both up and down the valley. This place is called ALMAGEL, which, on the hypothesis of an Arab occupation, would be a most appropriate name, since al malzal denotes in Arabic "the station," or "the halting-place." A high grassy mound, probably the terminal moraine of an ancient glacier, is called the TELLIBODEN, the first syllable of which name seems to be the Arabic word tell, a round hill. The neighbouring pasture goes by the name of the MATMARK, the ancient form of which was Matmar, or the "Moor's Meadow." Close by is another pasture called the EYEN—a name which is pronounced in exactly the same way as the Arabic aín, a "fountain," or "source of waters"—a very apposite description, as will be admitted by all those Alpine tourists who, before the recent construction of a road, have splashed across it, ankle deep, for
some hundred yards. Passing the Distel Alp—a doubtful name—we find the valley completely barred by an enormous glacier. This is called the Alalein Glacier, and the Arabic interpretation of the name, Alâ 'l aîn, or “Over the source,” gives a most graphic picture of the precipitous wall of ice, with the torrent of the Visp rushing from the vast cavern in its side. Opposite Almagel, and a little to the north of the Alalein Glacier, are the Mischabel hörner, three peaks, the midmost of which, the Dom, is the loftiest summit in Switzerland. The latter part of the name Mis-schabel is pronounced almost exactly in the same way as the Arabic gebel, a mountain. The genius of the Arabic language would, however, require gebel to be a prefix rather than a suffix, but it is quite possible that Mischabel may be a hybrid formation, akin to Mongibello in Sicily. The northern outlier of the Mischabel range is called the Balfrain, a name whose Arabic interpretation—“the peak with two river sources”—describes the twin glaciers which hang from the flanks of the mountain, and send their tributary streams to join the Visp.

It is probable that the etymologies assigned to some of these names may be fallacious, but the cases are too numerous, and the accordances with the physical features of the spot are too precise, to allow us easily to explain them away by any hypothesis of accidental coincidence of sound; and though we may not be able to find any historical evidence whatever that the Moro was one of those passes which were occupied by Count Hugo’s Moors, yet it seems difficult not to believe, on the evidence of the names alone, that the present inhabitants of the Saas Valley are descended from the marauders from the Maurienne.

The third of the passes which in ancient times formed the chief communication between Italy and the North, was that which connects the Lake of Como with the Engadine. This, also, it would seem, was occupied by the Arabs. Near the summits of the St. Bernard and of the Moro we have the Mont Mort and the Piz del Moro; and so, near the summit of the Maloja and Muretto passes, we have the Piz Muretto, the Piz Mortiratsch, and the Piz Morter. Descending the pass on the northern side, we come to a very
ancient stone bridge of one arch, springing from rock to rock across a narrow chasm. This place is called Pontresina, which seems to be a corruption of Ponte Saracina, the Saracens' bridge. The village of Pontresina is composed of solid stone houses, Spanish rather than Swiss in their appearance. Five minutes' walk from the village, we come to an ancient five-sided stone tower called Spaniola. In documents of the twelfth and fourteenth centuries we find mention of families inhabiting this valley bearing the names De Ponte Sarisino, Sarracino, Sarazeno, and the like. Saratz is still a very common surname in the district, and those bearing it claim descent from the Saracens, and possess a marked Oriental type of feature. A Herr Saratz was lately president of the Gotthaus Bund, the Eastern division of the Grisons.

In the neighbourhood of Pontresina there are several names which can be explained from Arabic sources. Such are Samaden, Alvenen, Albigna, Tarasp, Al-Vaschein, Mad-ul-ein, and the Val Ain-as. The river which flows from the Maloja on the Italian side is called the Maira. Near the Swiss frontier a barrier of roches moutonnées blocks up this valley so completely that it has been necessary to excavate a considerable tunnel through the rock to admit of the passage of the road. On the summit of this admirable defensive position stands a ruined castle, which goes by the name of Castel Muro, and an ancient building by the side of the castle exhibits certain Saracenic features which are in striking contrast with the Italian architecture around. In this neighbourhood, however, I have been unable to discover traditions of Saracenic occupation resembling those which are current at Pontresina.

To the west of Pontresina is the Scaletta pass, which leads to the valley of the Upper Rhine. A local tradition affirms that the Scaletta is not the Staircase pass, as we might suppose, but that it owes its name to the bleaching skeletons of a band of marauding Moors from Pontresina, who were defeated by the men of Chur, and whose corpses were left strewn over the mountain side where they fell in their attempted flight across the pass. The encounter is supposed to have taken place at the foot of the pass, on the western side, where there is a pasture which still goes by the name of Kriegsmatten, the
“battle-field.” Whether there be truth in this tradition or not, it is valuable as testifying to the popular belief in the existence of a Moorish colony in the valleys of the Bernina, and it harmonizes well with the curious evidence supplied by the still existing local names.¹

CHAPTER VII.

THE ANGLO-SAXONS.

England is the land of inclosures—This denoted by the character of Anglo-Saxon Names which end in "ton," "yard," "worth," "fold," "hay," and "bury"—Ham, the home—The Patronymic "ing"—Teutonic clans—Saxon Colony near Boulogne—Saxon settlement in England began before the departure of the Romans—Early Frisian settlement in Yorkshire—Litus Saxoniwm near Caen—German village names in France and in Italy—Patronymics in Westphalia, Franconia, and Swabia—Seat of the "Old Saxons."

England is pre-eminently the land of hedges and inclosures. On a visit to the Continent almost the first thing the tourist notices is the absence of the hedgerows of England. The fields, nay even the farms, are bounded only by a furrow. The bare shoulders of the hills offend an eye familiar with the picturesque wooded skyline of English landscape; the rectangular strips of cultivation are intolerable; and the interminable monotony of the plains, varied only by the straight rows of formal poplars which stretch for miles and miles by the side of the chaussée, is inexpressibly wearisome to those who have been accustomed to quaint, irregular crofts, and tall, straggling hedge-rows, twined with clematis and honeysuckle—

"Little lines of sportive wood run wild,"

overshadowed here and there by gnarled oaks and giant elms.

And if we compare the local names in England with those on the Continent, we shall find that for more than a thousand years England has been distinctively and pre-eminently the land of inclosures. The suffixes which occur most frequently
in Anglo-Saxon names denote an inclosure of some kind—something hedged, walled in, or protected. An examination of these names shews us that the love of privacy, and the exclusiveness of character which is so often laid to the charge of Englishmen, prevailed in full force among the races which imposed names upon our English villages. Those universally recurring terminations ton, ham, worth, stoke, stow, fold, garth, park, hay, burgh, bury, brough, borrow, all convey the notion of inclosure or protection. The prevalence of these suffixes in English names proves also how intensely the nation was imbued with the principle of the sacred nature of property, and how eager every man was to possess some spot which he could call his own, and guard from the intrusion of every other man. Even among those portions of the Teutonic race which remained on the Continent, we do not find that this idea of private right has been manifested in local names to the same extent as in England. The feeling seems, indeed, to have been more or less enchorial, for we find strong indications of it even in the pure Celtic names of Britain. Probably more than one-half of the Celtic names in Wales and Ireland contain the roots llan, kil or bally, all of which originally denoted an inclosure of some kind. The Teutonic suffixes which do not denote inclosures, such as gau, dorf, leben, hausen, stadt, and stein, all so numerous in Germany, are not reproduced in England to anything like the same extent as on the Continent. It would seem, therefore, that the English passion for inclosures is due partly to the Celts who were gradually absorbed among the Saxon colonists, and partly to the necessity for protection felt by intruding colonists settling among a hostile and alien race.

The suffix ton constitutes a sort of test-word by which we are enabled to discriminate the Anglo-Saxon settlements. It is the most common termination of English local names; and although it is a true Teutonic word, yet there is scarcely a

---

1 This characteristic of the Teutonic race did not escape the acute observation of Tacitus. "Colunt discretac diversi, ut fons, ut campus, ut nemus placuit. Vicos locant, non in nostrum morem connexis et cohaerentibus sedificiis: suam quisque domum spatio circumdat."—Germania, § 16.
single instance of its occurrence throughout the whole of Germany. In the little Anglo-Saxon colony on the French coast it is as common as it is in England, and it is not unfrequent in Sweden—a fact which may lead to the establishment of a connexion, hitherto unsuspected, between the Anglo-Saxon colonists of England and the tribes which peopled eastern Scandinavia.

The primary meaning of the suffix *ton* believed to be related to the Celtic *dun* (whence the suffix -don) denotes a place surrounded by a hedge. In modern Dutch *tuin* means a “garden,” and in modern German we find the word *Saun*, a hedge, and in Anglo-Saxon we have the verb *tyan*, to hedge. The phrase “hedging and tining,” for hedging and ditching, was current two hundred years ago. Brushwood used for hedging, is called *tinetum* in law Latin. Hence a *tun*, or *ton*, was a place surrounded by a hedge, or rudely fortified by a palisade. Originally it meant only a single croft, homestead, or farm, and the word retained this restricted meaning in the time of Wycliffe. He translates Matt. xxii. 5, “but thei dispiseden, and wenten forth, oon into his toun (ἀγός), another to his marchaundise.” This usage is retained in Scotland, where a solitary farmstead still goes by the name of the *toun*; and in Iceland, where the homestead, with its girding wall, is called a *tun*. In many parts of England the rickyard is called the *barton*—that is, the inclosure for the bear, or crop which the land bears. The sixty English villages called BARTON or BURTON must, at first, have been only outlying rickyards. Usually, however, the *ton* included the settler’s house. In a few cases the features of the original settlement are still conserved. Thus

1 We have, however, Altona, near Hamburg, and Ost- and West-tönne in Westphalia.

2 *E.g.* Colincthun, Alencthun, and Todincthun. See p. 89.

3 *E.g.* Eskilstuna, Sollentuna, Wallentuna, Sigtuna, and Frötuna.

4 Sweden takes its name from the Suiones who peopled it. The Suiones are probably identical with the Suevi or Swabians who, as will be shewn, contributed largely to the Teutonic colonization of England.

5 The root is widely diffused through the Aryan languages. Compare the Slavonic *tuin*, a hedge, and even the Armenian *tun*, a house.
the lone farmhouses in Kent called Shottington, Wingleton, Godington, and Appleton, may be regarded as venerable monuments, showing us the nature of the Saxon colonization of England. But in most cases the isolated *ton* became the nucleus of a village, then the village grew into a *town*, and, last stage of all, the word *town* has come to denote, not the one small croft inclosed from the field or the forest by the first Saxon settler, but the dwelling-place of a vast population, twice as great as that which the whole of Saxon England could boast.

The Anglo-Saxon *yard*, and the Norse equivalent *garth*, contain nearly the same idea as *ton*. It denotes some place guarded or girded round.

The same may be said respecting *stoke*, or *stow*, another common suffix, which we find in *Basingstoke* and *Alverstoke*. A *stoke* is a place stockaded, surrounded with *stocks* or piles, like a New Zealand *pah*. A somewhat similar inclosure is denoted by the suffix *fold* (A.-S. *falod*). This was a stall or place constructed of felled trees, for the protection of cattle or sheep.

The Anglo-Saxon *weorthig*, which appears in English names in the form of *worth*, bears a meaning nearly the same as that of *ton* or *garth*. It denotes a place warded, or protected. It was, probably, an inclosed homestead for the churls, subordinate to the *tun*. We find this suffix in the names of *Bosworth*, *Tamworth*, *Kenilworth*, *Walworth*, *Wandsworth*, and many other places.

A *haigh*, or *hay*, is a place surrounded by a hedge, and appears to have been usually an inclosure for the purposes of the chase. We find it in *Rothwell Haigh*, near Leeds;

---

1 Cf. the German *gerte*, and the Anglo-Saxon *gerd*. The Goths and Franks seem to have introduced the word *jardin* into the French, Spanish, and Italian languages. Of cognate origin are the Albanian *gërdine*, the Servian *gràdena*, the Russian *gorod* and *grad*, and the Persian *gird*, a city or fortified town.

2 From the Anglo-Saxon *warian*, to ward or defend. A *weir* which wards off the waters of a river, is from the same root. Compare the Sanskrit *vri*, to protect, and the Zend *vra*, a place hedged round.

3 Bosworth is a *worth* containing a *boose* or cowstall. (Anglo-Saxon *bós.*)
Haye Park, at Knaresborough; and Horshay, near Colebrookdale. The word park, which is of kindred meaning, seems to have been adopted by the Saxons from the Celtic parw, an inclosed field.

Related to the Anglo-Saxon verb beorgan, and the German bergen, to shelter or hide, are the suffixes bury, borough, burgh, brough, and barrow. Sometimes these words denote the funeral mound which gave shelter to the remains of the dead, but more frequently they mean the embanked inclosure which afforded refuge to the living. Such places were often on the crests of hills; hence the word came to mean a hill-fortress, corresponding to the Celtic dun. In Anglo-Saxon a distinction was made between beorh, which answers to the German berg, a hill, and buruh, which is the equivalent of the German burg, a town. This distinctive usage is lost in modern English. The word barrow, however, is generally confined to funeral mounds, as in Inglebarrow. Burgh and brough, which we find almost exclusively in Northumbria, as Jedburgh, Broughton, Brough, are Anglian and Norse forms; so also, probably, are four-fifths of the boroughs; as for example Peterborough, Scarborough, Marlborough, while bury is the distinctively Saxon form.

The suffix ham, which is very frequent in English names, appears in two forms in Anglo-Saxon documents. One of

1 The Hague (correctly Gravenhage, the count’s hedge) was originally a hunting-seat of the Counts of Holland. Cf. the Dutch haag, an inclosure; the old High-German hag, a town; the German hagen, to hedge; the French haie, a hedge; and the English ha-ha, and hawthorn, or hedge-thorn. The source seems to be the Sanskrit kakscha, which means “bush” and also a “fence.”

2 Compare the phrases to burrow in the earth; to borrow, i.e. to obtain goods on security; to bury, i.e. to hide in the earth; the bark of a tree is that which hides or covers the trunk. This widely diffused root appears to have been introduced from the Teutonic into the Romance languages. To it we may refer Burgos, Bergamo, Cherbourg, Luxembourg, Pergam, and scores of other names spread over Europe and Asia. Gothic baurgs, Greek πόργος, Macedonian βόργος. Even the Arabs borrowed burg, a fortress, from the Goths. Etymology shows that the Roman oppidi, like the English borough, was originally an earthwork.
these, hām, signifies an inclosure, that which hems in—a meaning not very different from that of ton or worth. These words express the feeling of reverence for private right, but hām involves a notion more mystical, more holy. It expresses the sanctity of the family bond; it is the home, the one secret (geheim) and sacred place. In the Anglo-Saxon charters we frequently find this suffix united with the names of families—never with those of individuals. This word, as well as the feeling of which it is the symbol, was brought across the ocean by the Teutonic colonists, and it is the sign of the most precious of all the gifts for which we thank them. It may indeed be said, without exaggeration, that the universal prevalence throughout England of names containing this word home, gives us the clue to the real strength of the national character of the Anglo-Saxon race. What a world of inner difference there is between the English word home, and the French phrase chez nous! It was this supreme reverence for the sanctities of domestic life which gave to the Teutonic nations the power of breathing a new life into the dead bones of Roman civilization.

The most important element which enters into Anglo-Saxon names yet remains to be considered. This is the syllable ing. It occurs in the names of more than one-tenth of the whole

---

1 This is, for the most part, the source of the Frisian suffix um, which fringes the coast-line of Hanover and Oldenburg. It occurs in Holstein and part of Sleswic, in the Danish islands Sylt and Föhr, and in the Frisian colony in Yorkshire. See p. 92, infra. It should be noted, however, that the suffix um is sometimes only the sign of the dative plural.

2 Cognate with hām is the German heim, home, which enters so largely into the names of Southern Germany. We have also the Gothic haimis, the Lithuanian kaimas, and the Greek κωμη, a village. The ultimate root seems to be the Sanskrit श, to repose. Cf. κείωμαι and κοιμώμαι.

3 Mr. Kemble has compiled a list of 1,329 English names which contain this root. To ascertain the completeness of the enumeration, the Ordnance Maps of three counties—Kent, Sussex, and Essex—were carefully searched, and it was discovered that Mr. Kemble had overlooked no less than forty-seven names in Kent, thirty-eight in Sussex, and thirty-four in Essex. If the omissions in other counties are in the same ratio, the total number of these names would be about 2,200. Large additions might also be made from Domesday Book. The Exon and Ely Domesdays alone contain thirty-six names not given by Mr. Kemble.
number of English villages and hamlets, often as a simple suffix, as in the case of Barking, Brading, Dorking, Hastings, Kettering, Tring, or Woking; but more frequently we find that it forms the medial syllable of the name, as in the case of Buckingham, Kensington, Islington, Haddington, or Wellington.

This syllable *ing* was the usual Anglo-Saxon patronymic. Thus we read in the Saxon Chronicle (A.D. 547):

\[
\begin{align*}
Ida \ &\text{was Eoppa's son}, \\
Eoppa \ &\text{was Esa's son}, \\
Esa \ &\text{was Ingwy's son}, \\
Ingwy, \ &\text{Angenwit's son}.
\end{align*}
\]

In fact the suffix *ing* in the names of persons had very much the same significance as the prefix Mac in Scotland, O' in Ireland, Ap in Wales, or Beni among the Arabs. A whole clan or tribe, claiming to be descended from a real or mythic progenitor, or a body of adventurers attaching themselves to the standard of some chief, were thus distinguished by a common patronymic or clan name.

The family bond, which, as we have seen, was so deeply revered by the Anglo-Saxon race, was the ruling power which directed the Teutonic colonization of this island. The Saxon immigration was, doubtless, an immigration of clans. The head of the family built or bought a ship, and embarked in it with his children, his freedmen, and his neighbours, and established a family colony on any shore to which the winds might carry him. The subsequent Scandinavian colonization was, on the other hand, wholly or mainly effected by soldiers of fortune, who abandoned domestic ties at home, and, after a few years of piracy, settled down with the slave women whom they had carried off from the shores of France, Spain, or Italy, or else roughly wooed the daughters of the soil which their swords had conquered. Thus the Scandinavian adventurers Grim, Orm, Hacon, or Asgar, left their names at Grimsby, Ormsby, Hacoby, and Asgarby; whereas in the Saxon districts

---

1 It may be observed that the etymology of the word *clan* proves the patriarchal nature of the Scottish clans. It is derived from the Gaelic *cluain*, children. So the Teutonic *king* was the kinsman of the tribe he ruled.
of the island we find the names, not of individuals, but of clans. It is these family settlements which are denoted by the syllable \textit{ing}. Hence we perceive the value of this word as an instrument of historical research. In a great number of cases\(^1\) it enables us to assign to each of the chief German clans its precise share in the colonization of the several portions of our island.

In investigating the local topography of England, we constantly meet with the names of families whose deeds are celebrated in the legendary or historic records of the Teutonic races. Thus members of a Frankish clan—the Myrgings, or Maurings, of whom we read in the “Traveller’s Song,” and who, at a later time, are familiar to us as the Merovingian dynasty of France—seem to have settled in England at 

\textit{Merring} in Nottinghamshire, and at 
\textit{Merrington} in Durham and Shropshire. The family of the Harlings, whose deeds are also chronicled in the “Traveller’s Song,” is met with at 

\textit{Harling}, in Norfolk and in Kent, and at 
\textit{Hartington}, in Bedfordshire and Middlesex. The families of the Brentings, the Scyfings (a Swabian race), the Banings, the Hælsings, the Hócings,\(^2\) and the Scæringhs, which are all mentioned in Beowulf or in the “Traveller’s Song,” are found at 

\textit{Brentingley}, 
\textit{Shilvington}, 
\textit{Banningham}, 
\textit{Helsington}, 
\textit{Hucking}, 
\textit{Woking}, 
\textit{and Sherringham}; and the Scyldings—a Danish family, to which Beowulf himself belonged—are found at 
\textit{Skelding} in Yorkshire. In the Edda and in Beowulf we read of the Wælsings, a Frankish race, whom we find settled at 

\textit{Wolsingham} in Norfolk, 
\textit{Woolsingham} in Durham, and 
\textit{Wolsingham} in Northumberland. The Thurings, a Visigothic clan, mentioned by Marcellinus, Jornandes, and Sidonius Apollonaris, are found at 
\textit{Thorington} in Suffolk and 
\textit{Thorrington} in Essex.

\(^1\) The syllable \textit{ing} has sometimes a topographic rather than a patronymic signification. Thus, in the Chronicle and the Charters, mention is made of the Centings, or men of Kent, the Bryfordings, or men of Bradford, and the Bromleagings, or men of Bromley. Sometimes the suffix \textit{ing} has simply the force of the genitive singular. In a few cases, used as a prefix, it denotes a meadow, as \textit{ingham}, and \textit{ingrove}.

\(^2\) The Hócings are probably the same as the Chauci of Tacitus—the interchange of \textit{k} to \textit{ch} or \textit{w} often takes place, as in the case of \textit{Chatti} and \textit{Hesse}. The Wokings were probably the same as the Hócings.
The Silings, a Vandal tribe, mentioned by Ptolemy, are found at SELLING in Kent. The Icelings, the noblest family of Mercia, are found at ICKLINGHAM in Suffolk. The Hastings, the noblest race of the Goths, are found at HASTINGLEIGH in Kent, and HASTINGS in Sussex. The Ardings, the royal race of the Vandals, are found at ARDINGTON in Berkshire, and ARDINGLEY in Sussex; and a branch of the royal Visigothic family is found at BELTING in Kent. The Irings, the royal family of the Avars, are found at ERRINGHAM in Sussex, and at ERRINGTON in Yorkshire. The Varini, who are placed by Tacitus in juxtaposition with the Angli, are found at WARRINGTON in Lancashire and Bucks, and at WERRINGTON in Devon and Northamptonshire. The Billings, who were the royal race of the Varini, seem, as might have been anticipated, to have profited extensively by the conquest of England, for we find their name in no less than thirteen places, as BILLINGE, BILLINGHAM, BILLINGLEY, BILLINGTON, and BILLINGSHURST. The Åscings, the royal race of Kent, are likewise found in thirteen places. The Cyllings and the Wealings are found in twelve places; the Dodings, the Wittings, and the Willings in eleven; the Ofings in ten; the Donings and the Sillings in nine; the Edings, the Ellings, the Hardings, and the Lings in eight; the Fearings, the Hemings, the Herrings, the Holings, the Hornings, the Newings, the Serings, and the Wasings in seven; the Cannings, the Cerrings, the Hastings, the Lullings, the Hannings, the Stannings, the Teddings, the Tarings, and the Withings in six; the Bennings, the Bings, the Bobbings, the Cædings, the Collings, the Gillings, and the Stellings in five; and the remaining 400 or 500 patronymics in four or a smaller number of places. Some families seem to have spread much more widely than others. Of many only an isolated local name bears witness, some are confined to a single county, while the names of others, as the Åscings and the Billings, are spread far and wide throughout the island.

Where the patronymic stands without any suffix, as in the case of MALLING, BASING, or HASTINGS, Mr. Kemble thinks that we have the original settlement of the clan, and that the names to which the suffixes *ham* or *ton* are applied mark the filial colonies sent out from this parent settlement. This theory
derives considerable support from the way in which these patronymics are distributed throughout the English counties. By a reference to the subjoined table, which represents the proportion of names of these two classes to the acreage of the several counties, it will be seen that the names of the former class are chiefly to be found in the south-eastern districts of the island, where the earliest Teutonic settlements were formed,—namely, in Kent, Sussex, Essex, Middlesex, Norfolk, Suffolk, and the adjacent counties,—and that they gradually diminish in frequency as we proceed towards the northern and western counties. Still farther to the west, as in Gloucestershire and Warwickshire, the names of the former class are very rare; those of the second abound. In the semi-Celtic districts of Derbyshire, Devonshire, and Lancashire, names of either class become scarce, while in Cumberland, Westmoreland, Cornwall, and Monmouth they are wholly or almost

wholly wanting. This remarkable distribution of these names accords with the supposition that the Saxon rule was gradually extended over the western and central districts by the cadets of families already settled in the island, and not by fresh immigrants arriving from abroad.

England is not, however, the only country which was conquered and colonized by the Anglo-Saxon race. In the old French provinces of Picardy and Artois there is a small well-defined district, about the size of Middlesex, lying between Calais, Boulogne, and St. Omer, and fronting the English coast, in which the name of almost every village and hamlet is of the pure Anglo-Saxon type. To exhibit graphically the distribution of these Saxon villages the accompanying sketch-map has been constructed. Each dot represents the position of one of the Saxon names.

SAXON NAMES IN PICARDY AND ARTOIS.
These names are, most of them, identically the same with village-names to be found in England.

Thus we have in the

We have also such familiar English forms as Graywick, Brucedal, Marbecq, Longfosse, Dalle, Vendal, Salperwick, Fordebecques, Staple, Crehem, Pihem, Dohem, Roqueton, Hazelbrouck, Roebeck, and the river Slack. Twenty-two of the names have the characteristic suffix *-ton*, which is scarcely to be found elsewhere upon the Continent; and upwards of one hundred end in *ham, hem*, or *hen*. There are also more than one hundred patronymics ending in *ing*. A comparison of these patronymics with those found in England proves, beyond a doubt, that the colonization of this part of France must have been effected by men bearing the clan-names which belonged to the Teutonic families which settled on the opposite coast. A few phonetic changes are worthy of notice. We find *ham* once or twice close to the coast—the usual form, however, is *hem*—and farther inland it changes to *hen*; while *ing* is sometimes changed into *eng* or *inc*, and *gay* into *gue*. The suffix *gay*, which we find in Framlingay and Gamlingay, is found abundantly in those parts of Germany from whence the Saxons emigrated. It there takes the form *gau*. This word originally denoted a forest clearing, hence afterwards it came to mean the primary settlement with independent jurisdiction, like the Cymric *tref*. 
Thus we have

These correspondences, a complete list of which would fill pages, afford convincing proof that the same families which gave their names to our English villages also made a settlement on that part of the French coast which lies within sight of the English shore.

The question now arises whether the Saxons, as they coasted along from the mouths of the Weser and the Rhine, made the Boulogne colony a sort of halting-place or stepping-stone on their way to England, or whether the French settlement was effected by cadets belonging to families which had already established themselves in this island.

In favour of the latter view we may adduce the entire absence of Saxon names from that part of the coast which lies to the north-east of Cape Grisnez. Why should the intending settlers have passed along this stretch of coast, and have left it entirely untouched? The sketch-map shews conclusively that the colonists did not arrive from the east, but from the west—the Saxon names radiate, so to speak, from that part of the coast which fronts England. And the names are arranged exactly as they would have been if the invaders had set sail from Hythe for the cliffs on the horizon. The district about St. Omer was evidently colonized by men who landed, not in the neigh-
bourhood of Dunkerque, but in the neighbourhood of Boulogne. Again, if any importance is to be attached to Mr. Kemble’s theory of original and filial settlements, the Saxon villages in France must all have been filial settlements. We find that ing is never a mere suffix; in every case it forms the medial syllable of the name.

On the other hand, it may be said that these names mark the position of the “Litus Saxonicum in Belgica Secunda”—the coast settlement of the Saxons in Flanders—which is mentioned in the “Notitia Imperii.” This Litus Saxonicum existed as early as the third century, and therefore, it may be urged, its foundation must have been long anterior in date to the Saxon colonization of Britain, which, according to the chroniclers, commenced in the fifth century, with the arrival of Hengist and Horsa. Eutropius informs us that the Emperors Diocletian and Maximian appointed Carausius, “apud Bononiam” (Boulogne), to protect the Flemish coast and the adjoining sea, “quod Saxones infestabant.” Carausius was a Menapian; that is, a native of the islands near the mouth of the Rhine. He was probably himself one of those pirates whose incursions he was appointed to suppress. Carausius, it would seem, entered into a compact with his Saxon kinsmen, and promoted their settlement, as subsidized naval colonists, in the neighbourhood of his fortress at Boulogne.

It may be said, in reply, that the date ordinarily assigned for the commencement of the Saxon colonization of Britain is too late by at least a couple of centuries. Even in the time of Agricola the Saxon piracy had begun. In the south-east of England a Saxon immigration seems to have been going on in silence during the period of the Roman rule. Without supposing, as some inquirers have done, that the Belgae, whom Cæsar found in Britain, were Low Germans in blood and speech, we may suppose that, after the extermination of the Iceni, the desolated lands of Eastern Britain were occupied by German colonists. In Essex and Suffolk there is a smaller proportion of Celtic names than in any other district of the island, and this would indicate that the Germanization of those counties is of very ancient date. Gildas, Nennius, and Beda, among all their lamentations over the “destruction of Britain” by the Jutish
and Saxon invaders, are strangely silent as to any settlements on the eastern coast, where, from geographical considerations, we might have expected that the first brunt of invasion would be felt. While we can trace the progress of the Saxons in the western and central districts of England, with respect to the east both the British bards and the Saxon chroniclers are dumb. They tell us of no conquests, no defeats. Descents had, however, been made, for we learn from Ammianus Marcellinus that, nearly a century before the date assigned by Beda for the landing of Hengist and Horsa, London was taken by Saxon invaders, who slew the Duke of Britain and the Count of the Saxon shore.

This name alone might suffice to set the question at rest. Even before the time of Constantine, there was in England, as well as in Flanders, a Litus Saxonicum, or Saxon coast settlement, which extended from Brancaster in Norfolk as far as Shoreham in Sussex. The Roman names of the places in this district seem in some cases to be referable to Teutonic rather than Celtic roots. The modern name of Reculvers probably approximates very closely to the original word which was Latinized into Regulbium, and it suggests the settlement of a Teuton named Raculf. The name of Dover, Latinized into Dubris, reminds us of Douvres in the Saxon shore near Bayeux, and of Dovercourt in the intensely Teutonized district near Harwich, as well as of the Dovrefjeld in Norway; and Thanet, also a Teutonic name, appears in the pages of Solinus, an author certainly not later than the fourth century.

There are also several concurrent indications that the district of Holderness was occupied by Teutonic settlers before the close of the Roman rule. Holderness is a fertile tract of some 250 square miles, bounded on the north, east, and south by the sea and the Humber, and on the west by the Wolds, which were probably a frontier of wooded and impenetrable hills. In this district Ptolemy places a people whom he calls the Παρισιοί. Grimm has shewn that the Old German p is

1 The name of the British usurper, Tetricus, whose date is about 270 A.D., appears to be only the German name Dietrich in a Latinized form.
2 The name Holderness means the wooded promontory of Deira. The Wolds are “the woods.” Cf. the German wald.
interchangeable in Latin with $f$, the aspirated form of the same letter. This would lead us to identify the Παπίσιον with the Frisi or Frisians.\(^1\) In the same district Ptolemy places Petuaria, a name which cannot be explained from Celtic sources, but which points undoubtedly to the German root *ware*-inhabitants, which appears in Cantware, Wihtware, and so many other names.\(^2\) Nor is this all, for Ptolemy gives us a third name in the district of Holderness, Gabrantovicorum Sinus, which must be either Filey Bay or Bridlington Bay. Now, this word contains the root *vic*, which was the appellation of a bay in the language of the *vikings* or Bay-men who, at a later period, descended in such numbers from the Frisian region.

There seems therefore to be good ground for assigning for the commencement of the Saxon settlements in Britain a date anterior to the time of Carausius,\(^3\) and we may believe that the Saxon settlement in Flanders may be partly due to the energetic measures by which he compelled or induced the Saxon pirates, who were establishing themselves on the British coast, to seek a new home beyond the channel.

There was also a third Litus Saxonicum, in the neighbourhood of Caen, and which extended as far as the islands at the mouth of the Loire, where the population still retains the distinctive outward marks of Saxon blood. The Swabian *leti* who, as we learn from the Notitia, were settled at Bajocca (Bayeux), may have formed the nucleus of this settlement. In the year 843 the annalists mention the existence of a district in this neighbourhood called Otlinga\(^4\) Saxonica, and Gregory of Tours

---

\(^1\) The Frisian form of *ham* is *um*. See p. 82. Holderness is the only part of England where this form occurs. Here we find the village-names Arg-*am*, News-*om*, Holl-*ym*, Arr-*am*, Rys-*om* Garth, and Ulr-*ome*, as well as Owstwick, another Frisian form. The village of Frismersk is now washed away. Names in *-om* or *-um* are often dative plurals.

\(^2\) Ptolemy also gives us a Vand-*uar-*ia, near the wall, apparently a settlement of some tribe of Vandals or Wends.

\(^3\) The date usually assigned to the landing of Hengist and Horsa is 449 A.D. The Saxons took London in 367. Carausius was appointed in 287. The latest writer on the subject places the commencement of the Saxon colonization "three or four centuries" before 449.

\(^4\) This phrase, which has elicited so many ingenious etymological guesses,
speaks of the "Saxones bajocassini." This Saxon settlement dates from the third century, and its formation was probably contemporaneous with that of the colony in Picardy. By the aid of local names we can still trace its sharply defined boundaries.\(^1\) It will be seen that in the departments of the Eure and of the Seine Inférieure, where the Danish names of a later period are so thickly clustered, hardly a single Saxon name is to be found, while in the department of the Calvados, and in the central portion of La Manche, where the Danish names are comparatively scarce, their place is occupied by names of the Saxon type. The Northmen seem to have respected the tenure of their Teutonic kinsmen, and to have dispossessed only the Celtic tribes who dwelt to the east and north-west of the Saxon colony. It is curious to note that the artificial landscape in this Saxon district is of a thoroughly English type. The sketcher might imagine himself in Devonshire or Kent. The country is divided by thick hedgerows into small irregular crofts, and the cottages are unmistakably English rather than French in structure and appearance.\(^2\)

In this neighbourhood we find the village-names of Sassetot (Saxons'-field), Hermanville, Étréham or Ouistreham (Westerham), Hambye, le Ham, le Hamelet, Cottun (cows' yard), Etainhus, Heuland (highland), Plumetot (Blomfield or Flowerfield), Caen, which was anciently written Cathem and Catheim, and Douvres, on "the shore," which reminds us of our own Dover. There are also about thirty Saxon patronymics. It is curious to observe in how many cases we find the same families on the opposite coast of Hants, Dorset, Devon, and Cornwall. In the whole of Cornwall there are only two patronymic names, and both of these are also found among the thirty on the opposite coast.

\(^1\) See the coloured map, and the sketch map of Normandy in the next chapter.

\(^2\) These two characteristic features of Saxon colonization are also to be noted in the Litus Saxonicum near Boulogne.

Local names are of great value when we attempt to estimate the amount and the distribution of the Teutonic element in the population of France. It is only by means of the local names that we are enabled to prove that certain parts of modern France are as thoroughly Teutonic in blood as any portion of our own island. The historical evidence is meagre and vague, and the philological analysis of the modern French vocabulary would give a most inadequate notion of the actual numbers of the Frank and Burgundian colonists. There are not more than five hundred words in the French language which were introduced by the German conquerors. A large proportion are names of weapons and military terms, such as gonfanon; massacre from metzger, a butcher; bivouac from beiwacht; guerre from werra, war; and the chasse from hetzen. The other words are chiefly the names of articles of dress, of beasts of the chase, and terms belonging to the feudal system. To these must be added the points of the compass, nord, sud, est, ouest.¹

¹ The fact that in these cases the Teutonic terms should have displaced their Romance equivalents is a striking indication of the more mobile habits
The Germanization of France commenced with settlements of subsidized colonists, *lati,* who were introduced by the Roman rulers to defend the frontier. According to the Notitia there were Batavian *lati* at Arras. The Emperor Julian transported thousands of the Chattuarii, Chamavi, and Frisii, to the neighbourhood of Amiens, Beauvais, and Langres. The system was continued at a later period. Charlemagne transported into France a vast multitude of Saxons—*multitudinem Saxonorum cum mulieribus et infantibus.* After another Saxon conquest he transplanted every third man—*tertium hominem*—of the vanquished people. A few of the German names in France may be due to these forced immigrations, but by far the greater number are, no doubt, records of the settlements of the Frank and Burgundian conquerors. The area and intensity of this German colonization may conveniently be traced by means of the patronymic village-names, of which there are more than 1100 in France.

The subjoined sketch-map, which gives the political frontier of France prior to the late annexations, will give an approximate idea of the distribution of these names.

The Isle of France, especially the department of the Aisne, the Upper Valley of the Loire above Orleans, and the provinces of Franche-Comté and Burgundy, present numerous names of the patronymic class. In that part of the old province of Lorraine which has just been re-annexed to Germany, almost every village-name is patronymic, and bears witness to the extensive colonization effected by the Frankish conquerors. The shaded district (Alsace) is also full of names of the pure of the German tribes as contrasted with the stationary life of the Celto-Latin inhabitants. The radical meaning of the word *west* is perhaps the vast, the vastitudo, or great unknown region lying before the conquerors as they advanced from the east. The Romance words introduced into the Teutonic languages are chiefly ecclesiastical, a fact which, connected with the nature of the terms conversely introduced into the Romance languages, suggests curious speculations as to the reciprocal influence of the rude conquerors and their more civilized subjects. German was spoken in France more or less for some 400 years after the Teutonic conquest. So late as the year 812 A.D. the Council of Tours ordained that every bishop should be able to preach both in the Romance and Teutonic languages.

A Latinization of the German word *leute,* people. The *lathes* of Kent are probably a vestige of the latic organization.
German type, few of which, however, are patronymic. It is worthy of note that the German settlers took possession of the fertile valleys of the great rivers, leaving the barren uplands almost wholly undisturbed. It is manifest also that the whole of the south and west of modern France was unaffected by the Teutonic invasion.

The towns indicated by initials are Amiens, Caen, Rouen, Paris, Rheims, Treves, Chalons, Troyes, Dijon, Strasburg, and Maçon.

Of the 1100 patronymic village-names in France, about 250, or nearly one-fourth, are also to be found in England—the proportional number of identifications being far smaller than in the case of the Litus Saxonicum in Picardy, where it is more than three-quarters.
Thus we have the

It is difficult to account for these resemblances on the ordinary theory that England was colonized exclusively by Saxons and Angles, and France by Franks and Burgundians. We find that numerous Frankish, Vandal, Visigothic, Gothic, and Burgundian families settled in England, while many Anglian and Saxon families have recorded their names in the list of French villages. It is therefore certain that a large number of Frank adventurers must have joined in the descents which the Saxons made on the English coast: and many Saxons must have found a place in the ranks of the Frankish armies which conquered North-eastern France. The chroniclers, when mentioning the earlier invasions and piratical attacks, attribute them to Franks and Saxons, or to Saxons and Lombards in conjunction. 1 The Welshman Llywarc Hen uses

1 Eutropius, Julian, and Ammianus Marcellinus associate the Franks and Saxons in this manner. Ammianus Marcellinus places Alemanni in Britain; Lappenberg believes that the Saxons were accompanied by large numbers of Franks, Frisians, and Lombards; and Latham thinks that Kent was largely colonized by Franks.
Frank as an equivalent for Saxon. The evidence leads to the conclusion that the various tribes between the Rhine and the Elbe—Franks, Saxons, Angles, Sueves, Lombards, and Burgundians—were united by a much closer connexion— ethnological, geographical, and political—than historians have hitherto been willing to admit. At all events, the speech of all these invading tribes must have been mutually intelligible. Indeed, there are reasons for believing that the names of Frank, Saxon, and Lombard are not true ethnic names, but that they were only the designations of temporary confederations for military purposes, an hypothesis which would be almost reduced to a demonstration if we could succeed in establishing that plausible etymology of these names which makes them descriptive terms relating to the equipment of the invading hosts—whether armed with javelin (franca), sword (seax), or partisan (langbarta).

Little need be said respecting the German names in Italy. Paulus Diaconus and Gregory of Tours assert that the conquest was effected by Saxons and Lombards. The Lombard German was commonly spoken in Northern Italy, till the year 800 A.D. We find the names of the early Lombard kings are of a pure Anglo-Saxon type. Thus Audouin and Alboin are, no doubt, the same names as Edwin and Elfwine. There are several clusters of patronymic names in Northern Italy. One of these is to be found on the southern side of the Po, opposite the mouth of the Dora Baltea, where we have the villages of VARENGO, ODANELGO, TONENGO, GONENGO, and SCALENGHE. Near Biella there is another cluster of these names—VALDENG, ARBENG, BOLENG, and TERNENG. Near Milan we find MARENG and MORENG; and near Brescia—BOVENG and PISOGNE. In the villages of RONEGNO and TORCEGNO, in the Valle Sugana, German is still spoken. All these patronymics reappear in England, where we find the village-names of Warrington, Athelney, Donnington, Connington, Skillington, Waldingfield, Erpingham, Bolingbroke, Thurning, Marrington, Bovington, Bessingham, Rockingham, and Torkington.

There are not many undoubtedly Teutonic names in Spain.

1 See p. 54, supra.
We have, however, the notable exception of Burgos, as well as Collunga and Meville, both of which are within the limits of the Swabian kingdom, which comprised Galicia, the Asturias, and part of Portugal.

It has been generally assumed that the original home of the Saxons is to be sought between the mouths of the Elbe and the Weser. I have made a careful search in this region for names identical or analogous with those which are found in Saxon England. But the investigation was remarkably barren of results; the names, for the most part,\(^1\) proving to be of an altogether dissimilar type. The search was continued over Mecklenburg, Holstein, Friesland, and the greater part of Germany. A few sporadic names were found, but always surrounded and outnumbered by names possessing no distinctive Anglo-Saxon character. There is, however, in a most unlikely corner of the Continent, a well-defined district, rather larger than Devonshire, where the names, though slightly disguised in form, are as characteristically Saxon as those found in the Boulogne colony. This district is confined chiefly to the Valley of the Neckar, but just crosses the watershed between the Neckar and the Danube. It occupies the northern half of the modern kingdom of Württemberg, and includes a small portion of Bavaria in the neighbourhood of Donauwörth. It also stretches into the State of Baden, between Heidelberg and Bruchsal. It does not extend to the left bank of the Rhine, or to the right bank of the Lower Neckar. In Württemberg, however, it occupies both banks of the Neckar. The railway from Bruchsal to Ulm, with its serpentine windings and fearful gradients, carries the tourist through the centre of this district—which has attractions for the artist and the angler, as well as for the ethnologist.

This district comprehends the southern portion of the region which used to be known as Franken, or Franconia, together with the northern part of Swabia, or Schwabenland, as well as a region which in mediæval times bore the name of the An-

\(^1\) Names in wick and wich, so common in England, are found on the Continent only in the Netherlands, Friesland, and old Saxony. The horsts which abound in Kent and Sussex, are found also on the Weser in Westphalia.
GLADEGAU. Etymologically and historically, Franconia is the land of the Franks, and Schwabenland is the land of the Suevi, just as England is the land of the Angles. We have already seen that Franks and Saxons were closely associated in the conquest of England, so much so that the names are used almost interchangeably. The same close connexion subsists also between the Suevi and the Angles. Tacitus locates the Suevi near the Angles; and Ptolemy even speaks of the Suevi as one division of the Angles: τῶν δὲ ἐντὸς καὶ μεσογείων ἐθνῶν μέγιστα μέν ἐστι τὸ τῶν Σουήβων τῶν Ἀγγειλῶν. And it is a very significant fact that in mediæval times the Swabian borderland south of Heidelberg should be called the ANGLADEGAU.

The ancient charters of this district, extending from the eighth to the twelfth centuries, have been admirably edited, and published by the Government of Württemberg. The local names which occur in these charters are, to a surprising extent, identical with those in the Anglo-Saxon charters, published by the English Historical Society. Twenty-four very remarkable correspondences have been noted by Professor Leo, and it would be easy largely to increase the list.

But confining ourselves to the names which have survived to the present time, I find in the maps of the admirable Government Survey of Württemberg no less than 344 patronymics, of which 266, or 80 per cent. occur in England, and a large number also in France. The evidence is overwhelming. It proves that the villages of Württemberg and the villages of England were originally settled by men bearing the same family names. Detailed lists of these correspondences were given in the former editions of Words and Places; a few instances must now suffice. Thus the Æslingas are mentioned in a Kentish charter, we have Eslingaforda in the Exon Domesday, and ISLINGTON in Norfolk and Middlesex. In Artois we find ISLINGHEM and ESLINGHEN; and in Württemberg there are several villages named ESSLINGEN, EISLINGEN, and AISLINGEN. Again, the

1 Wirtembergisches Urkundenbuch, herausgegeben von dem Königlichen Staatsarchiv in Stuttgart. Edid. Kausler; two vols. 4to. 1849 and 1858.

2 Codex Diplomaticus Ævi Saxonici, opera Ioh. M. Kemble; six vols. 8vo.
Basingas, who are mentioned in an Anglo-Saxon charter, appear at Bessingham in Norfolk, at Bazingham in Artois, and at Bissingen in Württemberg. The Birlingas appear in a Worcestershire charter; we have Birl in Kent, Birlingham in Worcestershire, Barlinghem and Berlinghen in Artois, and in Württemberg Bierlingen—a place which has been identified with the Birlingen of an ancient charter. So also we have Bocking in Essex, Bouquinghem in Artois, and Bœchingen in Württemberg.

These Swabian names terminate almost universally in -ing-en. The suffix en is usually the sign of the dative plural. Thus Birlingen would mean “At the Birlings,” that is, "at the place where the family of Birl lives.” 1 It should, however, be noted that a name like Birlingen may be a corruption of the Berlingen which we find in Artois. The hen in this case is, undoubtedly, a corruption of hem, for we find that close to the coast the village-names end in hem, a suffix which passes into hen as we approach the Belgian frontier. The hem of Artois is undoubtedly only a phonetic modification of the English hám; and it is therefore a question whether the -ing-en of Württemberg is not the same as the -ing-ham of England, since we can trace it through the intermediate stages of inghen and inghem. 2

What interpretation shall we put upon these facts? Shall we conclude that the cradle of the Saxon race is to be sought in the Valley of the Neckar, or were Swabia and England both colonies from a common motherland? In the case of a fluvial migration the descent of the river would be far more easy, and therefore far more probable, than the ascent against a rapid current like that of the Rhine. But this argument is of small

1 So Baden is a dative plural answering to Thermis or Aquis. Holstein, Sweden, Hessen, and Preussen are also dative plurals.

2 In Switzerland heim often becomes en: e.g. Altheim is now Alten, Dachsheim is now Dachsen, Sickingen was anciently Sickingheim. In Hesse we find Sielen, anciently Silheim, and Heskem, anciently Heistunghem. Some of the names, instead of the suffix ing-en, terminate in ig-heim. This is clearly the Anglo-Saxon hám, a home, while hám, an inclosure, would be represented by en. The distinction which has been lost in England has been preserved in Swabia. Since heim is a long syllable, the penultimate is shortened for phonetic reasons by the omission of a letter, and ingheim becomes igheim, or enheim, as in the cases of Bönigheim, Besigheim, Bietigheim, Billigheim, and Dackenheim.
force, when weighed against the concurrence of ancient tradition, which places the Saxons on the coast of the German Ocean. Ptolemy speaks of the “islands of the Saxons;” and the geographer of Ravenna says, confinalis Danice est patria quae nominatur Saxonia. Orosius speaks of the Saxons, gentem Oceani in litoribus et paludibus invivi sitam. It need hardly be said that it is out of the question to locate the “old Saxons” in the modern kingdom of Saxony, which was Slavonic to a late date, as is shewn by the local names.

We are compelled, therefore, to come to the conclusion that the “old Saxons” were seated somewhere between the mouths of the Elbe and of the Rhine, in juxtaposition with the Suevi, the Franks, the Lombards, and the Angles. It was here that, for thirty-two years, they withstood the power of Charlemagne, who avenged their obstinate resistance by the massacre of thousands of their warriors in cold blood, and, as we have seen, dispersed a third of the nation into distant provinces. This extermination of the Saxons on the Weser, coupled with the subsequent influx of a Slavonic population, as evinced by the local names, may serve to account for the absence of characteristic Saxon names in that region, while the Swabians and Angles of Württemberg may possibly have formed one of the transported colonies of Charlemagne; if, indeed, the Swabian colony was not a settlement brought about at the same time and by the same causes that produced the descents upon the English coast.\footnote{The chief authorities on Teutonic names are the two invaluable works of Förstemann, \textit{Alt-deutsches Namenbuch}, and \textit{Die Deutschen Ortsnamen}. See also Kemble, \textit{Codex Diplomaticus}; Leo, \textit{Rectitudines Singularum Personarum}; Zeuss, \textit{Die Deutschen und die Nachbarstäemme}; and \textit{Die Herkunft der Baiern}; Ellis, \textit{Introduction to Domesday Book}; Bender, \textit{Die Deutschen Ortsnamen}; Buttmann, \textit{Die Deutschen Ortsnamen}; Vilmar, \textit{Ortsnamen in Kurhessen}; Meyer, \textit{Ortsnamen des Kantons Zürich}; Müller, \textit{Marken des Vaterlandes}; Edmunds, \textit{Names of Places}; Monkhouse, \textit{Etymologies of Bedfordshire}; and the works of Jacob Grimm, Diefenbach, Leo, Kemble, Guest, Garnett, Latham, and Donaldson.}
CHAPTER VIII.

THE NORTHMEN.

For three centuries the Northmen were the terror of Western Europe. They sailed up the Elbe, the Scheldt, the Rhine, the Moselle, and the Neckar. They ravaged the valleys of the Somme, the Seine, the Marne, the Yonne, the Loire, and the Garonne. They besieged Paris, Amiens, Orleans, Tours, Troyes, Chalons, Poitiers, Bordeaux, and Toulouse. They plundered the coasts of Italy, and encountered the Arabs at Seville and Barcelona. Over the entrance to the arsenal at Venice may still be seen one of the sculptured lions which once adorned the Piræus at Athens. The marble is deeply scored with Norse runes, which, by the aid of photography, have been deciphered by Professor Rafn of Copenhagen, and which prove to be a record of the capture of the Piræus by Harold Hardráða, the Norwegian king who fell at Stamford Bridge. The Northmen established themselves as conquerors or colonists over the half of England, in the isles and western coasts of Scotland, in Greenland, in Iceland, in the Isle of Man, and in the north of France—they founded kingdoms in Naples, Sicily, France, Eng-
land, Ireland, and Scotland—while a Norse dynasty ruled Russia for seven hundred years, and for centuries the Varangian guard upheld the tottering throne of the Byzantine emperors.

The historic annals of these exploits are scanty and obscure. But the Norse names which are still found scattered over the north-west of Europe supply a means of ascertaining many facts which history has left unrecorded. By the aid of the names on our modern maps we are able to define the precise area which was ravaged by the Scandinavians, and we can, in many instances, detect the nature of the descent, whether for purposes of plunder, trade, or colonization. Sometimes, indeed, we can even recover the very names of the Viking chiefs and of their followers, and ascertain from whence they sailed, whether from the low-lying coasts of Denmark, or from the rock-bound fjords of Norway.

Before we proceed to attempt the solution of any of these curious problems, it will be necessary to exhibit the tools with which the historical lock is to be picked. We must analyse and classify the characteristic names which the Northmen have left upon the map.

The most valuable and important of these test-words is byr or by. This word originally meant an abode, or a single farm, and hence it afterwards came to denote a village. In Iceland, at the present day, the ordinary name given to a farmstead is boer, and in Scotland a cow-stall is still called a byre. The Devonshire suffix bere or bear comes still nearer to the Icelandic form. We find this word as a suffix in the village-names of Denmark, and of all countries colonized by the Danes. In Normandy we find it in the form bue or boeuf, which seems to be represented in the English booth, and the Scotch bothie. In England this suffix is usually contracted into by. In the Danish district of England—between Watling Street and the river Tees—the suffix by frequently takes the place of the Anglo-Saxon -ham or -ton. In this region there are numerous names like GRIMSBY, WHITBY, DERBY, RUGBY, KIRBY, NETHERBY, SELBY, or ASHBY.

1 A by-law is the local law enacted by the township.
2 In a few cases we have documentary evidence of a change of name consequent upon the Danish conquest. Thus we know that the Norse
In Lincolnshire alone there are one hundred names ending in
by. To the north of Watling Street there are some six hundred
instances of its occurrence—to the south of it, scarcely one.
There are scores and scores of names ending in by in Jutland and
Sleswic, and not half-a-dozen throughout the whole of Germany,
and even these are found chiefly in the Danish district of Hol­
stein. The suffix is common both to the Norwegian and Danish
districts of England, though it is more frequent in the latter.

Another useful test-word is thorpe, throp, or trop,¹ which we
find in althorpe, copmansthorpe, and wilstrop. It means
an aggregation of men or houses—a village; being in fact the
Norse form of the German word dorf, a village, which we have
in dusseldorf. This suffix is very useful in enabling us to
discriminate between the settlements of the Danes and those
of the Norwegians, being confined almost exclusively to the
former. It is very common in Denmark and East Anglia, it
is very rare in Norway, it does not occur in Lancashire, only
once in Cumberland, and very seldom in Westmoreland.

The word toft, which in Normandy takes the form tot, is also
distinctly Danish and East Anglian. It is very scarce in Nor­
way and Westmoreland, and is unknown in Cumberland. It
signifies a homestead or inclosure, and, like by and thorpe, it is
an indication of permanent colonization.

Thwaite, on the other hand, is the distinctive Norwegian suf­
fix. The meaning is nearly the same as the Saxon field, a forest
clearing. It is very common in Norway, it occurs forty-three
times in Cumberland, and not once in Lincolnshire, while thorpe,
the chief Danish test-word, which occurs sixty-three times in
Lincolnshire, is found only once in Cumberland.

In Normandy the greater proportion of Norse names end in
ville, as tancarville or haconville. This suffix is not, as is
commonly supposed, due to the Romance word villa, but is iden­
tical with the German weiler (old High German wilari or wilre),
an abode, a single house, which is so common in the Rhinegau

¹ In Westphalia and Münster the form trup or drup is very common, as
holtrup, aldrup, sandrup, barnstrup, westrup.

name of Deoraby or derby took the place of the former Saxon name of
Northweorthig, or Norworth as it would now be written. So the Saxon
Streoneshalch became the Norse whitby.
and other parts of Germany, as BREITWIL. Toward the edge of the Norman occupancy it takes the form villiers, as in the name HARDIVILLIERS, a form which suffices to shew how inadequate the Romance villa is as a source of these names. In the United States it has been extensively adopted in such compounds as SMITHVILLE or BROWNVILLE.

The Norse garth, an inclosure, which corresponds to the Anglo-Saxon yard, has already been discussed.

The word beck, a brook, is more frequent in the Norwegian than in the Danish region, and this also is the case with the suffixes -haugh, -with, and -tarn. The word force, which is the ordinary name for a waterfall in the Lake district, is exclusively Norwegian, and corresponds to the Norwegian and Icelandic foss. The word fell is also derived from Norway, where it takes the form field (pronounced fi-ell). It is the usual name for a hill in the north-west of England. The Anglo-Saxon field or feld is from the same root as the Norse fell. A fell is a place where the ground is on the fall; a field or feld is where the trees have been felled. Just like the American term “a clearing” the word field bore witness to the great extent of unfelled timber which still remained. In old writers wood and field are continually contrasted. With the progress of cultivation the word has lost its primitive force. The word fold is from the same root, and means an inclosure formed by felled trees.

We now come to the words which do not necessarily imply any permanent colonization by the Northmen. The Norse word dale, which is seen in KENDAL, ANNANALE, and LONSDALE, is the equivalent of the German thal, a valley. The Anglo-Saxon form is dell, as in ARUNDEL. When dal is a prefix it is usually a corruption of the Celtic dol, a field, as in the cases of DALKEITH and DALRYMPLE. The word ford is a derivative of faran or fara, to go. A cabman’s or waterman’s fare is the person who goes with him. Farewell is an imperative, meaning journey well. The field-fare is so called from its characteristic habit of moving across the fields. From faran, to pass, we get ford, that which is passed, a passage. This suffix ford occurs both in Anglo-Saxon and in Norse names, but with

1 In Mercia we find the form batch, as in WOODBATCH, COMBERBATCH, and SANDBACH.
a characteristic difference of meaning. The *fords* of the Anglo-Saxon husbandmen, which are scattered so abundantly over the south of England, are passages across rivers for men or cattle; the *fords* of the Scandinavian sea-rovers are passages for ships up arms of the sea, as in the case of the fjords of Norway and Iceland and the firths of Scotland. These Norse fords are found on the coasts which were frequented for purposes of trade or plunder. We have instances in *Wexford*, *Carlingford*, *Waterford*, and *Strangford* in Ireland, in *Haverford* in Wales, in *Orford* and *Chillesford* in Suffolk, in the *Firth of Firth* in Scotland, and in *Faxafjord*, *Hafnafjord*, and *Hvalfjord* in Iceland.

*Wick* is also found in both Anglo-Saxon and Norse names, but here also there is a difference in the application, analogous to that which we have just considered. The primary meaning in either case seems to have been a station. With the Anglo-Saxons it was a station or abode on land—hence a house or a village: with the Northmen it was a station for ships—hence a small creek or bay. The sea-rovers derived their name of *vikings*, or “creekers,” from the *wics* or creeks in which they anchored. The inland wicks, therefore, are mostly Saxon, while the Norse wicks fringe our coasts, and usually indicate the

1 It is curious and instructive to note, that while many of our agricultural terms, as basket, crook, kiln, fleam, barrow, ashlar, gavelock, rasher, and mattock, are of Celtic origin; seafaring words, such as cockswain, boatswain, and skipper, are mostly Norse.

2 The root runs through all the Aryan languages. We have the Sanskrit *vēca*, the Zend *vić*, the Greek *olvos*, a house; and the Latin *vicus*, the Mæso-Gothic *veiks*, the Polish *wies*, the Irish *fich*, the Cymric *gwic*, all meaning an abode or village.

3 Afterwards the word viking came to be used for any robber. Thus in a Norse Biblical paraphrase Goliath is termed a viking.

4 The whole of the Essex coast is lined with names ending in *wick*. About thirty of the farmhouses in the salt marshes bear this name. We have the Wick (three times), Eastwick (twice), Westwick (twice), Northwick (twice), as well as Jewick, Raywick, Frowick, Langwick, and Lastwick. These names may be derived either from the Anglo-Saxon, or from the Norse, *wic*. More probably, however, they should be referred to an entirely different source, namely the Anglo-Saxon *vīc*, a marsh, a word which is related to the German *weich*, soft, and the modern English word *weak*. Several places in South Tyrol called *Vigo* seem to derive their names from the Latin *vicus*. 
stations of pirates rather than those of colonists. Thus we have **wick** and **sandwich**, in Kent; **wyke**, near Portland; **berwick**, in Northumberland; and **wicklow**, in Ireland, all of which occur in places where there are no inland names denoting Norse colonization.

The names of **northwich**, **middlewich**, **nantwich**, **droitwich**, **netherwich**, **shirleywich**, **wickham**, and perhaps of **warwick**, although inland places, are derived indirectly from the Norse *wic*, a bay, and not from the Anglo-Saxon *wic*, a village. All these places are noted for the production of salt, which was formerly obtained by the evaporation of sea-water in shallow wiches or bays, as the word *baysalt* testifies. Hence a place for making salt came to be called a wych-house, and Nantwich, Droitwich, and other places where rock-salt was found, took their names from the wych-houses built for its preparation.¹

Another word which denotes the occasional presence of the sea-rovers is *ness* or *naze*, which means a nose, or promontory of land. Thus we have **caithness**, **wrabness**, **cape grinez** near Calais, and the **naze** in Norway and in Essex.

We may also detect the visits of the Northmen by the word *scar*, a face of rock or cliff—from *skera*, to *shear* or cut a sunder.² Instances are to be found in the names of **scarborough**, the **skerries**, and **skerryvore**. A *holm* means an island, almost always an island in a lake or river. **Stockholm** stands on such an island. We have also **flatholm** in the Severn, and **lingholme** in Windermere. An island in the sea is denoted by the suffix *oe*, *a*, or *ay*, as in the case of the **faroe islands**; **mageroe**, in Norway; **staffa**, **iona**, and **cumbray**, on the

¹ Domesday Book mentions salt-works at Wich, Upewic, Helperic, Midelwic, and Norwiche, all in Worcestershire. From the same authority we learn that at **droitwich** certain *dues* of salt were payable.

² Cf. the Gaelic and Erse *sgeir*, a cliff, and the Anglo-Saxon *sciran*, to divide. Hence the *shire*, a division of the kingdom, the *shore* which divides land from sea, the *skewer*, the ploughshare and the *shears*, instruments for dividing, and a *share*, a divided part. A *shower* consists of divided drops of water. To *score* is to make notches on a stick, and the numeral a *score* denotes the number of notches such a stick would contain. A *scar* is the mark where the flesh has been divided. A *shard* is a bit of broken pottery. *Shear*, *sharp*, and *skarp* denote that something has been cut off. *Sewer*, *scare*, and *scour* are from the same root.
western coast of Scotland; and Lambay on the Irish coast. The forms _ea_ and _ey_ are usually Anglo-Saxon, as Chelsea and Romney.

Furnished with these test-words, we may endeavour to trace the various settlements of the Danes and of the Norwegians.

To begin with our own island. As will be seen by a reference to the coloured map, the Danes of Jutland appear to have frequented the south-eastern portion of the island for purposes of trade or plunder rather than of colonization. This we gather from the fact that the Norse names in this district are found chiefly in the immediate vicinity of the coast, and designate, for the most part, either safe anchorages or dangerous headlands. We find hardly one solitary instance of the occurrence of the suffixes _by_, _toft_, _thorpe_, or _thwaite_, which would indicate permanent residence.

London was repeatedly besieged by the Danes. With the hope of capturing the rich and unrifled prize, their fleets lay below the city for many months together. Their stations were at Deptford, "the deep fiord;" at Greenwich, the "green reach;" and at Woolwich, the "hill reach," so called apparently from its being overhung by the conspicuous landmark of Shooter's Hill. The spits and headlands which mark the navigation along the Thames and the adjacent coasts, almost all bear characteristic Norse names—such as the Foreness, the Whiteness, Shellness, Sheerness, Shoeburyness, Foulness, Wrabness, Orfordness, and the Naze, near Harwich. On the Essex coast we find Danesey Flats, Langenhoe, and Alresford. In the south-east of Essex we have indications of Danish colonization, due perhaps to the settlement of some of the victors after Cnut's great victory over Eadmund Ironside at Assandun. Here we find the Hundred of Dengey (Danes' Island), which is spelt Daneing in a charter of Edward the Confessor. Prettlewell and Hawkswell, in the same neighbourhood, may probably contain the suffix _-ville_, which is so common in Normandy; and the village of Thoby, near Ingatestone, clearly implies the presence of Danish settlers. In the

---

1 _Saxon Chronicle_, A.D. 1013, 1014, 1016.
2 This etymology is confirmed by the fact that Woolwich is written Hulviz in Domesday.
extreme north-eastern corner of the county we find a little compact Danish colony—planted on a spot well guarded by marshes and the sea. Here we discover the Danish names of Harwich, Holmes Island in Hamford Water, Kirby, Thorpe-le-Soken, and East Thorpe. At Walton on the Naze there seems to have been a walled inclosure, to defend the intruders from the assaults of their hostile Saxon neighbours. In the south-eastern corner of Suffolk we have another Walton, probably a second fortified outpost of the Danish kingdom.1

In Suffolk there are a few scattered Danish names, chiefly near the coast—such as Ipswich, Dunwich, Walderswick, Orford, Chillesford, Thorpe, Barnby, and Lowestoft.

The name of Norwich is probably Norse. The city is situated on what was formerly an arm of the sea, and it was visited by Danish fleets. In the south-eastern corner of Norfolk there is a dense Danish settlement—occupying the Hundreds of East and West Flegg,2 a space some eight miles by seven, well protected on every side by the sea and the estuaries of the Bure and the Yare. In this small district eleven village-names out of twelve are unmistakeably Norse, compounded mostly of some common Danish personal name, and the suffix by. We find the villages of Stokesby, Billockby, Filby, Hemsby, Ormsby, Scroby, Rollesby, Maltby, Herringby, and Clippesby. The parish of Repps reminds us of the Icelandic districts called Hreppar, and St. Olave's Bridge preserves the name of the royal saint of Scandinavia. In the remaining part of Norfolk there are scattered names of a distinctively Danish character, though they by no means preponderate. Here, however, we are met by an element of uncertainty, since the dialectic peculiarities of the Danes from

1 In England we find some forty places called Walton. With one or two exceptions these occur in the neighbourhood of some isolated Danish or Norwegian colony. There are places bearing the name in the neighbourhood of Harwich, Ipswich, Fenny Stratford, Lynn, Wisbeach, Liverpool, and Haverford West, all regions inhabited by an intrusive population, to whom the security afforded by a walled town would be a matter of prime necessity.

2 From the Norse word flegg, or Danish vlak, flat. Compare the names of Fleckney, in Leicestershire, and Flekkefjord and Fleckerof, on the Norwegian coast.
Jutland merge into those of the East Anglians who migrated from the contiguous districts of Holstein and Sleswic; and it is often difficult to discriminate between the names derived from either source.

When, however, we cross the Wash and come to Lincolnshire, we find overwhelming evidence of an almost exclusive Danish occupancy. About one-fourth of the village-names in Lincolnshire present the characteristic Danish suffix by, while the total number of Danish names in this county amounts to about three hundred—more than are found in all the rest of Southumbrian England.

The fens which border the Witham, the Welland, and the Nen effectually guarded the southern frontier of the Danish settlers; and this natural boundary they do not seem to have crossed in any considerable numbers. A line drawn from east to west, about eleven miles to the north of Boston, will mark the southern limit of the purely Danish, as distinguished from the Anglian settlement. North of this line is a district about nine miles by twelve, between Tattershall, New Bolingbroke, Horncastle, and Spilsby, which would appear to have been more exclusively Danish than any other in the kingdom. In this small space there are some forty unmistakeable Danish village-names; such as Kirby, Moorby, Enderby, Wilksby, Claxby, Miningsby, Hagnaby, Danderby, Scrivelsby, Hareby, Lusby, Revesby, Raithby, Sommersby, Salmonby, Fulletby, Ashby, Asgardby, Hemingby, Toft, and others, all denoting the fixed residence of a Danish population.

From Lincolnshire the Danes spread inland over the contiguous counties. The Danelagh, or Danish district, by an agreement made between Alfred and Guthrum, and renewed by Eadmund and Anlaf in 941, was divided from the English kingdom by a line passing along the Thames, the Lea, and the Ouse, and then, following the course of Watling Street, the Roman road which runs in a straight line from London to Chester. North of this line we find in the local names abundant evidence of Danish occupancy, while to the south of it hardly a single name is to be found denoting any permanent colonization. The coloured map will shew the manner in which the Danish local names radiate from the Wash. In
Leicestershire, Rutland, Northamptonshire, and Yorkshire, the Danish names preponderate over those of the Anglo-Saxon type; while Cambridgeshire, Huntingdonshire, Bedfordshire, and the adjacent counties, protected from invasion by the fens, present scarcely a single Danish name, with the exception of Toft, in Cambridgeshire. We have, however, in Oxfordshire, the Danish village-names of Heythrop, Adlestrop, and Cockthorpe. Dacorum Hundred, in Herts, is called Danais in Domesday: it contains the hamlets of Elstrop, Aystrope, Causewell, Hamwell, and a place called Danefurlong; and on the borders of the hundred, close to the dividing line of Watling Street, are Kettlewell, Chiswell, and Danesend. It is curious also to see how the Danish names cluster thickly round the Danish fortresses of Leicester, Derby, Stamford, Nottingham, Lincoln, and York.

As we leave Yorkshire and approach Durham and Northumberland the Norse names rapidly diminish in frequency, and north of the Tweed they almost entirely disappear. The few that we find are usually only stations on the coast, as Alnwick and Berwick. The names of a few bays and headlands prove that the Northmen were familiar with the navigation of the coast, while the absence of any Norse names of villages or farms proves that the soil, for some reason, was left in the undisturbed possession of the Anglians or the Celts. In Fife we find by once or twice, and thorpe appears once in the form of thread. The map proves conclusively that the district between the Tees and the Forth is, ethnologically, one of the most purely English portions of the island, thus remarkably illustrating the assertion of historians, who affirm that down to the eleventh century the Lothians were accounted as English soil.

As we approach the north-eastern extremity of Scotland a new phenomenon presents itself. We find a large number of Norse names; they are, however, no longer Danish as heretofore, but exclusively Norwegian. The local nomenclature of the region bears decisive witness to the historical fact that down to the middle of the thirteenth century the Shetlands, the Orkneys, the Hebrides, and the Isle of Man, were not dependencies of the Crown of Scotland, but jarldoms attached to the kingdom of Norway.
It may seem strange to us that the extreme north-western corner of Great Britain should be called Sutherland. No inhabitants of Scotland could have bestowed so inappropriate a name. And, accordingly, we find that the Gaelic peasantry call the county Catuibh. The name of Sutherland was evidently given by a people living still further to the north. Sutherland, in short, was the mainland to the south of the Orkney jarldom. Here, as well as in Caithness, we find numerous Norwegian names, such as Brora, Thurso, Wick, Skerrow, Loch Skerrow, and Sandwick Bay. The local names prove that the two races were in joint occupation of the land. The barren uplands were left to the Gael—the names are Celtic—while in the more fertile straths and glens we find the Norse suffixes -dale, -seter, and -ster. Names like Loch Laxford (Salmon fjord), or Strath Helmsdale, in which a Celtic synonym is prefixed to the Norse word, seem to point to the recovery by the Celts of that preponderance of which, for a time, they had been deprived.

In the Orkneys the Celtic element is nearly evanescent. In all the sixty-seven islands there are only two, or perhaps three, Celtic names. One of these is the name of the group. In the word Orkney the terminal syllable ey is the Norse for island. The n which precedes is, apparently, a vestige of the Gaelic innis or inch, an island. Ork is probably from the Gaelic orc, a whale. Milton speaks of "the haunt of seals and orcs." Dr. Guest and Chalmers, however, think that the root is the Cymric word orch, which means a border or limit. The names of the individual islands present, with hardly an exception, the Norwegian suffix, a, island. We have Sanda (sand island), Stronsa (stream island), and Westra (west island); and often, as in the case of Rondalsa and Egilsa, we find the name of the first Norwegian chief who found here a safe island home.

When we come to the Shetlands, we find that every local name, without exception, is Norwegian. The names of the farms end, as in Norway, in -seter or -ster, and the hills are

1 This word, and the first syllable of Caithness, are probably vestiges of an Ugrian occupation, which preceded the arrival of the Celts. In the Lapp language ketje means an end or extremity. The black-haired short-statured race which is found here, in the south-west of Ireland, and in parts of Wales, is undoubtedly of Ugrian or Euskarian, not of Celtic blood.
called -how, -hay, and -holl. The names of the small bays have the Norwegian suffix -voie, as WESTVOE, AITHSVOE, LAXVOE, and HAMNAVOE. We find also BURRAFORD, SAXAFORD, LERWICK, and SANDWICK. The Faroe Islands are also wholly Norwegian. We have the islands of SANDOE, MEGGANAES, HESTOE, VAAGOE, NAALSEOE, and the chief town is THORSHAVN.

It was the practice of the Vikings to retire during the winter months to one of the small islands off the coast, and to issue forth again on the return of summer to recommence their piracies. The names of the innumerable islets of the Hebrides bear curious testimony to the prevalence of this practice. The small islands, with few exceptions, bear Norse appellations, while the local names on the mainland are almost wholly Celtic. The name of LEWIS is the Norwegian ljoð-hus, the wharf or landing-place; and in this island we find bays called SANDWICK and NORWICK. UIG was anciently called Wig, and HARRIS is a corruption of Harige. BROADFORD bay, in Skye, is a name identical with BREIDA FIORD in Iceland, and there are also the capes of TROTTERNISH and VATTERNISH (waterness). The first portion of this name contains the characteristic Norse word vatn, which appears in the names of no less than ten of the Hebridean lakes—as, for example, in those of Lochs LANGAVAT and STEEPAVAT. 2

The Norsemen called the Hebrides the SUDREYJAR, or Southern Islands. The two sees of the Sudreyjar and of the Isle of Man were united in the eleventh century, and made dependent on the Archbishop of Trondhjem, in Norway, by whom, till the year 1334, the Episcopi Sudorenses were always consecrated. The Anglican Bishop of SODOR and Man still retains his titular supremacy over those “southern isles” which

1 There are three islands called Bernera, two called Scalpa, two called Pabbay. We have also the islands of Skarpa, Tarransay, Gillisay, Barra, Sundera, Watersay, Mingalay, Sanderay, Plottay, Uidhay, Eriskay, Fiaray, Wiay, Grimsay, Rona, Calvay, Lingay, and Hellesay. Nearer to the coast we find Rona, Frædd, Raasay, S (twice), Longa, Sanday, Cana, Ulva, Gommeray, Staffa (cf. Stafafell, in Iceland), Tona, Colonsay, Oronsay, Kerrera, Skarba, Jura, I slay, Gigha, Cara, Cumbray, Ailsa, and many others.

2 In Iceland there are lakes called Langer-vatn, Apa-vatn, Grøena-vatn, Fiski-vatn, Torfa-vatn, and Sand-vatn.
have so long been under the pastoral care of a presbyterian Church.

In the south of Scotland the only Scandinavian settlement on the mainland was in Dumfriesshire. Here we find more than a dozen names with the suffix by, and others ending in garth, beck, and thwaite. In the neighbouring counties of Kirkcudbright and Wigton there are also a few outlying names of the same class.

The Isle of Man, which at one time formed a portion of the kingdom of Norway, must have contained a considerable Norwegian population, as appears from the Norse names of the villages, such as COLBY, GREENABY, DALBY, BALEBY, KIRBY, SULBY, and JURBY. On the coast we find the bays of PERWICK, FLESWICK, GREENWICK, SANDWICK, ALDRICH, SODERICK, GARWICK, and DRESWICK, the capes of LANGNESS and LITTLENESS, and the islands of EYE, HOLM, the CALF, and RONALDSAY; while SNEEFELL (snow hill), the highest mountain in the island, bears a pure Norwegian name. The distribution of these Norse names is very noteworthy. It will be seen by a reference to the coloured map that they are confined mainly to the south of the island, a circumstance which is explained by the historical fact that when Goddard of Iceland conquered Man he divided the southern portion among his followers, while he left the natives in possession of the northern region, where, consequently, Celtic names still prevail.

In the same way that the Danish names in England are seen to radiate from the Wash, so the Norwegian immigration seems to have proceeded from Morcambe Bay and that part of the coast which lies opposite to the Isle of Man. Cumberland, Westmoreland, Lancashire, and Dumfriesshire contain a very considerable number of Scandinavian names, but comparatively few of a distinctively Danish cast. The lake district seems to have been almost exclusively peopled by Celts and Norwegians. The Norwegian suffixes, -gill, -garth, -haugh, -thwaite, force, and -fell, are abundant; while the Danish forms, -thorpe and -toft, are almost unknown; and the Anglo-Saxon test-words, -ham, -ford, -worth, and -ton, are comparatively rare. Of the other test-words we find holm in LINGHOLM and SILVERHOLM on Windermere, and in RAMPSHOLME on Ulleswater. The suffix a, which denotes a river as well as an island, appears in the
river-names of the Greta, Liza, Wiza, Rotha, Bretha, Rathay, Calda, as well as in the names of the EA and the Eamont. Ness occurs in the names of Bowness, Shamburness, Scarness, and Furness;—wick in Keswick on Derwentwater, and in Blowick on Ullswater. The Norwegian word stackr, a columnar rock, was appropriately applied to the mountains which bear the names of the Stake, the Sticks, Pike O’ Stickle, and the Haystacks (the high rocks).

More than 150 different personal names of the Icelandic type are preserved in the local topography of the lake district. According to the last Census there are now only sixty-three surnames in Iceland, of which the commonest are Kettle, Halle, Ormur, and Gils. In Cumberland and Westmoreland these are preserved in the local names, Kettlewell, Hallthwaite, Ormathwaite, and Gellstone. By far the most common Christian names in Iceland are Olafur (borne by 992 persons), Einer (by 878), and Bjarni (by 869). These are found in Ulverston, Ennerdale, and Baronyhouse. We find the name of Hrani (now Rennie) in Ransdale, Rainsbarrow, and Wrenside; Loki in Lockthwaite, Lockholm, Lockerby, and Lockbarrow; Buthar in Buttermere, Butterhill, and Buttergill; Geit in Gateswater, Gatesgarth, and Gatesgill; and Skogul in Skeggleswater. The Norse haugr, a sepulchral mound, is often found in the names of mountains crowned by conspicuous tumuli. The name of the old Viking who lies buried beneath is often preserved in the first portion of such local names. Thus, Silver Howe, Bull Howe, Scale Howe, and Butterlip Howe, are, probably, the burial-places of the forgotten heroes, Sölvar, Böll, Skall, and Buthar Lipr.

In Cheshire, with one remarkable local exception, we find no vestiges of Norse colonists. But the spit of land called the Wirral, between the Dee and the Mersey, seems to have allured them by its excellent harbours, and the protection afforded by its almost insular character. Here, in fact, we find geographical conditions similar to those which gave rise to the two isolated Norse colonies at the mouths of the Stour and the Yare, and the result is no less remarkable. In this space of about twelve miles by six there is scarcely a single Anglo-Saxon name, while we find the Norse villages of Raby, Pensby,
IRBY, FRANKBY, KIRBY, WHITEBY, and GREASY. We find also the Norse names of SHOTWICK, HOLME, DALPOOL, HOWSIDE, BARNSTON, THORNTON, THURSTANSTON, BIRKENHEAD, and the BACK Brook; and in the centre of the district is the village of THINGWALL, a name which indicates the position of the meeting-place of the Thing, the assembly in which the little colony of Northmen exercised their accustomed privileges of local self-government.

The Vikings cruised around the coasts of North Wales, but we find no trace of settlements, though the names of the ORME’S HEAD, the NORTH STACK, the SOUTH STACK, FENWICK ROCK, the SKERRIES, and PRIESTHOLME, shew their familiar acquaintance with the dangerous points on this rock-bound coast.

There is a curious exception to the broad assertion that has been made as to the non-existence of Norse names to the south of Watling Street. The sea-rovers, with infallible instinct, seem to have detected the best harbour in the kingdom, and to have found shelter for their vessels in the fjords of the Pembrokeshire coast—the deep land-bound channels of MILFORD, HAVENFORD, WHITEFORD, and SKERRYFORD, and the neighbouring creeks of WATHWICK, LITTLE WICK, OXWICH, HELWICK, GELLYSWICK, MOUSSELWICK, WICK HAVEN, and MUGGLESWICK BAY. The dangerous rocks and islands which fringe this coast likewise bear Norwegian names; such are the STACK ROCKS, STACKPOLE Head, the STACK, PENYHOLT STACK, ST. BRIDE’S STACK, STACK ISLAND, SKOKHOLM ISLAND, SKERRYBACK, SKERRY-POINT, the NAZE, STRUMBLE HEAD, the WORM’S HEAD, NASH (NAZE) POINT, and DUNGENESS (Dangerness). Most of the names on the mainland are Celtic, but the neighbouring islands bear the Norse names of CALDY (Cold Island), BARRY (Bare Island), SULLY (Ploughed Island), LUNDY (Grove Island),

1 From the Norse orm, a serpent. The Wurmshead in South Wales presents the Saxonized form of the same word. In Stanfield’s admirable picture of this rock we seem to see the sea-serpent raising its head and the half of its huge length above the waves.

2 Havenjord. So there is a Hafnafjord in Iceland.

3 Whiteford Sands shew that the estuary of the Burry must have received from the Norsemen the appropriate name of Heut-fjord.
skokholm (Wooded Island), denney (Danes’ Island), ramsey, skomer, burry holmes, gateholm, grassholm, flatholm, and steepholm.

No less than twenty-four of the headlands on the Pembroke-shire coast are occupied by camps, which we may regard as the first beginning of a Scandinavian occupation of the soil. Round the shores of Milford Haven a little colony of permanent settlers was established in the villages of freystrop (Freysthorpe), studda, vogar, angle, tenby (Daneby), derby, hasguard, fishguard, dale, lambeth, and whitsand. Of the Vikings who founded this Welsh colony, Harold, Bakki, Hamill, Grim, Hiarn, Lambi, Thorni, Thor, Gorm, Brodor, Sölvar, Hogni, and Buthar have left us their names at haroldston, buckston, ambleston, creamston, hearston, lambston, thornston, thurstan, gomfreston,¹ brother hill, silver hill, honey hill, and butter hill, several of which may be the burial-places of those whose names they bear.

There is, occasionally, in Pembroke-shire, a difficulty in distinguishing between the Norse names and those which are due to the colony of Flemings which was established in this district during the reign of Henry I. We read in Higden’s Chronicle, “Flandrenses, tempore Regis Henrici primi . . . ad occidentalem Walliae partem, apud Haverford, sunt translati.” These colonists came from a portion of Flanders which was submerged by an irruption of the sea in the year 1110. lewinston, rickeston, robeston, rogeston, johnston, walterston, herbrandston, thomaston, williamston, jameston, and jeffreyston belong to a class of names which we find nowhere else in the kingdom—names given, not by Saxon or Danish pagans, but by Christianized settlers, men bearing the names, not of Thurstan, Gorm, or Grim, but of Lewes, Richard, Robert, Walter, and others common in the twelfth century. The names of the village of flemingston, and of the via flandrica, which runs along the crest of the Precelly mountains, afford ethnological evidence still more conclusive,

¹ The last syllable in these names would seem not to be the Anglo-Saxon ton, but was probably derived from the memorial stone erected over the grave of some departed hero.
and TUCKING Mill (Clothmaking Mill) shews the nature of the industry which was imported.

This Pembrokeshire settlement was probably, at first, little more than a nest of pirates, who sallied forth to plunder the opposite coast of the Channel, and to prey upon any passing merchant craft. That the Somersetshire coast was not unknown to them we see from the Norse names of wick Rock at one entrance of Bridgewater Bay, and now Rock at the other. The sands which lie in the estuary of the Yeo are called Langford grounds—an indication that this "long fiord" was known to the Northmen by the appropriate name of LANGFORD.

The chief port of Scilly bears the name of GRIMSBY, and ST. AGNES, the name of the most southern island, is a corruption of the old Norse name Hagenes. On the mainland of Cornwall only one station of the Northmen can be discovered, but the position is admirably adapted for refitting ships, and obtaining necessary supplies. Near the Lizard Point a deep inlet bears the name of HELFORD, and the village at its head is called GWEEK, evidently a corruption of Wick.

In Devonshire there are two or three clusters of Norse names. These present the characteristic suffix by in a form nearly approaching to the old Norse form byr, which is preserved in the boer of the Icelandic farms. In North Devon we find ROCKBEER and BEAR, both in the neighbourhood of the fjord of BIDEFORD. On the left bank of the estuary of the Exe, in South Devon, we have another cluster of such names, comprising the villages of AYLESBERE, ROCKBERE, LARKBEER, and HOUNDBERE. We find also BYESTOCK and THORP, EXWICK and COWICK, TOTNESS (toft-ness), the NESS at Teignmouth, the SKERRIES close by, and a place called NORMANS (i.e. Northman's) CROSS. Here a portion of the Roman road to Exeter takes the Danish name STRAIGHTGATE. Four hills in Dartmoor are called respectively FIELDFARE, DRYFIELD (fjeld), SCORHILL, and WATERN TOR. The Northmen also penetrated up the estuary of the Tamar. In the SAxon Chronicle (A.D. 997) we read of a descent of the Danes at Lidford; and in this neighbourhood we find LANGABEER, BEARDON, BEER ALSTON, BEARON, BEER FERRERS, DINGWELL, and THURSHELTON, as
well as burn and beara (byr water), both on the banks of brooks. At the mouth of the Otter, again, we find the villages of beer, berewood, and boy in beer. Near Poole Harbour we have holme, bere, and swanage (a corruption of Swanwick). In the Saxon Chronicle (A.D. 877) we read of the defeat of a Danish fleet at Swanawic on the south coast; and it has been conjectured, with some probability, that a chief bearing the common Danish name of Sweyn may have been in command, from whom we derive the name of “Sweyn’s Bay.” swan-thorpe, ibthrop, and edmundsthorp, all in Hampshire, exhibit the suffix which is so characteristic of Danish settlements. At holmsdale, in Surrey, we find an isolated Danish name. At this spot the crews of 350 ships, who had marched inland, were cut off by Ethelwulf, in the year 852, and it is probable that the survivors may have settled in the neighbourhood. Further to the north we find thorpe, near Chertsey. There seem to be traces of the Danes at berwick and seaford near Beachy Head, and at holmstone and wick in Romney Marsh, as well as at the point of dungeness, or dengeness. Finally, we find them on the Kentish coast at sandwich (the sandy bay)—a name which occurs also in Iceland, in Norway, in the Orkneys, in the Hebrides, and in the Shetlands. Sandwich in Kent was one of the favourite stations for the Danish fleets; they were there in the years 851 and 1014, as we learn from the Saxon Chronicle.

The northmen would appear to have established themselves in Ireland rather for the purposes of trade than of colonization. Their ships sailed up the great fjords of waterford, wexford, strangford, and carlingford, and anchored in the bays of limerick and wicklow. In Kerry we find the name of smerwick, or “butter bay,” then apparently, as now, a trading station for the produce of the surrounding district. The name of copeland Island, near Belfast, shows that here was a trading station of the Norse merchants, who trafficked in English slaves and other merchandise. As we approach Dublin the numerous Norse names along the coast—lambay Island

1 Here a battle was fought between Danes and Saxons. The Danes had a fortress in Romney Marsh.

2 To the south of Wexford is the Barony of forth (fjord).
IRELAND.

DALKY Island, Ireland's eye, the skerries, the Hill of Howth, and Leixlip (the "salmon leap") on the Liffey—prepare us to learn that the Scandinavians in Dublin were governed by their own laws till the thirteenth century, and that, as in London, they had their own separate quarter of the city, guarded by walls and gates—Oxmantown, that is, Ostmantown, the town of the men from the East. At one time Ostman kings reigned in Limerick, Dublin, and Waterford.

The general geographical acquaintance which the Northmen had with the whole of Ireland is shewn by the fact that three out of the four Irish provinces—namely, Leinster, Munster, and Ulster—present the Norse suffix -ster, a place, which is so common in local names in the Shetlands and in Norway.

From the character of the Norse names upon the map of the British Isles, we may class the districts affected by Scandinavian influence under three general divisions:

I. Places visited only for trade or booty. These fringe the coast, and are the names of bays, capes, or islands. The surrounding villages have Saxon or Celtic names. To this class belong, mostly, the names along the estuaries of the Thames and Severn, and along the coasts of Kent, Sussex, Essex, North Wales, Ireland, and Eastern Scotland.

II. Isolated settlements amid a hostile population. These are found in places which are nearly surrounded by water, and which are furnished with good harbours. In this class we must include the settlements near Harwich, Yarmouth, Birkenhead, and Milford.

III. The Danelagh, or Danish kingdom, where the Norse element of the population was predominant. Yet even here the names are clustered, rather than uniformly distributed. Such clusters of names are to be found near Stamford, Sleaford, Horncastle, Market Rasen, Melton Mowbray, Leicester, Ashby-de-la-Zouch, Newark, Lincoln, Grimsby, York, and Bridlington.

In order to estimate with some exactitude the proportionate amount of the Scandinavian element in the different parts of England, the following table has been carefully compiled. It shews the proportion of Norse names denoting permanent settlement to the acreage of the several counties—the proportion
in Kent being taken as the unit of computation. The names in those counties which are printed in italics exhibit a Norwegian rather than a Danish character.

The actual number of names is—in Lincolnshire, about 300; in Leicestershire, Westmoreland, Cumberland, and each of the Ridings, about 100; in Norfolk, Northampton, Notts, and Lancashire, about 50; in Durham and Northumberland, about 20; in Suffolk, Derby, Cheshire, Rutland, and Pembroke, about a dozen; in Bucks, Bedford, and Warwick, not more than half that number.

With the exception of a few nautical terms, the Scandinavians who settled in France have left hardly any memorials of their speech in our French dictionaries—few permanent conquests have had so slight an influence on the language of the conquered nation. The conquerors married native women, and their sons seem only to have learned the language spoken by their mothers; so that, except in the neighbourhood of Bayeux,\(^1\) where the Norman speech was grafted on the nearly-

These are not the terms used either in French or Danish. The French
related and firmly-established language of the Saxon shore, the sons of the soil at no time spoke a Scandinavian dialect. But the map of Normandy supplies abundant traces of the Scandinavian conquest. The accompanying sketch-map shews the distribution of these names, and it proves also how carefully the Scandinavians avoided all encroachment on the district already occupied by Saxon colonists.

We find that the names of the original Scandinavian settlers are thickly scattered over the land. We have seen that in England the former abodes of the Northmen—Grim, Björn, Harold, Thor, Guddar, and Haco—go by the names of Grimsby, Bur nthwaite, Harroby, Thoresby, Guttersby, and Hacconby: in Normandy these same personal appellations occur in the village-names, and we find Grim onville, Borneville, Herouv ille, Tourville, Godarville, Haconville, and Hacquerville.

The Norse gardr, an inclosure, or yard, occurs in Normandy at Fisigard, Auppegard, and Epegard—names which we may compare with Fishguard in Pembrokeshire, Applegarth in Yorkshire, and Æblegaard in Denmark. Toft, which also means an inclosure, takes the form of tot in Normandy, as in Yvetot, Ivo's toft; Plumetot, flower toft; Lilletot, little toft; Routot, red toft; Criquetot, crooked toft; Berquetot, birch toft; Hautot, high toft; and Langetot, long toft. We have also Prétot, Tournetot, Bouquetot, Grastot, Appetot, Garnetot, Ansetot, Turretot, Hebertot, Cristot, Brestot, Franquetot, Raffetot, Houdetot, and others, about one hundred in all. Toft being a Danish\(^1\) rather than a Norwegian suffix would incline us to suppose, from its frequent occurrence, that the conquerors of Normandy were Danes rather than Norwegians; and the total absence of thwai te, the Norwegian test-word, tends to strengthen this supposition.

The suffix by, so common in Danish England, generally takes,

\(^1\) Moreover, in Denmark we often find combinations identical with some of those just enumerated. Such are Blumtofte, Rodtofte, Langetofte, and Grasttofte.
in Normandy, the form *bœuf*, *buf*, or *bue*, as in the cases of *criquebuf* (Crogby, or crooked-by), *marœuf* (Markby), *quittebuf* (Whitby, or white-by), *daubeuf* (Dalby), *carquebuf* (Kirkby), *quillebuf* (Kil-by¹), *elbeuf*, *painebuf*, and *lindebuf*. The form *buf*, or *bœuf*, seems very remote from the old Norse *boer*; but a few names ending in *bue*, such as *longbue* and *tournebue*, and still more the village of *bures*, exhibit the transitional forms through which the names in *buf* may probably have passed. *hambye* and *colomy* are the only instances of the English form. The village of *le torp* gives us the word *thorpe*, which, however, more usually appears in the corrupted form of *torbe*, *tourp*, or *tourbe*, as in the case of *clitourps*.

The name of the river *dieppe*, which was afterwards given to the town which was built beside it, is identical with that of the *Diupa*, or "deep water," in Iceland; and it may be compared with "The Deeps" near Boston. From the Norse *beckr* (Danish *bœc*), a brook, we have *caudebec*, the "cold brook," the same name as that of the *Cawdbeck* in the Lake District, and the *Kaldbakr* in Iceland. The name of the *briguebec*, the "birch-fringed brook," is the same as that of the *Birkbeck* in Westmoreland. The *houlbec*, the "brook in the hollow," corresponds to the *Holbeck* in Lincolnshire, and the *Holbek* in Denmark. The name of *bolbec* we may compare with *Bolbek* in Denmark; and the name of *foulbec*, or "muddy brook," is identical with that of the *Fulbeck* in Lincolnshire. The suffix *fleur*, which we find in *honfleur* and other names, is derived from the Norse *flot* (Danish *flod*, English *flood*), a small river or channel, which we have in *Purfleet*, *Northfleet*, and many other English names. The phonetic resemblance between *fleur* and *fleet* may seem slight, but the identification is placed beyond a doubt by the fact that *harfleur* was anciently written *Herosfluet*; while Roger de Hovenden calls *barfleur* by the name of *Barbeflet*, and Odericus Vitalis calls it *Barbeflot*. *vittefleur* is the "white river," and *fiquefleur* seems to be *Wickfleet*, "the river in the bay." The Danish *ø*, an island, is seen in *eu*, *cantaleu*, *jersey*, *guernsey*,

¹ Norse *kellda*, German *quelle*, a *well* or river-source.
and Alderney; and holme, a river island, appears in the names of Turhulme, Niou, and Le Houlme, near Rouen. Cape de la Hogue, Cape Hoc, and Cape le Hode, may be compared with the Cape near Dublin, called the Hill of Howth. The root is the old Norse haugr, a sepulchral mound, the same word which appears in the haughs of Northumberland. The name of the castle-crowned rock of Falaise reappears in the fells of Cumberland; and les Dalles, Oudales, Crodale, Croixdal, Danestal, Depeyal, Dieppeyal, Dartetal, and Bruquedalle, remind us of the dales of Westmoreland and the North Riding. Escoves seems to be the Icelandic skogr, and corresponds to the English shaw, a wood, or shady place. Bosc, a wood, or bushy place, is a very common suffix in Normandy, as in the names Verbosc, Eriquebosq, and Bandribosc. Holt, a wood, occurs in the name Terhoude, or Theroude. The Calf of Man is repeated in Le Cauf.

Beyond the district of Norse colonization we have a few scattered names of bays and capes, indicating occasional visits of the Vikings. Such are Cape Grinez (Greyness), near Calais; wyk in Belgium; Quantovic; Vigo Bay in the North of Spain, and possibly Vico in the Bay of Naples. The Berlingas, a group of rocky islets forty miles north-west of Lisbon, would seem to have been a station of the Northmen, apparently presenting a widely diffused patronymic which is found on the Baltic coast, in Friesland, and in England. Hastingues, a river-island near Bayonne, probably takes its name from the renowned Viking Hasting, who was long the terror of France, Spain, and Italy; and the Ile de Biere in the Loire was no doubt so called from the huts which the Danes erected upon it for the accommodation of their prisoners. Scaranos, on the southern coast of Sicily, is an almost solitary memorial of the visits of the Vikings to the Mediterranean. With this name we may compare those of Scarnose on the coast of Banff, Scarness in Cumberland, and Sheerness on the Thames. The Skerki rocks, also on the Sicilian coast, may not improbably have received from the Northmen the name of the Skerries, or Scar Isles, which was so frequently given to similar dangerous

1 Granted to one Njal, or Niel, A.D. 920.
needles of sea-washed rock. The most easterly Norse name is kibotus (Chevetot), on the Hellespont. Here was the station of the Væring, or Varangian guard of the Byzantine Emperors, who were afterwards reinforced by the Ingloi, or Saxon refugees, who fled from the Norman conquerors. We find the name of these Warings, or Varangians, at varengefjord in Norway, varengeville in Normandy, wieringerwaard on the coast of Holland, and at warrington and other places in England.

The Norman conquest of England has left comparatively few traces on the map. There was in no sense any colonization, as in the case of the previous Saxon and Danish invasions; nor was there even such a general transference of landed property as took place in Normandy, and which is there so fully attested by the local names. The companions of the Conqueror were but a few thousands in number, and they were widely dispersed over the soil. A few Norman-French names, however, may be still pointed to as memorials of the conquest. The only Anglo-Norman suffixes seem to be clere, manor, and court, as in highclere, beaumanoir, and hampton court. We have also a few hybrid names like chester-le-street, bolton-le-moor, and laughton-en-le-morthen. We have two county names, Montgomery and clare; but, as might be expected, the Norman names belong mostly to castles and abbeys. Thus at malpas was a castle built by the first Norman Earl of Chester to guard the “bad pass” into the valley of the Dee. Montford, or Montesfort, in shropshire, and mold in Flintshire, anciently Monthault (Mons Altus), were also frontier fortresses; so was Montgomery on the Welsh border; and the same story is told in another language by the Welsh name of Montgomery—Trefaldwyn, or Baldwin’s Town. Montacute Hill, in Somerset, has Mortaine’s Norman castle on its summit, and a Norman abbey at its foot. The commanding situation of belvoir Castle justifies its Norman name. Henry IV. transferred to his Surrey palace at Sheen the name of his Yorkshire earldom of Richmond. At beaumont, near Oxford, was a palace of the Norman kings; and at pleshy (plessis) in Essex, the seat of the High Constables of England, the ruins of the Norman keep are still visible. Beauchamp-otton, near
Castle Hedingham, bears the name of Ottone, the skilful goldsmith who fashioned the tomb of the Conqueror at Caen. We find the Norman abbeys of RIEVAUX and JORVEAUX in Yorkshire, BEAULIEU in Hampshire, DELAPRE in Northamptonshire, and the Augustinian Priory of GRACEDIEU in Leicestershire. The Norman village of St. Clair has bestowed its name upon a Scottish family, an English town, an Irish county, a Cambridge college, a royal dukedom, and a king-at-arms.\(^1\) We have the names of Norman Barons at STOKE-MANDEVILLE, CARLTON-COLVILLE, MINSHALL-VERNON, ASHBY-DE-LA-ZOUCH, NEWPORT-PAGNELL, BURY-POMMEROYE, ASTON-CANTELOUPE, STOKE-PIROU, ACTON-TURVILLE, and NEVILLE-HOLT. Local names bear striking testimony to the power and possessions of certain families. Thus no less than one hundred parishes in the Welsh marches bear the suffix Lacy, as MANSEL LACY. The names of HURST-MONCEAUX, HURST-PIERPOINT, and HURST-COURTRAY all occur in the county of Sussex, where the Conqueror landed, and where the actual transfer of estates seems to have taken place to a greater extent than in other counties. Sussex is the only English county which is divided into rapes, as well as into hundreds or wapentakes. While the hundred seems to indicate the peaceful settlement of Saxon families, and the wapentake the defensive military organization of the Danish intruders, the rape, as it would appear, is a memorial of the violent transference of landed property by the Conqueror—the lands being plotted out for division by the hrepp, or rope, just as they had been by Rolf in Normandy, as Dudo tells us—"Illam terram (Normandy) suis fidelibus funiculo divisit." So also the districts of Iceland are called Hreppar. The hyde, the Saxon unit of land, seems to have been a portion measured off with a thong, as the rape was with a rope, and the rood with a rod.

There are some curious memorials of that influx of Anglo-Norman nobles into Scotland which took place during the reigns of David I. and Malcolm Canmore. In ancient records the name of Maxwell is written in the Norman form of Maccusville. The name of Robert de Montealt has been

\(^1\) The Clarenceaux King-at-Arms had jurisdiction over the Surroys, or men south of the Trent, and the Norroys' king over those to the north of that river.
corrupted into Mowatt and Moffat; and the families of Sinclair, Fraser, Baliol, Bruce, Campbell, Colville, Somerville, Grant (le grand), and Fleming are all, as their names bear witness, of continental ancestry. Richard Waleys—that is, Richard the foreigner—was the ancestor of the great Wallace, and has left his name at Richardtun in Ayrshire. The ancestor of the Maule family has left his name at Maleville, or Melville, in Lothian. Seton takes its name from a Norman adventurer called Say. Tankerton, in Clydesdale, was the fief of Tancard, or Tancred, a Fleming who came to Scotland in the reign of Malcolm IV. And a few village names like Ingliston, Normanton, and Flemington, afford additional evidence of the extensive immigration of foreign adventurers which was encouraged by the Scottish kings.¹

CHAPTER IX.

THE CELTS.

Europe has been peopled by successive immigrations from the East. Five or six great waves of population have rolled in, each in its turn urging the flood which had preceded it further and further toward the West. Of the earliest, the Euskarian, there are but dim indications round the coast-line of Western Europe; but the next, the mighty Celtic inundation, can be distinctly traced in its progress across Europe, forced onward by the succeeding deluges of the Romance, Teutonic, and Slavonic peoples, till at length it was driven forward into the far western extremities of Europe.

The Celts were divided into two great branches which followed one another on their westward passage across the Continent. Both branches spoke languages of the same stock, but distinguished by dialectic differences as great as those which divide Greek from Latin, or English from German. There are living tongues belonging to each of these branches. The first, or Gadhelic branch, is now represented by the Erse.
of Ireland, the Gaelic of the Scotch Highlands, and the Manx of the Isle of Man; the second, or Cymric branch, by the Welsh of Wales, and the Brezonec or Armorican of Brittany, which is still spoken by a million and a half of Frenchmen.

Although both of these branches of the Celtic speech now survive only in the extreme corners of Western Europe, yet, by the evidence of local names, it may be shewn that they prevailed at one time over a great part of the continent of Europe, before the Teutonic and the Romance races had expelled or absorbed the once dominant Celts. In the geographical nomenclature of Italy, France, Spain, Switzerland, Germany, and England, we find a Celtic substratum underlying the superficial deposits of Romance and Teutonic names. These Celtic syllables form the chief available evidence to which we can appeal when investigating the migrations of the Celtic peoples.

We shall now proceed to adduce a few fragments of the overwhelming mass of material which has been collected by numerous industrious explorers, and which seems to justify them in their belief as to the wide extension of the Celtic race at some unknown pre-historic period.

One class of local names is of special value in investigations relating to primæval history. The river-names, more particularly the names of important rivers, are everywhere the memorials of the earliest races. These river-names survive where all other names have changed—they seem to possess an almost indestructible vitality. Towns may be destroyed, the sites of human habitation may be removed, but the ancient river-names are handed down from race to race; even the names of the eternal hills are less permanent than those of rivers. Over the greater part of Europe—in Germany, France, Italy, Spain—we find villages which bear Teutonic or Romance names, standing on the banks of streams which still retain their ancient Celtic appellations. Throughout the whole of England there is hardly a single river-name which is not Celtic. By a reference to the map prefixed to this volume it will be seen that those districts of our island which are dotted thickly with Anglo-Saxon or Scandinavian village-names, are traversed
everywhere by red lines, which represent the rivers whose names are now almost the sole evidence that survives of a once universal Celtic occupation of the land.

The Celtic words which appear in the names of rivers may be divided into two classes. The first may be called the substantival class, and the second the adjectival.

The first class consists of ancient words which mean simply water or river. At a time when no great intercommunication existed, and when books and maps were unknown, geographical knowledge must have been very slender. Hence whole tribes were acquainted with only one considerable river, and it sufficed, therefore, to call it "The Water," or "The River." Such terms were not at first regarded as proper names; in many cases they only became proper names on the advent of a conquering race. To take an example—the word afon. This is the usual Welsh term for a river. On a map of Wales we find at Bettws-y-Coed the "Afon Lugwy," or, as it is usually called by English tourists, the "River Llugwy." So also at Dolwyddelen we find the Afon Lledr, or River Lledr, and the Afon Dulas and the Afon Dyfi at Machynlleth. In England, however, the word avon is no longer a common name as it is in Wales, but has become a proper name. We have a River AVON which flows by Warwick and Stratford, another River AVON flows past Bath and Bristol, and elsewhere there are other rivers of the same name, which will presently be enumerated. The same process which has converted the word afon from a common name into a proper name has also taken place with other words of the same class. There is, in fact, hardly a single Celtic word meaning stream, current, brook, channel, water, or flood, which does not enter largely into the river-names of Europe.

The second class of river-names comprises those which may be called adjectival. The Celtic words meaning rough, gentle, smooth, white, black, yellow, crooked, broad, swift, muddy, clear, and the like, are found in the names of a large proportion of European rivers. For example, the Celtic word garw, rough, is found in the names of the GARRY, the YARE, the YARROW, and the GARONNE.

We may now proceed to enumerate some of the more important names which belong to either class.
THE CELTS.

I. Avon. This, as we have seen, is a Celtic word meaning "a river," which has become a proper name in the case of numerous streams in England, Scotland, France, and Italy. The Stratford Avon flows through Warwickshire and Worcestershire. The Bristol Avon divides the counties of Gloucester and Somerset. The Little Avon, also in Gloucestershire, runs near Berkeley Castle. One Hampshire Avon flows past Salisbury to Christchurch, another enters the sea near Lymington. We also have rivers called Avon or Evan in the counties of Devon, Monmouth, Glamorgan, Lanark, Stirling, Banff, Kincairdine, Dumfries, and Ross. We find the I ve in Cumberland, the Anne in Clare, and an inn in Fife and in the Tyrol. The Aune in Devon keeps close to the pronunciation of the Celtic word. The Auney, in the same county, is the Celtic diminutive "Little Avon," which we find also in the Ewenney in Glamorgan, the Eveneny in Forfar, the Inney in Cornwall, and the Anney in Meath.

A very large number of French river-names contain the root afon. In Brittany we find the Aff, and two streams called Aven. There are two streams called Avon in the river system of the Loire, and two in that of the Seine. The names of the chief French rivers often contain a fragment—sometimes only a single letter—of this root, which may, however, be identified by a comparison of the ancient with the modern name. Thus, the Matriona is now the Marne, the Asona is the Aisne, the Sequana is the Seine, the Antura is the Eure, the Iscauna is the Yonne, the Saucona is the Saone, the Meduana is the Mayenne, the Durania is the Dordogne, the Garumna is the Garonne. The names of an immense number of the smaller French streams end in on, onne, or one, which is probably a corruption of the root afon. In the single department of the Vosges, for instance, we find the Madon, the Durbon, the Angronne, and the Vologne. The same termination occurs

1 It is written aon in the Manx language, and abhunu (pronounced avain) in Gaelic. We find also the ancient forms amhain and awson. It is cognate to the Latin amnis. Ultimately afon is to be referred to the Sanskrit root ap, water, which we see in the names of the Punj-ab, or land of the "five rivers;" the Do-ab, the district between the "two rivers;" as well as the river-names of the Z-ab, and of the Dan-ub-ins, or Dan-ub-e.
frequently in the names of German streams, as, for example, in the case of the Lahn, anciently the Lohana, the Isen, anciently the Isana, the Mörn, anciently the Merina, and the Argen, anciently the Argana; while the Drave and the Save preserve the former instead of the latter portion of the ancient word. In Italy we find the Avenza, the Savone, the Aufente, and the Avensa; in Portugal we have the Avia, and in Spain the Abono or Avono. The Guadi-ana is the Anas of Strabo, with the Arabic prefix Wadi.

II. Dur. Another word, diffused nearly as widely as afon, is the Welsh dŵr, water.\(^1\) Forty-four ancient river-names contain this root. On the modern map we find the DOUR in Fife, Aberdeen, and Kent, the DORE in Hereford, the DUR in Lanark, the THUR in Norfolk, the DORO in Queen's County and Dublin, the DURRA in Cornwall, the DAIRAN in Carnarvonshire, the DURARWATER and the DEARGAN in Argyle, the DOVER or Durbeck in Nottinghamshire; the Glasdur, or grey water, in Elgin; the Rother, or red water (Rhuddwr), in Sussex; the Calder;\(^2\) or winding water, in Lancashire (twice), Yorkshire, Cumberland, Lanark (three times), Edinburgh, Nairn, Inverness, and Renfrew; the Adder in Wilts and Berwick (twice), the Adur in Sussex, the Noder in Mayo, the Noder in Wiltshire, the Cheddar in Somerset, the cascade of Lodore, the lakes of Windermere and Derwent-water. The name Derwent is probably from dŵr-gwyn, the clear water. There is a river Derwent in Yorkshire, another in Derbyshire, a third in Cumberland, and a fourth in Durham. The Darwen in Lancashire, the Derwen in Denbighshire, the Darent in Kent, and the Dart in Devon, are contractions of the same name.\(^3\) Dorchester was the city of the Dur-otriges, or dwellers by the water, and a second ancient city of Dorchester, in Oxfordshire, stands upon the banks of the Thames.

---

\(^1\) Brezonec and Cornish dour: Gaelic and Irish dŵr and dobhar, pronounced doar; cf. the Greek ὅδρος.

\(^2\) Perhaps, however, from the Norse kalldr, cold.

\(^3\) That the Darent was anciently the Derwent is shewn by the name of Derventio, the Roman station on the Darent. The further contraction into the form Dart is exhibited in the name of Dartford, the modern town on the same river.
In France we have the Duranius, now the Dordogne; the Antura, now the Eure; and the Aturus, now the Adour. The Alpine Durance, anciently the Druentia, reminds us of our English Derwents. We find the Thurr in Alsace, and again in Switzerland, the Durbion in the Vosges, the Durdan in Normandy, the Dournon and the Dourbie in the department of the Aveyron, as well as the Douron in Brittany. In the north-western, or Celtic part of Spain, there are the Durius, now the Douro; the Duerna, the Duraton, the Torio, the Tera, the Turones, and the Tormes. In Italy are the Torre, the two Durias or Doras in Piedmont, the Turia, a tributary of the Tiber, the Tronto, the Trionto, the Trebia, the Terias, and the Termus. In Germany we find the Oder, the Drave, the Durbach, the Dürrenbach in Württemberg, the Dürnbach in Austria, the Dürrenbronne near Eppingen, and the city of Marcodurum, now Duren. Zürich, in Switzerland, is a corruption of Turicum, Solothurn of Salodurum, and Wintertthur of Vitodurum.1

Stour is a very common river-name. There are important rivers of this name in Kent, Suffolk, Dorset, Warwickshire, and Worcestershire; we have the Stör in Holstein; the Stura, in Latium, is now the Store, and Stura is a common river-name in Northern Italy. The etymology of this name Stour is by no means certain. In Welsh, words are augmented and intensified in meaning by means of the prefix ys. Thus we have—

1 In ancient Gaul we find many names of towns in which this root indicates that their sites were on the banks of rivers. We may specify, among others, Ernodurum, Salodurum, Ictodurum, Divodurum, Brevidurum, Ganodurum, Velatodurum, Antissodurum, Octodurum, Brivodurum, Marcodurum, Duronum, Durocatalaunum, and Vetodurum. In the valley of
Stour, therefore, may be only the intensive of dur. Or it may be derived from the Gaelic sturr, rough, uneven; or it is possible that by a common process of reduplication of synonyms, which will presently be discussed, the word Stour may be formed from a prevalent root—is, water; and dur, water. There is also a further complication, arising from a Teutonic river-root st-r, which appears in the names of more than one hundred German streams, such as the Elster, Alster, Lastrau, Wilster, Ulster, Gelster, Halsterbach, Streu, Suestra, Stroo, Ströbeck, Laster, Nister, and others.

III. Esk. The Gaelic and Erse word for water is usisge. The word Whisky is a corruption of Uisge-boy, yellow water. In Welsh we have the related words wysg, a current, and gywydd or wy, water. This root, subject to various phonetic mutations, is found in the names of a vast number of rivers. There is an esk in Donegal, in Devon, in Yorkshire, in Cumberland, in Dumfries, two in Forfarshire, and two in Edinburghshire. We have an esky in Sligo, an esker in King’s County and in Brecknock, an eskle in Herefordshire, and an isle in Somerset. Esthwaite water, and Easedale, in the Lake district, contain the same root, as well as the eses in Northumberland and Dumfries, the ise near Wellingborough, the Isbourne, a tributary of the Stratford Avon, the Easeburn in Yorkshire, the Ashbourne in Sussex, and the ash in Hertfordshire and Wiltshire. In Bedfordshire and in Hertfordshire we have the iz; the Ischalis was the ancient name of the Ivel, and the Tisa of the Tees. The Tem-ese, or Thames, is the “broad water.” In Wales we have the river which the Welsh call the wysg, and the English call the usk. This Celtic word was Romanized into Isca, while another Isca in Devonshire, now the exe, has given its name to Exeter, Exmoor, and Exmouth. There is also an ex in Hampshire and in Middlesex. The Somersetshire axe flows by Axbridge,

the Danube we find Gabanodurum, Bragodurum, Ebodurum, Ectodurum, Boyodurum; and in Britain, Durovernum, Durobrivae, Durolevum, Duroolithum, Durocornovium, Durocobrivium, and Durolipsus.

1 The Welsh names of many aquatic animals contain the root gywy water, e.g. hwyad, a duck; gywydd, a goose; guillemot. Guilt is the Provençal term for a duck.
and the Devonshire axe gives its name to Axminster and Axmouth. The ancient name of the Chelm must have also been the Axe, for Chelmsford was formerly Trajectus ad Axam, and Thaxted has been supposed to be a corruption of The Axe-Steal. The town of Uxbridge stands on the river Colne, a later Roman appellation, which apparently superseded the Celtic name Ux. The ock joins the Thames near Oxford, the oke is in Devon, and the Banocburn, near Stirling, has given its name to a famous battle-field. The few Gadhelic names in England are found chiefly towards the eastern part of the island; here consequently we find three rivers called the ouse, as well as the ousel, theouseburn, the use in Buckinghamshire, uglg Mere, and os-ey Island. ose-ney Abbey is on an island near Oxford. The n is probably a relic of the Celtic innis, island, as in the case of Orkney, and wisk-in (water island) in the Fens, which was formerly an island. The Welsh wysg rather than the Gaelic uisge seems to be the source of this name, as well as of the wisk and the Washburn in Yorkshire, the guash in Rutland, the Wissey in Norfolk, and the local names of Wishford, Wisley, Wistow, and Asbeach, in the fens of Huntingdonshire, Wisbeach, and the Wash.

In Spain there are the esca and the Esla, the latter of which we may compare with the two Islas in Scotland, the Isle in Somerset, and the Isle in Brittany, where also we find the Isac, the Oust, the Couesnon, and the Couesan; and in other districts of France are the esque, the asse, the ose, the Isolé, the Isère, the Ousche, the Aisne, the Ausonne, and the Achase. There are several French rivers called the Æs or Æse. The Isara, or Esia, has become the oise, the Axona is now the Aisne, the Iscauna is the Yonne, the Ligeris is the Loire, and the Æsantus insula is the island of Ouessant or Ushant. The name of the town of Orange, near Avignon, is a corruption of Araision. The Isella is now the Yssel, the Scaldis is the Scheldt, the Vahalis is the Waal, the Albis is the Elbe, the Tanais is the Don, the Borysthenes is the Danasper or Dnieper, the Tyras is the Danaster or Dniester, the Tiberius is the Theis, and the Ister is the Danube. Among German streams we find the ise, the axe, the Isen, the Isar, the Eisach, the Schau, the Save, the Ahse, the Eisbach, the Aschbach, and scores of similar
names. The word *etsch* is a German corruption of the ancient name *Athesi* or *Athesis*, which the Italians have softened into the *Adige*. In Italy we find the *Is* now the *Issa*, the *Æsis* now the *Fiumesino* (*Flumen Æsinum*), the *Æsarus* now the *Isaro*, the *Natiso* now the *Natizone*, the *Galesus* now the *Galeso*; the *Osas*, which still retains its name unchanged; the *Ausar*, now the *Serchio*; the *Aprusa*, now the *Ausa*; and the *Padusa*, a branch of the Po. The name of *Istria*—a region half land, half water—is derived from the Celtic roots, *is*, water, and *ter*, terra; and *Trieste*, its chief town, exhibits a Celtic prefix *tre*, a dwelling, which will presently be discussed.

From the closely related Welsh word *gwy* or *wy* (water), we may derive the names of the *Wye* in Wales and in Derbyshire, and of the *wey* in Hampshire, in Dorset, and in Surrey. The *Llugwy* (clear water), the *Mynwy* (small water), the *Garway* (rough water), the *Dowrddwy* (noisy water), the *Elwy* (gliding water), the *Conway* (chief water), the *Sowy*, the *Edwy*, the *Onwy*, the *Olway*, the *Vrynwy*, are all in Wales; the *Medway* is in Kent, and the *Solway* on the Scottish border. There is an *Ivel* (*Guivel*) in Somersetshire and in Bedfordshire. The *Solent* was anciently called *Yr wylh*, the channel, and the *Isle of Wight* was *Ynys yr wylh*, the Isle of the Channel, from which the present name may possibly be derived.¹ We find the *Viehbach*, *Wippach*, and many similar names in Germany. In France the *Gy*, the *Guisave*, and the *Guil*, in the department of the Hautes Alpes, and the *Guiers*, in the department of the Ain, seem to contain the same root.

IV. Rhe. The root *Rhe* or *Rhin* is connected with the Gaelic *rea*, rapid; with the Welsh *rhe*, swift; *rhedu*, to run; *rhin*, that which runs; and also with the Greek *pēw*, the Sanskrit *ri*, and the English words *run* and *rain*.² From this root we have the *rye* in Kildare, Yorkshire, and Ayrshire; the *reaw* in Salop, Warwick, Herts, and Worcestershire; the *rey* in

¹ See, however, p. 48 supra.
² The *raindeer* is the running deer. In Welsh *rhyn* is a promontory, a point of land which *runs* out to sea. *Penrhyn* near Bangor, *Rynd* in Perth, *Rhind* in Clackmannan, the *Rins* of Galloway, *Penryn* in Cornwall, *Rien* in Clare, *Rinmore* in Devon, Argyle, and Aberdeen, and several *Rins* in *Kerry*, are all projecting tongues of land.
Wilts, the \textit{ray} in Oxfordshire and Lancashire, the \textit{rhee} in Cambridgeshire, the \textit{rhea} in Staffordshire, the \textit{wrey} in Devon, the \textit{roy} in Inverness, the \textit{roe} in Derry, the \textit{rue} in Montgomery, the \textit{eryn} in Sussex, the \textit{roden} in Salop and Essex, and the \textit{ribble} in Lancashire. We also find this root in the names of the \textit{rhine} (Rhenus), the \textit{rhin}, the \textit{rege}, the \textit{rega}, and the \textit{rhadanau}, in Germany, the \textit{reinach} and the \textit{reuss} in Switzerland, the \textit{regge} in Holland, the \textit{rhone} in France, the \textit{ri} in Spain, the \textit{rha} or \textit{volga} in Russia, the \textit{eridanus}, now the \textit{Po}, and the \textit{rhenus}, now the \textit{Reno}, in Italy.

V. \textit{Don}. The meaning of this root is obscure. It may be connected with the Celtic \textit{afon}, or it may be an unrelated Celtic or Scythian gloss. In the language of the Ossetes—a tribe in the Caucasus, which preserves a very primitive form of the Aryan speech—the word \textit{don} means water or river.\footnote{There is a Gadhelic word \textit{tain}, water. Armstrong says \textit{don} is an obsolete Gaelic word for water, and that it is still retained in the Armorican. Compare the Sclavonic \textit{tenu}, a river-deep. Ultimately, we may probably refer \textit{don} to the conjectural Sanskrit word \textit{udan}, water—which contains the root \textit{und}, to wet. Hence the Latin \textit{unda}. The Sanskrit \textit{udra}, water, comes from the same root \textit{und}, and is probably the source of the Celtic \textit{dur}.} If this be the meaning of the word, it throws light on certain primitive myths. Thus Hesiod informs us that \textit{Danaus}, the grandson of Poseidon and Libya (\textit{λίβα,} moisture), relieved Argos from drought: "\textit{Αργας ἀνύρων ἐὼν Δάναιος πολησεν ἐννυρων.} Again, we are told that the fifty Danaides, having slain their husbands, the fifty sons of \textit{Ægyptus}, on the wedding night, were condemned to carry water in broken urns to fill a bottomless vessel. This myth receives a beautiful interpretation as an exoteric exposition of a natural phenomenon, if we interpret the ancient gloss \textit{dan} as meaning water. We then see that the \textit{Danaides}, or daughters of \textit{Dan}, are the waters of the inundation, which overwhelm the fifty provinces of Egypt in their fatal embrace, and for a penalty have to bear water up the mountain sides in their broken urns of cloud, condemned ceaselessly to endeavour to fill the valley, a bottomless gulf through which the river carries forth the outpourings of the clouds into the sea.

But whatever may be the signification of this root, we find it in a large number of the most ancient and important river-
names. On the Continent we have the Danube, the Danastris, the Danaster or Dniester, the Danapris, Danasper or Dnieper, the Don, anciently the Tanais, and the Donetz, a tributary of the Don, in Russia; the Rhadanau, in Prussia, the Rhodanus or Rhone, the Adonis, the Aredon in the Caucasus, the Tidone and the Tanaro, affluents of the Eridanus or Po, the Durdan in Normandy, the Don in Brittany, and the Madon, the Verdon, the Loudon, the Odon, and the Roscodon in other parts of France.

In the British Isles this word is found in the names of the Don in Yorkshire, Aberdeen, and Antrim, the Bandon in Londonderry, the Dean in Nottinghamshire and Forfar, the Dane in Cheshire, the Dun in Lincolnshire and Ayrshire, the Tone in Somerset, and probably in the Eden in Yorkshire, Cumberland, Kent, Fife, and Roxburgh, the Davon in Cheshire and Glamorgan, the Devon in Leicestershire, Perth, Fife, and Clackmannan, and possibly in the Tyne in Northumberland and Haddington, the Teign in Devon, the Tien in the Island of Jura, the Teane in Stafford, the Teyn in Derbyshire, and the Tynet in Banff.

It thus appears that the names of almost all the larger rivers of Europe, as well as those of a very great number of the smaller streams, contain one or other of the five chief Celtic words for water or river, viz.—

1. Avon or aon.
2. Dwr or ter.
3. Esk or wye.
4. Rhe or rhin.
5. Don or dan.

It will, doubtless, have been remarked that several rivers figure more than once in the foregoing lists; we find, in short,

1 Some of these names may be from the Celtic tian, running water, or, perhaps, from Ta-aon, the still river. In many river-names we find an initial i or t, which may be either from dhu, black, da, two, or from the Celtic preposition di, do, or du, which means “at.” Thus the Dusk is probably the “dark water,” while the Devon and the Deskie, each formed by the junction of two streams, may be the “double water.” The incorporation of a preposition in a name is exemplified in the cases of Zermat, Andermat, Amsteg, Stanko (es tav Kâ), Utrecht (ad trajectum), Armorica, Arles.
that two or even three of these nearly synonymous roots enter into the composition of their names. Thus it seems probable that the name of the

Some of these cases may be open to criticism, but the instances are too numerous to be altogether fortuitous. The formation of these names appears to be in accordance with an important law which elucidates the process of slow accretion by which many ancient names of mountains and rivers have been formed. The theory assumes that, when the same territory has been subject to the successive occupancy of nations speaking different languages, or different dialects of the same language, the earliest settlers called the river, on whose banks they dwelt, by a word signifying in their own language "The Water," or "The River." As language changed through conquest, or in the lapse of ages, this word was taken for a proper name, and another word for "River" or "Water" was superadded. This process of superimposition may have been repeated again and again by successive tribes of immigrants, and thus ultimately may have been formed the strange aggregations of synonymous syllables which we find in so many river-names. The operation of this law we may detect with greater certainty in the case of names not affected, as are most of the names which have been cited, by the phonetic changes of many centuries. It will be well, therefore, to illustrate this process in the case of some familiar and more modern names, where it must, beyond possibility of doubt, have taken place.

In the case of the DUR-BECK in Nottinghamshire, and the
REDUPLICATION OF SYNONYMS

DUR-BACH in Germany, the first syllable is, plainly, the Celtic *dwr*, water. The Teutonic colonists, who, in either case, dispossessed the Celts, inquired the name of the stream; and being told it was *dwr*, the water, they naturally took this to be a proper name instead of a common name, and suffixed the Teutonic word *beck* or *bach*, a stream. In the names of the ESK-WATER and the DOUR-WATER in Yorkshire, we have a manifest English addition to the Celtic roots *esk* and *dwr*. The IS-BOURNE, the EASE-BURN, the ASH-BOURNE, the WASH-BURN, and the OUSE-BURN, present the Anglian *burn*, appended to various common modifications of the Celtic *uisge*. In the name of WAN-S-BECK-WATER we first find *wan*, which is a corrupted form of the Welsh *afon*. The *s* is probably a vestige of the Gadhelic *uisge*. As in the case of the Durbeck, the Teutonic *beck* was added by the Anglian colonists, and the English word *water* was suffixed when the meaning of Wansbeck had become obscure, and Wansbeckwater, or Riverwater-riverwater, is the curious agglomeration which has resulted.

The same process of formation may be traced in the names of mountains as well as of rivers. Thus the mountain at the head of the Yarrow is called MOUNTBENJERLAW. The original Celtic name was *Ben Yair*, or "Yarrow Head." The Angles added their own word *hlaw*, a hill; and the *mount* is an Anglo-Norman addition of still later date. In the name of BRINDON HILL, in Somersetshire, we have first the Cymric *bryn*, a hill. To this was added *dun*, a Saxonised Celtic word, nearly synonymous with *bryn*; and the English word *hill* was added when neither *bryn* nor *dun* were any longer significant words. PENDLE-HILL, in Lancashire, is similarly compounded of three synonymous words—the Cymric *pen*, the Norse *holl*, and the English *hill*. In PEN-TLOW HILL, in Essex, we have the Celtic *pen*, the Anglo-Saxon *hlaw*, and the English *hill*. SHAR-PEN-HOE-KNOLL, in Bedfordshire, contains four nearly synonymous elements. The names of PIN-HOW in Lancashire, PEN-HILL in Somersetshire and Dumfriesshire, PEN-D-HILL in Surrey, and PEN-LAW in Dumfriesshire, are analogous compounds. MON-GIBELLO, the local name of Etna, is compounded of the Arabic *gebel*, a mountain, to which the Italian *monte* has been prefixed.

Trajan's bridge, over the Tagus, is called the LA PUENTE DE
THE CELTS.

AHCANTARA. Here we have the same process. Al Cantara means “the Bridge” in Arabic, and La Puente means precisely the same thing in Spanish. In the case of the city of NAGPOOR we have nagara, a city, and pura, a city. The val de nant, in Neufchâtel, presents us with the Celtic nant and the French val, both identical in meaning. HERT-FORD gives us the Celtic rhyd, a synonym of the Saxon ford. In HOLM-IN ISLAND there are three synonyms. We find, first, the Norse hollm; secondly, the Celtic innis; and, lastly, the English island. INCH ISLAND is an analogous name. In the case of the Isle of Sheppey, Canvey Island, Osey Island, and Ramsey Island, we have the Anglo-Saxon ea, which is identical in meaning with the English island. In like manner, we might analyse the names of the Hill of Howth, the Cotswold Hills, the Tuskar Rock, the Menrock, Smerwick Harbour, Sandwick Bay, Cape Griznez, Start Point, the A-land Islands, Treville, Hampton, Hamptonwick, Bourn Brook in Surrey, the Bach Brook in Cheshire, the Oeh-bach in Hesse (Old High German aha, water), Knock-knows, Dal-field, Kinn-aird Head, the King-horn River, Hoe Hill in Lincoln, Mal-don (Celtic maol or moel, a round hill), Maserfield (Welsh maes, a field), Romny Marsh (Gaelic ruimne, a marsh), Alt Hill (Welsh allt, a cliff), and many others. It would be easy to multiply, almost without end, unexceptional instances of this process of aggregation of synonyms; but the cases cited may suffice to make it highly probable that the same process prevailed among the Celtic and Scythian tribes of Central Europe, and that this law of hybrid composition, as it is called, may without extravagance, be adduced in explanation of such names as the Rha-dan-au, or the Dn-ies-ter, and with the highest probability in cases like the Ax-ona or the Dur-dan.

It now remains briefly to consider the second or adjectival class of river-roots.

Two have been already mentioned. From the Welsh garw (Gaelic and Irish, garbh), rough, we obtain the names of the gara in Sligo and Hereford, the garry in Perth and Inverness, the yare in Normandy, in Norfolk, in the Isle of Wight, and in Devon, the garway in Carmarthen. the garnere in Clare.
the GARNAR in Hereford, the YARRO in Lancashire, the YARROW and the YAIR in Selkirk, the GARVE and the GARELOCH in Ross, the GARONNE, the GERS, and the GIRON in France, and the GUER in Brittany.

From the Gaelic all, white, we obtain al-aon, "white aon." The Romans Latinized this word into Alauna. The Lancashire Alauna of the Romans is now the LUNE; and the Warwickshire Alauna is the ALN.\(^1\) There is another LUNE in Yorkshire, and one in Durham. We find a river ALLEN in Leitrim, another in Denbigh, another in Northumberland, and a fourth in Dorset. There is an ALLAN in Perthshire, and two in Roxburghshire. The ALAN in Cornwall, the ALLWEN in Merioneth, the ELWIN in Lanark, the ELLEN in Cumberland, the ILEN in Cork, and the ALN or AULN, which we find in Northumberland, Cumberland, Hampshire, Warwick, Roxburgh, and Berwickshire, are all modifications of the same name, as well as the AULNE and the ELLEE in Brittany. The name of the ELBE is probably connected with the same root.

To the Gaelic and Erse ban, white, we may refer the BEN in Mayo, the BANN in Wexford, the BANE in Lincoln, the BAIN in Hertford, the AVEN-BANNA in Wexford, the Banon (Ban Afon) in Pembroke, the BANA in Down, the BANDON in Cork and Londonderry, the BANNEY in Yorkshire, the BANAC in Aberdeen, the BANOC-BURN in Stirling, the BAUNE in Hesse, and the BANitz in Bohemia.

The word dhu, black, appears in five rivers in Wales, three in Scotland, and one in Dorset, which are called Dulas. There are also two in Scotland and one in Lancashire called the DOUGLAS, and we have the DOULAS in Radnor, the DOWLES in Shropshire, and the Diggles in Lancashire.

From LEVEN, smooth, or from its derivative LINN, a still pool, we obtain the names of Loch LEVEN and three rivers called LEVEN in Scotland, beside others of the same name in Gloucestershire, Yorkshire, Cornwall, Cumberland, and Lancashire. To one of these words we may also refer the names of Loch LYON in Perth, the river LYON in Inverness, the LOIN in

---

\(^1\) Lancaster, anciently Ad Alau nam, is the castra on the Lune. The name of Alcester, which stands on the Aln, the Warwickshire Alauna, is written Ellencaster by Matthew Paris.
Banff, the LEANE in Kerry, the LINE in Cumberland, Northumberland, Nottingham, Peebles, and Fife, the LANE in Galloway, and the LAIN in Cornwall. Deep pools, or lynns, have given names to LINCOLN, King's LYNN, DUBLIN, GLASLIN, LINLITHGOW, LINTON, KILLIN, and ROSLIN.

The word *tam*, spreading, quiet, still, which seems to be related to the Welsh *taw* and the Gaelic *tav*, appears in the names of the Tem-ese or THAMES, the TAME in Cornwall, Cheshire, Lancashire, Stafford, and Bucks, the TAMAR in Devon, the TEMA in Selkirk, the TEME in Worcester, and perhaps\(^1\) in those of the TAW in Devon and Glamorgan, the TA Loch in Wexford, the TAY (anciently the Tavus) in Perth and Waterford, the TAVY in Devon, and the TAVE in Wales. Pliny tells us, “Scythre vocant Mæotim Temarundam,”—the “Broad Water.”\(^2\)

The widely-diffused root *ar* causes much perplexity. The ARAR, as Cæsar says, flows “incredibili lenitate;” while, as Coleridge tells us, the ARVE and the ARVEIRON “rave ceaselessly.” We find, however, on the one hand, a Welsh word *araf*, gentle, and an obsolete Gaelic word *ar*, slow, and on the other we have a Celtic word *arw*, violent, and a Sanskrit root *arb*, to ravage or destroy. From one or other of these roots, according to the character of the river, we may derive the names of the ARW in Monmouth, the ARE and the AIRE in Yorkshire, the AYR in Cardigan and Ayrshire, the ARRE in Cornwall, the ARRO in Warwick, the ARROW in Hereford and Sligo, the Aray in Argyle. the Ara-glin and the Ara-gadeen in Cork, the ERVE, the ARVE, the OURCQ, the ARC, the Arrière and the Arveiron, in France, the Arga and three rivers called Arva in Spain, in Italy the Arno and Era, in Switzerland the AAR and the Arbach, in Germany the OHRE, AHR, Isar, Aurach, Orre, Erl, Erla, Arl, Orla, Argen, and several mountain streams called the ARE; besides the well-known ancient names of the Oarus, the Araxes, the AR-AP-AR, the Naparis, the Aras, and the Jaxartes.

---

\(^1\) See page 139, *supra*.

\(^2\) We find a Sanskrit word, *lâmara*, water. The ultimate root seems to be *tam*, languescere.
The word *cam*, \(^1\) crooked, we find in the *cam* in Gloucester and Cambridgeshire, in the *camil* in Cornwall, the *camlad* in Shropshire, the *cambeck* in Cumberland, the *camlin* in Longford, and the *camon* in Tyrone. *Morcambe Bay* is the crooked-sea bay, and *camden* is the crooked vale. We have also the rivers *kamp* and *cham* in Germany, and the *kam* in Switzerland.

To the Gaelic *clith*, strong, we may refer the *clyde* and the *cludan* in Scotland, the *clwyd*, the *cloyd*, and the *clydach*, in Wales, the *glyde* and several other streams in Ireland, and, perhaps, the *clitumnus* in Italy.

There are many other clusters of river-names which invite investigation, but of which a mere enumeration must suffice. Such are the groups of names of which the *neath*, the *soar*, the *may*, the *dee*, the *tees*, the *cher*, the *ken*, the *frome*, the *colne*, the *irke*, the *lid*, the *lea*, the *meuse*, the *glen*, and the *swale*, may be taken as types. It is indeed a curious fact that a unique river-name is hardly to be found. Any given name may immediately be associated with some dozen or half dozen names nearly identical in form and meaning, collected from all parts of Europe. This might suffice to shew the great value of these river-names in ethnological investigations. Reaching back to a period anterior to all history, they enable us to prove the wide diffusion of the Celtic race, and to trace that race in its progress across Europe.

For antiquity and immutability, the names of mountains and hills come next in value to the names of rivers. "Helvellyn and Skiddaw," says an eloquent historian, "rise as sepulchral monuments of a race that has passed away." The names of these conspicuous landmarks have been transmitted from race to race very much in the same way, and from the same causes, as the names of rivers.

---

\(^1\) This word was adopted into English, though it is now obsolete. In *Coriolanus*, Act iii. scene i., Sichinius Velutus says of the crooked reasoning of Menenius Agrippa, "This is clean kam;" to which Brutus replies, "Merely awry." The root appears in the phrase, arms in kembo, or a-kimbo. To *cam*, in the *Manchester* dialect, is to cross or contradict a person, or to bend anything awry.
The modern Welsh names for the head, the brow, and the back, are *pen*, *bryn*, and *cefn*. We find these words in a large number of mountain-names. The Welsh *cefn* (pronounced *keven*), a back, or ridge, is very common in local names in Wales, as in the case of *cefn coed* or *cefn bryn*. In England it is found in the *chevin*, a ridge in Wharfdale; in *chevin Hill* near Derby; in *keynton*, a name which occurs in Shropshire, Dorset, and Wilts; in *chevening*, on the great ridge of North Kent; in *chevington* in Suffolk and Northumberland; also in *chevy Chase*, and the *cheviot* Hills; in the *Gebenna Mons*, now *les cevennes*, in France; and in Cape *chien* in Brittany.

The Welsh word *bryn*, a brow or ridge, is found in *brandon* in Suffolk, which is the Anglicized form of *Dinas Bran*, a common local name in Wales. A ridge in Essex is called *brandon*. *breandown* is the name of a high ridge near Weston-super-Mare. *brendon* Hill forms part of the great ridge of Exmoor. *birnwood* Forest, in Buckinghamshire, occupies the summit of a ridge which is elevated some 300 feet above the adjacent country. *braintree* in Essex, and *brinton* and *brancaster* in Norfolk (anciently Brannodunum) contain the same root, which is found in numerous Swiss and German names, such as *brannberg*, *brandenburg*, *brendenkopf*, and the *brenner* pass in the Tyrol.

The Welsh *pen*, a head, and by metonymy, the usual name for a mountain, is widely diffused throughout Europe. The south-easterly extension of the Cymric race is witnessed by the names of the *Penn-ine* chain of the Alps, the *A-Penn-ines*, a place called *penne*, anciently Pinna, in the high Apennines, and *Mount pindus*, in Greece. The ancient name of *penni-

---

1 Cf. the Sanskrit *bhūdha*, eyebrow. The English word *brow*, the Scotch *brae*, and the old German *brāwā*, all seem to be connected with this root.

2 From the root *pen*, originally a head or point, come probably, pinnacle, penny (?), pin, spine, and the name of the pine-tree. It is curious that the Cymric *pyr*, a fir, bears the same relation to the name of the *Pyrenees* that *pīna* does to those of the Apennines and Pennine Alps. Compare the Pyrenean mountains in Upper Austria, and the Ferner in Tyrol. In the case of many of the Pyrenean giants the topmost pyramid of each is called its "penna." *Peña* is the name for a rock in Spanish, and in Italian *penna* is a mountain summit.
LUCUS, at the end of the lake of Geneva, is evidently a Latinized form of *Pen-y-lleuch*, the head of the lake. We find PenHenrf and the headland of PenMarch in Brittany, and there is a hill near Marseilles which is called La Penne. In our own island, hills bearing this name are very numerous. We have Penard, Penhill, and Pen in Somerset, Upper and Lower Penn in Staffordshire, and Pann Castle near Bridgenorth. The highest hill in Buckinghamshire is called Pen. One of the most conspicuous summits in Yorkshire is called Pennigant. In Kent Pen stands on a high hill in Berkshire. We have Pendleton and Penketh in Lancashire, Penshurst in Sussex; in Cumbeland we find Penrith, the head of the ford; and in Herefordshire, Pencoid, the head of the wood. In Cornwall and Wales the root *pen* is of perpetual occurrence, as in the cases of Penrhyn and PenDenis (*Pen Dinas*) in Cornwall, and Penmaenmawr, Pembroke (*Pen-bro*, the head of the land), and Penrhos, in Wales.

In Argyleshire and the northern parts of Scotland the Cymric *pen* is ordinarily replaced by *ben* or *cenn*, the Gaelic forms of the same word.

This distinctive usage of *pen* and *ben* in local names enables us to detect the ancient line of demarcation between the Cymric and Gadhelic branches of the Celtic race. We find the Cymric form of the word throughout the kingdom of Strath-clyde, as in the case of the Pentland Hills, and Penpont in Dumfries, the *pen* of Eskdalemuir, Pen Craig in Haddington, Penwally in Ayrshire. On the other hand the Gaelic *ben*, which is conspicuously absent from England, Wales, and the south of Scotland, is used to designate almost all the higher summits of the north, as, for instance, Bennevis, Benledi, Benmore, Benwyvis, Benlomond, BenCruachan, and many more, too numerous to specify.

The Gadhelic *cenn*, a head, is another form of the same word. It is found in Kenmore, Cantire, Kinnaird, and

---

1 Ben Rhydding, in Yorkshire, is a name of very recent concoction.
2 Kenmore, the “great head,” from the Gaelic *mor*, or the Welsh *mawr*, great. This name is found also in Switzerland. There is a mountain called the Kamor in Appenzell, and another called the Kammerstock between
KINROSS in Scotland, KINSALE and KENMARE in Ireland, in the English county of KENT, KENNE in Somerset, KENNEDON in Devonshire, KENTON in Middlesex, KENCOT in Oxfordshire, and KENCUMB in Dorset.

The position of ancient Celtic strongholds is frequently indicated by the root dun, a hill-fortress, a word which is closely related to the modern Welsh word dinas. The features of such a natural stronghold are well exhibited at SION in Switzerland, where a bold isolated crag rises in the midst of an alluvial plain. Like so many other positions of the kind, this place bears a Celtic name. The German form SITTEN is nearer than the French SION to the ancient name Sedunum, which is the Latinized form of the original Celtic appellation. In a neighbouring canton the ancient Ebredunum has become YVERDUN, a place which, as well as THUN (pronounced Toon), must have been among the fortress-cities of the Celts of Switzerland. In Germany, Campodunum is now KEMP-ten, and Tarodunum, in the modern form of DOR-N-STADT, preserves only a single letter of the Celtic dun. The same is the case with Carrodunum (carraighdun, the rock fort), now KHAR-N-BURG on the Danube; while Idunum, on the same river, is now I-DIN-o. The ancient name of Belgrade was SEGODUNUM, Seigha-dun, equivalent to Hapsburg, or Hawks'-hill. THUNDORF and DUNE-STADT also witness the eastern extension of the Celtic people. In Italy we find nine ancient names into which this Celtic root enters, as Vindinum, the “white fort,” Atina, and Retina. COR-TONA was evidently Caer-dun. But in France, more especially, these Celtic hill-forts abounded. Augustodunum is now AU-TUN, and Juliodunum is LOU-DUN near Poictiers. Lugdunum (llavich-dun, the “lake fort,”) on the Rhone, is now LYONS; Lugdunum or Lugodinum, in Holland, is now LEYDEN; and Lugidunum, in Silesia, is now GLOGAU. The rock of LAON, the stronghold of the later Merovingian kings, is a contraction of Laudunum. Noviodunum, the “new fort,” is a common name: one is now

Uri and Glarus. Mont CENIS was anciently Mons Cinisius. GENEVA is probably CENN ASON, the head of the river.

1 From the Celtic the root has penetrated into Italian and Spanish as duna, into English as down, and into French as dune. The Dhuns of the Himalayas, as Kjarda Dhun and Dehra Dhun, are cognate words.
CELTIC STRONGHOLDS.

NOYON, another NEVERS, another NYON, another JUBLEINS. Melodunum (mealladun, the hill-fort), now MELUN, Verodunum (fir-dun, the "man's fort") now VERDUN, and Uxelloadunum in Guienne, were also Celtic strongholds.

In England there seem to have been fewer Celtic fortresses than in France. Londunum or Londonium, the fortified hill on which St. Paul's Cathedral stands, is now LONDON. Lex­don, near Colchester, seems to have been Legionis dunum; Camalodunum is possibly MALDON, in Essex. Sorbiodunum, now Old SARUM; Brannodunum, the "brow fort," now BRACTON; Moridunum, the "sea fort," now CARMAR-THEN; Moridunum, probably SEATON; Rigiodunum, perhaps RIBBLE-CHESTER; and Taodunum, now DUNDEE, were all British forts which were occupied by the Romans. The same root dun is found also in DUNSTABLE, DUNMOW, and DUNDRY Hill in Somerset. In Scotland we have DUMBLANE, DUMFRIES, DUNKELD, the "fort of the Celts," and DUMBARTON, the "fort of the Britons." In Ireland we find DUNDREUM, DUNDALE, DUNGANNON, DUNGAVON, DUNLEY, DUNLAVIN, and scores of other names which exhibit this root. It was adopted by the Saxons from the Celts, and, in accordance with the genius of their language, it is used as a suffix instead of as a prefix, as is usually the case in genuine Celtic names. We have instances in the names of HUNTINGDON, FARINGDON, and CLARENDON. The Celtic languages can, and usually do, place the substantive first and the adjective last, while in the Teutonic idiom this is unallowable. The same is the case with substantives which have the force of adjectives. Thus the Celtic Strathclyde and Abertay correspond to the Teutonic forms Clydesdale and Taymouth. This usage often enables us to discriminate between Celtic and Saxon roots which are nearly identical in sound. Thus, Balbeg and Strathbeg must be from the Celtic beg, little; but Bigholm and Bighouse are from the Teutonic big, great. Dalry, Dalgain, Dalkeith, Daleaglis, Dolberry in Somerset, and Toulouse must be from the Celtic dol, a plain; while Rydal, Kendal, Mardale, and Oundle, are from the Teutonic dale, a valley.

PENRHOS, a name which occurs in Wales and Cornwall.
contains a root—rhos, a moor—which is liable to be confused with the Gaelic ros, which signifies a prominent rock or headland. Ross in Hereford and in Northumberland, Rosneath by Loch Long, and Rosdwy on Loch Lomond, are all on projecting points of land. Every Rigi tourist will remember the projecting precipice of the Rossegg in Canton Schwytz, whose partial fall overwhelmed the village of Goldau. There are six other mountains of the same name in Germany. To the same source we may probably refer the names of Monte Rosa, Piz Rosatsch, Rosseg, and Rosenlaui in Switzerland, and Rosstrenan in Brittany. In our own islands we find this root in the names of Wroxeter, Roslin, Kinross, Cardross, Montrose, Melrose, Roxburgh, Arderossan, and Roscommon.

Craig, a rock, so common in Welsh names, is found in crick in Derbyshire and Northampton, and Cricklade in Wilts. In Ireland this word takes the form carraig, as in the case of Carrickfergus. The root is probably to be found in the name of the three ranges called respectively the Graian, the Carnic, and the Karavanken Alps. In the Tyrol we have the prefix kar, and in Savoy it takes the form crau. This form also appears in the name of a barren boulder-covered region between Arles and Marseilles, which is called La Crau.

Tor, a projecting rock, is found in the names of Mount Taurus, the Tyrol, Torbay, and the Tors of Devonshire and Derbyshire. We find Yes Tor, Fur Tor, Hey Tor, Mis Tor, Hessian Tor, Brent Tor, Hare Tor, and Lynx Tor, in Devon; and Row Tor, Mam Tor, Adyn Tor, Chee Tor, and Owlar Tor, in Derbyshire. Hentoe, in Lancashire, is a corruption of Hen Tor.

The word ard, high, great, which forms the first portion of the name of the legendary King Arthur, occurs in some 200 Irish names, as Ardagh, Armagh, and Ardfert. In Scotland we have Arderossan, Armeanagh, Ardnamurchan, and Ards.

1 The rush is the characteristic moorland plant. The Latin rus is a cognate word, and indicates the undrained moorland condition of the country.

2 Some of these may be the "red" mountains. The red hue of Monte Rosso, a southern outlier of the Bernina, is very markedly contrasted with the neighbouring "black peak" of Monte Nero.

3 Petronius tells us that this name means a rock.
The name of **Arran**, the lofty island, has been appropriately bestowed on islands off the coasts of Scotland and Ireland, and it attaches also to a mountain in Wales. The **Lizard** Point is "the high fort." In combination with the word *den*, a wooded valley, it gives us the name of the Forest of **Ardan** in Warwickshire and in Yorkshire, and that of the **Ardennes**, the great forest on the borders of France and Belgium. **Auverne** is probably *ar fearann*, the "high country."

The word *cwm*¹ is very frequently used in Wales, where it denotes a cup-shaped depression in the hills. This word, in the Saxonized form *combe*, often occurs in English local names, especially in those counties where the Celtic element is strong. There are twenty-three parishes called **Compton** in England. In Devonshire we have **Ilfracombe**, **Yarcombe**, and **Combe Martin**; and the combes among the Mendip hills are very numerous. The Celtic county of **Cumberland** has been supposed to take its name from the *combes* with which it abounds.² Anderson, a Cumberland poet, says of his native county:

"There's Cumwhittin, Cumwhinton, Cumranton, Cumrangan, Cumrew, and Cumcatch, And mony mair Cums i' the county, But nin wi' Cumdivock can match."

High **Wycombe** in Buckinghamshire, **Combe** in Oxfordshire, **Appledurcombe** and **Gatcombe** in the Isle of Wight, **Facombe** and **Combe** in Hampshire, **Gomshall** and **Combe** in Surrey, are instances of its occurrence in districts where the Celtic element is more faint than in the west: and abroad we find the root in the name of the Puy de **Bellecombe** in Cantal, and not improbably even in the name of **como**.

The Welsh *llwch*, a lake, morass, or hollow, corresponds to the Scotch *loch* and the Irish *lough*. This word constitutes the first syllable of the common ancient name *Lugdunum*, which has been modernized into **Lyons** and **Leyden**. We can trace the first portion of the Romanized Celtic name *Luguballium*.

---

¹ A *comb*, a measure for corn, and the *comb* of bees, are both from this root, which is found in several local dialects in the Celtic parts of France, Spain, and Italy, as, for example, the Piedmontese *comb*.

² See, however, p. 48, *supra*. 
in the mediæval Caerluel which superseded it, and which, with little change, still survives in the modern form Carlisle. The lake which fills a remarkable bowl-shaped crater in the Eifel district of Germany is called Laach. We find the same root in Lukotekia, Lukotokia, or Lutetia, the ancient name of Paris. 1

The Cymric prefix tre, a place or dwelling, is a useful test-word, since it does not occur in names derived from the Gaelic or Erse languages, though related to the Irish treabh, a clan, and, more distantly, to the Latin tribus. It occurs ninety-six times in the village-names of Cornwall, 2 more than twenty times in those of Wales; and is curiously distributed over the border counties. We find it five times in Herefordshire, three times in Devon, Gloucester, and Somerset, twice in Shropshire, and once in Worcester, Yorkshire, Lancashire, Cumberland, and Northumberland. 3 It is frequent in Brittany, it occurs some thirty times in other parts of France, and twice or thrice in the Celtic part of Spain, as in Trevento and Conterbia. Trèves, anciently Augusta Trevirorum, Troyes, anciently Civitas Tricassium, and Tricastin, near Orange, exhibit this widely-diffused Cymric root. The tribe of the Durotriges, the dwellers by the water, have given a portion of their name to Dorset, and the Atrebates have bestowed theirs upon Arras and Artois. In Italy we find the name Treba, now Trevi, Trebula.

1 Old Paris was confined to the island which divides the Seine into two branches. The name seems to be from Iluwch, and toki, to cut. From the related Welsh word Ilailh, moist, we have the name of Arelate, anciently Arlate, the town “on the marsh.”

2 More than a thousand times, if we include hamlets and single homesteads. Hence it enters into a vast number of Cornish territorial surnames. There is an old adage which says:—

“By Tre, Pol, and Pen,
You may know the Cornish men.”

3 We have, for example, such names as—Trefonen, Tre-evan, Tretire, Trevill, and Trewen, in Herefordshire; Trebroader in Shropshire; Treborough in Somerset; Treton in Yorkshire; Treboun in Berwickshire; Trehorn in Cunningham, in Ayrshire; Tretown in Fifeshire; Tregallon in Kirkcudbright; Treuchan in Perthshire. Such names as Uchiltre in Ayrshire, Wigtonshire, and Linlithgow; Wavertree in Lancashire; Braintree in Essex; Bawtry in Notts; Oswestry in Shropshire; and Coventry in Warwickshire, may, or may not, contain this root. The substantive in Celtic names is usually, but not invariably, the prefix. See p.149, supra.
NAMES OF DWELLINGS.

Now Treglia, Tresso, Treviso, Trebbia, and Trieste, besides Trient in the Italian Tyrol, and other similar names in the most Celtic part of Italy, near the head of the Adriatic.

_Bod_, a house, is very common in Cornwall, as, for example, in Bodmin, the "stone house," and it appears also in Wales. Ty means a cottage, and is universally prevalent in Wales, though it enters into few important names. In Cornwall it takes also the forms Chy and Ky, as Chynoweth, the "new house," Kynance, the "house in the valley." In Brittany it is very frequent in the form of Qui and Cae, as in Quiberon.

_Llan_, an inclosure, and hence, in later times, the sacred inclosure, or church, is also a useful Cymric test-word. It occurs ninety-seven times in the village-names of Wales, thirteen times in those of Cornwall, in Shropshire and in Herefordshire seven times, in Gloucestershire four times, and in Devon twice. It is also found in the Cymric part of Scotland, as in Lanark and Lanrick, and is very common in Brittany. The original meaning of _llan_ was probably not an inclosure but a level plain, such as the Landes, the vast sandy flats near Bayonne, or the Llanos, the sea-like plains of South America. In a mountainous country like Wales such level spots would be the first to be inclosed, and it is easy to perceive the process by which the transition of meaning might be effected. The root, in its primary meaning, appears in the name of Mi-lan, which stands in the midst of the finest plain in Europe. The Latin name Mediolanum probably embodies, or perhaps partly translates, the ancient enchorial word.

The Celtic word _man_, a district, is probably to be sought in Maine, Mans, Mantes, and Mayenne in France, in Mantua in Italy, in la Mancha and Manxes in Spain, in England in Mansfield, in Mancunium, now Manchester, in Mandues-sedum, now Manchester, as well as in Mona, the Menai Straits, the Isle of Man, and several Cornish names.

_Nant_, a valley, is a common root in the Cymric districts of our island, as in Nant-Frangon, the "beavers' valley," in Car-

---

1 Our words lawn and land come from the same ultimate root. Compare, however, the Persian làn, a yard.

2 Mona and the Isle of Man are perhaps from the Welsh mon, separate, a word cognate with the Greek μόνος.
narvonshire, or NANTGLYN in Denbighshire. NANT BIELD is the name of a steep pass in Westmoreland, and NANTWICH stands in a Cheshire valley. In Cornwall we find NANS, NANCEMELLIN, the "valley of the mill," PENNANT, the "head of the valley," and TRENANCE, the "town in the valley." It is also found in NANTAUA in Burgundy, NANCY in Lorraine, NANTES in Brittany, and the VAL DE NANT in Neufchâtel. All Chamounix tourists will remember NANT BOURANT, NANT D'ARPENAZ, NANT DE TA CONAY, NANT DE GRIA, NANT DANT, NANGY, and the other nants or valleys of Savoy, which were once, as this word proves, possessed by the same people who now inhabit the valleys of North Wales.

The ancient kingdom of GWENT comprised the counties of Monmouth and Glamorgan, and Monmouth still locally goes by this name. The word denotes an open champaign country, and the uncouth Celtic word was Latinized by the Romans into Venta. Venta Silurum is now CAER-WENT in Monmouthshire, Venta Belgarum is now WIN-CHESTER, and Bennaventa is now DAVENTRY. The Veneti were the people who inhabited the open plain of Brittany, and they have left their name in the district of LA VENDEE and the town of VANNES. The vast plain at the mouth of the Po, where Celtic names abound, has from the earliest times been called Venetia, a name which may probably be referred to the same root, as well perhaps as Beneventum, now BENEVENTO, and Treventum, now TRIVENTO.

Most of the Celtic roots which we have hitherto considered are distinctively Cymric rather than Gaelic or Erse. Such are cefn, bryn, cwm, llan, tre, nant, and gwent. Dun and llwych are common to both branches of the Celts, while the Gaelic ben, cenn, and carraig are closely related to the Cymric pen and craig. The next root to be considered is decisively Gadhelic, and is, therefore, very useful as a test-word in discriminating between the districts peopled by the two great branches of the Celtic stock.

The word magh, a plain or field, is found in more than a

1 Sanskrit, maht, terra. The Welsh form is maes, as in MAES GARMON, MESHAM, MAESBURY, MASERFIELD, MASBROOK, and WOODMAS. The MAES or MEUSE is the river of meadows. The English math, and to now, and the Latin meto, are cognate words,
hundred Irish names, such as MAGH-ERA, MAYNOOTH, MA-LLOW
On the Continent it is found in many ancient and modern names.
In Germany we find Magetoburgum, now MAG-DEBURG; Mogontiacum, now MAINZ, Marcomagus, now MARMAGEN, Noviomagus, or "Newfield," now NIMEGEN, Rigomagus, or "Kingsfield," now RHEINMAGEN, and Borbetomagus, now WORMS, and in North-eastern France this root was equally common. We have it in Rotomagus, now ROUEN, Noviomagus, now NEMOURS, Noviomagus Lexoviorum, now LISIEUX, Argentomagus, now ARGEN
ton, Catorimagus, now CHORGES, and Germanicomagus, now CHERMEZ.

The chief Cymric roots are found scattered over Spain, Northern Italy, Switzerland, and Southern Germany; but the root magh, the Gadhelic test-word, seems to be confined almost entirely to the district of the Lower Rhine and its tributaries. In Switzerland it does not appear,¹ and in Italy it occurs only in the district peopled by the intrusive Boii.² In Southern and Western France it hardly occurs at all, and it is found only once or twice in Britain.³ We may therefore conclude that while the Cymry came from the region of the Alps, the Gadhelic branch of the Celts must have migrated from the valleys of the Rhine and the Moselle. It seems to have been from this district that the earliest historic movement of the Celts took place. Three associated Celtic tribes burst through the Alps; they pillaged Rome, and, after returning to Illyria for a while, they broke in upon Greece, and plundered the treasures at Delphi. They settled for a time in Thrace, where we have local traces of a still earlier abode of a Celtic people, and then

¹ The Swiss form mat, a meadow, which appears in ZERMAT and ANDERMAT, is found only in the Cymric, and not in the Gaelic portions of Great Britain. E.g. MATHERN in Monmouth and in Hereford.

² We have Rigomagus near Turin, Bodincomagus on the Po, and Came-
lionagus near Placentia.

³ We have Magintum, now Dunstable. Close to the town is an ancient earthwork, called the Maiden Bower, or the Maidning Bourne, which seems to be a corruption of the Celto-Saxon name Mageburg. The original name of CÆSAROMAGUS was probably Dunomagus, as is indicated by DUNMOW-the modern name. SITOMAGUS is, perhaps, Thetford. The position of these places is a strong corroboration of the opinion held by many Celtic scholars, that East Anglia was Gaelic rather than Cymric.
crossing the Bosphorus, they took possession of the central parts of Asia Minor, to which they gave the name of Galatia, the land of the Gael, and where they long retained their Celtic speech, and the ethical peculiarities of their Celtic blood. We see, from many indications in St. Paul’s Epistle, that the “foolish Galatians,” who were so easily “bewitched,” were, like the rest of the Gaelic race, fickle, enthusiastic, fond of glory and display, and at the same time lively, witty, eloquent, and full of good sense and good feeling. The Galatians, like all other Celtic peoples, made admirable soldiers, and overthrew the invincible phalanx of Macedonia. We recognise in them the same military qualities which have made the charge of the Highland clans and of the Irish regiments so terrible, and which have rendered so famous the brilliant Celtic mercenaries of France and Carthage. Here, curiously enough, we again encounter this root mag, which is found so abundantly in the district from which they emigrated. In the Galatian district we find the names of Magydus, Magabula, Magaba, Mygdaile, Magnesia (twice), and the Mygdones. Magaba is on the Halys, which is a Celtic word, meaning “salt river.” In Lycia, according to Strabo, there was an enormous rocky summit, steeply scarped on every side, called Ἐρύος.2

The accumulative evidence furnished by these Celtic names has been exhibited in a very imperfect manner, but enough has probably been adduced to lead irresistibly to the conclusion that large portions of Italy, Spain, France, Switzerland, and Germany, were at some period inhabited by the race which now retains its speech and its nationality only in a few of

1 Galatas . . . proprium linguam etiam pene habere quam Treviro. Jerome, Commentary on the Epistle to the Galatians, Proemium.

2 There are many other Celtic names in Galatia and the neighbouring parts of Bithynia and Magnesia; such as the rivers Áesius, Áesyros, and Áeson, which apparently contain the root ēs, water. Abr-ös-tola seems to contain the roots aber and dol as well. Vindia, Cinna, and Brianie call to mind the roots gwent, cenn, and bryn. Armorium reminds us of Armorica. Olenus, in Galatia, reminds us of Olenœum in Britain, and Olin in Gaul. Agannia reminds us of Agennium in Gaul. An Episcopus Taviensis came from Galatia to attend the Nicene Council. We have also the apparently Celtic names Acitorizacum, Ambrenna, Eccobriga, Landrosia, Roslogiacum, and the river Siberis.
the western corners of Europe—Ireland, the Scotch Highlands, the Isle of Man, Wales, and Brittany.

The following may be offered as a brief summary of the results disclosed by the evidence of these Celtic names.

There is no ground for any probable conjectures as to the time and place at which the division of the Celts into their two great branches may be supposed to have taken place.

In Central Europe we find traces of both Cymry and Gael. The most numerous people of primæval Germany were of the Gadhelic branch. They were not only the most numerous, but they were also the earliest to arrive. This is indicated by the fact that throughout Germany we find no Cymric, Slavonic, or Teutonic names which have undergone phonetic changes in accordance with the genius of the Erse or Gaelic languages. Hence it may be inferred that the Gaels, on their arrival, found Germany unoccupied, and that their immigration was therefore of a peaceful character.

Next came the Cymry. They came as conquerors, and in numbers they were fewer than the Gaels whom they found in possession. This we gather from the fact that there are comparatively few pure Cymric names in Germany, but a large number of Gadhelic names which have been Cymricized. From the topographical distribution of these names we infer that the Gaels arrived from the east, and the Cymry from the south. The large number of Cymric names in Northern Italy, and the fact that several of the passes of the Alps bear Cymric names, seem also to indicate the quarter whence the Cymric invasion proceeded.

Lastly came the Germans from the north—they were conquerors, and fewer in number than either the Cymry or the Gael. They have Germanized many Gadhelic names which had previously been Cymricized.

The names of Northern and Central France are still more decisively Celtic than those of Germany. Without this evi-

1 We find the roots *llan*, *gwent*, *afon*, *is*, *stour*, *dwr*, *tre*, *ter*. A large number of words are common to the Celtic and Latin languages. Compare, for instance, the words *sagitta* and *saighead*, *lorica* and *liuireach*, *telum* and *tailm*. 
dence we should have no conception of the real amount of
the Celtic element in France; for though the Celtic tongue was
spoken down to the sixth century, it is surprising how very
few Celtic words have found their place in the French lan-
guage, though many linger in the provincial dialects. In
Brittany, the Armorican, a language closely allied to the
Welsh, is still spoken, and the local names, with hardly any
exceptions, are derived from Cymric roots, and are in a much
purer and more easily recognisable form than in other parts.
But we find that the same names which occur in Brittany are
also scattered over the rest of Northern France, though more
sparsely, and in more corrupted forms. Brandes has compiled
a list of more than three hundred Breton names, which also
occur in other parts of France. We have avon four times, bryn
nine times, tre thirty times, as well as llan, is, ar, dwr, and
garw. In the north-east of France we find a few Gaelic and
Erse roots which are altogether absent from the local nomen-
clature of the west, a fact which suggests that the Gaels of Ger-
many may have taken this road on their way to the British Isles.

But in South-western France—the region between the Ga-
ronne and the Pyrenees—the Celtic names, which are so
universally diffused over the other portions of the kingdom,
are most conspicuously absent. The names which we find in
this district are not even Indo-European, but belong to quite
another family of human speech—the Turanian, which includes
the languages which are now spoken by the Turks, the Mag-
yars, the Finns and Lapps of Northern Europe, and their
distant congeners the Basques, who inhabit the western portion
of the Pyrenees. These Spanish mountaineers, who now
number three-quarters of a million, seem to be the sole un-
absorbed remnant of the powerful race which once occupied
the greater portion of Spain, the half of France, the whole of

1 The theory has been advanced that the Bretons of Brittany were a
colony from Cornwall or Devon. No doubt there was a great amount
of intercourse. The Cornwall and Devon of France afforded refuge to the
emigrants expelled by the Saxons from the Cornwall and Devon of England;
but the local names of France prove conclusively that the Bretons were
once more widely spread.

2 The Glossa Malperga, recently disinterred by Leo, contains the laws of
a Belgian tribe, written in a language nearly akin to Irish.
Sardinia and Corsica, and large portions of Italy. The philo-
logical evidence of the existence of this people in our own
islands is but faint, being limited to some half-dozen names
such as CAITHNESS, HIBERNIA, BRITAIN, and SILURIA. The
ethnologist, however, readily identifies the short-statured, dark-
eyed, dark-haired "Silurian" race, which is so prevalent in
South Wales and the west of Ireland, with the Gascon or
Basque type of the Pyrenean region. It is doubtful whether
these Ligurians, Iberians, or Euskarians, as they are called,
crossed into Spain by the Straits of Gibraltar, or whether they
crept along the coast of the Mediterranean from Liguria, and
penetrated by the north-eastern defiles of the Pyrenees. The
absence of Iberic names from Eastern Europe and Asia seems
to make it probable that the Iberians crossed from Africa, and
spread over Spain, and thence to France, the Italian coastal-
land, and the Mediterranean Islands. There appear, however,
to be a few Euskarian names in Thrace. The ethnology of Spain
has been discussed in an admirable and exhaustive manner
by Wilhelm von Humboldt. The materials of this investigation
consist chiefly of the ancient names which are found in
Pliny, Ptolemy, Strabo, and the Itineraries. These names he
endeavours to trace to Celtic or Euskarian roots, and compares
them with the Basque names now found in the Asturias. One
of the most prevalent words is asta, a rock, which we have in
ASTURIA, ASTORGA, ASTA, ASTEGUIETA, ASTIGARRAGA, ASTOBIZA,
ASTULEZ, and many other names. The root ura, water, occurs
in ASTURIA, ILURIA, URIA, VERURIUM, URBICA, and URBINA.
Iturria, a fountain, is found in the names ITURISSA, TURAS,
TURIASO, TURDETANI, and TURIGA. The characteristic Euskarian
terminations are uris, pa, etani, etania,1 gis, ilia, and uia. The
characteristic initial syllables are al, ar, as, bae, bi, bar, ber, cal,
ner, sal, si, tai, and tu. These roots are found chiefly in Eastern
and Northern Spain, in the valley of the Tagus, and on the
southern coast, while in Galicia, in the valleys of the Minho2
and the Guadiana, and in Southern Portugal, the names are
purely Celtic, and there seems to have been no infusion of
an Euskarian element. Various fortresses in the Iberic district

1 See p. 39, supra.
2 The Myndow or Mynwy, on which Monmouth stands, is the same name.
bear Celtic names, while in the mountainous district of Central Spain a fusion of the two races would seem to have taken place, probably by a Celtic conquest of Iberic territory, and the Celtiberians, as they are called, separated the pure Celts from the pure Iberians.

In Aquitania proper there is hardly a single Celtic name—all are either Iberic or Romance. In Italy Iberic names are not uncommon, and it has been thought that some faint traces of a Turanian, if not of an Iberic population, are perceptible in the names of Egypt, North-western Africa, and Sicily.

In the British Isles, the Gaelic, the Erse, the Manx, and the Welsh are still living languages. Just as in Silesia and Bohemia the Slavonic is now gradually receding before the German language, so in the British Isles a similar process has been going on for more than fourteen centuries. We have documentary evidence of this process. The ancient documents relating to the parishes north of the Forth exhibit a gradually increasing proportion of Teutonic names. In the Taxatio of the twelfth century only 2½ per cent. are Teutonic; in the Chartularies from the twelfth to the fourteenth century the proportion rises to 4 per cent., and in the tax-rolls of 1554 to nearly 25 per cent. In the south of the island a similar retrocession of the Celtic speech may be traced. Thus in the will of Alfred, Dorset, Somerset, Wilts, and Devon, are enumerated as "Wealhcyne," a phrase which proves that these counties were then Celtic in blood and language, although politically they belonged to the Anglo-Saxon commonwealth. Dr. Guest has shewn that the valleys of the Frome and the Bristol Avon formed an intrusive Welsh wedge, protruding into the Saxon district. Athelstan found Britons and Saxons in joint occupation of the city of Exeter. He expelled the former, and drove them beyond the Tamar, and fixed the Wye as the boundary of the Northern Cymry. Harold, son of Godwin, ordered that every Welshman found east of Offa's Dyke should have his right hand struck off. Even so late as the time of Henry II. Herefordshire was not entirely Angli-

---

1 We find URIA in Apulia, ASTURA near Antium, ASTA in Liguria, as well as LIGURIA, BASTA, BITURGIA, and others which are compounded with the Euskarian roots, ASTA, a rock, URA, water, and ILIA or ULLA, a city.
cized, and it was only in the reign of Henry VIII. that Monmouthshire was first numbered among the English counties. In remote parts of Devon the ancient Cymric speech feebly lingered on till the reign of Elizabeth, while in Cornwall it was the general medium of intercourse in the time of Henry VIII. In the time of Queen Anne it was confined to five or six villages in the western portion of the county, and it has only become extinct within the lifetime of living men (A.D. 1777),\(^1\) while the Celtic race has survived the extinction of their language with little intermixture of Teutonic blood. In the west of Glamorgan, in Flint, Denbigh, and part of Montgomery, the English language has almost entirely displaced the Welsh, and in the other border counties it is rapidly encroaching. In fact, we may now see in actual operation the same gradual process which has taken place throughout the rest of Britain. In Wales, the change of language, now in progress, is accompanied by hardly any infusion of Saxon blood. The same must also have been the case at an earlier period. In Mercia and Wessex, at all events, we must believe that the bulk of the people is of Celtic blood. The Saxon keels cannot have transported any very numerous population, and, no doubt, the ceorls, or churls, long continued to be the nearly pure-blooded descendants of the aboriginal Celts of Britain.

These theoretical conclusions are thoroughly borne out by the evidence of the local names. Throughout the whole island almost every river-name is Celtic, most of the shire-names contain Celtic roots,\(^2\) and a fair sprinkling of names of hills, valleys, and fortresses, bears witness that the Celt was the aboriginal possessor of the soil; while in the border counties of Salop, Hereford, Gloucester, and Devon, and in the mountain fastnesses of Derbyshire and Cumberland, not only are the names of the great natural features of the country derived from the Celtic speech, but we find occasional village-

\(^{1}\) Many Cornish words still survive, as *quilquin*, a frog.

\(^{2}\) Cambridge, Cornwall, Cumberland, Devon, Dorset, Durham, Gloucester, Hertford, Huntingdon, Kent, Lancaster, Lincoln, Monmouth, Northumberland, Oxford, Worcester, and York, together with all the Welsh and Scotch shires, except Anglesea, Montgomery, Haddington, Kirkcudbright, Selkirk, Stirling, Sutherland, and Wigton.
names, with the prefixes *lan* and *tre*, interspersed among the Saxon patronymics. A large number of the chief ancient centres of population, such as London, Winchester, Gloucester, Exeter, Lincoln, York, Manchester, Lancaster, and Carlisle bear Celtic names, while the Teutonic town-names, such as Buckingham, Reading, and Derby, usually indicate by their suffixes that they originated in isolated family settlements in the uncleared forest, or, like Stafford, Bedford, and Chelmsford, arose from the necessities of traffic in the neighbourhood of some frequented ford. These facts, taken together, prove that the Saxon immigrants, for the most part, left the Celts in possession of the towns, and subdued, each for himself, a portion of the unappropriated waste. It is obvious, therefore, that a very considerable Celtic element of population must, for a long time, have subsisted, side by side with the Teutonic invaders, without much mutual interference. In time the Celts acquired the language of the dominant race, and the two peoples at last ceased to be distinguishable. Just in the same way, during the last two centuries, Anglo-Saxon colonists have been establishing themselves among the aborigines of North America, of the Cape, and of New Zealand, and the natives have not been at once exterminated, but are being slowly absorbed and assimilated by the superior vigour of the incoming race.

To exhibit the comparative amount of the Celtic, the Saxon, and the Danish elements of population in various portions of the island, an analysis has been made of the names of villages, hamlets, hills, woods, and valleys, in the counties of Suffolk, Surrey, Devon, Cornwall, and Monmouth. River names are excluded from the computation.

By far the greater number of Celtic names in England are of the Cymric type. Yet, as we have already seen, there is a thin stream of Gadhelic names which extends across the island from the Thames to the Mersey, as if to indicate the route by which the Gaels passed across to Ireland, impelled, probably, by the succeeding hosts of Cymric invaders.

The Cymry held the lowlands of Scotland as far as the Perthshire hills. The Celtic names in the valleys of the Clyde and the Forth are, as a rule, Cymric rather than Gaelic in their character. At a later period the Scots, an Irish sept, crossed over into Argyle, and gradually extended their dominion over the nearly related Gadhelic tribes who occupied the Highlands, encroaching here and there on the Cymry who held the Lowlands, and who were probably the people who go by the name of the Picts. In the ninth century the monarchy of the Picts was absorbed by that of the Scots. The Picts, however, still maintained a distinct ethnical existence, for we find them fighting in the battle of the Standard against Stephen. In the next century they disappear mysteriously from history.

To establish the point that the Picts—or the nation, whatever was its name—that held Central Scotland, were Cymric, not Gaelic, we may refer to the distinction already mentioned between *ben* and *pen*. *Ben* is confined to the west and north; *pen* to the east and south. *Inver* and *aber* are also useful test-words in discriminating between the two branches of the Celts. The difference between the two words is dialectic only; the etymology and the meaning are the same—a confluence of waters, either of two rivers, or of a river with the sea. *Aber* occurs repeatedly in Brittany, as *abervrack* and *avrances*, and it is found in about fifty Welsh names, such as *aberdare*, *abergavenny*, *abergele*, *aberystwith*, and *barmouth*, a corruption of Abermaw. In England we find *aberford* in Yorkshire, and *berwick* in Northumberland; and it has been thought that the name of the *humber* is a corruption of the same root. *Inver*, the Erse and Gaelic form, is common in Ireland, where *aber* is unknown. Thus we find

---

1 In ancient records Scotia means Ireland. North Britain was called Nova Scotia. In the twelfth century the Clyde and the Forth were the southern boundary of what was then called Scotland.
places called *INVER*, in Antrim, Donegal, and Mayo, and
*INVERMORE* in Galway and in Mayo. In Scotland, the *invers*
and *abers* are distributed in a curious and instructive manner.
If we draw a line across the map from a point a little south
of Inverary, to one a little north of Aberdeen, we shall find
that, with certain exceptions, the *invers* lie to the north-west
of the line, and the *abers* to the south-east of it. This line
roughly coincides with the present southern limit of the Gaelic
tongue, and probably also with the ancient division between
the Picts and the Scots. Hence, we may conclude that the
Picts, a people belonging to the Cymric branch of the Celtic
stock, and whose language has now ceased to be anywhere
vernacular, occupied the central and eastern districts of Scot­
land, as far north as the Grampians; while the Gadhelic Scots
have retained their language, and have given their name to the
whole country. The local names prove, moreover, that in
Scotland the Cymry did not encroach on the Gael, but the
Gael on the Cymry. The intrusive names are *invers*, which
invaded the land of the *abers*. Thus on the shores of the Frith
of Forth we find a few *invers* among the *abers*. The process
of change is shewn by a charter, in which King David grants
the monks of May, "Inverin qui fuit Aberin." So Abernethy
became Invernethy, although the old name is now restored.
The Welsh word *uchel*, high, may also be adduced to prove
the Cymric affinities of the Picts. This word does not exist
in either the Erse or the Gaelic languages, and yet it appears
in the name of the *OCHIL* Hills, in Perthshire. In Ayrshire,
and again in Linlithgow, we find places called *ochil-tree*;
and there is an *uchel-tree* in Galloway. The suffix in this case
is undoubtedly the characteristic Cymric word *tre*, a dwelling.
Again, the Erse *bally*, a town, occurs in 2000 names in Ireland;
and, on the other hand, is entirely absent from Wales and
Brittany. In Scotland this most characteristic test-word abounds

1 Inverary, Inverness, Inveraven, Inverury, Inveroran, Inverlochy, In­
vercannich, Inverfankaig, Invercaslie, Inverallen, Inverkeithnie, Inver­
amsay, Inverbroom, Invereshie, Invergarry, Invernavon.
2 Arbroath or Aberbrothwick, Abercorn, Aberdeen, Aberdour, Aber­
nethy, Abertay, Aberledy, Abergeldie, Abermyte, Aberfeldie, Aberfoyle.
3 E.g. Inveresk, near Edinburgh, Inverkeithing in Fife, Inverbervie in
Kincardine.
in the *inver* district, while it is extremely rare among the *abers*. The evidence of these four test-words leads us to the conclusion that the Celts of the Scottish lowlands belonged to the Cymric branch of the Celtic stock.

The ethnology of the Isle of Man may be very completely illustrated by means of local names. The map of the island contains about 400 names, of which about 20 per cent. are English, 21 per cent. are Norwegian, and 59 per cent. are Celtic. These Celtic names are all of the most characteristic Erse type. It would appear that not a single colonist from Wales ever reached the island, which, from the mountains of Carnarvon, is seen like a faint blue cloud upon the water. There are ninety-six names beginning with *Balla*, and the names of more than a dozen of the highest mountains have the prefix *Slieuv*, answering to the Irish *Slieuvh* or *Sliabh*. The Isle of Man has the *Curraghs*, the *Loughs*, and the *Allens* of Ireland faithfully reproduced. It is curious to observe that the names which denote places of Christian worship are all Norwegian; they are an indication of the late date at which Heathenism must have prevailed, and help to explain the fact that so many heathen superstitions and legends still linger in the island.

1 In the Channel Islands the names of *all* the towns and villages are derived from the names of saints, indicating that before the introduction of Christianity these islands were inhabited only by a sparse population of fishermen and shepherds.

CHAPTER X.

THE HISTORIC VALUE OF LOCAL NAMES.

There is a striking contrast between the characteristics of Saxon and Roman names. The Saxon civilization was domestic, the genius of Rome was imperial; the Saxons colonized, the Romans conquered. Hence, the traces of Roman rule which remain upon the map are surprisingly few in number. Throughout the whole island, we scarcely find a single place of human habitation denoted by a name which is purely Roman. The names of our English villages, with few exceptions, are Scandinavian or Teutonic; while the appellations of the chief centres of population and of the great natural landmarks—the rivers and the mountains—are the legacy of a still earlier race.

The character of Roman names is very different. Rome, with her eagle eye, could cast a comprehensive glance over a province or an empire, and could plan and execute the vast physical enterprises necessary for its subjugation, for its material progress, or for its defence. The Romans were essentially a constructive race. We still gaze with wonder on the massive fragments of their aqueducts, their bridges, their amphitheatres, their fortresses, and their walls; we still find their

1 Exceptions are SPEEN, anciently Spine, PONTEFRACT, PONTELAND, CAERLEON, PORCHESTER, and CHESTER.
altars, their inscriptions, and their coins. The whole island is intersected by a network of Roman roads, admirably planned, and executed with a constructive skill which is able to excite the admiration even of modern engineers. These are the true monuments of Roman greatness.

The Saxons were not road-makers. Vast works undertaken with a comprehensive imperial purpose were beyond the range of Saxon civilization. The Saxons even borrowed their name for a road from the Latin language. The Roman *strata*, or paved roads, became the Saxon *streets*. This word street often enables us to recognise the lines of Roman road which, straight as an arrow-course, connect the chief strategic positions in the island.

Thus, from the fortified port of Lymne an almost disused road runs across the Kentish Hills to Canterbury, bearing the name of STONE STREET. From the fortified port of Richborough the road which the Saxons afterwards called WATLING STREET, the "pilgrims' road," went to Canterbury and London, and thence by STONY STRATFORD, the "paved Street-ford," to Chester, the "castra" of the northern army. RYKNIELD STREET led from Tynemouth, through York, Derby, and Birmingham, to St. David's. ICKNIELD STREET led from Norwich to Dover, Chester and Exeter. London and Lincoln were joined by the ERMIN STREET, or "paupers' road." The Roman road by which sick men journeyed from London to bathe in the hot springs at Bath, went, in Saxon times, by the appropriate name of AKEMAN STREET, an appellation which survives in the name of a hollow called JACUMAN'S BOTTOM. The Westmoreland mountain called HIGH STREET derives its name from the Roman road which crosses it at a height of 2,700 feet.

Even where the Roman roads have become obliterated by the plough, we may often trace their direction by means of the names of towns, which proclaim the position they occupied on the great lines of communication. Such are the names of ARDWICK LE STREET in Yorkshire, CHESTER LE STREET in Durham, STRETTON, STRATTON, STREATHAM, STREATHLEY, and several places called STRETFORD or STRATFORD, all of which inform us that they were situated on some line of Roman road. Roman roads which do not bear the name of *street* are often called
Portways. There are nine Portways in different parts of the kingdom. The fossway also was a Roman road, running from Cornwall to Lincoln.

In the Scandinavian districts of the island the word gate is commonly used to express a road or street, as in the case of Harrogate. In York, Leeds, Lincoln, and other northern towns, the older streets usually bear this suffix. In Leeds we find Briggate or Bridge Street, and Kirkgate or Church Street. In York this suffix was borne by no less than twenty of the streets, as in the case of Micklegate, Walmgate, Jubbergate, Feasegate, Godramgate, Castlegate, Skelmergate, Petersgate, Marygate, Fishergate, and Stonegate. We find Millgate Street and St. Marysgate in Manchester, and Cowgate and Canongate in Edinburgh.

In the South the word gate usually takes the sense of the passage through a town wall, as in the case of Newgate, Bishopsgate, and the other gates of London. In the name of Highgate, however, we have the sense of a road.

The passes through lines of hill or cliff are frequently denoted by this root. Thus Reigate is a contraction of Ridgegate, the passage through the ridge of the North Downs. Gatton, in the same neighbourhood, is the “town at the passage.” Sarrat was anciently Sceargeate, the passage between the shires of Hertford and Buckingham. Ramsgate, Margate, Westgate, Kingsgate, and Sandgate, are the passages to the shore through the line of Kentish cliffs. In Romney Marsh Gut takes the place of gate, as in the case of Jervis Gut, Clobesden Gut, and Denge Marsh Gut.

The difficulties of travelling must formerly have interposed

1 The Danish word gata means a street or road. The Anglo-Saxon geat means a gate. The distinction is analogous to that which exists in the case of the word ford. (See p. 106, supra.) The one is a passage along, the other a passage through. The root is seen in the German verb gehen, and the English go. Compare the Sanskrit gati, and the Zend gātu, which both mean a road. From the same primary meaning of a passage we obtain gut, the intestinal passage, and the nautical term gat, a passage through a narrow channel, as the Cattegat. A gate is the passage into a field. A man’s gait is the way he goes; his gaiters are his goers. Othergates is the Sussex provincialism for otherways. The ghat, or ghaut, of India are the passages to the river-sides and the passes through the hill-ranges.
great obstacles in the way of commercial intercourse. Local names afford various intimations that the art of bridge-building, in which the Romans had excelled, was not retained by the Anglo-Saxons. Thus the station on the Tyne, which in Roman times had been called Pons Aelii, received from the Anglians the name GATESHEAD, or, as we may translate it, "road's end," an indication, it would seem, of the destruction of the bridge. At the spot where the Roman road crosses the Aire, the name of PONTEFRACHT (Ad Pontem Fractum) reminds us that the broken Roman bridge must have remained unrepaird during a period long enough for the naturalization of the new name; and the name of STRATFORD LE BOW contains internal evidence that the dangerous narrow Saxon ford over the Lea was not replaced by a "bow," or "arched bridge," till after the time of the Norman Conquest.

But nothing shews more conclusively the unbridged state of the streams than the fact that where the great lines of Roman road are intersected by rivers, we so frequently find important towns bearing the Saxon suffix -ford. At OXFORD, HEREFORD, HERTFORD, BEDFORD, STRATFORD ON AVON, STAFFORD, WALLINGFORD, GUILFORD, and CHELMSFORD, considerable streams had to be forded. In the kingdom of Essex, within twenty miles of London, we find the names OLD FORD, STRATFORD, ILFORD, ROFORD, WOODFORD, STAPLEFORD, PASSINGFORD, STANFORD, CHINGFORD, and STORTFORD. We find the same state of things in Kent. The Medway had to be forded at AYLESFORD, the Darent at DARTFORD and at OTFORD, and the Stour at ASHFORD.

1 The importance attached by the Romans to the art of bridge-building is indicated by the fact that the chief ecclesiastical functionary bore the name of the bridge-builder—Pontifex.

2 The piles on which the Roman bridge rested were discovered in 1771. There seems to have been another bridge built by Aelius on the continuation of the Roman road northward. Six miles from Newcastle we find the village-name of PONTELAND, apparently a corruption of Ad Pontem Aelianum. There was also a Roman bridge at PAUNTON, Ad Pontem.

3 The bridge was built by Matilda, queen of Henry I. The town of IRONBRIDGE in Shropshire dates from the year 1779, when an iron bridge, the first of its kind, was thrown across the Severn, and a town rapidly sprang up at its foot.
The great deficiency of bridges is still more forcibly impressed upon us when we remember that while the names of so many large towns present the suffix *ford*, there are only a very few which terminate in *bridge*. We have TUNBRIDGE, WEYBRIDGE, UXBRIDGE, STOCKBRIDGE, CAMBRIDGE,¹ and a few more, all of which stand on small and easily-bridged streams. But in all these cases the English form of the suffix seems to shew the comparatively modern date of the erection, and names which take a Saxon form, such as BRIXTON, or BRISTOL, anciently Bricgstaw, are extremely rare.

It should be noticed that *pont*, the Welsh word for a bridge, is derived from the Latin, probably through the monks, who were the great bridge-builders. Nevertheless it has been thought that the art of bridge-building was known at a very early period to the Celtic nations, and was subsequently lost. In the most purely Celtic parts of Spain and France, a very large number of the names of riverain cities terminate in *briga* and *briva*, which, in the opinion of many Celtic scholars, must have meant a bridge. They think it is an ancient Aryan word, older than the epoch of the separation of the Teutonic and Celtic stems, and which disappeared from the Celtic speech at the time when the art of bridge-building was lost.²

The hardships incident to travelling must have been much increased by the fewness of houses of entertainment along the roads. Where no religious house existed to receive the wayfarer, he would usually be compelled to content himself with the shelter of bare walls. The ruins of deserted Roman villas were no doubt often used by travellers who carried their own bedding and provisions, as is done by the frequenters ¹

¹ Camboritum, the ancient name of Cambridge, gives us the Celtic root *rhyd*, a ford, which we find also in *Rhedecina*, the British name of Oxford, and in *Hert-ford* (Rhyd-ford), where we have two synonymous elements. The Celtic *rhod*, a roadstead, and *rhyd*, or *red*, a ford, bear much the same relation to each other as the Norse *fjord* and the Saxon *ford*.

² In Spain we have Turobriga, Segobriga, Lacobriga, Arcobriga, and others, thirty-five in all. In Celtic Gaul there are Eburobriga, Limnobriga, and Amagenbriga, and Brivate and Durocobrivis in Britain. An allied form is *bria*, which we find in Mesembria, Selymbria, and Poltyobria, in Celtic colonies on the Euxine. Brescia was in the Celtic part of Italy. The names of Bregentz, Braganza, Briançon, and perhaps of the Brigantes, contain the same root.
of khans and serais in the East. Such places seem commonly to have borne the name of COLD HARBOUR.¹ In the neighbourhood of ancient lines of road we find no less than seventy places bearing this name,² and about a dozen more bearing the analogous name of CALDICOT, or "cold cot."

The only great works constructed by the Anglo-Saxons were the vast earthen ramparts which served as the boundaries between hostile kingdoms. For miles and miles the dyke and ditch³ of the WANDSYKE—the ancient boundary of Wessex—still stretch across the bleak downs of Somerset and Wilts. Beginning near Portishead, on the Bristol Channel, it runs by Malmesbury and Cirencester, to Bampton in Oxfordshire; it then crosses the Thames, and reappears at a place called KINSEY. This name is a corruption of King’s Way, and shews that the dyke must have been used as a road as well as for purposes of defence. OFFA’S DYKE, which stretched from Chester to the Wye, guarded the frontiers of Mercia against the Welsh. GRIM’S DYKE near Salisbury, OLD DITCH near Amesbury, and BOKERLY DITCH, mark the position of the Welsh and Saxon frontier at an earlier period. The ditch called the PICTS’ WORK, reaching from Galashiels to Peel Fell, seems to have been at one time the boundary between the Anglian kingdom of Northumbria and the Pictish kingdom to the west. A vast work, variously called the RECKEN DYKE, the DEVIL’S DYKE, ST. EDMUND’S DYKE, and Cnut’s DYKE, served as the defence of the kingdom of East Anglia against Mercia; unless, indeed, we suppose, as is not improbable, that it was constructed at a time when the Mercian kingdom was still British, and the East-

¹ Compare the German Herberg, shelter, and the French auberge.
² There are three on Akeman Street, four on Ermin Street, two on Icknield Street, two on Watling Street, two on the Portways, and one on the Fossway.
³ The Anglo-Saxon díc is derived from the root which supplies us with the verb to dig, and is used to mean both the mound and the excavation. In modern English we call one the dyke and the other the ditch. Probably the masculine and feminine of the Anglo-Saxon díc supplied the original germ of the distinctive use. The common village-name of DITTON (dyketon) may sometimes guide us as to the position of these dykes. Fen Ditton and Wood Ditton, in Cambridgeshire, stand respectively on the Fleam Dyke and the Devil’s Dyke.
Anglian settlement was the sole possession of the Teutons in the island.¹

But these Saxon defences were at the best mere earthworks, and are not to be compared, in a constructive point of view, with the two Roman walls which stretched across the island from sea to sea. The Wall of Hadrian, or of Severus, as it is called, ran from Newcastle to Carlisle, and is still in wonderful preservation. But even if the massive masonry and huge earthen rampart of this wall had perished, it would be easy to trace its direction by means of the continuous series of memorial names which are furnished by the villages and farm-houses along its course. It began at WallSEND, now famous as the place where the best Newcastle coals are shipped. We then come in succession to places called Benwell, Wallbottle, Heddon-on-the-Wall, Welton, Wallhouses, Wall, Walwick Chesters, Wallshiel's, Walltown, Thirlwall, Birdoswald, Wallbours, Walton, Oldwall, Wallknoll, Wallmill, and Wallby, with Wallend, Wallfoot, and Wallhead at the western end. The wall was, moreover, protected by fortified posts at regular intervals. The sites of these fortresses go by the names of BLAKE (Black) CHESTERS, RUTCHESTER, HALTON CHESTERS, CARROWBURGH, CHESTERHOLM, GREAT CHESTERS, BURGH, and DRUMBURGH.

The northern wall, or Wall of Antoninus, extended from the Forth to the Clyde, and goes by the name of GRIME'S DYKE.² DUMBARTON, DUMBUCK Hill, and DUNGLAS were probably fortified stations along its course.

Fortified camps, whether of British, Roman, Saxon, or Danish construction, are very commonly marked by the suffix BURY. To enumerate any considerable portion of these names would far exceed our limits; but merely to shew how this suffix may guide the antiquarian in his researches, it may suffice to exhibit the results obtained from a single county. In Wiltshire alone there are, or were in Camden's time, military earthworks in existence at the places called Chisbury, Boadbury,

¹ The Mercian kingdom was founded 140 years after that of Kent, and we have seen that the East-Anglian settlement was probably much earlier than that in Kent.

² There is also a Grimesditch in Cheshire, and there are four other earthworks bearing the same name, slightly altered.
Abury, Yanesbury, Ambresbury, Selbury, Sidbury, Badbury, Wanborough, Burywood, Barbury, Oldbury, Rybury, Westbury, Battlesbury, Avesbury, Scratchbury, Waldsbury, Bilbury, Winklebury, Chiselbury, Cleresbury, Whichbury, Frippsbury, and Ogbury; while at Malmesbury, Salisbury, Heytesbury, Ramesbury, Titsbury, and Marlborough, the sites of British or Saxon earthworks seem to have been used for the erection of Norman castles.

A competent etymological investigation of the first syllable in these names might probably yield results not destitute of value. The Roman stations throughout the island may very frequently be recognised by the fact that their modern names contain a modification of the Latin word *castra*.1 These modifications are very curious, as exhibiting the dialectic tendencies in different portions of the island. Throughout the kingdoms of Essex, Sussex, Wessex, and in other purely Saxon districts, the form *chester* is universal. Here we have the names of Colchester, Godmanchester, Grantchester, Chesterford, Irchester, Rochester, Winchester, Ilchester, Chichester, Silchester, Porchester, and two Dorchester. But as we pass from the Saxon to the Anglian kingdoms, we find *chester* replaced by *caster*. The distinctive usage of these two forms is very noticeable, and is of great ethnological value. In one place the line of demarcation is so sharply defined that it can be traced within two hundred yards. Northamptonshire, which is decisively Anglian and Danish, is divided by the Nen from Huntingdonshire, which is purely Saxon. On the Saxon side of the river we find the village of Chesterton, confronted on the other side by the town of Castor, the two names recording, in two different dialects, the fact that the bridge was guarded by the Roman station of Durobrivae (water-bridge). Throughout the Anglian and Danish districts we find this form *caster*, as in Tadcaster, Brancaster, Ancaster, Don-

---

1 One syllable of names containing *chester*, *caster*, or *caer*, is usually Celtic, and seems to have been a Latinization of the enchorial name. In Winchester the first syllable is the Latin *venta*, a word which was constructed from the Celtic *gwent*, a plain. Binchester contains a portion of the Latinized name Binovium. In Dorchester and Exeter we have the Celtic words *dwr* and *uisge*, water; in Manchester we have *man*, a district.
caster, Lancaster, Casterton, Alcaster, Castor, and Caistor. As we pass from East Anglia to Mercia, which, though mainly Anglian, was subject to a certain amount of Saxon influence, we find cester, which is intermediate in form between the Anglian caster and the Saxon chester. The e is retained, but the h is omitted; and there is a strong tendency to further elision, as in the case of Leicester, pronounced Le'ster; Bicester, pronounced Bi'ster; Worcester, pronounced Wor'ster; Gloucester, pronounced Glo'ster, and Cirencester, pronounced S'i'sester or Si's'ter. The same tendency is seen in the cases of Alcester, Mancester, and Towcester. It is still more noteworthy that beyond the Tees, where the Danish and Mercian influence ceases, and where almost all the local names resume the pure Saxon type, we find that the southern form cluster reappears; and we have the names Lanchester, Binchester, Chester-le-Street, Ebchester, Ribchester, Rowchester, Ficherester, Chesterknows, Chesterlee, Chesterholm, Rutchester, and a few others on the Wall.

Towards the Welsh frontier the c or ch becomes an x, and the tendency to elision is very strong. We have Wroxeter, Uttoxeter, pronounced Ux'ter, and Exeter, which in Camden's time was written Excester.

These names on the Welsh frontier exhibit a gradual approximation to the form which we find in the parts where the Celtic speech survived, where castra is replaced by the Welsh prefix caer in the names of Caerleon, Caergai, Caergwyle, Caersws, Caerwent, Caerphilly, Caerwis, and the still more abbreviated forms of Carstairs, Carluke, and Carredin in Scotland, Carhayes in Cornwall, Carmarthen, Cardigan, Cardiff, and Carnarvon in Wales, Carhallock, Carlisle, and Carvoran in England, Caher and Cardross in Ireland. With these forms we may compare Caerphili and Caerven in Brittany, Cherbourg in the Celtic peninsula of Cornuaille, and Carsoli, Carosio, Carmiano, Carovigno, and Cortona, in the Celtic part of Italy.  

1 Great Chesters, on the Wall, is an exact reproduction of the Celtic name Carvoran, from which it is only three miles distant. As in the case of Chesterton and Castor, we have here an indication of the close geographical proximity in which different races must have lived.

2 Chester and castor are, undoubtedly, from the Latin castra. But there
The Latin word *colonia* is found in the names of *Lincoln*, *Cologne*, and *Kulona* in Palestine, and perhaps also in those of *Colchester* and the two rivers called the *Colne*, one of which rises near the site of the *colonia* of Verulamium, and the other flows past Colchester. In the immediate vicinity of Colchester a legion was stationed for the protection of the colony. The precise spot which was occupied by the camp of this legion is indicated by the remains of extensive Roman earthworks at *Lexdon*, a name which is a corruption of *Legionis Dunum*. The Second Legion—Legio Augusta—was stationed on the river Usk, or Isca, at a place called, in the Roman time, Isca Legionis. The process by which the modern name of *Caerleon* has been evolved is indicated in the work which bears the name of Nennius: "bellum gestum est in urbe Leogis, quae Brittanice Cair Lion dicitur." Another legion we find at *Leicester* (Legionis castra).

The station of the seventh legion was in Spain, at *Leon* (Legionis Castra), that of the Claudian legion at *Klo ten* in Switzerland. Megiddo in Palestine, where another legion was quartered, now goes by the name of *Ledjún*, or *Lejjun* (Castra Legionis).

Roman military stations in Gaul were commonly called *Tabernae*. *Tabernae Triborocorum* is now *Saverne*; *Tabernae Rhenanae* is *Rhein Zabren*; and *Tabernae Bononienses* is *Devres* near Boulogne.

The numerous "peels" along the Scottish border are an evidence of the insecurity arising from border warfare in times when every man's house was, in a literal sense, his castle also. The hill where the border clan of the Maxwells used to assemble previous to their dreaded forays bears the appropriate name of the *WARDLAW* (guard-hill). A reference to this try-sting place is contained in the war-cry of the clan, "I bid you bide Wardlaw."

is considerable doubt whether *caer* is a modification of *castra*, or an independent Celtic root. We have the British and Cornish *caer*, the Armorican *ker*, and the Irish *cathair* and *ca’ir*, a fortress, and the Welsh *cae*, an inclosure, and *cor*, a close. Compare the Hebrew and Phoenician word *Kartha*, which is seen in the names of *Kirjath*, *Keroth*, *Kir*, and *Carthage*, and is identical in meaning with the Celtic *caer*. If there is no affiliation, this is a very remarkable coincidence of sound and meaning.
A similar state of society is indicated by the name of Castile, as well as by the castle which appears on the armorial bearings of that kingdom. The name and the device date from the times of continuous border warfare, when the central portion of the peninsula was, mile by mile, being wrested from the Moors, and secured by an ever-advancing line of frontier castles.

At a later period, when the unbelievers had been finally expelled from Northern and Central Spain, the debateable ground was the province which now goes by the name of Murcia. This word means the district of the "march" or margin, the demarcation between two alien races. To make a mark is to draw a boundary. Letters of marque are letters which contain a licence to harass the enemy beyond the frontier. A Margrave, Mark-graf, Earl of March, or Marquess was the Warden of the Marches, who held his fief by the tenure of defending the frontier against aggression, and this important office gave him rank next to the Duke or Dux, the leader of the forces of the shire. The root is found in all the Indo-Germanic languages, and is probably to be referred to the Sanskrit maryā, a boundary, which is a derivative of the verb smrī, to remember. We may compare the Latin margo, and the Persian marg, a frontier. The uncleared forest served as the boundary of the gau of the Teutonic settlers. Hence the Scandinavian mörk, a forest, and the English word murky, which originally denoted the gloom of the primæval forest. The chase took place in the forest which bounded the inhabited district, hence the Sanskrit mrga, chase, hunting. A huntsman being nearly synonymous with a horseman, we have the Celtic marc, a horse, which has found its way into the English verb to march, and the French word maréchal, a groom or farrier. The Earl Marshal was originally the "grand farrier," or "master of the horse"—a great officer of state, like the grand falconer.

The Scotch and the Welsh marches, for many centuries, occupy an important place in English history as the border-

1 Gaelic and Erse, marc; Welsh, Cornish, and Brezonec mar’ch. Compare the Anglo-Saxon near, a horse, whence the English mare. According to Ammianus Marcellinus, the war-cry of the Sarmatians was Marha, Marha, "to horse, to horse."
lands between England, and her ancient enemies in Scotland and Wales. The Anglo-Saxon kingdom of Mercia was the frontier province between the East Angles and the Welsh. On the frontier line we find Marbrook and Marchomley in Shropshire, Marbury in Cheshire, and Markley in Herefordshire. On the frontier between the Celts of Cornwall and the Saxons of Devon, stands the village of Marham. We have seen that the valleys of the Frome and Avon remained Celtic long after the surrounding country had been occupied by the Saxons. Some three or four miles to the south-west of Bath stands the village of Merkbury, the "fortress of the march" or boundary of the Welsh district. The names of the adjoining villages of Englishcombe and Englishbatch seem to mark outlying portions of the English territory. The town of March in Cambridgeshire is close to the sharply defined frontier line of the Scandinavian kingdom, and on the frontier of the outlying Danish colony in Essex we find a place called Comarques.

Throughout Europe we find this word march or mark entering into the names of outlying or frontier provinces. The Marcomanni of Tacitus were the marchmen of the Slavonic frontier of Germany. The names of the provinces of Altmark, Mittelmark, Ukemark, and Neumark, which collectively constitute the Mark of Brandenburg, shew the successive encroachments of the Germans on the Poles; Altmark, or the "Old Mark," being the farthest to the west, while Neumark, the "New Mark," is the farthest to the east. Denmark was the Danish frontier. Finnmark, and four provinces called Lappmark, shew the five successive stages by which the Scandinavian invaders encroached upon the territory of the Fins and Lapps. Moravia takes its name from the March, or Mor-ava, a bordering river. Steyermark, or Styria, as we Anglicize the word, formed the south-eastern frontier between

1 Grimm thinks that the Marcomanni were the men of the forest, rather than the men of the frontier.
2 The name of the Ukermark contains two synonymous elements—Ukraine being a Slavonic word, meaning a frontier. The Ukraine of the Dnieper was the southern frontier of the ancient kingdom of Poland.
3 The suffix ava is the Old High German aha, a river.
the Germans, and the Hungarians and Croats. Here we find the border town of Marburg. The boundary of the Saxon colony in Westphalia is shown by the district called March, and there is a place called Marbach on the frontier of the Swabian settlement in Württemberg. On the frontiers of the Saxon colony in Picardy we find the rivers Morbecq and Morbecque, a dyke called the Mardick, and the village of Marck. In the Vosges, on the frontier of the Alemannic population of Alsace, we find the town of la Marche. One of the old provinces of France, called Marche, was the frontier between the Franks and the Euskarians of Aquitaine. The March of Ancona, and the other Roman Marches which are now annexed to the kingdom of Italy, together with the Marquisate of Tuscany, formed the southern boundaries of the Carolingian empire. The Marquisate of Flanders was erected at a later period as a barrier against the Danes, and on its frontier are two towns called Marchiennes. In fact, all the original Marches, those of Milan, Verona, Carniola, Istria, Moravia, Cambe, Provence, Susa, Montserrat, and many others, will be found to have been marks or frontier territories.

Two names survive which indicate ancient boundaries of the Roman empire. The name of the Fiume della Fine, near Leghorn, is a corruption of the Roman name, Ad Fines. This river, about the year 250 B.C., formed the extreme northern limit of the Latin confederacy. The Canton Valais in Switzerland is curiously divided between a German- and a French-speaking population. The Romans left the upper end of the valley to the barbarous mountaineers, and their descendants now speak German. The lower part, which was included within the Roman rule, is now French in language. The line of linguistic demarcation is sharply drawn in the neighbourhood of Leuk. On this line we find a village which is called Pfyn, a name which marks the fines, the confines both of the Roman rule and of the language of the conquerors.

A somewhat similar name is found in England. Devizes is a barbarous Anglicization of the Low Latin Divisae, which denoted the point where the road from London to Bath passed into the Celtic district. Even so late as the time of Clarendon, the name had hardly become a proper name, being
called The Devizes, in the same way that Bath was called The Bath in the time of Addison.

The former state of our island, divided between hostile peoples—Saxon, Celt, and Dane—is indicated not only by such names as Mercia and March, but by those of several of our English counties. CUmbERLAND is the land of the Cymry. CORNWALL, or Cornwall, is the kingdom of the Welsh of the Horn. DEVON is the land of the Damnonii, a Celtic tribe; KENT that of the Cantii; WORCESTERSHIRE that of the Huicii. SUSSEX, ESSEX, WESSEX, and MIDDLESEX were, as the names imply, the kingdoms of the southern, eastern, western, and central Saxons. In Robert of Gloucester, the name of SURREY appears in the form of Sothe-reye, or the south realm. NORFOLK and SUFFOLK were the northern and southern divisions of the East-Anglian folk. The position on the map of what we call NORTHUMBERLAND—the land north of the Humber—proves that it was by aggression from the south that the Northumbrian kingdom, which once stretched northward from the Humber, was reduced to the restricted limits of the modern county. Everyone must have noticed that a certain number of shire-names are derived from the names of the county towns, as in the case of OXFORDSHIRE or WARWICKSHIRE, while others are tribal or territorial, as DEVON, DORSET, or ESSEX. This distinction is not arbitrary, but has a curious historical basis. With hardly an exception, names of the former class belong to the Mercian or Northumbrian kingdoms, which were conquests or annexations, posterior in date to the Saxon tribal immigration. Successive districts, as they were annexed, took their names from the town in which the earl held his court, and from which he governed his conquered earldom. Names of the one class point out the limits of the original tribes or kingdoms; those of the other class mark the boundaries of the subject provinces.

These county names may serve to remind us of the origin of the discordant fragments that have at length been welded into a national unity; while numerous village-names, such as SAXBY, FLEMINGSBY, FRANKBY, FRISBY, FINSTHWAITE, SCOT-

1 We have Frankby in Cheshire, four Franktons in Salop, and one in Warwick, Frankley in Worcester, and Frankham in Dorset. We find a
THORPE, NORMANDBY, and DANBY, prove from how wide an area those bands of adventurers were collected who made their swords the title-deeds to portions of our English soil.

At the close of the period of Roman occupation, the Barbarian auxiliaries must have formed a not inconsiderable element in the population of Britain. From the “Notitia Imperii,” and from inscriptions, we learn that there were legions recruited from Moors, Cilicians, Dacians, Sarmatians, Tungrians, Batavians, and from sundry tribes of Gaul, Spain, and Germany, which were located in various parts of Britain. There were Indians stationed at Cirencester; Thracians in Yorkshire, in Shropshire, at Cirencester, and on the Wall; and Dalmatians in Norfolk, Lincolnshire, and on the Wall. Local names preserve a few traces of these military colonies. The names of QUAT and QUATFORD,¹ near Bridgenorth in Salop, and of TONG,² in Yorkshire, have been thought to bear witness to settlements of Quadi and of Tungrians. The ancient name of HUNNUM on the Wall, and the modern one of HUNSTANTON, in Norfolk, may possibly be due to the Huns. There is only one name of this class, however, which can be referred to with any confidence. We are informed by Zosimus that large bodies of Vandal auxiliaries were settled in Britain by the Emperor Probus, and Gervase of Tilbury informs us that Vandalburgh in Cambridgeshire was a fortification raised by them. Vandalburgh is undoubtedly to be identified with the huge earthwork called WANDLESBURY, which occupies the summit of the Gogmagog Hills. Wendalebury, near Bicester, in Oxfordshire; Windlesham, near Woking, in Surrey; Windleden and Wenden Hill, in Yorkshire; and Windle, in Lancashire, may, some of them, be Vandal settlements.

Henry of Huntingdon informs us that the Picts, during one

¹ More probably from the Celtic coed, a wood.
² More probably Norse.
of their incursions, advanced as far as Stamford, where they suffered a bloody repulse. The remnant of this invading host may with some probability be traced at Pitchley in Northamptonshire, a place which, in Domesday, is called Picts-lei and Pihtes-lea, the *laga* or settlement of the Picts or Pehtas.¹

NANT-Y-GWYDDYL, the "Valley of the Gael," in the Black Mountains, is one among several places in Wales where fragments of an earlier Gadhelic race seems to have survived in the midst of their Cymric conquerors.

Beyond the confines of England we find numerous names which denote intrusive colonization, or the settlement of the remains of defeated armies. One of the most curious of these is SCYTHOPOLIS, a strong natural rock-fortress in Eastern Palestine, the name of which is probably a record of the Scythian invasion in the reign of Josiah, which is recorded by Herodotus.²

It is probable that the modern Greeks are mainly Slavonic, rather than Hellenic, in blood. At all events the names of SERVIANIKA and CRAVATTA shew that Servians and Croats penetrated into the Morea. In Westphalia we find the adjacent villages of FRANKENFELD and SASSENBERG, and in Hesse Cassel FRANKENBERG and SASSENBERG stand face to face. In the Rhineland, FRANKFURT and FRANKENTHAL³ are settlements of the Franks, just as KATZELLENBOGEN and SACHSENHAUSEN are of the Saxons. FLAMANDVILLE and SASSETOT in Normandy, and SUEVEGHEM in Flanders, are among the numerous names of the kind which might easily be collected. A curious tradition derives the name of Canton SCHWYTZ from a Swedish colony which settled there at some remote period. The WESTMANN ISLES, opposite Hjörleif's Head on

¹ The pronunciation of this name, Peitchley, strongly favours the etymology suggested in the text. Compare also the phrases Sexena-*laga*, the seat or district of the Saxons, and Danelagh, that of the Danes.
² Herodotus, i. c. 105; Zephaniah, ii. 5, 6. It is possible that there may be truth in the tradition which asserts that the Frank Mountain, in the same neighbourhood, was a refuge of the Crusaders.
³ The ancient forms of these two names shew that they are derived from the nationality of the inhabitants, and not, as is usually supposed, from the possession of certain franchises.
the coast of Iceland, were the refuge of some westmen, or Irish slaves, who slew their master, Hjörleif, and then, seizing a boat, fled for their lives to the neighbouring islets.¹

CHAPTER XI.

THE STREET NAMES OF LONDON.

The history of many cities has been deciphered from inscriptions, and so the history of Old London may, much of it, be deciphered from the inscriptions which we find written up at the corners of its streets. These familiar names, which catch the eye as we pace the pavement, perpetually remind us of the London of bygone centuries, and recall the stages by which the long unlovely avenues of street have replaced the elms and hedgerows, and have spread over miles of pleasant fields, till scores of outlying villages have been absorbed into a "boundless contiguity" of brick and mortar.

By the aid of the street names of London let us then endeavour to reconstruct the history of London, and, in the first place, let us take these names as our guide-book in making the circuit of the old City Walls. The ancient wall started from the Norman fortress on Tower Hill, and ran to Aldgate—the "Old Gate." Through Bishopsgate the Bishop of London used to ride forth to hunt in his woods at Stepney. Between Aldgate and Bishopsgate the wall was protected by an open ditch, two hundred feet broad, whose name, Houndsditch, sufficiently indicates the unsavoury nature of its contents. Camomile Street and Wormwood Street remind us of the
desolate strip of waste ground which lay immediately within the wall, and of the hardy herbs which covered it, or strove to force their rootlets between the stones of the grey rampart. In continuation of the street called Houndsditch, we find a street called LONDON WALL. Here no ditch seems to have been needed, for the names of FINSBURY, MOORFIELDS, MOOR LANE, and MOORGATE STREET, hand down the memory of the great Fen or Moor—an "arrant fen," as Pennant quaintly calls it—which protected the northern side of London. On this moor, just outside the wall, was the ARTILLERY GROUND, where the bowmen were wont to assemble to display their skill.

Where the fen terminated the wall needed more protection, and here accordingly we find the site of the BARBICAN, one of the gateway towers, which seems to have guarded ALDERSGATE, the chief entrance from the north. Considerable remains of the wall are still visible in CASTLE STREET, as well as in the churchyard of St. Giles', CRIPPLEGATE. Passing by NEWGATE we come to the OLD BAILEY, a name which is derived from the ballium or vallum, an open space between the line of the outer wall and the advanced gate of the city. The wall now turned southward, and ran along the crest of LUDGATE HILL, its western face being protected by the FLEET, a small stream which flowed along the ditch of the city wall, which was here called

1 Hard by we find ARTILLERY STREET, where the Bowyers and Fletchers fabricated longbows and cloth-yard shafts. The word artillery, in Old English, denotes bows and arrows, and it retained this meaning till the seventeenth century, for we find the word used in this sense in 1 Sam. xx. where our version reads, "And Jonathan gave his artillery unto his lad, and said unto him, Go, carry them to the city."

2 In a similar position with respect to the city wall, we find the OLD BAYLE at York, the church of St. Peter in the Bailey at Oxford, and Bailey Hill at Sheffield and Radnor. A bailiff was originally the Bayle-reeve, or officer in charge of the Ballium; just as the sheriff is the shire-reeve. A bail is etymologically a palisade. Thus the bails at cricket were originally the stumps, the present restricted meaning of the word being of later origin. The Roman vallum, and the English wall, are etymologically stockades. So also is Bally, the commonest prefix in Irish village-names.

3 The words flood, fleet, and float, come from the Anglo-Saxon verb flogan, to float or swim. A fleet is either that which is afloat, or a place where vessels can float—that is, a channel, or where water fleets or runs. Hence the names FBBFLEET, NORTHFLEET, SOUTHFLEET, PURFLEET, and PORTFLEET. The word vley, which the boers of the Cape use for the
THE WALLS.

the FLEET DITCH. The river Fleet also gave its name to the street which crossed it at right angles, and entered the city by Fleetgate, Floodgate, or LUDGATE. A Norman fortress erected at the same time as the Tower of London stood at the angle formed by the wall and the Thames. A wharf which occupies the site, as well as one of the city wards, still retain the name of CASTLE BAYNARD, although every vestige of the fortress has long disappeared. DOWGATE and BILLINGSGATE were two of the passages through that part of the wall which protected the city from assailants coming from the riverside.

The small space within the walls of Old London was almost exactly of the same shape and the same area as Hyde Park. As the last syllable of its name indicates, LONDON was originally a dun or Celtic hill-fortress, formed by Tower Hill, Cornhill, and Ludgate Hill, and effectually protected by the Thames on the south, the Fleet on the west, the great fen of Moorfields and Finsbury on the north, and afterwards by the Houndsditch and the Tower on the east.

For a long period London was confined within the limit of its walls. In the reign of Edward I. CHARING was a country village lying midway between the two cities of London and Westminster, and ST. MARTIN'S-IN-THE-FIELDS long continued to be the village church. Along the STRAND of the river hardly a house had been built in the time of Edward III., and no continuous street existed till the reign of Elizabeth. Even then, to the north of this straggling line of houses, the open country extended from LINCOLN'S INN FIELDS to the village church of ST. GILES' IN THE FIELDS. James I. ordered the justices to commit to prison any person presuming to build upon this open space. LONG ACRE, formerly a field called "The Elms," or "The Seven Acres," was not built upon till the reign of Charles I. And scarcely a century ago a man with a telescope used to station himself in LEICESTER FIELDS—now Leicester Square—and offer to the passers-by, at the charge of one half-penny, a peep at the heads of the Scotch rebels which garnished the spikes on Temple Bar.

If, two or three centuries ago, what now forms the heart of smaller rivers, is the same word fleet (Dutch, vliet), in a somewhat disguised form.
London was unbuilt upon, it was at a still more recent period that Kensington, Brompton, Paddington, Dalston, Stoke Newington, and Islington, remained detached country villages, though they are now districts incorporated with the wilderness of streets. There was a coach which took three hours to run, or rather to flounder through the ruts, from the village of Paddington to London: and Lord Hervey, in country retirement at Kensington, laments that the impassable roads should cause his entire isolation from his friends in London.

The names Spitalfields, Bethnal Green, Field Lane, Clerkenwell Green, Paddington Green, Vine Street, Moorfields, Smithfield, Coldbath Fields, St. George's Fields, Spa Fields, Rosemary Lane, Copenhagen Fields, and Kingsland, indicate the rural character of the districts that separated the outlying villages from the neighbouring city. In these fields the citizens could take pleasant country walks with their wives, while their children clambered over Goodman's Style, in Goodman's Fields, to drink fresh milk from Farmer Goodman's cows, or, on rare occasions, went nutting on Notting Hill. In Windmill Street, Finsbury, there was a windmill built on the top of a large mound composed of bones and earth which had been carted from the churchyard of Old St. Paul's; there was another windmill in Windmill Street, at the top of the Haymarket; and there was a water-mill in Milford Lane, Strand. In Tottall Fields there was a bear garden, and the hounds of the Lord Mayor's pack were kennelled at Doghouse-Bar, in the City Road. In the fields by the side of the brook which has given its name to Brook Street, an annual fair was held on the site of Curzon Street and Hertford Street—a rural fete whose memory is preserved in the name of the fashionable region of Mayfair.

The names of the present streets will enable us to trace the courses of the brooks which ran through these country fields. The little stream called the Holborn, rising near Holborn Bars, gave its name to the street down which it flowed; and after turning the mill at Turnbull or Turnmill

---

1 The "Old Bourne," or burn, is the etymology of "The Holborn," which is universally given—thoughtlessly copied, according to the usual custom, by one writer from another. That a village or town should be
THE BROOKS.

Street, it joined the Fleet river at Holborn Bridge. From this point to the Thames the Fleet was navigable, at all events by barges, as is attested by the names of Seacoal Lane and Newcastle Lane.

Finsbury and Moorfields were drained by the Walbrook, which passed through the wall in its course to the Thames. At Budge Row—a corruption of Bridge Row—there was a bridge over this brook. Two or three centuries ago the stream was vaulted over, and Walbrook Street was built upon the ground thus gained. The Langbourne, another of the city streams, has given its name to one of the London wards; and Sherbourne Lane, near London Bridge, marks the course of the Sherbourne. Further to the west, the positions of two small rivulets which crossed the Strand are denoted by Ivybridge Lane and Strand-Bridge Lane.

The Tyburn, a much larger stream, after passing by the church of St. Mary le bourne, or Marylebone, and crossing the great western road near Stratford Place, passed across Brook Street, and down Engine Street, to the depression of Piccadilly. The hollow in the Green Park is, in fact, the valley of the Tyburn, and the ornamental water in front of Buckingham Palace was the marsh in which it stagnated before its junction with the Thames.

To the west of the Holborn and the Tyburn we find the Westbourne, with its affluent the Kilburn. Where this stream crossed the great western road, it spread out into a shallow Bay-Water, where cattle might drink at the wayside. On the formation of Hyde Park a dam was constructed across the valley of the Westbourne, so as to head up the water, thus forming the Serpentine River, which leaves the park at Albert Gate, and crosses the Kensington Road at Knightsbridge.

It would appear that the water supply of Old London, when not derived from the Thames, the Holborn, or the Tyburn, called Oldham, Aldborough, or Newton, is intelligible, but how a name like Oldbourne should have arisen is difficult to explain. The introduction of the old is another difficulty in the way of this etymology. It seems far more in accordance with etymological laws to refer the name to the Anglo-Saxon hole, a hollow, or ravine; the Holborn will therefore be "the Burn in the hollow," like the Holbeck in Lincolnshire, and the Holbec in Normandy.
was obtained from numerous wells—Clerkenwell, or the priest's well, Bridewell or St. Bridget's well, Holywell, Sadler's Wells, Bagnigge Wells, and others—and in later times from the conduits or fountains which gave a name to Lamb's Conduit Street, and Conduit Street, Regent Street. The use of the Shoreditch, the Walbrook, the Sherbourne, the Langbourne, and the Fleet, was, we will hope, discontinued at a comparatively early period.

Redriff, or Rotherhithe, St. Mary Somerset, a corruption of Summer's Hithe, Stepney, anciently Stebenhithe, Queenhithe, and Lambeth, or Lambhithe, mark some of the chief "hithes" or landing-places on the banks of the Thames.

Close to London Bridge we find the church of St. Mary Overy, or St. Mary of the Ferry. This name, if we may believe the old traditions, recalls the time when the Thames was unbridged, and when the proceeds of the ferry formed the valuable endowment of the conventual church. So Horse-ferry Road is a reminiscence of the ferry which Westminster Bridge has superseded.

The monastic establishments were chiefly situated in the fields around the city, their sacred character rendering unnecessary the protection of the walls. Convent, or Covent Garden, was the garden of the monks of Westminster Abbey. The name of the Charterhouse, or Carthusian convent, has been corrupted into the Charterhouse. At Canonbury, Islington, was an affiliated establishment of the canons of St. Bartholomew's Priory, now St. Bartholomew's Hospital. Spital Square occupies the site of the churchyard belonging to the church of the priory and hospital of St. Mary, which stood.

I am not aware that any etymology of the name of Wych Street has been proposed. Like Wynch Street in Bristol, it may be probably derived from the wynch of the public well of Holywell.

2 The names of Erith and Greenhithe, lower down the river, contain the same root.

3 This etymology, as well as the myth of the miserly ferryman and his fair daughter, are open to grave suspicion. St. Mary Overy is probably St. Mary Ofer-ea, or St. Mary by the water-side. The Anglo-Saxon offer is the same as the modern German ufer, a shore.

4 So Orchard Street, Bristol, was the garden of a monastery, and Culver Street was the columbarium.
beyond the walls in SPITAL-FIELDS. In AUSTIN FRIARS, Broad Street, stood the convent of the Augustines; that of the Miniresses, or Nuns of St. Clare, was in the MINORIES, just outside the eastern wall; and in CRUTCHED FRIARS, Tower Hill, was that of the Crutched Friars, distinguished by the cross upon their dress. In MONKELL STREET was a hermitage belonging to the Monastery of Garendon in Leicestershire, and in HOLYWELL STREET, Shoreditch, the Priory of the Nuns of St. John the Baptist. ST. KATHERINE'S DOCKS occupy the site of the abbey of St. Katherine. The Knights of the Temple of Jerusalem occupied what is now the TEMPLE; the round church, built on the model of the church of the Holy Sepulchre, being the only part of the ancient building still remaining. At ST. JOHN'S GATE, Clerkenwell, we find a vestige of the other great military order, the Hospitallers, the Knights of the Hospital of St. John, of Jerusalem, Rhodes, and Malta.

To several of the convents belonged sanctuaries, or precincts possessing the valuable privilege of freedom from arrest. The BROAD SANCTUARY belonged to the abbot and monks of Westminster. The monastic establishment of the SAVOY enjoyed similar privileges. GLOSTER COURT, Blackfriars, is a corruption of Cloister Court, and marks the site of the convent of the BLACK FRIARS, or Dominicans, who together with the WHITE FRIARS, or Carmelites, and the GREY FRIARS, or Franciscans, possessed the privileges of sanctuary, the abuse of which has conferred an unenviable notoriety upon the districts to which these immunities were attached. The monastery of the Greyfriars is now Christ's Hospital. The cloisters and the buttery are the only parts of the old edifice now remaining.

1 A crutch is the old English word for a cross. A cripple's crutch has a cross piece of wood at the top. Crouchmass was the festival on the 14th of September, held in honour of the Holy Cross. To crouch is to bend the body into the form of a cross. Crochet work is performed with a crooked needle. A person who has a crotchet has a crook in the mind. A crotchet in music is a crooked note. A shepherd's crook is crooked at the top.

2 The Augustines, the Dominicans, the Franciscans, and the Carmelites, were the four mendicant orders, whose sphere of labour lay among the crowded population of great cities. The Benedictines and Cistercians had their establishments, for the most part, in country districts, where they discharged the duties of great feudal landowners.
The Greyfriars were sometimes called the Minorites, but the name of the Minories is derived, as has been said above, from the Minoress nuns, and not from the Minorite Friars.

Special districts in the city, or in the suburbs, were assigned to aliens, or appropriated by those who carried on certain trades. *Tooley Street*, a corruption of St. Olaf's Street, and the church of *St. Clement Danes* mark respectively the colony and the burying-place of the Danes in the southern and western suburbs. The Jews were admitted within the walls, and resided in the two districts which still retain the names of *Jewinf Street* and the *Old Jewry*. The *Lombard* pawn-brokers and money dealers established themselves in the street which bears their name, between the two chief centres of trade, the positions of which are denoted by the names of *Cheapside* and *Eastcheap*. 1 The corn-market on *Cornhill* adjoined the grass-market in Grasschurch or *Gracechurch Street*, and the hay-market in *Fenchurch Street*. 2 The wool-market was held round the churchyard of *St. Mary Woolchurch*. The soapmakers were established in *Soper's Lane*, now Queen Street, Cheapside; the buckler-makers in *Bucklersbury*; while *Lothbury*, a corruption of Lattenbury, was inhabited by the workmen in brass and copper. *Sermon Lane* is a corruption of *Shiremonger's Lane*, and was inhabited by the shermongers, whose business it was to cut bullion into shape ready for coining. The *Mint*, in Bermondsey, was the issuing place at a later date. The colemen or charcoal-burners sold their goods in *Coleman Street*, and the makers of the trumpets for the city watchmen were conveniently located in *Trump Street*, close to the Guildhall. The names of the *Poultry*, the *Vintry*, *Fish Street*, *Bread Street*, *Milk Street*, *Leadenhall*, (a corruption of Leather Hall,) *Leather Lane*, *Silver Street*, and *Smithfield*, indicate the localities appropriated to other trades.

The streets in the neighbourhood of *St. Paul's* were occupied by those who ministered to the temporal and spiritual necessities of the frequenters of the church. *Dean's Court*,

1 From the Anglo-Saxon *cap*, sale.
2 The name of Fenchurch is probably from *fenum* or *foin*, hay. The western *Haymarket* dates from a much later period.
DOCTORS’ COMMONS, and GODLIMAN STREET, still form an oasis of ecclesiastical repose amid the noise and whirr of the city. At the great entrance of the Cathedral the scene must have resembled that which we see at the doors of continental churches, which are often blocked up by stalls for the sale of rosaries, crucifixes, and breviaries. We read in Stow’s Survey: “This street is now called PATERNOSTER ROW, because of the stationers or text-writers that dwelled there, who wrote and sold all sorts of books then in use, namely A B C, or Absies, with the Paternoster, Ave, Creed, Graces, &c. There dwelled also Turners of Beads, and they were called Paternoster-makers. ... At the end of Paternoster Row is AVE MARY LANE, so called upon the like occasion of text-writers and bead-makers then dwelling there. And at the end of that lane is likewise CREED LANE, late so called, ... and AMEN CORNER is added thereunto betwixt the south end of Warwick Lane, and the north end of Ave Mary Lane.”

Of the recreations of old London but few memorials are preserved in names. It is difficult to realize the fact that tournaments were held on London Bridge, or in the middle of Cheapside. The name of QUEEN STREET, Cheapside, seems to have arisen from an ancient stone balcony which had been erected at the corner of the street in order to enable the queens of England to enjoy the spectacle of the tourneys which on special occasions were held in this great thoroughfare. The permanent stone balcony was erected in 1329, in consequence of the fall of one of the temporary wooden structures previously used. The name of the street was bestowed in 1667, when it was rebuilt after the Great Fire.

The city Maypole was erected in front of the church of ST. ANDREW UNDERSHAWT. The tall shaft, when not required for use, lay upon a row of hooks over the house doors in SHAFT ALLEY. The pole was erected for the last time in the year 1517, and was destroyed by the mob in 1552.

Drury Lane Theatre was built on the site of a cockpit called the Phoenix, the memory of which is perpetuated, not only in the “Rejected Addresses,” but by the names of
PHŒNIX ALLEY, leading to Long Acre, and of COCKPIT ALLEY in Great Wyld Street.

The names of many of our streets preserve the remembrance of the sites of the town houses of great historical families. These were originally within the walls. Richard III. resided in Castle Baynard, and Duke Humphrey of Gloucester, and Prince Rupert, in the Barbican. OLD PALACE YARD reminds us of the ancient palace of the kings of England, the site of which is now occupied by the Houses of Parliament. ADDLE STREET, near the Guildhall, was believed by Stow to owe its name to the royal residence of Athelstane, which once stood upon the site. In the time of Henry VI. the Percys, Earls of Northumberland, had their town house near Fenchurch Street, on the spot which still goes by the name of NORTHUMBERLAND ALLEY. The De la Poles, Dukes of Suffolk, lived in SUFFOLK LANE, Cannon Street; DUCK'S FOOT LANE, close by, is probably a corruption of Duke's Foot-lane; the Manners family resided in RUTLAND PLACE, Blackfriars; the Earls of Devonshire in DEVONSHIRE SQUARE, Bishopsgate; and the Earls of Bridgewater in BRIDGEWATER SQUARE, Barbican. LONDON HOUSE YARD, in St. Paul's Church-yard, marks the site of the palace attached to the See of London.

The greater security which existed under the Tudor princes is shown by the fact, that the protection of the walls was found to be unnecessary, and mansions began to cover the ground between London and Westminster, where hitherto churchmen only had found it safe to reside.

The Bishops of Bangor, Chichester, Durham, and Ely lived, respectively, in BANGOR COURT, Shoe Lane; CHICHESTER RENTS, Chancery Lane; DURHAM STREET, Temple Bar; and ELY PLACE, Holborn. SAFFRON HILL, near Ely Place, obtained its name from the saffron which grew abundantly in the gardens of Ely House. Between the river Fleet and Temple Bar, we find SALISBURY SQUARE, which occupies the site of the courtyard of the old Salisbury House, belonging to the see of Sarum; while DORSET STREET and DORSET COURT, Fleet Street, mark the position of the residence of the Sackvilles, Earls of Dorset. In Clerkenwell we find a NORTHAMPTON SQUARE, which was formerly the garden of the Earls of Northampton; and in
AYLESBURY STREET and COBHAM ROW, both in the same fashionable locality, were the houses of the Earls of Aylesbury, and of the celebrated Sir John Oldcastle, Lord Cobham. LINCOLN’S INN was the town house of Henry Lacy, Earl of Lincoln, and GRAY’S INN of the Baron Gray of Wilton. The Wriothesleys, Earls of Southampton, lived in SOUTHAMPTON BUILDINGS, Chancery Lane, and Christopher Hatton, Elizabeth’s chancellor, had his house in HATTON GARDEN.

But the neighbourhood of the Strand was the favourite residence of the great nobles, probably because the execrable condition of the roads rendered necessary the use of the Thames as the chief highway. At the beginning of the seventeenth century the Strand must have presented the appearance of a continuous line of palaces, with gardens sloping down to the brink of the then silvery Thames. ESSEX STREET, DEVEREUX COURT, and ESSEX COURT, point out the spot where Elizabeth’s favourite plotted and rebelled. The great space which is now occupied by SURREY STREET, HOWARD STREET, NORFOLK STREET, and ARUNDEL STREET, is a proof of the wide extent of the demesne attached to Arundel House, the residence of the head of “all the Howards.” The present SOMERSET HOUSE stands on the site of the palace which was built by the Protector Somerset, and which afterwards became the residence of Henrietta Maria, queen of Charles I. Those nests of poverty and crime called CLAREHOUSE COURT, CLARE MARKET, and NEWCASTLE STREET, replace the mansion and gardens of Clare House, the residence of the Earls of Clare, afterwards Dukes of Newcastle. Near CRAVEN BUILDINGS, Drury Lane, stood the house of Lord Craven, a soldier of the Thirty Years’ War, celebrated as the hero of Kreutznach, and the champion of the Winter Queen. CLIFFORD’S INN was the mansion of the Baron Clifford. Peter de Savoy, uncle of Eleanor of Provence, the queen of Henry III., built for himself a palace at the SAVOY, which was afterwards converted into a conventual establishment. Facing each other, on opposite sides of the Strand, stood the mansions of the two sons of the great Sir William Cecil, Lord Burleigh. The elder son, created Earl of Exeter, occupied his father’s house, which has now made way for BURLEIGH STREET, EXETER
HALL, and EXETER STREET; while the younger son, Sir Robert Cecil, Earl of Salisbury, built Salisbury House on the site where CECIL STREET and SALISBURY STREET are now standing. In close proximity to the houses of the Cecils was, as we have seen, the “convent garden,” belonging to the abbot and monks of Westminster. After the dissolution of the monasteries this property came into the hands of the Russell family, and here the Earls of Bedford built a mansion, which, about a century and a half ago, gave place to SOUTHAMPTON STREET, RUSSELL STREET, TAVISTOCK STREET, and BEDFORD STREET. The Russells then removed to Bloomsbury, where BEDFORD SQUARE, SOUTHAMPTON STREET, RUSSELL SQUARE, TAVISTOCK SQUARE, and CHENIES STREET, preserve the memory of the great house they occupied. SYDNEY ALLEY and LEICESTER SQUARE remind us of another historic name—that of Robert Sydney, Earl of Leicester, whose house stood on what is now called LEICESTER PLACE. GEORGE STREET, VILLIERS STREET, DUKE STREET, OF ALLEY, and BUCKINGHAM STREET, preserved, till our own day, every syllable of the name and titles of “Stenie,” the fortunate and unfortunate favourite of James I. and “baby Charles.” Of all the palaces which once lined the Strand, Northumberland House is the only one which remains.

If the Strand is full of memories of the statesmen and favourites of Elizabeth, PICCADILLY brings us to the time of the Restoration. The street itself takes its name from Piccadilla Hall, a shop for the sale of piccadillas, the once fashionable peaked or turn-over collars. The CLARENDON stands on the site of the mansion of the great statesman and historian. ALBEMARLE STREET and CLARGES STREET preserve the memory of Monk, Duke of Albemarle, and of Nan Clarges, the butcher’s daughter, his duchess; ARLINGT0N STREET and BENNET STREET, of Henry Bennet, Earl of Arlington; CORK STREET, of Boyle, Earl of Cork; COVENTRY STREET, of Lord Keeper Coventry; DOVER STREET, JERMYN STREET, and ST. ALBAN’S PLACE, of Henry Jermyn, Earl of St. Albans, one of the heroes of Grammont’s Memoirs; SACKVILLE STREET and DORSET PLACE, of Edward Sackville, Earl of Dorset; CLEVELAND ROW, of

1 The Adelphi, with the five streets—Robert Street, John Street, George Street, James Street, and Adam Street—was built in 1760, by four brothers of the name of Adam.
the "beautiful fury," Barbara Villiers, Duchess of Cleveland and mistress of Charles II.; while King Street, Charles Street, St. James' Street, Duke Street, York Street, and the Albany bear the names and titles of the royal brothers, Charles II. and James, Duke of York and Albany, and are in convenient proximity to Pall Mall and the Mall in St. James's Park, where the courtiers played at Paille Maille while the merry monarch fed his ducks.

There are a few scattered names to remind us of persons and events memorable in later times. Harley Street, Oxford Street, Henrietta Street, Cavendish Square, and Holles Street, take their names from Harley, Earl of Oxford, and his wife Lady Henrietta Cavendish Holles. Hans Place and Sloane Street bear the names of Sir Hans Sloane, who invested his fees in the purchase of the manor of Chelsea, and in the formation of a collection of natural curiosities as celebrated as Harley's collection of MSS. or the marbles of the Earl of Arundel. Pimlico takes its name from a celebrated character of a very different order—one Ben Pimlico, who kept a suburban tavern, first at Hoxton, but afterwards in the neighbourhood of Chelsea. 1

The dates at which other streets were built can, in many cases, be determined by the names they bear. If the Savoy reminds of the queen of Henry III., Portugal Street, Lincoln's Inn, carries us to the time of the marriage of Charles II. Queen Anne Street, Marlborough Street, Hanover Square, Great George Street, Regent Street, King William Street, and Victoria Street, afford dates, more or less definite, of certain metropolitan extensions or improvements; while Blenheim Street, Quebec Street, Vigo Street, Waterloo Bridge and Trafalgar Square are instances of that system of nomenclature which has been so extensively carried out in Paris. 2

1 The Malakoff, in like manner, was called from a tavern kept by Alexander Ivanovitch Malakoff, a ropemaker discharged for drunkenness from the arsenal at Sebastopol. Strange origin for a ducal title!

CHAPTER XII.

HISTORIC SITES.

Places of popular assembly—Runnimeede—Moot-hill—Detmold—The Scandinavian “things” or parliaments—The Thingvellir of Iceland—The Thingwells and Dingwells of Great Britain—Tynwald Hill in the Isle of Man—Battle-fields: Lichfield, Battle, Slaughter—Conflicts with the Danes—

Eponymic names—Myths of Early English history—Carisbrooke—Hengist and Horsa—Cissa—Ælle—Cerdic—Offa—Maes Garmon—British chieftains—Valetta—Alexander—Names of the Roman Emperors—Modern names of this class.

In the preceding chapter it has been shown how the history of a great city tends to perpetuate itself in its street-names. It would be easy, did space permit, to apply the same method of investigation to other cities, such as Paris, Rome, or Athens. We might show, from the evidence of names, how Paris was originally confined to the little island in the Seine, upon which the cathedral of Notre Dame now stands; and how the Louvre was at first a hunting-seat; and the Tuileries a tile-yard (French tuile, a tile). The names of the Palatine, the Vatican, and the Janiculum, of the Forum, and the Latin Gate at Rome, or of the Ceramicus, the Acropolis, and the Pnyx at Athens, would prove similarly suggestive.

But the instance of London may suffice as an example of the value of local names in city history, and in this chapter we will rather pursue another department of the subject, and collect the names of various scattered historic sites—names which conserve the remembrance of historic personages, which denote the localities of great battles, or of places otherwise memorable in the history of the human race.

The places where popular self-government has at any time been exercised are frequently indicated by local names.

Runnimeede, the “meadow of the runes,” was the ancient Anglo-Saxon field of council; and on the spot thus consecrated
to national liberty, the privileges of the great feudatories of England were afterwards secured by the Magna Charta. In Scotland the ancient place of national assembly was the MOTE HILL at Scone, near the ancient capital of the kingdom. This hill, perhaps the most interesting historical memorial in Scotland, has been recently removed, to improve the view from a drawing-room window. In the midst of the town of Hawick there is a singular conical mound called the MOAT HILL. We may notice also the names of the MOOT HILL at the eastern end of Lyne Bridge, and the MOTE OF THE MARK in Galloway. On the confines of the Lake District there are hills called MOUTAV and CAERMOTE, and there is a MOOT HILL at Naseby, all of which, as well as LUDLOW, the "people's hill," have probably served as the meeting-places of local popular assemblies. The Nottinghamshire mote was held under an oak in SHERWOOD (shire-wood), and the county of Berks derives its name from the bare oak beside which the shire mote met.

The names of the English Hundreds are often very curious and significant, guiding us for the most part to the spot appointed for the assemblage of the heads of households in prehistoric times. These places are sometimes important towns or villages, but quite as often barrows, dikes, trees, and heaths—conspicuous landmarks rather than centres of population. Thus in the single county of Dorset we have HUNDREDS BARROW Hundred, LOOSEBARROW Hundred, BADBURY Hundred, OMBSDITCH Hundred, CLIFFORD TREE Hundred, and RUSHMORE Hundred.

The Stannary Court of the Duchy of Cornwall is an assembly which represents, in continuous succession, the local courts of the ancient Britons. The court was formerly held in the open air, on the summit of CROKERN TOR, where the traveller may still trace concentric tiers of seats hewn out of the rock. The name of Crokern Tor seems to point to a deliberative assembly,¹ and WISTMAN'S WOOD, in the immediate

¹ We have the Welsh word gragan, to speak loud, whence comes the English verb to croak, to make a loud noise like a frog or raven. The creaking of a door and the name of the corn crake are from the same root. Compare the Sanskrit kruḍa, to call out, the Greek κρόαδω, and the Latin croceire.
neighbourhood, suggests the wisdom traditionally imputed to the grave and reverend seniors who took part in the debates.

In Germany there are several places called Ditmold. We find the names DEITMOLD, DIETMALE, RODENDITMOL, and KIRCHDITMOLD. These were all places of popular assembly, as the names imply. The first portion of the name is diet, people, which we have in the name of Deutschland. The suffix is mal, a place of assembly, or court of justice.

But the most noticeable traditions of ancient liberties are associated with the places where the Things, the judicial and legislative assemblies of the Scandinavian nations, were wont to meet. These institutions, of which we find traces in all the regions colonized by the Northmen, were derived from the parent country, Norway, where there was an Althing, or general assembly, and four district Things for the several provinces. The Norwegian parliament still goes by the name of the Storting, or great council.

The Thing usually met on some island, hill, or promontory, where its deliberations could be carried on secure from lawless disturbance. Thus the Swedish parliament used to assemble on a mound near Upsala, which still bears the name of THINGHOGEN (Thing-hough). One of the chief attractions for Icelandic tourists is a vast sunken lava-plain which bears the name of the THINGVELLIR, or “council plains.” In the midst of this plain there is an isolated area, some two hundred feet long and fifty broad, which is guarded on every side by deep rifts, produced by the cooling of the lava. Across these rifts the sole access is by one narrow bridge of rock. This spot, so well protected by nature, is called the AlTHING, and, till the beginning of the present century, was the assembly-place of the “general council” of the whole island. A mound, in the midst of the Althing, bears the name of the LOGBERG, the sacred “hill of laws,” from whose summit, for nine hundred

1 The word thing is derived from the Old Norse tinga, to speak, and is allied to the English word to think.

2 Often wrongly called the Thingvalla. This, however, is the genitive case. The word völlr means a plain or field. The root is the Norse völl, a stick or post (Mæso-Gothic valus: cf. the English goal, a winning-post). The völlr takes its name from the nature of the inclosing fence, like ton, ham, garth, stoke, and bally.
years, all the enactments of the Althing had to be promulgated before they could receive the force of laws. Each of the twelve districts into which Iceland is divided had also its Thing, where the peasant-nobles carried into action their privileges of local self-government. Thinganes, Thingkaler, Arneshing, Thingore, and Thingmuli, were, as the names denote, places at which some of these subordinate assemblies were accustomed to be held.

The Northmen introduced their Things into England. The very name survives among us as a household word. A "meeting," according to Dr. Dasent, is the mot thing, or assembly of freeholders, and at the "hustings," or house things, the duly qualified householders still assemble to delegate their legislative powers to their representatives in parliament. In the Danelagh, as well as in most of the detached Scandinavian colonies, we find local names which prove the former existence of these Things.

In the Shetland Islands, Sandsting, Aithsthing, Delting, Nesting, and Lunziesting, were the places of assembly for the local Things of the several islands, which were usually held in the centre of circles of upright stones, perhaps the erection of an earlier race. The Althing, or general assembly, seems to have been held in the parish of Tingwall. Here, in the midst of a small fresh-water lake, there is an island which is still called the Sawting. On this island are four great stones, forming the seats for the officers of the court, and the access is by stepping-stones laid in the shallow waters of the lake. In the Shetlands, the old Norwegian laws are even now administered at open courts of justice, which go by the ancient name of Lawtings. In the Ross-shire colony we find the names of Dingwall and Tain, while Tinwald Hill, near Dumfries, was the assembling place of the Norse colonists who settled on the northern shore of the Solway. Not far from the centre of the Cheshire colony in the Wirral, we find the village of Thingwall. Near Wrabness, within the limits of the little colony in the north-east of Essex, we find a place whose name, Dengewell, probably marks the spot where the local jurisdiction was exercised. The three neighbouring Danish parishes of Thorp le Soken, Walton le Soken, and Kirby le Soken
possessed the privilege of holding a soke, or local court, independent of the jurisdiction of the hundred—a vestige, probably, of their ancient Scandinavian franchises.

In the absence of all documentary evidence, I was inclined to believe that the apparently Danish names in Devonshire must be explained from Saxon sources; I felt that I should hardly be justified in placing a Scandinavian colony in that county, so far removed from their compatriots in the Danelagh. But my hesitation was removed by the accidental discovery of an isolated farmhouse bearing the name of Dingwell. It stands on a plateau, steeply scarped on three sides, and about a mile from the village of Thurshelton, a name every syllable of which is of the Icelandic type, denoting the tun or enclosure round the skaaler, or wooden booths, which were usually erected at some little distance from the Thingvellir for the convenience of persons attending the meeting. The Thing was inaugurated by sacrifices and religious ceremonies, which enables us to understand why the name of the deity Thor should appear in the first syllable of this name Thurshelton. These two names, Thurshelton and Dingwell, surrounded as they are by names of the Norse type, seem to prove that the Northmen must have settled in this remote corner of the island in sufficient numbers to establish their usual organized self-government.

In the Danelagh we meet with several places bearing names which may, with greater or less certainty, be regarded as meeting places of local Things. In Northamptonshire we have, near Kettering, a place called Finendon, which was anciently written Thingdon, and there is a place called Dingley near Market Harborough. We find Tinwell in the county of Rutland, Tigrith in Bedfordshire, and Tingewick, in the north of Buckinghamshire. Ixworth in Thingoe, near Bury St. Edmunds, was probably the meeting place of the Suffolk Thing. In Yorkshire, there are Tinsley near Rotherham, and Thwing near Bridlington. In Durham, on the extreme northern border of the Danelagh, we find Dinsdale, a place which is almost

1 See p. 119 supra.
2 Near Tingwall, in Shetland, we find Scalloway, or Booth Bay. Portingscale, near Keswick, seems to be an analogous name.
entirely surrounded by one of the bends of the Tees, and is thus well protected from hostile intrusion, as is the case with so many of these sites. I cannot discover any indication of the place where the Lincolnshire Thing assembled, unless indeed it be at Thimbleby or Legebourn. In the Scandinavian district of Cumberland and Westmoreland, the word Thing does not appear in any local name; but the Vale of Legberthwaite, no doubt, contained the logberg, or "hill of laws," from which the local enactments were promulgated.

By far the most interesting of these ancient Westminsters is Tynwald Hill in the Isle of Man. Less than a century ago the Isle of Man preserved a sort of quasi independence of the British crown, and it was only in the year 1764 that the Duke of Athol parted with the last of the royal rights, which had descended to him from the ancient Norwegian kings. But though the representative of the Norwegian jarls has divested himself of his regal prerogatives, the descendants of the vikings still retain a shadow of their ancient legislative powers. The old Norse Thing has survived continuously in the Isle of Man to the present day, though in Iceland, in Norway, and in Denmark, its functions have been intermitted, or have long ceased. The three estates still assemble every year, and no laws are valid in the island unless they have first been duly proclaimed from the summit of Tynwald Hill. This is an ancient mound some eighteen feet in height, and constructed with four concentric circular stages, whose diameters are, respectively, 80, 27, 15, and 7 feet.

The ancient place of the coronation of the kings of England was Kingston in Surrey, where, in the centre of the town, is still to be seen the stone on which the Saxon monarchs sat while the ceremony was performed. Trondheim, or Drontheim, was in like manner the "throne home," or coronation seat of the kings of Norway, and Königsberg, in the extreme east of Prussia, shews the way in which that agglomerated kingdom has extended itself westward from the ancient seat of the grand master of the Teutonic Knights. King's Gate, in the Isle of Thanet, marks the spot where Charles II. landed after his exile; and Queenborough, in the Isle of Sheppey, is a proof of the development of the English navy in the time of Edward
III. The manor of Hull, or KINGSTON-UPON-HULL, was purchased by Edward I.; and Coningsby, Coneyby, Conington, Cunningham, Kingthorpe, Kinsby, King’s Lynn, Lyme Regis, and many similar names, denote the residences, or manors, of Saxon, Danish, and English monarchs.

Local names often conserve the memory of famous battles, or sometimes they tell us of forgotten contests of which no other memorial remains.

Probably the greatest reverse ever suffered by the Roman arms was the defeat which Hannibal inflicted on Flaminius at Thrasyemene. The brook which flows through this scene of slaughter is still called the SANGUINETTO, and the name of the neighbouring village of OSSAIA shews that the plain must have long been whitened by the bones of the fallen Romans.

The Teutonic division of the Cimbric horde which invaded Italy was annihilated by Marius in the year 102 B.C., and the slaughter is said to have reached the immense number of 100,000 men. The battlefield afterwards bore the name of the Campi Putridi, a name which is preserved by the Provencal village of POURRiÈRES. The Temple of Victory built by the conqueror is now the parish church of ST. VICTOIRE.

Of the great battles which have changed the course of the world’s history, few are more important than the defeat of the Magyars by the Emperor Otho in the tenth century. This battle, regarded as to the magnitude of its results, can only be compared with the overthrow of the Saracens by Charles Martel. The one rescued Christianity, the other saved civilization. The Magyar host, like that of the Saracens, was all but exterminated, and the name of the LEICHFELD, or “Field of Corpses,” near Augsburg, informs us of the precise locality of the fearful slaughter. The German word leich, a corpse, is preserved in the lychgate of our churchyards, where the corpse awaits the approach of the priest; and in the lyke-wake, or funeral feast, which is celebrated in some parts of Scotland. From this root comes the name of LICHFIELD in Hampshire, where are seven barrows. At LICHFIELD in Staffordshire, the city arms are a field surcharged with dead bodies. Tradition refers the name to the martyrdoms of a thousand
Christian converts. These names, as well as that of LECKHAMPSTEAD in Buckinghamshire, are probably memorials of battles of which history has preserved no certain record. The chroniclers tell us that in the year 1173 an army of 10,000 Flemings under Robert, Earl of Leicester, was almost totally annihilated at LACKFORD, near Bury St. Edmund's, by Richard Lucy, Chief Justice of England. LECKFORD in Hampshire may also not improbably indicate the site of a bloody battle which was gained by Cymen over the Britons in this immediate neighbourhood. The final overthrow of the Britons by Athelstan in the year 936 occurred at a place called BOLLEIT, in Cornwall. This name means in Cornish the "House of Blood."

The name of BATTLEFIELD, about three miles from Shrewsbury, is a memorial of the decisive contest which Shakespeare has so vividly brought before us; and an additional memorial of the fiery Welsh chieftain is found in an ancient tumulus near Corwen, which bears the name of DINAS MONT OWAIN GLYNDWR, and from the summit of which he is said to have been in the habit of gazing down the valley of Dee.

Close to Bannocburn is the inclosure of BLOODY FOLD, where the Earl of Gloucester fell, and the name of GILLIES HILL commemorates the station of the camp-followers who created the fatal panic.

Of the destruction of the Spanish Armada we have a geographical reminiscence in the name of PORT-NA-SPANIEN in Ireland, where one of the galleons of the Invincible Armada was dashed to pieces.

The chief struggle at the battle of Towton took place in a field called BLOODY MEADOW, where the grass still grows rank. There is a place called BATTLE FLATS north of Bosworth, though perhaps hardly near enough to be confidently referred to as the scene of the struggle. CROWN HILL, a small eminence on the plain, is pointed out as the spot where Stanley placed Richard's crown on the head of Henry VII.

KNOCKTOE, near Galway, the site of the great battle between the Earl of Kildare and the Earl of Clanricarde in the year 1504, is a corruption of Knoc-na-tuadh, battle-axe hill.

The flying Cavaliers, after the defeat at Naseby, were overtaken and cut to pieces at a place now called SLAUGHTERFORD.
where the road to Harborough crosses the Welland; and a part of the route by which Monmouth's army marched to the night attack at Sedgemoor still goes by the name of WAR LANE.

The names of the town of BATTLE in Sussex, and of BATTLE FLATS near Stamford Bridge, have already been mentioned. SENLAC (Sangue Lac), the Norman name of the battle-field of Hastings, still survives as a local name in the neighbourhood of the town of Battle. STANDARD HILL, close by, is said to be the place where the Conqueror raised his standard previous to the commencement of the engagement, and MONTJOIE, one of the four wards of the town, commemorates the spot to which he rode in triumph at the conclusion of the fight.

The Battle of the Standard was fought near Northallerton. Here a farm called STANDARD HILL marks the position of the three Yorkshire standards; and a mile to the north a farm called SCOTS PITS takes its name from the trenches into which the slaughtered Scots were thrown.

About six miles south of Poictiers there is a place called MAUPERTUIS, a name supposed to commemorate the exact site of the battle-field which proved so disastrous to the chivalry of France. Frederick the Great's victory over the Austrians at Hohenfriedberg has given the name of SIEGESBERG, or "Victory Hill," to an eminence which stands within the confines of the battle-field.

The terror which was inspired by the inroads of the Danes, and the joy with which their discomfiture was hailed, is evidenced by numerous local names, which are often associated with traditionary battle-legends which still linger among the surrounding villagers. Such a tradition is connected with a camp in Hampshire called Ambrose Hole, hard by which runs a rivulet called DANESTREAM. At SLAUGHTERFORD in Wiltshire, and at BLEDLOE (bloody hlaw) in Buckinghamshire, there are traditions that great slaughters of the Danes took place. ENGLEFIELD in Berkshire was the scene of a victory which the men of Wessex obtained over the Danes in the year 870. In the Saxon Chronicle we have an account of the great victory gained by Cnut over Eadmund Ironside, which led to the division of the kingdom between the two monarchs. The Chronicle places the battle at Assandun in Essex. Near
CONFLICTS WITH THE DANES.

Billericay there is a place now called Assington, and in the neighbourhood we find twenty barrows, and the names of Canebdon and Battlebridge. At Knutsford in Cheshire Cnut also gained a battle. On Camphill, near Rochdale, the Danes are said to have encamped on the eve of the battle that was fought in the neighbourhood; and Killdanes, the name of the valley below Camphill, tells us the story of the bloody day. Near Stow-on-the-Wold in Gloucestershire is a Danish earthwork called Bury Camp, and an adjacent village bears the name of Slaughter. In a field called Knap Danes in the parish of Nettlecombe, a vast quantity of bones was found, supposed to be those of the Danes who landed at Watchet in the year 918. At Denebury near Chelmsford, and at Danesbanks in the parish of Chartham in Kent, the outlines of camps are still to be traced. Gravenhills is also the legendary scene of a battle with the Danes. It is surrounded with entrenchments, and is covered with mounds, which are probably the graves of the fallen warriors. At Dene graves on the Yorkshire wolds numerous small tumuli are still visible. The name of Danesford, in Shropshire, is supposed to be a memorial of the Danes who wintered at the neighbouring town of Quatford in the year 896. Dantsey, or "Danes Island," in Wiltshire, was formerly the property of the family of the Easterlings, a name usually given to the Vikings from the East. Ware in Hertfordshire seems to have been the place at which Alfred constructed his weir across the river Lea, in order to cut off the retreat of a Danish fleet. On Brent Knoll near Athelney, in Somersetshire, is a camp which tradition ascribes to Alfred, and at the foot of the hill, half a mile from its summit, stands the village of Battlebury. There is also a camp near Salisbury which goes by the name of Battlesbury; and there is a place called Battlewick near Colchester. By the side of the Dee in Scotland there is an ancient earthwork called Norman (Northmen's) Dikes, in the front of which there is a piece of land which bears the name of Bloody Stripe. Near Burnham in Norfolk there is a camp surrounded by tumuli, the road leading to which goes by the name of Bloodgate. At Chelsham in Surrey there is a Roman camp crowning the summit of a knoll called Botle or Battle Hill. Two Roman
camps in Forfarshire go by the names of _battle dikes_ and _war dikes_. In Perthshire there is a place called _blairinroan_, which means the "field of division." This has been identified as the probable site of the battle of the Mons Grampius, in which the Ninth Legion, under Agricola, narrowly escaped destruction. Close at hand there is a Roman camp, and some upright monoliths which are locally known as the _Roman stones_.

There is a camp near Caterham called _war coppice_; and the name of _caterham_ itself may perhaps be referred to the Celtic word _cath_, battle. The name of the Caturiges, "the battle kings," and the personal names of Catullus, Cadwallon, Cadwallader, St. Chad, and Katleen, contain this word. _Cadbury_, a name which occurs in Somersetshire and in Devon, means the "battle entrenchment." _Caterthun_, a remarkable Celtic fortress which overlooks Strathmore, is no doubt "Battle Hill." The numerous Cat Stanes in Scotland are supposed to be memorials of battles. Such are the _catt stane_ in Kirkliston parish, and the _caig stone_ near Edinburgh. From the Anglo-Saxon _camp_, battle, we have a few names like _campton_ and _kempston_ in Bedfordshire. The Nicene Creed was framed in _nicaea_, a city whose name, like those of _nicopolis_, the Italian _nice_, the Egyptian _cairo_, and the Indian _futepore_, is a record of victory.

In the case of several of these battle-fields we find traditions which assign a local habitation to the names of British chieftains or Anglo-Saxon kings. It is possible that in some of these instances minute fragments of historic truth have been conserved, but it is needless to say that the greatest caution must be exercised as to the conclusions which we allow ourselves to draw. The traditions are generally vague and obscure, and the personages whose names are associated with these sites have often only a mythical, or, to speak technically, an _eponymic_ existence. This convenient phrase is used to convey the suggestion that a personal name has been evolved by popular speculation to account for some geographical term, the true meaning of which has not been understood.

A full discussion of this subject would form a curious and important chapter in what we may call the history of History.

Most nations have supposed themselves to be descended
from some mythical or eponymic ancestor. The Lydians, the Phœnicians, the Pelasgians, the Dorians, the Æolians, the Hellenes, the Sicilians, and the Italians, have respectively traced their origin to mythical personages whom they called Lydus, Phœnix, Pelasgus, Dorus, Æolus, Hellen, Siculus, and Italus. Rome was said to have been built by Romulus; Nineveh by Ninus; Memphis by Menes. When we come down to a later time we are encountered by the still more extravagant absurdities which fill the pages of Geoffrey of Monmouth, Layamon, Wace, Matthew Paris, and Matthew of Westminster, by whom the origin of all the nations and cities of Europe is traced to heroes of the Trojan war. We are gravely told that France takes its name from Francus, a son of Hector, and Britain from Brute, Prydain, or Pryd, a son of Æneas; that Lisbon (Olisipo) was built by Ulysses; and Paris by the well-known son of Priam. Tours was the burial-place of a Trojan named Turonus, and Troyes was, of course, a colony from Troy. Nürnberg was built by Nero, and Prussia takes its name from one Prussus, a brother of Augustus. But these are modest pretensions when compared with that of the Scots, who claimed to be descended from Scota, a daughter of Pharaoh, while the Saracens are assigned to Sarah the wife of Abraham.

These wild absurdities are mostly the creation of authors of a late date, and seldom conceal any esoteric truths. The case is often different with the earliest legends. Thus we are told that Pedias was the wife of Cranaus, one of the mythical kings of Attica. Under this disguise we recognize a statement of the fact that Attica is formed by the union of the mountain district (κρανάως, rocky), and the plain (πεδιάς, level).

But the extravagances of Geoffrey of Monmouth, or the more recondite myths of Grecian history, concern us less nearly than the eponymic names which fill the earlier pages of Beda and the Saxon Chronicle. These narratives are still regarded as historical by the great mass of half-educated Englishmen, who seem to have hardly a conception that, in the ordinary school histories of England, the chapter "On the arrival of the Saxons" relates the deeds of personages who, in all probability, have only an eponymic existence.
To take a few instances. The name of Portsmouth undoubtedly dates from the time when the commodious harbour was used as a portus by the Romans. But when we read in the Saxon Chronicle that Portsmouth derives its name from a Saxon chieftain of the name of Port, who landed there, we conclude at once that the name of Port is eponymic, or, in other words, that no such personage ever existed except in the imagination of some early historical speculator, the name of the person having been invented to account for the name of the place. Again, Carisbrooke, in the Isle of Wight, was anciently written Wiht-gara-byrig. Respecting the etymology of this name there can be little doubt. Wiht is a corruption of Vectis, the Roman name of the island. The inhabitants of the island would be called Wiht-ware, and the chief town of the island would be called Wiht-gara-byrig; "the burgh of the men of Wight," just as Canterbury, or Cant-ware-byrig, is "the burgh of the men of Kent." But when the Saxon Chronicle asserts that Wiht-gara-byrig was the burgh of a Saxon chief named Wihtgar, who was buried there, we do not hesitate to affirm that the name of Wihtgar, like that of Port, is eponymic. But we should undoubtedly be wrong were we to extend our scepticism to some other cases. For instance, we read in a later and more historical portion of the Saxon Chronicle, and in the Latin version which bears the name of Florence, that King Harthacnut drank himself to death at a feast which Osgod Clapha, one of the great nobles of Wessex, gave in his house at Lambeth to celebrate the marriage of his daughter Gytha with Tovi the Proud. In this case there is a very high probability that the London suburb of Clapham takes its name from the ham of the Saxon thane. Or to take another case of a somewhat different character, we find near Christchurch, in Hampshire, a place called Tyrrell's Ford, around which a tradition used to linger that here Tyrrell passed on the day of the death of Rufus. There is nothing intrinsically improbable about this tradition, and Tyrrell is certainly not an eponymus. We may even go so far as to lend an ear to the assertion that Jack Cade was killed at Cat Street, near Heathfield, in Sussex—especially when we find that the name was anciently written Cade Street.
Bearing in mind, then, the necessity of great caution as to the eponymic character of many of the heroes who figure in Beda and the Saxon Chronicle, we may proceed to enumerate a few of the more conspicuous of the localized traditions of the Saxon conquest.

Whether the names of Hengist and Horsa are wholly eponymic, or whether there remains a substratum of historic fact, after all due concessions have been made to the demands of modern criticism, is a question respecting which scholars are not agreed. But we find their names in many places. Thus at HENGISTBURY HEAD, on the Hampshire coast, there is a large funeral barrow protected by an entrenchment; and a tumulus of flints at HORSTED, in Sussex, is said to mark the sepulchre of Horsa. There is also a mound near the castle wall of Conisbrough which bears the name of Hengist. Camden asserts that it was his tomb; and we learn from Polydore Vergil that in the sixteenth century a local tradition still survived respecting a great battle which had been fought upon the spot. Henry of Huntingdon informs us that Hengist and Horsa fought a battle with the Picts and Scots at Stamford, in Lincolnshire. A local tradition affirms that the Saxons came from Kent by sea, and landed near Peterborough, after sailing up the Nene. This tradition is supported by the fact, that at about two miles from Peterborough there is an ancient entrenchment which goes by the name of HORSEY HILL. There is a camp near Chesterford in Essex, called HINGESTON BARROWS. We have also the names of HINKSEY near Oxford, anciently Hengestesige; HENSTRIDGE in Somerset, anciently Hengestesrieg; HINXWORTH in Hertfordshire, anciently Haingesteworde; and HENGESTON, anciently Hengestesdun, in Cornwall. There are many other names of the same class. The numerous Horsleys and Hinkleys are probably only forest leys or pastures for horse or steed (hengst). Other names, such as two Horsteads in Sussex, and one in Norfolk, Horsham in Sussex and in Norfolk, Horsay in Norfolk, and Horsell in Sussex, certainly seem specially to connect some person, or persons, bearing the name of Horsa with the two English counties of Sussex and Norfolk.

According to the Saxon Chronicle the kingdom of the South Saxons was founded by Ælle and his three sons, Cymen,
Wlencing, and Cissa. If these names are not altogether eponymic, as is probably the case, the account in the Chronicle receives very remarkable confirmation from local names. The landing is said to have taken place at Keynorp in Selsea, anciently Cymemesora, or Cymen’s shore, where we may suppose the eldest son was left to guard the ships while the father and the brothers advanced into the interior. We find the name of Ælle at Elstead in Sussex and Elstead in Surrey. The name of Lancing near Shoreham is certainly very remarkably coincident with that of Wlencing. The name of Cissa may be sought at Cissbury, a rude camp on a lofty hill near Worthing, as well as at another camp in Wiltshire called Chisbury; also at Cissanham in Hampshire, and at Chichester, anciently Cissan-ceaster, the “fortress of Cissa,” who, according to the Chronicle, succeeded in taking the old Roman city, and made it the capital of his kingdom of the South Saxons.

The kingdom of Wessex was founded, we are told, by Cerdic, through whom Queen Victoria may claim to be lineally descended from Woden! The name of Cerdic we find at his town of Chard, and also at Charford, anciently Cerdices-ford, where was fought the decisive battle which gave the Saxons the supremacy as far west as the Hampshire Avon. Cerdices-ora, where the Chronicle asserts that Cerdic landed, may perhaps be Charmouth in Dorset. The name of Lichmere, the mor of corpses, not far from Charford, seems to mark the precise locality of the struggle, and is of a more definite historic character. The nephew of Cerdic was the eponymic Wihtgar of Carisbrooke Castle, whose claims to an historical existence have already been discussed.

In Sewardstone near Waltham Abbey we have, perhaps, the name of Seward, king of the East Saxons; and Offa, another king of the same people, had a palace and a tomb at Offley near Hitchin. Another Offa, king of the Mercians, had a palace at Offenham in Worcestershire, and in the year

1 There was another Ælle, founder of the Anglian kingdom of Northumbria. To him we may perhaps refer Ellakirk, Ellaby, Ellard, Ellerbeck, Ellerburn, and other Yorkshire names. Ellescroft is said to be the burial place of the Ælle who was killed in a battle with Regner Lodbrok.
773 he is said to have gained a victory over Eadmund, king of Kent, at Otford on the Darent. The name of Wuffa, king of the East Angles, may perhaps be found at Ufford in Suffolk. Rendlesham, in the same county, was in the seventh century the residence of Redwald, another king of the East Angles. Among other Anglian traditions we are told that King Atla of Norfolk was the founder of Attlebury, and that the name of Bebbe, queen of Ida of Northumbria, is to be found in Bebbanburh, now Bamborough, near Berwick-upon-Tweed. Oswald, a Christian prince of Mercia, gave his name to Oswestry, where he fell fighting against the heathen Penda, who ordered the body of his foe to be cut into pieces, and suspended on three crosses in derision of his faith. The strong natural fortress of Edinburgh bears the name of Edwin, king of Northumbria, who extended his kingdom to the shores of the Forth.

Ammianus Marcellinus, a more trustworthy authority than the earlier portion of the Saxon Chronicle, says, that Valentinian sent over to Britain one Fraomarius, the king of the Bucinobantes, an Alemannic tribe near Mayence. These names are perhaps preserved at Bramerton and four Buckenhams, all in Norfolk.

Attempts have been made to identify the spots selected for an abode by other less distinguished settlers. The results are of course highly conjectural, to say the least, but they are perhaps sufficiently curious to justify the insertion of a few specimens in a note.¹

1 Thus we have—

Personal name. | Ancient local name. | Modern local name.
---|---|---
Heremod | Harmodestone (Domesday) | Harseone, Lincoln.
Heorogar | Herigerby (Domesday) | Harnyby, Lincoln.
Helga | Helgiby (Domesday) | Hellaby, Yorks.
Halga | Helgefelf (Domesday) | Helilfeild, Yorks.
Bedca | Bedan ford (Saxon Chronicle) | Bedfor.
Childeric | Hildericesham (Domesday) | Hildersham, Yorks.
The British traditions conserved in local names are often more trustworthy than those of the Saxon period. There is a high probability that Maes Garmon near Mold was the scene of the famous Alleluia victory, which was obtained by St. Garmon over the Picts. The good bishop placed the members of his Church militant in ambush, and when the invaders were fairly entangled in the intricacies of the valley, a loud shout of Alleluia from the Welsh created a panic which enabled them to gain an easy but decisive victory. Pwll-Meurig in Monmouthshire is the site of a battle in which the Welsh king Meurig was slain by the Saxons. The Caradoc, the most picturesque of the Shropshire hills, is crowned by an earthwork bearing the name of Caer Caradoc, and here, as tradition affirms, was the stronghold of Caractacus.1

A camp near Verulamium, called Oister Hills, has been supposed to bear the name of the Roman general Ostorius, and we have a Caesar’s camp near Farnham, and a Vespasian’s camp in Wiltshire. Chilham in Kent was anciently called Julham, and is supposed to be the site of the battle fought by Julius Caesar, in which Laberius was slain. This supposition is curiously corroborated by a tradition which calls a large tumulus in the neighbourhood by the name of Julaber’s grave. According to the Chronicles, it fell to the lot of Catigern, a Kentish chieftain, to oppose the earliest invasion of the Saxons. We are told that he fought a battle with the forces of Hengist and Horsa in the neighbourhood of Aylesford. On the summit of the downs which overlook the battlefield there is a Celtic tomb, constructed of vast vertical and horizontal slabs of sandstone. This, the most remarkable megalithic erection in the south-eastern portion of the kingdom, goes by the name of Kit’s Coty House, and may not improbably bear the name of the British prince. We also read that the body of Ambrosius, the successor of Vortigern, was buried, according to his dying request, at Ambresbury on Salisbury Plain. There is also a large camp in Epping Forest called Ambresbury Banks.

In the year 945 the British population of Cumbria, under a

1 The real name of Caractacus was probably Cradock, which is still a common surname in the West of England.
chief who bore the name of Donald, made a final and unsuccessful attempt to shake off the Saxon yoke. A cairn at the summit of the desolate pass which leads from Keswick to Ambleside is called DUNMAILRAISE, and in all probability it marks the precise scene of the struggle with Eadmund, as well as the burial-place of the British leader. In Strathearn there is a barrow which goes by the name of CARN-CHAINICHIN, that is, the Cairn of Kenneth. This name no doubt preserves the memory of the burial-place of Kenneth IV. of Scotland, who in the year 1003 was slain by Malcolm II. in a battle which was undoubtedly fought in the near neighbourhood of the cairn. An entrenchment on Barra Hill in Aberdeenshire bears the name of CUMMIN'S CAMP, and thus preserves the memory of the defeat of Comyn, Earl of Buchan, by Robert Bruce; while DALRY, the "king's field," in Perthshire, is the spot where John of Lorn defeated Bruce, and from whence he tracked him with blood-hounds, as is so inimitably told in the "Tales of a Grandfather."

The names of GIBRALTAR and TARIFA have already been noticed. VALETTA, the port and chief town of Malta, preserves the name of John Parisot de la Vallette, the heroic Grand Master of the Knights of St. John. Together with the suburb of VITTORIA it was founded in the year 1566, at the close of the memorable siege in which some 500 knights, assisted by 9,000 men-at-arms, successfully withstood for four months the assaults of an army of 30,000 Turks, until at last there survived only 600 of the Christians, utterly worn out by the toils and perils of the siege. One of the gates of Valetta hands down the memory of a much later siege. It is called the PORT DES BOMBES, from its bearing the marks of the cannonade which took place when the French were attacked by the English and Maltese.

The rulers of the ancient world seem to have anxiously desired to stamp their names upon cities of their own creation. Of the fifteen cities upon which Alexander the Great bestowed his name, only six retain it, and only two still possess any geographical importance. The name of Alexandria in Egypt has been corrupted into the Arabic form of ISCANDERIEH, and Alexandria in Bokhara is now SAMERCAND. The city of
Alexandria which was built near the battle-field of Issus, though now a miserable village, has given a name to the Bay of SCANDEROON or ISKENDEROON. ALEXANDRETTA and CANDAHAR still maintain an obscure existence. Antiochus and Seleucus, and the princes of their dynasties, followed the example of their great captain. There were ten cities called Antiochia, and seven called Seleucia; but while the once important name of SELEUCIA has almost vanished from the map, being retained only by the Cilician village of SELEFKIEH, Antioch, on the Orontes, now ANTAKIEH, still ranks among the great cities of the East. Philippi, now FELIBEDJIK, built by the father of Alexander, would be now forgotten were it not for the epistle addressed by St. Paul to its inhabitants; and the mention of PHILADELPHIA in the Apocalypse still causes us to bear in mind that it was built by Attalus Philadelphus, king of Pergamus.

The names of the Roman Emperors are scattered over Europe, and some of them are found under very curious phonetic disguises. Who would expect, for instance, to find the name of Cæsar in Jersey, a name which nevertheless is probably a corruption of Cæsarea? In the East the phonetic changes have been less; the Cæsareas in Palestine and Cilicia are now called KAISARIYEH; and KESRI, on the Dardanelles, is probably a corruption of the same name. The city of Cæsarea Jol, built by Juba in honour of Augustus, is now ZERSHELL in Algeria. Two of the most curious of these transmutations are those of Cæsarea Augusta into ZARAGOSSA, and Pax Augusta into BADAJOZ. Augusta Emerita has been clipped down into MERIDA. Augustodunum is now AUTUN, and Augusta is AOSTA and AUGIA. We find the same Imperial name preserved in AUGSBURG, AUGST in Canton Bâle and in Canton Zürich, Aoust in the department of the Drôme, AUCH near Toulouse, and the AUST passage over the Severn.

1 ALESSANDRIA, an important fortress in Piedmont, takes its name from a Roman Pope. Several places in Russia and Siberia are called ALEXANDROV and ALEXANDRIA, from the Russian Emperor.  
2 The names of GUERNSEY and CHERBOURG are possibly to be traced to a similar origin, as well as Jerbourg in Guernsey; though it is more probable that the first is Norse, and that the root of the two latter is the Celtic word Caer.
The names of Julius and Julia we have in Loudon (Juliodunum), Beja in Portugal (Pax Julia), Truxillo in Spain (Turris Julia, or Castra Julia), Júlich or Jüliers (Juliacum), the valley of Zsil (Julia) in Hungary, pronounced Jil, Zuglio (Julium), Itucci (Victus Julius), and Lillebonne (Julia bona); while Friuli, Forli, and Frejus are all corruptions of Forum Julii. Orleans, Valenciennes, Grenoble, and Adrianople, bear the names of the Emperors Aurelian, Valentinian, Gratian, and Hadrian, by whom they were respectively founded or rebuilt. Forum Aurelii is now Fòira, Aurelia or Aureliana is Orleans, Claudii Forum is Klagenfurt, and Pampeluna and Lodì (Laus Pompeii) bear the name of Pompey. Tiberias, in Palestine, was built by Herod Antipas in honour of his imperial friend and master. Constantius Chlorus gave his name to Constance or Constanz on the Boden See, and to Coutances (Constantia) in Normandy, where Roman antiquities are still occasionally found. The surrounding district, now called the Còtantin, exhibits very curiously a parallel but independent corruption of the name Constantinum. Kustendje is the Turkish corruption of Constantiana. Constantineh is the strongest place in Algeria. Constantine, the son of Constantius, had a palace a few miles from Trèves, at a place now called Conz, a name which, after long obscurity, is again becoming audible among men, in the novel character of a great railway junction. I could not but think, as I once whiled away a tedious hour in the waiting-room at Conz, of the waiting-rooms on the same spot once thronged by the nobles of Western Europe, worshipping the rising sun who was afterwards to imprint his name on Constantinople, the new capital of the Roman world.

The successive rulers and conquerors of India have striven to stamp their names upon her cities. Thus we have Aurungabád, Hyderabad, Ferozepore, Shahjeanpore and Runjeetgurh; together with hideous hybrid compounds belonging to the period of the English rule, such as Campbellpore, Morellgunj, Edwardsabád, and Frazerpet.

Of the modern cities which are thus inscribed with the dates of their foundation, St. Petersburg, Adelaide, and Victoria, the capitals of three distant realms, occur at once
to the memory. Ekaterinenburg was founded by the great Empress Catherine. Bonifacio, on the strait between Corsica and Sardinia, was built by Boniface, Lord of Pisa, in the ninth century. Christiania, Christianstad, and Christiansand, are memorials of the subjection of Norway and Sweden to the crown of Denmark in the seventeenth century, during the reign of Christian IV. of Denmark. The little kinglets of Germany, otherwise unknown to fame, have not been slow in endeavouring to rescue their obscure names from oblivion by a geographical immortality of this kind. As we fly past upon the railway, the names of Carlsruhe, Friedrichshafen, Ludwigsafen, Ludwigsburg, or Wilhelmsbad may, perhaps, induce the traveller to endeavour to learn from his open Murray the deeds of the monarchs who have thus eagerly striven after fame.

A far more inconvenient practice prevails in the United States, where the names of popular Presidents have been bestowed so liberally on towns and counties as to occasion no little confusion. There are no less than 169 places which bear the name of Washington, 86 that of Jefferson, 132 that of Jackson, while Munroe and Harrison have respectively to be contented with 71 and 62 places named in their honour.¹

¹ On “Things,” see Dasent, Story of Burnt Njal; Baring-Gould, Iceland; Worsaae, Danes and Norwegians; and Train, Isle of Man. On Eponymic names consult Pott, Mytho-Etymologie, in Kuhn’s Zeitschrift, vol. ix; Lappenberg, Anglo-Saxon Kings; Haigh, Conquest of Britain; Kemble, Codex Diplomaticus; Buttmann, Mythologus; Welsford, Origin of the English Language.
CHAPTER XIII.

SACRED SITES.

Day after day, as the weeks run round, we have obtruded upon our notice the names of the deities who were worshipped by our pagan forefathers. This heathenism is indeed so deeply ingrained into our speech, that we are accustomed daily, without a thought, to pronounce the once sacred names of Tiw, Woden, Thunor, Frea, and Sætere. These names are so familiar to us, that we are apt to forget how little is really known of the mythology of those heathen times. We have, it is true, Beowulf and the Traveller’s Song, the verse Edda, and other parallel Norse and Teutonic legends, but the Anglo-Saxon literature dates only from the Christian period, and proceeds mostly from the pens of Churchmen, who naturally preferred to recount thaumaturgic histories of Christian saints, and willingly allowed the pagan legends to die away out of the memories of men. So small, in fact, are the materials at our disposal for an account of the Anglo-Saxon Pantheon, that the very name of Sætere is conjectural—it is not found in any literary document till long after the extinction of the Anglo-Saxon paganism—and it would almost appear as if the name, the attributes, and the culte of this deity had been constructed
in comparatively recent times, in order to illustrate the assumed etymology of the word Saturday.¹ Our knowledge of Anglo-Saxon mythology being thus scanty, it will bear to be supplemented by the information which may be derived from local names.

We may arrive at some vague estimate of the relative mythological importance of the various Anglo-Saxon deities by means of a comparison of the number of places which severally bear their names, and which were probably dedicated to their worship. Judging by this standard, we conclude that Tiw, Frea, and Sætere, had but a small hold on the religious affections of the people; for TEWESLEY in Surrey, Great TEW and TEW DUNSE in Oxfordshire, TEWIN in Hertfordshire, DEWERSTONE in Devon, FRATHORPE and FRIDAYTHORPE in Yorkshire, FRAISTHORPE in Holderness, FREASLEY² in Warwickshire, three FRIDAYSTREETS in Surrey and one in Suffolk, SATTERLEIGH in Devon, and SATTERTHWAITE in Lancashire, seem to be the only places which bear their names.

But of the prevalence of the worship of Woden and Thunor we have wide-spread evidence. WEDNESBURY in Staffordshire, WISBOROW HILL in Essex, WANBOROUGH in Surrey, WANBorough in Wilts, WEMBURY in Devon, two Warnboroughs in Hampshire, WOODNESBOROUGH in Wilts, the Kentish tumulus called WINSBOROUGH, and WOODBRIDGE in Suffolk, are all corruptions of the Anglo-Saxon word Wodnesbeorh, a name which indicates the existence of a mound or other similar erection dedicated to Woden. WANSTROW in Somerset was formerly Wodnestrow, and WANSDIKE in Wilts; WOODNESDIC. WODEN HILL on Bagshot Heath, WONSTON in Hampshire, WAMBROOK in Dorset, WEDNESHOUg in Lancashire, WAMPool in Cumberland, WANSFORD in Northamptonshire and in Yorkshire, WANSTEAD in Essex, WAMDEN in Bucks, WADLEY in Berks, two WANSLEYS and WEDNESFIELD in

¹ That the worship of Sætere was very local, appears also from the fact that Saturday, as a name for the last day of the week, is found only in the Frisian, Anglo-Saxon, and other Low-German languages. Langardag, the Norse equivalent for Saturday, the Swedish Lördag, and the Danish and Norwegian Löøersdag, mean the washing-day, or laving-day; if, indeed, they do not refer to the Scandinavian deity Loki.

² Fraisthorpe and Freasley are more probably Frisian settlements.
Staffordshire, WENDON in Essex and in Somerset, WEDESLEY in Derbyshire, WEDNESHAM in Cheshire, WANTHWAITE in Cumberland, and WONERSH in Surrey, with other more doubtful names of the same class, enable us to form some estimate of how wide was the diffusion of Woden's worship.

The Scandinavian Thor was worshipped by the Anglo-Saxons under the name of Thunor, a name identical with the English word *thunder* and the German equivalent *Donner*. A laborious comparison of the Teutonic and Indian myths has enabled Mannhardt to establish the original identity of Thunor and Indra. The names also of Indra and Thunor, different as they may seem, are, no doubt, ultimately identical. We have seen (p. 138, supra) that *udra* and *udan* are related Sanskrit words, meaning water. The first gives us the name of Indra, the second that of Donnor or Thunor, both of whom are the storm and rain gods; both were born out of the water, both fill the rivers, and pour the milk of the cloud-cows of heaven upon the earth. We find traces of the worship of this deity in the names of THUNDERSFIELD in Surrey, two places called THUNDERSLEIGH in Essex and one in Hants, as well as THUNDERIDGE in Herts and THUNDERHILL in Surrey. To the name of Thor we may assign THURSLEY in Surrey, THURLEIGH in Bedfordshire, KIRBY THORE in Westmoreland, THURSCROSS in Yorkshire, THURSTON in Suffolk, THURSTABLE and THURLOW in Essex, THURSFIELD in Staffordshire, THURSFORD in Norfolk, TURSDALE in Durham, THURSHELTON in Devon, THURSBY in Cumberland, THURSO in Caithness, TORNESSE in Shetland, and THORIGNY in Normandy, all of which, as we have seen, are in regions settled more or less by Scandinavian colonists. In some of these cases it is probable that the name may have been derived from some Viking who bore the name of Thor. The Anglo-Saxon names, however, are not liable to this ambiguity, since it does not appear that any Anglo-Saxon—more timid, or more reverent than the Northman—ever dared to assume the name of the dreaded Thunor.

The curious fact that no names of Saxon heathendom are to be found in Salop or Herefordshire shews that the conquest of those counties was not effected till after the adoption of Christianity.
Names like Balderby or Balderton may probably be derived from the personal name Balder, rather than from that of the deity. Pol, another form of the name of the god Balder, is probably to be found in such names as Polbrook, Polstead, Polsdon, and Polsdon. Bell Hill and Hill Bell are probably vestiges of a still earlier cultus—Celtic, or possibly Semitic. It has been thought that there must have been some original connexion, etymologic or mythologic, between the Syrian Baal, the Celtic Bel or Belen, the Slavonic Biel-bog, and the Teutonic Pol. To the Celtic deity we may probably assign the local names of Belan, near Trefeglwys in Montgomeryshire, Belan near Newtown, two Belan Banks in Shropshire, and the Baal Hills in Yorkshire, besides three mountains called Belch in the Vosges and the Black Forest. Balerium, the ancient name of the Land's End, may possibly be due to the Phœnicians. Bel Tor in Devon may be either Teutonic, Celtic, or Semitic. Several of the Devonshire Tors seem to bear names derived from a primeval mythology. Mis Tor and Ham Tor have been supposed to bear Semitic names derived from Misor, the moon, and Ham or Ammon. The name of Hessary Tor can with greater confidence be referred to the Celtic deity Esus or Hesus,¹ mentioned by Lucan—

"Teutates, horrendus feris altariibus Hesus,
Et Taranis Scythica non mitior ara Dianae."

The Celtic deity Taith referred to in these lines under the name of Teutates, must not be confounded with the Teutonic Tiw, though the names are probably not unconnected, as we find that the word was used as the name of the Deity by all the Aryan nations. The Sanskrit déva, the Greek theós, the Latin deus, the Lithuanian dévas, the Erse dia, and the Welsh dew are all identical in meaning. The etymology of the word seems to point to the corruption of a monotheistic faith. The Sanskrit word dyáus means the expanse of blue sky, the heaven. This sense is retained in the Latin word dies, and in the phrase sub Jove, "in the open air." Jupiter, Diupiter, or

¹ Cf. the Sanskrit Asura, the supreme, self-existent Spirit, a name probably derived from a root as = esse. A statue inscribed with the name of Esus has been exhumed at Paris.
Diespiter, is the "heavenly father." Places called TOT HILL, TOOT HILL, or TOOTER HILL, are very numerous, and may possibly have been dedicated to the worship of Taith.

The word Easter, as we learn from Beda, is derived from the name of Eostre, or Ostāra, the Anglo-Saxon goddess of Spring, to whom the month of April was sacred. As in other instances, the Catholic clergy seem to have given the heathen festival a Christian import, and to have placed "Our Lady" on the throne previously occupied by the virgin goddess of the spring. She seems to have bestowed her name on two parishes in Essex which are called GOOD EASTER and HIGH EASTER (Estra in Domesday); we find also the more doubtful names of EASTERNFORD in the same county, EASTERLEAKE in Notts, and EASTERMAR in Hants.

The name of Hel, the mistress of the gloomy under-world, seems to be confined to Yorkshire; it may possibly be preserved in the names of HELLIFIELD, HELTHYRNE, HELWITH, two HEALEYS, HEALIGH, and HELAGH, all in Yorkshire. HELWELL in Devonshire is probably only the covered well, the word hell originally meaning only the "covered" place. Thus a wound heals when it becomes covered with skin. The heel is that part of the foot which is covered by the leg. A helmet covers the head. The hull is the covered part of a ship. To hele potatoes is to clamp or tump them. In Kent, to heal a child is to cover it up in its cradle, and to heal a house is to put on the roof or covering. A hellier is a slater.

Of the mythic heroes of Scandinavian legend, the name of Weland, the Northern Vulcan, who fabricates the arms of the heroes of the early Sagas, is preserved at a place in Berkshire called WAYLANDSMITH. Here, appropriately placed at the foot of that sacred HILL OF THE WHITE HORSE, which from immemorial times has borne the colossal symbol of Saxon conquest, there stands a huge megalithic monument, consisting of two chambers constructed of upright stones and roofed with large slabs. This structure our ancestors called Weland's Smithy, and the legend is that here was the forge in which the hero-smith fabricated the shoes for the sacred horse. Though bear-

---

1 Cf. the Sanskrit ushas = Aurora, from a root ush, to burn or glow. Hence the Greek ἀπός, the Latin auster, the south, and the English east.
ing a Saxon name, and connected with a Saxon legend, it is doubtless only a Celtic grave. The name of Eigil, the hero-archer, is probably to be sought at AYLESBURY, formerly Æglesbyrig, as well perhaps as at AYLESFORD, AYSWORTH, and AYLSTONE. ASGARDBY and AYSGARTH, however, probably refer to Asgard, the home of the gods.

Curious legends often linger round the numerous places called the Devil's Dyke, the Devil's Punchbowl, and the like, and results, not without value, might doubtless be obtained by a comparative analysis of the names of the various celebrated witch mountains. A dark and rugged rock in the Lake District bears the name of SCRATCH MEAL SCAR. Here we may perhaps detect the names of two personages who figure in the Norse mythology, Skratti, a demon, and Mella, a weird giantess. Mella, when tired of the company of Skratti, had a separate abode on MELL FELL; unless, indeed, this name be Celtic rather than Scandinavian, and allied to the word mull, a headland, which we have in the Mull of Cantyre and other names. Or the name may be connected with the Icelandic melr, a sandy hill. There is a MÆLIFELL in Iceland, and there is a SCRATTA WOOD on the borders of Derbyshire. The demon Skratti still survives in the superstitions of Northern Europe. The Skratt of Sweden, with a wild horse-laugh, is believed to mock travellers who are lost upon the waste, and sundry haunted rocks on the coast of Norway still go by the name of SKRATTASKAR. In the North of England the name of Skratti continues to be heard in the mouths of the peasantry, and the memory of "Old Scratch," as he is familiarly called, may probably be yet destined to survive through many future

1 The chief of these are the Blocksberg, or Brocken, in the Hartz; several Blocksbergs in Mecklenburg; the Huiberg near Halberstadt; the Horselberg in Thuringia; the Bechelsberg in Hesse; the Köterberg and the Weckingstein in Westphalia; the Kandel, the Heuerg, and the Staffelstein in the Black Forest; the Bischenberg and the Büchelberg in Alsace; the Blakulla (Black Mountain) in Sweden; and the Blaakolle in Norway. Hanenkamm and Hanenbuck in Bavaria were places of heathen worship. Heidenberg is the name of a hill near Zürich, down which on winter nights a headless horseman is seen to ride.

2 The name of Skratti is found also in the Sarmatian legends. In Bohemian, strett means a demon.
Christian centuries, in company with “Old Nick,” who is none other than Nikr, the dangerous water-demon of Scandinavian legend. This dreaded monster, as the Norwegian peasant will gravely assure you, demands every year a human victim, and carries off children who stray too near his abode beneath the waters. In Iceland also, Nykr, the water-horse, is still believed to inhabit some of the lonely tarns scattered over the savage region of desolation which occupies the central portion of the island.

Many similar traces of the old mythology are to be found in that well-stored antiquarian museum, the English language. In the phrase “Deuce take it,” the deity Tiw still continues to be invoked. In his book De Civitate Dei, St. Augustine speaks of “quosdam dæmones quos dusios Galli nuncupant.” The Bogie, with whose name nurses are wont to frighten children, is probably Bogu, the Slavonic name of the Deity, (Sanskrit bhaga, god, the sun,) and the name of Puck has been referred to the same source. The nursery legend of “Jack and Jill” is found in the younger Edda, where the story of Hjuki (the flow) and Bil (the ebb), the two children of the Moon, is seen to be merely an exoteric version of the flowing and ebbing of the tides. The morning gossamer is the gott-cymar, the veil or trail left by the deity who has passed over the meadows in the night. The word brag has an etymological connexion with the name of Bragi, the Norse god of song and mirth, while the faithful devotees of Bragi fall after awhile under the power of Mara, a savage demon, who tortures men with visions, and crushes them even to death, and who still survives, though with mitigated powers, as the Nightmare of modern days.

There is another class of names of sacred sites, those, namely, which are not associated with the names of particular deities. The name of Redruth in Cornwall is written in old deeds Dre-druith, the town of the Druids. Dilliker and Dilwyn are the “idol’s enclosure,” and the “idol’s island,” from the Welsh delw, an idol. From the Celtic nemet, a sacred grove,
we may deduce the name of NYMET ROWLAND in Devonshire, and of NISMES, anciently Nemausus, in Provence, as well as many ancient Gaulish names, such as Nemetcum, Nemetocenna, Vernemetum, and Tascinemetum. LUND and LUNDGARTH, both in Holderness, are probably from the Norse lundr, a sacred grove. LUNDY Island in the Bristol Channel and LUNDHOLME near Lancaster may be from this source, or from the Norse lundi, a puffin. There is an islet called LUNDEY on the Icelandic coast. The name of HOFF, near Appleby, and two places called HOF in Iceland, seem to be from the Anglo-Saxon and old Norse hof, a temple. The vast inclosure of SILBURY is probably the holy hill (selig, holy). So Jerusalem is called by the Arabs EL KUDS, the holy. Compare also the name of BETHEL, the “house of God,” with the Beit-allah of Mecca, and the Bætulia of early Phœnician worship. Behistan is the abode of the gods, from the Sanskrit bhaga. The names of WYDALE, WIGTHORP, and WEIGHTON, as well as WEIHBOGEN in the Tyrol, WYBORG and WISBY, all of them holy places, are probably connected with the Norse vé, a sacred place. We have the Gothic veihs, holy, and veihan, to consecrate; the old High German vih, a sacred grove or temple, the German weihnacht, Christmas, and the Anglo-Saxon wiccian, fasciare, whence the English word witch.

HELIGOLAND—which means “holy island land”—has been with great probability identified with the insula oceani, which is described by Tacitus as the seat of the secret rites of the Angli and other adjacent continental tribes. Of the numerous places bearing the name of HOLYWELL, HOLY ISLAND, and HOLY HILL,¹ many were probably the sites of an ancient pagan cultus, to which, in accordance with Gregory’s well-weighed instructions, a Christian import was given by Augustine and his brother missionaries.² The churches of St. Martin and St.

¹ Holy Hill is the highest point of ground in Kent. There are numerous Heiligenbrunns and Heilbrunns in Germany, to the waters of many of which a supernatural efficacy was supposed to attach. The original meaning of holly is healing.

² Gregory, “diu cogitans,” came to the conclusion that “fana idolorum destrui minime debeant,” but that the idols should be destroyed, and the temples, well sprinkled with holy water, should be supplied with relics, so that the gens Anglorum “ad loca quæ consuevit familiarius concurrat.”
Pancras, at Canterbury, as well as Westminster Abbey and St. Paul’s Cathedral, were built on the sites of heathen temples, and are instances of this practice of enlisting, in favour of the new faith, the local religious attachments of the people.

It would demand more space than the interest of the subject would warrant, to trace the local vestiges of the worship of the Sclavonian deities. They have left their names scattered far and wide over Eastern and Central Europe—a testimony to the long duration and great difficulty of the process by which the Sclavonic nations were converted to Christianity. Thus the name of Radegast, a god of light, is found at two places called RADEGAST in Mecklenburg Schwerin, one of the same name in Anhalt Dessau, and another in Oschatz; as well as at RADEGOSZ in Posen, RADIHOSCHT in Bohemia, RODGES in Hesse (anciently villa Radegastes), and many villages bearing the names of RADIBOR, RADEBURG, RADENSDORF, and the like.

At ZWETTNITZ in Bohemia, and SCHAUTEWITZ in Pomerania, we find traces of the worship of Swjatowit, a deity with attributes similar to those of Radegast; at JÜTERBOCK, near Berlin, of Juthrbog the god of spring; at ZEITZ, near Leipsig, of Ciza the goddess of fertility; at MITAU in Courland, of Mita a malevolent cynoform deity; and at MARZAHN near Berlin, MARZAHNA near Wittenberg, and MARZANA in Illyria, of Marsana the Sclavonic Ceres.

The subject of names derived from the Eastern and classic mythologies is too extensive for discussion in this place. It would require a chapter, or rather a volume, to itself. There are many such places in India, Syria is full of them, they abound in Italy and Greece. Thus CALCUTTA and CALICUT are the Kali.Ghaunts, the steps or landing-places by the river-side, where the festival of Kali was celebrated, and SERINGAPATAM is the “city of Sri Ranga” or Vishnu. BAALBEC was the chief seat of the worship of Baal, the ruins of whose temple, with its substructure of colossal stones, is still one of the wonders of the world. In the Old Testament we find many traces of the Canaanitish worship still lingering in Palestine. For a long time, probably, the devotions of the people were attracted by the old idolatrous sanctuaries, such as BAAL GAD, BAAL HERMON, BAAL TAMAR, BAAL HAZOR, BAAL JUDAH, BAAL, Q
MEON, and BAAL PERAZIM. In the genealogies of families we find evidence of the same lingering superstitions. Thus in the family of Saul we find persons bearing the names of Baal, Eshbaal, and Meribaal. Panium, now BANIAS, was a sanctuary of Pan. Near Boulogne we have Fanum Pollucis, now FAMPPOUX. The shores of the Mediterranean were covered with places bearing the names of the deities of Greece and Rome. More than a dozen might be enumerated taking their names from Neptune or Poseidon, of which PAESTUM, the ancient Posidonia, is the only one that still retains both its name and any human interest. Hercules seems to have been deemed the most powerful protector of colonies, for from him we find that some thirty or forty places were named HERACLEIA, HERACLEOPOLIS, or HERCULANEUM. MONTERCHI, in Umbria, is Mons Herculis. Twenty places, under the protection of Apollo, were called APOLLONIS or APOLLOIA, and fifteen bore the name of Pallas Athene, all of which, except ATHENS, have sunk into obscurity.

It is pleasant to leave these dry bones of a dead paganism, and turn to the names which speak to us of the first propagation of Christianity in our native land. One of the most striking scenes in the whole history of missionary enterprise was enacted in the East Riding of Yorkshire, at GOODHAM, or GODMUNDAHAM, a mile from WEIGHTON, the "sacred inclosure," where, as the name implies, stood a large heathen temple, the ruins of which may still be seen. Beda tells that the Bishop Paulinus presented himself on this spot before Edwin, king of the Northumbrians, and urged eloquently the claims of the new faith. Coifi, the pagan high-priest, to the surprise of all, proclaimed aloud that the old religion had neither power nor utility. "If," said he, "the gods were of any worth, they would heap their favour upon me, who have ever served them with such zeal." The demolition of the temple was decreed, but, with a lingering belief in the ancient faith, all shrank from incurring the possible hostility of the old deities by taking part in its destruction. "As an example to all," said Coifi, "I am myself ready to destroy that which I

1 The home of the mund, or protection of the gods, or from the Norse godi, a priest; hofgodi, a temple priest.
have worshipped in my folly." Arming himself with spear and sword, he mounted on a horse, and having profaned the temple by casting his lance against it, it was set on fire and consumed.

Godney near Glastonbury, Godmanchester in Huntingdonshire, Godmanstone in Dorset, Godley in Cheshire, Godstow near Oxford, Godshill in the Isle of Wight, and Godstone in Surrey, were probably, like Godmundingaham, pagan sites consecrated to Christian worship.

The prefix *llan*, which, as we have seen, occurs so frequently in Cornwall, Wales, and the border counties, often enables us to detect the spots which were the first to be dedicated to purposes of Christian worship.

The Cymric *llan* is replaced in Scotland and Ireland by the analogous Gadhelic word *kìl*. Originally this denoted only a hermit’s “cell,” though it was afterwards used to mean the “church,” of which the hermit’s cell was so often the germ. The numerous village-names which have this prefix *kìl* possess a peculiar interest. They often point out to us the earliest local centres from which proceeded the evangelization of the half-savage Celts; they direct us to the hallowed spots where the first hermit missionaries established each his lonely cell, and thence spread around him the blessings of Christianity and of civilization. In Ireland alone there are no less than 1,400 local names which contain this root, and there are very many in Scotland also, as Kilmore and Killin. In Wales and the neighbouring counties a few names occur with the prefix *kìl* instead of *llan*. These names may probably be regarded as local memorials of those Irish missionaries who about the fifth century resorted in considerable numbers to the shores of Wales.¹

It seems to have been by means of these Irish hermits that the fierce Scandinavians who settled in the islands off the Scottish coast were brought to submit to the gentle influences of Christianity. The Norse name for these anchorite fathers was *Pàpar*. Three islets among the Hebrides, two in the Orkneys, two in the

¹ We find Kilowm, Kilsant, and Kilycon in Carmarthen; Kilgarran and Kilred in Pembrokeshire; Kilkenin, Kiluellon, and Kilwy in Cardigan; Kilowen in Flint; Kilgwri in Cheshire; Kilmersdon and Kilstock in Somerset; Kildare and Killow in Yorkshire; and Kilpisham in Rutland.
Shetlands, and others among the Faroes and off the coast of Iceland, bear the names of PABBA, or PAPA, the "Father's isle." In the mainland of Orkney, and again in South Ronaldshay, we find places called PAPLAY, the "hermit's abode," and at ENHALLOW, and at one of the PAPAS in the Orkneys, the ancient cell still remains. DYSART, on the coast of Fife, marks the wilderness—desertum—where St. Serf scooped out of the rocks a cave for his abode.

In that part of England which was settled by the Danes, the missionary efforts seem to have been more of a parochial character. We find the prefix kirk, a church, in the names of no less than sixty-eight places in the Danelagh, while in the Saxon portion of England we find it scarcely once. It is found over the whole track of the Norsemen, from KIRKWALL in the Orkneys to DUNKERQUE in Flanders, and QUERQUEVILLE in Normandy. KIRBY means church-village, and the Kirbys which are dotted over East Anglia and Northumbria speak to us of the time when the possession of a church by a village community was the exception, and not, as is now happily the case, the rule. These names point to a state of things somewhat similar to that now prevailing in Australia or Canada, where often but a single church and a single clergyman are to be found in a district fifty miles in circumference. Thus we may regard these Kirbys distributed throughout the Danelagh as the sites of the mother churches, to which the surrounding parishes, whose names contain no such prefix, would bear a filial relationship.

Joined with the prefixes kiel and llan we find not unfrequently the name of the apostle of each wild valley or rocky islet—the first Christian missionary who ventured into the mountain fastnesses to tame their savage denizens. From the village-names of Wales, Scotland, and Ireland, it would be almost possible to compile a Hagiology of these sainted men, who have been canonized by local tradition, though their names are seldom to be found in the pages of the Bollandists.

In a few of these cases, where the same name is repeated again and again, we can only infer the fact of the dedication of the church to some saint of widely extended fame. Thus the repute of St. Bridget has given rise to no less than eighteen
Kilbrides in Scotland alone. At Icolmkill, or Iona, the chief monastery and seminary of North Britain, and the burial-place of innumerable kings and saints, as well as at Inchcolm, Colonsay, and Kirkcolm, we find the name of St. Columba, the great apostle of the Picts, who is said to have founded a hundred monasteries in Ireland and Scotland. So the name of St. Ciarran, the apostle of the Scoto-Irish, and the founder of a monastic rule, is found at Kilkiaran in Islay, as well as at Kilkerran in Ayrshire and in Connemara. But a very large number of these saint-names are locally unique, and the parishes which bear such names are almost always the most ancient, their ecclesiastical position being that of the mother parishes, affiliated to which are the churches dedicated to saints in the Romish calendar. Hence these village-names may fairly be adduced as evidence in any attempt to localize the scene of the labours of these primitive missionaries.

Were we to attempt such a commemoration in this place our space would fail, for in Wales alone there are no less than 479 of these local saints; it must therefore suffice to indicate a few names which are associated with some of the more familiar localities. Thus the watering-place of Llandudno takes its name from St. Tudno, a holy hermit who took up his abode among the rocks of the Orme's Head. Llanberis, now the head-quarters of Welsh tourists, commemorates the labours of St. Peris, an apostolically-minded cardinal. In the case of Beddgelert, the old Aryan legend of the hound Gelert, which Spenser has so gracefully enshrined in verse, must give place to the claims of St. Celert, a Welsh saint of the fifth century, to whom the church of Llangeller is also consecrated. Llangollen is so called from St. Collen, a man more fortunate, or unfortunate, than the majority of his brethren, in that a Welsh legend of his life has come down to us, recounting the deeds of valour which he performed when a soldier in the Roman armies; how he became Abbot of Glastonbury, and finally retired to spend the remainder of his days in a cave scooped out in that rugged wall of cliff which bounds the lovely valley on which the saint has bestowed his name. The name of Merthyr Tydfil commemorates the spot where the heathen Saxons and Picts put to death the martyr Tydfyl, daughter of the eponymic King
Brycnan, who is asserted by Welsh legend to have given his name to the county of Brecon. St. David or St. Dewi was a Welsh prince, whose preaching is compared to that of St. John the Baptist. He lived on herbs, and clothed himself in the skins of beasts. Llanddewi Brefi marks the spot where, at a synod assembled for the purpose, he refuted Pelagius. He was buried at his see of Ty Ddewi, "the house of David," a place which the Saxons call St. David’s. The names of St. Asaph, the apostle of North Wales, and of St. Maughold or Macull, the apostle of the Isle of Man, are to be found on the maps of the countries where they laboured. A few more of these names are appended in a note.

At Kirkcudbright and elsewhere we find the name of St. Cuthbert, a shepherd-boy who became abbot of Melrose, and the Thaumaturgus of Britain. St. Bega, an Irish virgin, lived an ascetic life at St. Bees, where her shrine was long a great

are attributed to

St. Cadoc, a martyr.
St. Padern, an Armorican bishop who came to Wales.
St. Cybi.
St. Illtyd, an Armorican.
St. Carannog.
St. Gadoga, a British saint of the fifth century, who died in Brittany.
St. Idloes.
St. Finian the leper, a royal saint.
St. Bar.
St. Kenelm, a Mercian prince, murdered in a wood by his aunt at the age of seven.
St. Lu.
St. Piran, a bishop consecrated by St. Patrick for a mission to Cornwall.
St. Petroc, one of St. Patrick’s missionary bishops.
St. Anthony.
place of pilgrimage. We find the name of St. Jia, another female saint, at ST. IVES in Cornwall. There is another place called ST. IVES, which takes its name, we are told, from St. Ivo,¹ a Persian bishop; but how his body reached Huntingdonshire, where it was miraculously discovered by a ploughman in the year 1001, tradition sayeth not. The neighbouring town of ST. NEOT'S bears the name of St. Neot, who was a relative of King Alfred.

ST. MALO takes its name from St. Maclou, as the chronicles call him. He appears to have been one of those wandering evangelists of whom Ireland and Scotland sent forth so many in the sixth century, and we may perhaps conjecture that his real name was McLeod, and that his cousin St. Magloire was a McClure. A more historical personage is St. Gall (the Gael), the most celebrated of the successors of St. Columba:—he occupied high station in France, and founded in the uncleared forest the Scotch abbey of ST. GALLEN, from which one of the Swiss cantons takes its name. Another Swiss canton was formerly the domain attached to a church founded by St. Fridolin, an Irish missionary, and dedicated to St. Hilarius, a saint whose name has been corrupted into GLARUS. ST. GOAR built a hut beneath the dangerous Lurlei rock, at the spot which bears his name, and devoted himself to the succour of shipwrecked mariners. St. Brioc fled from the Saxon invaders of Britain, and founded a monastery at ST. BRIEUX in Brittany. The town of ST. OMER was the see of St. Audomar, a Swabian favourite of Dagobert, and ST. CLOUD was the scene of the retirement of St. Hlodowald, one of the saints whose royal birth facilitated their admission to the honours of the calendar. Legends more or less marvellous often attach to names of this class. The history of St. Brynach, who gave his name to LLANFRYNACH, is, to say the least, somewhat remarkable. We

¹ There is a third St. Ivo, the popular saint of Brittany. He was an honest lawyer, and hence he is represented as a black swan in certain mediaeval verses in his honour:

"Sanctus Ivo erat Brito
Advocatus, sed non latro;
Res miranda populo."
are gravely told how, for lack of a boat, he sailed from Rome to Milford Haven mounted on a piece of rock, and how among other proofs of supernatural power he freed Fishguard from the unclean spirits, who by their howlings had rendered the place uninhabitable. Sometimes we have legends of a totally different class, as in the case of St. Heliers in Jersey. Here, we are told, was the retreat of St. Helerius, who mortified the flesh by standing on sharp stones, with spikes pointed against his shoulders, and others against his breast, in order to prevent him from falling backwards or forwards in his weariness. A far more picturesque legend is that which accounts for the name of the castle of St. Angelo at Rome. We are told that, in the time of Gregory the Great, while a great plague was desolating Rome, the Pontiff, walking in procession at the head of his monks, and chanting a solemn litany for the deliverance of the city, saw, or thought he saw, St. Michael, the destroying angel, standing upon the very summit of the vast mausoleum of Hadrian, in the act of sheathing his avenging sword. The plague ceased, and thenceforward, in memory of the miracle, the tower bore the name of the “castle of the angel,” whose effigy, poised upon its summit in eternal bronze, is pointed out as a perpetual evidence of the truth of the legend.

Where the reputed burial-places of celebrated saints have become great places of pilgrimage, the name of the saint has often superseded the original appellation. Thus the reputed tomb of Lazarus has changed the local name of Bethany to el Lazarieh; and Hebron, the place of interment of Abraham, who was called the friend of God, is now called by the Arabs el Khalil, or “the friend.” St. Edmund’s Bury in Suffolk was the scene of the martyrdom of St. Edmund, king of the East Angles. He was taken prisoner by Ingvar the Viking, and having been bound to a tree, he was scourged, and made a target for the arrows of the Danes, and was finally beheaded. St. Osyth in Essex is said to bear the name of a queen of the East Angles who was also beheaded by the

1 Not to be confounded with St. Hilarius, Bishop of Poitiers, or with Hilarius, Bishop of Arles, to whom Waterland has assigned the authorship of the Athanasian Creed.
There is only one saint of whom the local memory survived the effacing ordeal of the Saxon conquest. The venerable memory of St. Alban, the protomartyr of Britain, has supplanted the name of the Roman city of Verulamium, where he suffered. The marvellous legend of Dionysius the Areopagite finds a local habitation at St. Denis, the burial-place of the kings of France. Halifax in Yorkshire derived its name from the "holy tress" of the Virgin's hair which so many pilgrims came to see. The name of Santiago de Compostella in Spain has been curiously formed out of the Latin phrase Sancto Jacobo Apostolo. Santarem, Santiago, and Santander, also in the Peninsula, take their names respectively from St. Irene, a holy virgin, St. James, and St. Andrew; Archangel, in Russia, from St. Michael; Marsaba, on the Dead Sea, from the celebrated St. Saba, hermit and abbot.

Of the great monastic edifices of later ages, most of which are now demolished wholly or in part, or devoted to other purposes, we find traces in the names of Axminster, Leominster, Kidderminster, Westminster, Warminster, Bedminster, Beaminster, Sturminster, Upminster, and others. Minster is the Anglo-Saxon form of the Low Latin monasterium. From the same word come the names of several places called monstiers, Moustiers, or Moutier in France and Switzerland, and various monastirs in Greece and Thessaly. The bay of Aber Beniguët, in Brittany, takes its name from the lighthouse which the Benedictine monks maintained to warn vessels from the dangerous rocks upon the coast. München, or Munich as we call it, takes its name from the warehouse in which the monks (German mönche) stored the produce of their valuable saltmines at Reichenhall and Salzburg. Abbeville was the township belonging to the Abbot of St. Valeri, seized and fortified by Hugh Capet. Numerous names, such as Nunthorpe and Nunneyton, Stapleford Abbots and Abbots Langley, Bishopsley and Bishops Stortford, Monkton and Monklands, Preston and Prestwich, Priors Hardwick, Buckland Monachorum, Kingsbury Episcopi, and Toller Fratrum, record the sites of the long-secularized possessions of nuns, abbots, priors,

1 The name seems to be eponymic. Osyth means "water channel," and would correctly characterize the natural features of the spot.
bishops, friars, monks, and priests. The word Temple often appears as a prefix or suffix in village names, and marks the possessions of the Templars: such are CRESSING TEMPLE and TEMPLE ROYDON in Essex, TEMPLE CHELSING, and TEMPLE DINSLEY in Herts. TERREGLES in Dumfries is a corruption of Terra Ecclesiae, a phrase which is usually translated into the form of KIRKLANDS, or corrupted into ECCLES. The name of AIX-LA-CHAPELLE is reminds us of the magnificent shrine erected over the tomb of Charlemagne, and CAPEL CURIG of the chapel of a humble British saint.

1 Mr. Burgon, in his amusing letters from Rome, has recently pointed out an undoubted etymology for this word chapel, which has so long puzzled etymologists. It seems to have originally been the name given to the arched sepulchres excavated in the walls of the catacombs of Rome, which afterwards became places where prayer was wont to be made. The Low Latin capella is the hood or covering of the altar. Hence our words cape and cap.

2 On the subject of this chapter the following books may be consulted: Grimm, Deutsche Mythologie; Mannhardt, Die Götterwelt der deutschen und nördischen Völker; and Germanische Mythen; Mone, Geschichte des Heidenthums im nördlichen Europa; Müller, Geschichte und System der altdeutschen Religion; Buttmann, Die deutschen Ortsnamen; Panzer, Beitrag zur deutschen Mythologie; Barth, Über die Druiden der Kelten; Kemble, The Saxons in England; Thorpe, Northern Mythology; Pictet, Les Origines Indo-Européennes; Rice Rees, Essay on the Welsh Saints; W. J. Rees, Lives of the Cambro-British Saints; Butler, Lives of the Saints; Edmunds, Names of Places; and the Zeitschrift für Deutsche Mythologie, passim.
CHAPTER XIV.

PHYSICAL CHANGES ATTESTED BY LOCAL NAMES.

Vast geological operations are still in progress on this globe; continents are slowly subsiding at the rate of a few inches in a century; while new lands are uprising out of the waters, and extensive deltas are in process of formation by alluvial deposition. But these changes, vast as is their aggregate amount, are so gradual that generations pass away without having made note of any sensible mutations. Local names, however, form an enduring chronicle, and often enable us to detect the progress of these physical changes, and occasionally even to assign a precise date to the period of their operation.

Thus it is not difficult to prove that the present aspect of the lower valley of the Thames is very different from what it must have been a thousand years ago. Instead of being confined within regular banks the river must have spread its sluggish waters over a broad lagoon, which was dotted with marshy islands. This is indicated by the fact that the Anglo-Saxon word ea or ey, an island, enters into the composition of the names of many places by the river-side which are now joined
to the mainland by rich pastures. Such are Bermondsey, Putney, Battersea, Chertsey, Moulsey, Iffley, Osney, Whitney, and Eaton or Eton. The Abbey Church of Westminster was built for security on Thorney Island, and the eastern portion of the water in St. James's Park is a part of that arm of the Thames which encircled the sanctuary of the monks, and the palace of the Anglo-Saxon kings. The name Chelsea is a contraction of chesel-ea, or "shingle island," and in its natural features the place must have once resembled the eyots which are found in the Thames near Hampton. In Leland's time there was a shingle bank at the mouth of the Axe in Devon called the Chisille. The long ridge of shingle which joins the Isle of Portland to the mainland is also called the Chesil bank; and the name of the Isle of Portland indicates that the formation of this ridge took place in modern times, subsequent to the period when Anglo-Saxon gave place to modern English.

The Isle of Thanet was formerly as much an island as the Isle of Sheppey is at the present time. Ships bound up the Thames used ordinarily to avoid the perils of the North Foreland by sailing through the channel between the island and the mainland, entering by Sandwich and passing out by Reculver, near Herne Bay. Sandwich, or "sandy bay," was then one of the chief ports of debarkation; but the sands have filled up the wick or bay, the ancient port is now a mile and a half distant from high-water mark; and the ruins of Rutupia, now Richborough, the port where the Roman fleets used to be laid up, are now surrounded by fine pastures. Ebbfleet, which is now half a mile from the shore, was a port in the twelfth century, and its name indicates the former existence of a "tidal channel" at the spot. The Celtic name of Durlock, more than a mile from the sea, means "water lake," and indicates the process by which the estuary was converted into meadow. This navigable channel, which passed between the Isle of Thanet and the mainland, has been silted up by the deposits brought down by the River Stour. Stourmouth—the name, be it noted, is English, not Anglo-Saxon—is now four miles from the sea, and marks the former embouchure of this river. Chiselet, close by, was once a shingle islet; and five miles
farther inland, the name of FORDWICK,¹ the “bay on the arm of the sea,” proves that in the time of the Danes the estuary must have extended nearly as far as Canterbury. Beyond Canterbury is OLANTIGH, anciently Olantige, whose name shows that in Saxon times it must have been an island.

ROMNEY Marsh,² which is now a fertile tract containing 50,000 acres of the best pasturage in England, must, in Saxon times, have resembled the shore near Lymington—a worthless muddy flat, overflowed at every tide. OLD ROMNEY, NEW ROMNEY, and SCOTNEY, were low islands which afforded sites for the earliest fisher-villages. The name of WINCHELSEA, or gwent-chesel-ey enlightens us as to the process by which these islands were formed—namely, by the heaping up of shingle banks at the seaward edge of the muddy flats.³ The recent origin of this tract of land, and the gradual progress of its reclamation, are curiously illustrated by the character of the local names. Throughout the greater portion of the marsh they are purely English, such as IVYCHURCH, FAIRFIELD, BROOKLAND, and NEWCHURCH. In a few of the more elevated spots the names are Saxon or Celtic, as WINCHELSEA or ROMNEY, while it is only when we come to the inland margin of the marsh that we meet with a fringe of ancient names like LYMNE or APPLEDORE, which show the existence of continuous habitable land in the times of the Romans or the Celts.⁴ APPLEDORE is a Celtic name meaning “water-pool,” and was formerly a maritime town; while LYMNE, the ancient Portus Lemanus, is the καυνός λυμήν of

¹ Fordwick was anciently the port of Canterbury, and a corporate town. Norwich in the thirteenth and fourteenth centuries was “on the banks of an arm of the sea.”
² From the Gaelic word ruimne, a marsh. The name of RAMSEY, in the Fens, is derived from the same source.
³ Dungeness, at the southern extremity of Romney Marsh, is a long spit of shingle, derived from the disintegration of the cliffs at Beachy Head, and has for the last two centuries been advancing seaward at the rate of nearly twenty feet per annum.
⁴ The same is the case in the Fens. The portions reclaimed at an early period show English names surrounded by a border of Danish names on the north, and of Saxon names on the south. The same is the case with the Delta of the Rhone. Places lying to the north of the old Roman road between Nismes and Beziers have Celtic names, while all those to the south of the road have names of Romance derivation.
Ptolemy, and was one of the three great fortified harbours which protected the communications of the Romans with the Continent. The ruins of the Roman port are now nearly two miles from the sea. The names of West Hythe, which is more than a mile from the shore, and of Hythe, which is only half a mile, chronicle the silting up of the backwater which formed the ancient port, and the successive seaward advances of the shingle, since the time when the Saxon word hithe was superseded by its English equivalent haven. The name of Newhaven commemorates a geological event of an opposite character. Lewes was anciently a port, and Hamsey was a marshy island in the estuary of the River Ouse, which then entered the sea at Seaford, but a great storm in the year 1570 permanently changed its course, and the port of Newhaven has arisen at the new outlet of the river. The name of Newport in South Wales reminds us in like manner of the decay of the Roman port at Caerleon, and the erection of another a little nearer to the sea; and Newport in the Isle of Wight has taken the place of an older harbour near Carisbrooke. Pevensey and Selsey are now no longer islands, the channels which divided them from the mainland having been silted up. The name of Selsey (seal's island) reminds us of the remote period when seals lay basking on the Sussex coast.

The central part of Somersetshire presents many names which show great physical changes. In Celtic times Sticklinch, Moorlinch, and Charlinch, were islands, as was the case in the Saxon period with Muchelney, Rodney, Godney, Athelney, Henley, Bradney, Horsey, Hackney, Othery, Middleney, Thorney, Chedzoy, Westonzyoland, Middlezyoy, and Westholme, while the pasture-land called Meare must once have been the bed of an inland lake.

The whole district of the Traeth Mawr or "Great Sand" in North Wales was an estuary at no very remote period. The action of the sea may be distinctly traced along the rocks near Tremadoc.¹ Almost every rocky knoll on the wide flat pasture-land bears the name of ynys, or island,² and must once have

---

¹ The site of this town was reclaimed from the sea in 1813 by means of an embankment made by a Mr. Maddock.
² E.g. Ynys-Gwely, Ynys-Ceilio, Ynys-Calch, Ynys-Tywyn.
been surrounded by every tide, as is still the case with Ynys-gifftan and Ynys-gyngar. **YNYS FAWR** and **YNYS FACH**, the "Great Island" and the "Little Island" are now two miles from the sea, and **YNYS GWERTHERYN**, south of Harlech, is a mile inland. From **YNYS HIR**, now some way inland, Madoc is said to have sailed in quest of unknown lands. **Ywern**, two miles from the sea, was once a sea-port, as is proved by the parish register of Penmorpha.

The tract of land near Dartmouth called **NEW GROUND** was only reclaimed from the river a century ago. **ROODEY**, which now forms the race-course at Chester, was formerly an island surrounded by the river Dee, like the **INCHES**, or islands of Perth. The Carse of Gowrie is the bed of an ancient arm of the sea, which having been nearly filled up by the alluvium of the Tay and the Earn, has, in common with the whole of central Scotland, undergone an elevation of twenty or thirty feet since the Roman period. **INCHTURE, INCHMARTIN, INCH-MICHAEL, INCHYRA**, and **MEGGINCH** were, as the names witness, islands in this frith. An anchor has been dug up at Megginch, and at the farm of Inchmichael a boat-hook was found at a depth of eight feet below the soil, and twenty feet above the present high water-mark. In the plain a little below Dunkeld, a hillock containing 156 acres goes by the name of **INCHTUTHILL**, "the island of the flooded stream," showing that the Tay must once have surrounded it.

This secular elevation of Scotland may also be traced by means of the raised beaches on the western coast. Here also we meet with a remarkable etymological confirmation of the results arrived at on independent grounds by geological investigators. "**Loch Ewe**, in Ross-shire, one of our salt sea lochs," says Hugh Miller, "receives the waters of **Loch Maree**—a noble freshwater lake, about eighteen miles in length, so little raised above the sea level that ere the last upheaval of the land it must have formed merely the upper reaches of Loch Ewe. The name **Loch Maree**—Mary's Loch—is evidently mediæval. And, curiously enough, about a mile beyond its upper end, just where Loch Ewe would have terminated ere the land last arose, an ancient farm has borne, from time immemorial, the name of **KINLOCH EWE**—the head of Loch Ewe."
START ISLAND, in the Orkneys, has in comparatively recent times been separated from the Island of Sanda. The word start means a tail, as in the case of Start-point, in Devon. The redstart, is the red-tailed bird. Thus the name of START island proves that it was once only a long promontory projecting from the island of Sanda, and the recent date of the separation is shewn by the form of the name being Start Island, instead of the Norse equivalent Starta. So the name of STUDLAND (Anglo-Saxon studu, a post or pillar) proves the antiquity of the chalk columns which fringe the cape.

The Fens which surround the Isle of Ely constitute a vast alluvial flat of more than a thousand square miles in extent, and must formerly have been a shallow bay six times as large as the Wash, which has been silted up by the deposits of the Nen, the Welland, the Witham, and the Ouse.

The local names in this district shew, as might have been expected, great alterations in the distribution of land and water. We have LANDBEACH, WATERBEACH, ASBEACH, OVER (Anglo-Saxon ufer, a shore) and ERITH (ora, shore, and hithe, haven), which are all places on the edge of the present Fen district. HOLBEACH is now six miles from the coast, and WISBEACH, the beach of the Wash or Ouse, is seven miles inland. The ancient sea-wall, now at a considerable distance from the shore, has given rise to the local names of WALSOKEN, WALTON, and WALPOLE.

The tide does not now come within two miles of TYDD, and almost all the present villages in the Fen country were originally islands, as is shown by their names. Thus Tilney, Gedney, Stickney, Ramsey, Thorney, Stuntney, Southery, Norney, Quaney, Helgae, Higney, Spinney, Whittlesey, Yaxley, Ely, HOLME, Oxney, Eye, Coveny, Monea, Swathesey, Sawtrey, Raveley, Rowoy, and Wiskin (Celtic, the water island), are no longer, as they once were, detached islands in a watery waste; the great inland seas of Ramsey Mere and Whittlesey Mere are now drained, and the flocks of wildfowl have given place to flocks of sheep.

The Isle of AXHOLME or AXELHOLME, in Lincolnshire, is now joined to the mainland by a wide tract of rich corn-land. The name shews that it has been an island during the time of the
Celts, Saxons, Danes, and English. The first syllable *Ax* is the Celtic word for the water by which it was surrounded. The Anglo-Saxons added their word for island to the Celtic name, and called it Axey. A neighbouring village still goes by the name of Haxey. The Danes added *holm*, the Danish word for island, to the Saxon name, and modern English influences have corrupted Axeyholme into Axelholme, and contracted it into Axholme, and have finally prefixed the English word *Isle*. The internal evidence afforded by the name is supplemented by historical facts. In the time of Henry II. the island was attacked and taken by the Lincolnshire men in boats, and so late as the time of James I. it was surrounded by broad waters, across which the islanders sailed once a week to attend the market at Doncaster.

We can trace similar changes on the Continent. The city of *Lisle* is built on *L'isle*, once an island. *Montreuil sur Mer*, formerly *Monasteriolum super Mare*, was built in the year 900, on the banks of an estuary which has been silted up, and the town is now separated from the sea by many miles of alluvial soil. A Danish fleet once sailed up to *Bavent*, which is now ten miles from the sea. *Wissan* is now four miles from the sea. The name is a corruption of the Norse *Wissant* or *Witsand*, and refers to the "white sand" which has choked up the harbour from which, in all probability, Cæsar first sailed for Britain. *St. Pierre-sur-le-Digue*, near Bruges, is six miles from the present sea-wall, and the town of *Damme*, which once possessed an harbour and considerable maritime trade, is now an inland agricultural town. *Notre Dame des Ports*, at the mouth of the Rhone, was an harbour in the year 898, but is now three miles from the sea. *Ostia*, as the name implies, and as we are expressly told, was founded at the mouth of the Tiber, but the alluvial matter from the Apennines brought down by the yellow river has now advanced the coast-line three miles beyond the town.

There are but few islands in the world whose names do not contain some root denoting their insular character. A remarkable exception to this rule is to be found in the names of the islands which lie off the mouth of the Scheldt, and at the entrance of the Zuyder Zee. Does not the circumstance bear a
PHYSICAL CHANGES.

striking testimony to the historical fact that it is only within comparatively recent times that the delta of the Scheldt has been broken up, and the Zuyder Zee formed by incursions of the ocean?

**Port Valais**, the Portus Valesiae of the Romans, occupies the site of the ancient harbour at the upper end of the Lake of Geneva. The alluvium of the Rhone has advanced the land nearly two miles in less than two thousand years, being at the rate of between four and five feet per annum. **Villeneuve**, the new town, has taken the place of the old port.

The southern face of the Alps is bare and precipitous, and from meteorological causes, which are well understood, the district is peculiarily liable to sudden and violent falls of rain. The rivers of Lombardy are, in consequence, charged with an exceptional amount of alluvial matter. The whole plain of the Po is gradually rising, so much so that at Modena the ruins of the Roman city are found forty feet beneath the surface of the ground. Hence at the embouchures of the Po and the Adige we might anticipate rapid changes in the coast line; and this we find to be the case. We find a range of ancient dunes and sea beaches stretching from Brandolo to Mesola. Ravenna, now four miles inland, stood on the coast two thousand years ago. One of the suburbs of Ravenna is called Classe, a corruption of Classis, the ancient name of the port, which was capable of giving shelter to 250 ships of war. Classe is now separated from the sea by a dense forest of stone-pines two miles in breadth. The Adriatic takes its name from the town of Adria, which was its chief port, B.C. 200. Atri, the modern town upon the site, is now nearly twenty miles from the coast.

The present delta of the Po, containing 2,800 square miles, was probably at no very distant date a shallow lagoon, resembling that which is crossed by the railway viaduct between Mestre and Venice. The delta commences at the town of Osteglia, now eighty-six miles from the sea. The name of Osteglia would indicate that here formerly was the embouchure of the Po. Este is nearly thirty miles inland, and the name seems also to be a corruption of the word ostia. The Po has, moreover, frequently changed its channel, and two of these
DELTAS.

Deserted river-beds are known by the names of the Po Morto, the Po Vecchio.

The name of Vesuvius is probably Oscan, and proves, as Benfey thinks, that this volcano must have been in eruption some 2,400 years ago, before the Greeks arrived in Italy. A similar conclusion may be deduced from the fact that the name of Etna means a "furnace" in the Phoenician language.\(^1\)

On the Bay of Baiae we find Monte Nuovo, the "new mountain," which at the time of the eruption in the year 1538 was thrown up to a height of 440 feet in less than a week.

Near Primiero, in the Italian Tyrol, is a lake, three miles long, called Lago Nuovo. This was formed some years ago by a landslip which choked up the narrow entrance to one of the mountain valleys.

The physical condition and the climate of the northern hemisphere have been largely affected by the destruction of the forests which once clothed the greater part of Europe. The notices of ancient writers are seldom sufficiently definite or copious to enable us to discover the extent of the old woodland. Occasionally we have tangible evidence, such as is supplied by the bog oak of Ireland, or the buried trees of Lincolnshire. But ancient names here stand us in good stead, and enable us, at certain definite periods, to discover, with considerable precision, the extent of primæval forests now partly or entirely destroyed.

The local names of Iceland shew in a very curious manner the way in which the rigour of the climate and the scarcity of fuel have caused the total destruction of the few forests of dwarf trees which existed at the time when the island was first discovered. At the present time, a solitary tree, about 30 feet in height, is the sole representative of the former Icelandic forests; and the stunted bushes growing on the heaths are so eagerly sought for fuel that, as a recent traveller has observed, the loss of a toothpick may prove an irreparable misfortune. The chief resource of the inhabitants is the drift-

---

1 See p. 62, supra. The name of Sodom means burning, thereby indicating, as Dr. Stanley has suggested, the volcanic character of the region in which the catastrophe took place.
wood cast upon the coast by the Gulf Stream, or the costly substitute of Norwegian timber. But at the time of the first settlement of the island there must have been considerable tracts of woodland. In the *Landnamabok* we find no less than thirty-one local names containing the suffix *holt*, a wood, and ten containing the word *skogr*, a shaw. Most of these names still remain, though every vestige of a wood has disappeared. Thus there are several places still called *holt*; and we also find *Holtford, Skalholt, Reykholt* (where Snorro Sturleson was murdered), *Skogarfoß, Cape Skagi, Skogcotte*, and *Blaskogiheidi*, or Blue-wood-Heath.

The name of *Holstein*, or Hol-satia, means the Forest settlement, and it probably indicates that the now barren Segberger Heath was once a vast forest which supplied a portion of the Angles with the materials for the fleets with which they invaded the shores of England.

In Southern Europe, names like *Broglie, Brolo*, and *Breuil* attest the former existence of forests in districts now entirely bare. The name of the island of *Madeira* bears witness to the vast forests which clothed the mountains of the island, and which were wantonly destroyed by fire soon after the discovery by the Portuguese.

The bare heaths to the south-west of London seem to have been at one time partially clothed with forest. This is indicated by the root *holt* (German *holz*), which we find in the names of *Bagshot, Badshot, Ewshot, Lodshot, Bramshot, Aldershot*, and *Aldersholt*.

The vast tract in Kent and Sussex which is now called the *Weald* (German *wald*, wood), is the remains of an ancient forest called the *Andredesleah*, which, with a breadth of 30 miles, stretched for 120 miles along the northern frontier of the kingdom of the South Saxons. *Well Street*, the "wood-road," is the name of the Roman road which ran through the wooded district. In the district of the Weald almost every local name, for miles and miles, terminates in *hurst, ley, den*, or *field*. The *hursts* and *charts*¹ were the denser portions of the forest; the

¹ The word *chart* is identical with the *hart* (wood, or forest) which we find in such German names as the *Hartz* Mountains, the *Hercynian Forest, Hunhart*, and *Lyndhart*. *H* and *ch* are interchangeable, as in the
leys were the open forest glades where the cattle love to lie;¹ the dens² were the deep-wooded valleys, and the fields, as CUCKFIELD, LINDFIELD, and UCKFIELD, were little patches of "felled" or cleared lands in the midst of the surrounding forest. From PETERSFIELD and MIDHURST, by BILLINGHURST, CUCKFIELD, WADHURST, and LAMBERHURST, as far as HAWKSHURST and TENTERDENE, these forest names stretch in an uninterrupted string.³ The dens were the swine pastures; and down to the seventeenth century the "Court of Dens," as it was called, was held at Aldington to determine disputes arising out of the rights of forest pasture.⁴ Another line of names ending in den testifies

¹ The root of the word leah or lea, is the verb "to lie."
² Den is probably a Celtic word adopted by the Saxons. The ARDENNES is the "great forest" on the frontiers of Belgium and France.
³ An analysis of the forest names in the Weald gives the following results:

⁴ The surnames Hayward and Howard are corruptions of Hogwarden, an officer elected annually to see that the swine in the common forest pastures or dens were duly provided with rings, and were prevented from straying. The Howard family first comes into notice in the Weald, where their name would lead us to expect to find them. So the family name of Woodward is vudu veard, the wood warden, whose duties were analogous to those of the howard. There are many evidences of the importance attached to swine in Anglo-Saxon times. Flitch is etymologically the same word as fleisch or flesh, showing that the flesh of swine was pre-eminent
to the existence of the forest tract in Hertfordshire, Bedfordshire, and Huntingdonshire, which formed the western boundary of the East Saxon and East Anglian kingdoms. Henley in Arden, and Hampton in Arden, are vestiges of the great Warwickshire forest of Arden, which stretched from the Forest of Dean to Sherwood Forest. Names ending in hatch often indicate the ancient boundaries of forests. They are derived from the hitch-gates which kept cattle from straying out of the forest. Thus Colney Hatch marks the southern extremity of Enfield Chase.

The Black Forest in Argyle is now almost entirely destitute of trees, and the same is the case with the Cotswold Hills in Gloucestershire. This name contains two synonymous elements. The second syllable is the Anglo-Saxon weald, a wood, which we find in the now treeless Wolds of Yorkshire; and the first portion is the Celtic coed, a wood, which we find in Chat Moss, Catlow, Coitmore, Goodgrave, and Cadbeeston.

The name of Derby, the “village of wild beasts,” 1 shows us the state of things on the arrival of the Danes. The Midland Derby lay between the forests of Arden and Sherwood. The hundred of Derby, which occupies the southern portion of Lancashire, and includes the populous towns of Liverpool and Wigan, was one vast forest, with the solitary village of Derby standing in the midst, till at length the villages of Ormskirk and Preston grew up around the church built by Ormr, and the priest’s house.

Indeed, Lancashire, which is now such a busy hive of workers, was one of the most desolate and thinly peopled parts of England before coal had been discovered underlying her thick forests and barren moorlands. An analysis of the local names will enable us to make a rough comparison of the area anciently under cultivation with that which was unreclaimed. Throughout Lancashire we find very few names ending in “the flesh” to which our ancestors were accustomed. Sir Walter Scott, in the well-known forest dialogue in Ivanhoe, has pointed out the fact that while veal, beef, mutton, and venison are Norman terms, bacon is Saxon.

1 The German word thier still means any wild animal; but in England the extermination of the wolf, the wild ox, and the badger, has left the “deer” as the solitary representative of the German thier.
borough, by, or thorpe, and hence we conclude that the number of villages and towns was small. There is a fair sprinkling of names in ham, worth, and cote, suffixes which would denote detached homesteads; while the very large number of names which are compounded with the words shaw, holt, ley, hill, and mere, prove that the greater portion of the country consisted only of woodland or wild moor.

In order to arrive at somewhat definite results, an analysis has been made of the local names in the counties of Surrey and Suffolk. Of the total number of names in Surrey 36 per cent. have terminations like wood, holt, hurst, ley, den or moor, and 12 per cent. end in don, combe, ridge, hill, &c., while 40 per cent. exhibit such suffixes as ham, worth, cote, ton, sted, or borough, whence we gather that the proportion of uninhabited to inhabited places was 48 to 40. In Suffolk, on the other hand, the population seems to have been much more dense, for 65 per cent. of the names denote habitations, 18 per cent. denote wood and moorland, and 7 per cent. denote hills. It would thus appear that the ratio of the density of the population in Suffolk to that in Surrey was approximately as 13 to 8, whereas at the present time the population of Suffolk is 215 to the square mile, and that of Surrey 842, or in the ratio of 13 to 48.

The names which we have been considering indicate the former existence of ancient forests that have been cleared. In Hampshire we are presented with the converse phenomenon; we meet with names which establish a fact which has been doubted by some historical inquirers, that extensive populated districts were afforested to form what now constitutes the New Forest. The very name of the New Forest has its historical value—and within its present reduced area,
the sites of some of the villages that were destroyed are attested by names like TROUGHAM, FRITHAM, WOOTON, HINTON, BOCHAMPTON, TACHURY, WINSTED, CHURCH WALK, and CHURCH MOOR, while the village names of Greteham, Adelingham, Wolnetune, and Bermintone survive only in the Domesday record.

The hundred is supposed to have been originally the settlement of one hundred free families of Saxon colonists, just as the canton (from the Welsh cant, a hundred) was a similar Celtic division. In rural districts the population must have increased at least tenfold—often in a much larger proportion—since the period of the formation of the present hundreds. Many single agricultural parishes contain a hundred families removed above the labouring class, and we may probably conclude that the population is equal to that of one of the Saxon hundreds.

The manner in which the island was gradually peopled, and the distribution and relative density of the Saxon population, are curiously indicated by the varying sizes of the hundreds. In Kent, Sussex, and Dorset, which were among the earliest settlements, the small dimensions of the hundreds prove that the Saxon population was very dense, whereas, when we approach the borders of Wales and Cumberland, where the Saxon tenure was one rather of conquest than of colonization, and where a few free families probably held in check a considerable subject population, we find that the hundreds include a much larger area.

Thus the average number of square miles in each hundred is—

| In Sussex | 23 | In Herts | 79 |
| Kent | 24 | Gloucestershire | 97 |
| Dorset | 30 | Nottinghamshire | 105 |
| Wiltshire | 44 | Derbyshire | 162 |
| Northamptonshire | 52 | Warwickshire | 179 |
| Surrey | 58 | Lancashire | 302 |

We arrive at somewhat similar conclusions from the proportions of the slaves to the rest of the population, as returned in Domesday. In the east of England we find no slaves returned.
the Celtic population having become entirely assimilated. In Kent and Sussex the slaves constitute 10 per cent. of the population; in Cornwall and Devon, 20 per cent.; and in Gloucestershire, 33 per cent.

The knowledge which we possess of several thousand names which have been preserved in Anglo-Saxon charters, enables us to ascertain, in many cases, the original forms of names which have now become more or less corrupted. From the study of these names it may be inferred that agriculture was in a more advanced state among the Anglo-Saxons than on the Continent. A three-course system of husbandry was adopted; wheat and flax are the crops which seem to have been the most cultivated. We meet with indications of the existence of extensive estates, on which stood large houses, occasionally of stone but more frequently of wood, for the residence of the proprietor, surrounded by the tun or inclosure for cattle, and the bar⁵tin or inclosure for the gathered crops. Round the homestead were inclosed fields, with barns, mills, and weirs. There were detached outlying sheepfolds and sheepcotes, with residences for the serfs, and special pasturages were allotted to swine and goats. The estates were separated from one another by a mark, or broad boundary of woodland. There were open forest-pastures fed by swine, which must have presented an appearance resembling that of the open parts of the New Forest at the present day. In these woodlands the prevalent vegetation consisted of the thorn, hazel, oak, ash, elm, lime, and fern. The maple, beech, birch, aspen, and willow grew less abundantly. There were plantations of osiers, and the names of the rush and sedge occur so frequently as to indicate a very defective state of drainage.

One fact, however, which we gather from these ancient names indicates a marked peculiarity in the aspect of Anglo-Saxon England. In no single instance throughout the charters do we meet with a name implying the existence of any kind of pine or fir, a circumstance which curiously corroborates the assertion of Cæsar, that there was no fir found in Britain. The names of fruit-trees are also very unfrequent, with the exception of that of the apple-tree, and even this appears very rarely in conjunction with Anglo-Saxon roots, being found
chiefly in Celtic names, such as APPLEDURCOMBE, and AVALON; or in Norse names, such as APPLEBY, APPLEGARTH, and APPLETHWAITE.

At the period of the Conquest, vineyards do not seem to have been uncommon in the south of England. In Domesday Book vineyards are mentioned in the counties of Hertford, Middlesex, Norfolk, Suffolk, Kent, Hampshire, Dorset, and Wilts. At the present day a part of the town of Abingdon is called the VINEYARD, and there is also a field so called near Beaulieu Abbey in Hampshire, and another near Tewkesbury. The same name is borne by lands which were formerly attached to monastic foundations in the counties of Worcester, Hereford, Somerset, Cambridge, and Essex. The very early existence of vine culture in England is indicated by the name of WINNAL in Hampshire, which is derived from the Celtic gwinillan, a vineyard.

Local names occasionally preserve evidence of the former existence of animals now extinct. The names of the wolf and the bear were so commonly used as personal appellations by the Danes and Saxons, that we are unable to pronounce with certainty as to the significance of names like WOLFERLOW in Herefordshire, or BARNWOOD in Gloucestershire. WOLVESEY, a small island at Winchester, was, however, the place where the Welsh tribute of wolves' heads was annually paid. The seal ascended the Humber as far as SELBY. The badger or broc gave its name to BAGSHOT, BROXBOURNE, and BROGDEN; the wild boar (eoder) was found at EVERSHAW, EVERSHOT, EVERTON, and EVERSLEY; and the crane at CRANFIELD and CRANBOURN.

The huge aurochs, which once roamed over the forests of Germany, is mentioned in the Niebelungen Lied by the name of the Wisent; and in Hesse we find a place called WIESENFELD, the “aurochs' field,” and another called WIESENSTIEGE, the “aurochs' stair.” We find traces of the elk at ELBACH and ELLWANGEN; and of the Schelch, a gigantic elk, now everywhere extinct, at SCHÖLLNACH.

The fox is unknown in the Isle of Man, and not even a tradition survives of its former presence. A place called CRONKSHYNNAGH, which means “Fox hough,” is, however,
sufficient to prove that this animal was once a denizen of the island.

The vestiges of the Beaver are very numerous. Beverley in Yorkshire is "the beaver's haunt," and we find a Beverstone in Gloucestershire, and a Bevercoates in Nottinghamshire. The valley which stretches northwards from the Glyders, scored with glacial striæ and dotted over with moraines, bears the name of Nant Frangon, or "the beaver's dale;" and across this valley stretches Sarn yr Afrange, or "the beaver's dam." The magnificent pool, well known both to the artist and to the angler, which lies just below the junction of the Lledr and the Conway, is called Llyn yr Afrange, "the beaver's pool." In Germany we have the names of Bibersburg, Biverbike (the beaver's beck), and the Bebra (anciently Fiparaha, or beaver's river). From the Sclavonic bobr, a beaver, we have the river Bober in Silesia, as well as Bobern, Boberow, Boversburg, Boberwitz and Bobrau. Bievre on the Aisne has been identified with the Bibrax of Caesar, and Bibracte, now Autun, was the chief city of the Áeduì. The tribe of the Bibroci no doubt called themselves "the Beavers," in the same way that North American tribes take their names from the snakes, the foxes, or the crows.¹ The great auk is now extinct in Newfoundland, and though specimens have been found conserved in the guano of the Funk Islands, no record or memory of the bird exists save the name of the Penguin Islands, on which they used to breed.

In the Saxon charters we find many allusions to quarries, but there is a remarkable absence of names denoting ironworks or mines, such names, for instance, as the Goldberge, Eisenberg, Kupferhütte, and Erzgebirge, which we find in Germany. In the Forest of Dean, however, we find on the map Cinderford and Cinderhill, names derived from vast heaps of scoriæ, from which the iron had been so imperfectly extracted by the Roman miners, that these mounds form a valuable consideration in the purchase of the ground on which they lie. The charters contain numerous indications

¹ The word beaver is common to most of the Aryan languages. Latin fiber [= biber], Cornish befer, Gaelic beabhor, Gaulish biber, German befer. The Welsh names are afrange and Ilost lydan, "the broad-tailed."
of the localities where salt was procured or manufactured. Domesday Book enumerates no less than 385 salt-works in the single county of Sussex. The *wics* in the Essex marshes were probably once salt-works, and we have already traced the singular way in which the *wych* or bay-houses on the coast came to give a name to the inland salt-works of DROITWICH and NANTWICH. But the evidence of names enables us to prove that many existing salt-works were worked before the advent of the Teutonic race. This we can do by means of the Celtic word *hal*, salt; which we find in the name of **PWLHHELLI**, the "salt pools," in Carnarvonshire. At **HALING**, on the Hampshire coast, salt-works still exist, which apparently date from Celtic times; and we find a place called **HALTON** in Cheshire, and **HALSAL** and **HALLATON** in Lancashire. In the salt-producing districts of Germany several towns whose names contain the Celtic root *hal* stand on rivers which contain the Teutonic synonym *sal*. Thus **HALLE**, in Prussian Saxony, stands on the river **SAALA** (salt river); **REICHEN-HALL**, in Bavaria, is also on a river **SALE**; **HALLEIN**, in **SALZBURG**, stands on the **SALZA**. We find towns called **HALL** near the salt mines of the Tyrol, of Upper Austria, and of Swabia; there is a **HALLE** in Ravensberg, a **HALLSTADT** in the Salzkammergut, and **HALEN** and **HAL** in Brabant.

The institution of lighthouses dates from very early times, as names bear witness. The names of the **PHAROS**, at Dover and Alexandria, and the **GIBEL EL FARO**, near Malaga, take us back beyond the Christian era. In Sicily, the cape by the side of Charybdis, and opposite Scylla, was called **CAPE PELOUS** (Cape Terrible). It has now become **CAPO DI FARO**—the erection of the lighthouse having caused the Cape to lose at once its terrors, and its name of terror. **CAPE COLONNA**, in Greece, takes its name from the conspicuous white columns of the ruined Doric temple which served as a landmark to the Genoese and Venetian seamen; and **CAPE CORUNNA**, in Spain, is so called from the columna or tower which served the

1 See p. 108, *supra*.
2 There are six German rivers anciantly called *sala*. We find the river **HALYS** (salt water) in Galatia, and the river **HALYCUS** in Sicily.
purpose of a Pharos. The name of Flamborough Head speaks of the rude fires of coal or wood that used to "flame" by night on that dangerous headland.\(^1\) At the extremity of the peninsula of Furness (Fireness) is a small island, on which stands a ruined building, called the Pile of Foudry—that is, the "peel" or tower of the "fire isle."\(^2\) Furness and Foudry are Norse names, and are an indication of the antiquity of the lighthouse which guided the Northmen in their voyages from the Isle of Man to Lancaster. The numerous beacon hills throughout the island call to mind the rude though efficient means by which, before the days of the Electric Telegraph, the tidings of great events could be communicated from one end of the island to the other. There are those now alive who can remember looking out, the last thing every night, towards the Beacon Hill, to know if the dreaded landing of Bonaparte had taken place.

Though the commerce of the Anglo-Saxons was not extensive, yet our local names indicate considerable changes in the relative commercial importance of various towns. The natural advantages of the site of London have enabled it to maintain, at all times, its ancient pre-eminence—for its Celtic name implies that, even in pre-historic times, it was, as it is still, the "city of ships."

From the Anglo-Saxon ceapian, to buy, cypan, to sell, and ceap,\(^3\) price, or sale, we derive many names which indicate

---

\(^1\) This name may, however, mean the "camp of refuge" (Anglo-Saxon fleam, a fugitive). The extremity of the headland has been converted into a stronghold by an ancient dyke still called Danes' Dyke.

\(^2\) It is possible, however, that Furness may be only the "fore ness," and Foudry the "isle of fowls." There is also a Furness on the Belgian coast.

\(^3\) To this root we may trace many idiomatic English words. A chapman is an itinerant seller: chap was originally an abbreviated form of chapman. Cheap, an abbreviation of "good cheap," answers to the French bon marché; while good cheap still survives in the phrase dog cheap, where the letters d and g have been interchanged according to a well-known phonetic law. The original sense of the root is that of bargaining—the ancient method of making a purchase—which is preserved in the word to chaffer. To chop horses is to sell them. A horse couper is one who deals in horses. To chop and change is to sell and barter. To swop and to swab are probably phonetic variations of to chop. Thus we say the wind chops, i.e.
early seats of commercial activity. A *chipping* was the old English term for a market-place; thus Wicliffe translates Luke vii. 32, "They ben like children sitting in chepinge and spekinge togidre." Hence we see that CHIPPING NORTON, CHIPPING CAMDEN, CHIPPING SODBURY, CHIPPING ONGAR, CHIPPING BARNET, CHEPING HILL on the south side of the church at Witham, CHEPSTOW, and CHIPPINGHAM, are ancient market-towns—once of much greater relative commercial importance than they are at present. CHEAPSIDE and EASTCHEAP were the old market-places of London. In Norse names the form *cope* takes the place of the Anglo-Saxon *cap*. COPENHAGEN, anciently Kiobmaens havn, is equivalent to Chapmen's Haven. Hence also we derive the names of JØNKØPING, LIDCØPING, NYKØPING, and NORRKØPING. In like manner we infer from the name of the COPELAND Islands near Belfast, that here were the storehouses of the goods brought by Norwegian traders. COPMANSTHORPE, near York, would be equivalent to the German Kaufmansdorf, the merchants' village; and the form of the word shows us that here the Danish traders resided, just as those of Saxon blood dwelt together at CHAPMANS LADE. KIEL and KIELERFJORD take their names from the Danish *keol*, a ship. The name of the Hanse towns seems to be from *hansel*, a contract, or *hanse*, a company or association. AMPURIAS in Spain retains, nearly unchanged, the name of the Hellenic settlement of Emporia. Some of the local centres of Anglo-Saxon trade are denoted by *staple*, a word which has undergone some changes in meaning. It now signifies the established merchandise of a place;—thus we should say lace is the staple of Nottingham. But the term was formerly applied to the place rather than to the merchandise, and our forefathers would have said Nottingham is the staple of lace. In local names—as DUNSTABLE, BARNSTAPLE, and ETAPLES in France—this word staple denotes a place where merchants were wont to store their goods.

When the English word *market* takes the place of the Anglo-Saxon *chipping*, or *staple*, as in the case of stow changes. The ultimate root is the Sanskrit *kupa*, the beam of a balance. Compare the old Slavonic *kupiti*, to buy, the Gothic *kaupon*, the Latin *caupo*, and the Greek *καπηλός*. 
MARKET, MARKET BOSWORTH, OR WICKHAM MARKET, we may fairly conclude that the commercial importance of the town in question dates from a more recent period.¹

¹ On this subject see Lyell, Principles of Geology; Chambers, Ancient Sea Margins; Maury, Histoire des Grandes Forêts de la Gaule; Marsh, Man and Nature; Ellis, Introduction to Domesday; Piderit, Ortsnamen in Niederhessen; Leo, Rectitudines Singularum Personarum.
CHAPTER XV.

CHANGES AND ERRORS.

The words of a nation’s speech are continually clipped and worn down by constant currency, until, like ancient coins, the legend which they bore at first becomes effaced. Many words whose paternity is nevertheless indisputable do not retain a single letter, sometimes not even a single vocable, of the ancestral form, and exhibit still less resemblance to collateral descendants from the parent stock. Who would imagine, for instance, that the French word *larme* is the same as the English *tear*; that the French *jour* is a lineal descendant of the Latin *dies*; or that *jour* and the two syllables of Tuesday are all descended from the same original Aryan root?

In the case of local names the raw materials of language do not lend themselves with the same facility to the processes of decomposition and reconstruction, and many names have for thousands of years remained unchanged, and sometimes linger round the now deserted sites of the places to which they refer. The names of four of the oldest cities of

---

1 *Dies—diurnum tempus—giorno—jour. Aujourd’hui contains the root dies twice, the *hui* being a corruption of *hodie* = hoc die.*
the world—Hebron, Gaza, Sidon, and Hamath—are still pronounced by the inhabitants in exactly the same manner as was the case thirty, or perhaps forty centuries ago, defying often-times the persistent attempts of rulers to substitute some other name. During the three hundred years of the Greek rule, an attempt was made by the conquerors to change the name of Hamath to Epiphania, but the ancient appellation lingered on the lips of the surrounding tribes, and has now resumed its sway, while the Greek name has been utterly forgotten. The name of Accho, which we find in the Old Testament, was superseded for some time by the Greek name of Ptolemais. This is now forgotten, and the place goes by the name of Akka. The Greeks attempted to impose their name of Nicopolis on the town of Emmaus, but in vain; for the modern name, Amwâs, still asserts the vitality of the ancient designation. We read, in the Book of Chronicles, that Solomon built Tadmor in the wilderness. The Romans attempted to impose on it the name of Adrianopolis, but this appellation has utterly perished, and the Bedouin still give the ancient name of Tadmor to the desolate forest of erect and prostrate columns which marks the site of the city of the palms. Palmyra is the Italian translation of the enchorial name of Tadmor, and is known only in the West. Tenedos and Argos still bear the names which they bore in the time of Homer. Most of the islands of the Grecian archipelago, and many of the neighbouring cities, retain their ancient names with little variation. Delos is now Dili, Paros is Paro, Scyros is Skyro, Naxos is Naxia, Patmos is Patimo, Samos is Samo, Thasos is Thaso, Sardis is Sart, Sparta is Sparti, Arbela is Arbil, Tyre or Tzur is sûr, Nazareth is Nazirah, Joppa is Yafo, Gaza is Ghuzzeh. Several of the Etruscan cities are called by the same names which they bore at the first dawn of Italian civilization. Thus the names of Saturnia and Populonia are unaltered. Cortona is now Cortono, Volaterrâ is Volaterra, Sena is Sienna, Pisæ is Pisa, and Perusia is Perugia.

But we need not go to the East for instances of the persistency with which names adhere to the soil. The name of London is now, in all probability, pronounced exactly as it was at the time when Cæsar landed on the coast of Kent.
The Romans attempted to change the name, but in vain. It mattered little what the city on the Thames was called in the edicts of prefects and proconsuls. The old Celtic name continued in common usage, and has been transmitted in turn to Saxons, Normans, and Englishmen. It is curious to listen to Ammianus Marcellinus speaking of the name of London as a thing of the past,—an old name which had gone quite out of use, and given place to the grand Roman name “Augusta.”

In like manner the ancient Indian name of HAITI has replaced the appellation of ST. DOMINGO, which the Spanish conquerors attempted to impose upon the island. But though so many names remain substantially unchanged in spite of efforts to supplant them, yet, as the successive waves of population have flowed on, many influences have been set at work which have sometimes produced material modifications, and it often requires the utmost care, and no inconsiderable research, to detect the original form and signification of very familiar names, and to extract the information which they are able to afford.

These modifying influences are of two kinds. The first is simply phonetic. A conquering nation finds it difficult to pronounce certain vocables which enter into the names used by the conquered people, and changes consequently arise which bring the ancient names into harmony with the phonetic laws of the language spoken by the conquerors. Many illustrations of this process may be found in Domesday. The “inquisitors” seem to have been slow to catch the pronunciation of the Saxon names, and were, moreover, ignorant of their etymologies, and we meet consequently with many ludicrous transformations. The name of LINCOLN, for example, which is a hybrid of Celtic and Latin, appears in the Ravenna Geographer in the form Lindum Colonia, and in Beda as Lindocolina. The enchorial name must have been very nearly what it is now. This, however, the Norman conquerors were unable to pronounce, and changed the name into Nincol or

Nicole. The name of Shrewsbury is an English corruption of the Anglo-Saxon Scrobbes-byrig or Shrubborough. The Normans, however, corrupted Scrobesbury into Sloppesbury, whence the modern name of Salop is derived. So also the Roman Sorbiodunum was contracted into the English Sarum, and then, as in the case of Salop, the Normans changed the r into an l, and have thus given us the form Salisbury.

In the Arabic chronicles of Spain we meet with many curious transformations of familiar names, such, for instance, as that of the Visigoths into the Bishtolkat. So also the Indian names Misachibee and Tlaltelolco have been corrupted into Mississippi and Guadalupe. Mr. Motley gives an amusing instance from the archives of Simancas. A despatch of the ambassador Mendoja stated that Queen Elizabeth was residing at the palace of St. James's. Philip II., according to his custom, has scrawled on the margin of this despatch, "There is a park between it and the palace which is called Huytal, but why it is called Huytal I am sure I don't know." Whitehall seems to have presented an insurmountable etymological difficulty to the "spider" of the Escorial.

Among unlettered nations phonetic changes of this kind are especially likely to arise. The word Yankee is probably an Indian corruption of either Anglos or English. The Chinese call an Englishman Yingkwoh, the Bengalee calls him Ingrey, and corrupts the words champagne and Smith into the forms simkin and Ismit. At Fort Vancouver, the medium of intercourse a few years ago was a curious Lingua Franca, composed of Canadian-French, English, Iroquois, Cree, Hawaiian, and Chinese. The word for rum was lum, for money tula, a corruption of dollar, and an Englishman went by the name of a Kintshosh, a corruption of King George. An American was called Boston, and the ordinary salutation was Clakhohahyah, which is explained by the fact that the Indians, frequently hearing a trader named Clark, long resident in the Fort, addressed by his companions in the village, "Clark, how are you?" imagined that this sentence was the correct English form of salutation. The Kaffirs of Natal call Harry Hali,
and Mary Mali. The Egbas have turned Thompson into Tamahana, and Philip into Piripi. The Maoris make sad havoc of Biblical names; they have transformed Genesis into Keneki, Exodus into Ekorahi, Jordan into Horamo, and Philemon into Pirimona. Sailors are especially given to such innovations. Jos-house, for instance, the name applied to the Buddhist temples in China, has been formed by English sailors out of the Portuguese word dnos, god. The sailors’ transformations of H.M.S. Bellerophon into the Billy Ruffian, of the Andromache into the Andrew Mackay, of the Aeolus into the Alehouse, of the Courageux into the Currant Juice, and of the steamer Hirondelle into the Iron Devil, belong to another class of changes, which we shall presently consider.

Anglo-Saxon suffixes of nearly similar sound sometimes come to be interchanged. This has very frequently taken place in the case of stone and ton. Thus Brigges-stan has been transmuted into Brixton, and Brihtelmes-stan into Brighthelmstone, Brighthampton, and Brighton. The change from don to ton is also common, Seccandun and Beamdun, which we find in the Saxon Chronicle, are now Seckington and Bampton. The suffix hithe, a haven, is changed into ey, an island, in the case of Stepney, formerly Stebenhithe, and into head, in the case of Maidenhead, formerly Maydenhithe. In Carisbrook, which was anciently Wihtgara-byrig, we have a change from burgh to brook. The suffix in the name Durham is properly not the Saxon ham, but the Norse holm; and Dunelm—the signature of the bishop—reminds us also that the Celtic prefix is Dun, a hill fort, and not Dur, water. In the Saxon Chronicle the name is correctly written Dunholm.

Many of these changes seem to be simply phonetic, among which we may reckon Gravesham into Gravesend, Edgeworth into Edgware, Ebbsham into Epsom, Swanwick into Swanage, and Badecanwylla or Bathwell into Bakewell. The great tendency is to contraction: “letters, like soldiers,” as Horne Tooke puts it, “being very apt to desert and drop off in a long march.” In Switzerland Inghofen is generally contracted into ikon, as Benninghofen into Bennikon. We find Botolph’s ton contracted into Bo’ston, Agmondesham into Amersham, and Eurewic into York. In London St. Olaf’s Street has been
changed into **TOOLEY** Street, and in Dublin into **TULLOCH** Street. St. Mary's Hall, Oxford, has been transformed into Skimmery Hall, and this has been abbreviated into the disrespectful appellation **skim**. St. Bridget is turned into St. Bride, St. Benedict into St. Bennet, St. Etheldreda into St. Awdrey, St. Egidius into St. Giles. Territorial surnames show changes quite as startling. St. Denys has been corrupted into Sydney, St. Maur into Seymour, St. Paul into Semple, Sevenoaks into Snooks, and St. John and St. Leger are pronounced Sinjun and Sillinger. This tendency to contraction is often to be detected in the pronunciation of names of which the more lengthened form is retained in writing. Thus **CIRENCESTER** is pronounced Cisester; **GLOUCESTER**; **WORCESTER**; **BARRIE**; **BARFREESTONE**; **TROTTERSCLIFFE**; Trosley. In America, on the other hand, owing to the universal prevalence of reading, the tendency is to pronounce words exactly as they are spelt, and **WORCESTER** is pronounced Wor-ces-ter, and **ILLINOIS** is called Illinoys. In Samuel Rogers' youth everyone said Lunnon; we have now returned to Lundun, and may perhaps ultimately get back to London.

In endeavouring to recover the original forms of names, it becomes important to discover the phonetic tendencies which prevailed among different nations. This is not the place to exhibit or discuss the laws of phonetic change which have been detected; all that can here be attempted is to illustrate

1 Now pulled down. It was standing in the sixteenth century.
2 "Grimm's law," as it is called, enables us to identify cognate words in the Teutonic and Romance languages. It is—

</table>
them by a few characteristic instances. Thus Eburovices has been changed into Evreux; Vesontio into Besançon; Vinovium into Bincheater; Bononia into Boulogne; Chatti into Hesse; Aquitania into Guienne; Olisippo into Lisbon; Agrigentum into Girgenti; Aletium into Lecci; Aquae into Aix. In French names a final n or s is often added, as in the change of Dibio to Dijon; Matesco to Maçon; Brigantio to Briançon; Massilia to Marseilles; Londinium to Londres.

The tendency among the German nations is to develop the sibilants and gutturals; among the Romance nations to suppress these and develop the mutes and liquids. Thus, in the name of the river Atesis, how harsh is the German name—the ETSCH; how soft and harmonious the Italian development of the same word—the ADIGE. Again we may compare the German LÜTTICH with the French LIÈGE, or we may contrast the German change of Confluentes into COBLENTZ with the soft effect produced even in cases when the Italians have introduced sibilants, as in the change of Florentia into FIRENZE, or Placentia into PIACENZA.

But the best illustration of these phonetic tendencies will be to enumerate a few cases where the same root has been variously modified by different nations. Let us take the Latin word forum. The Forum Julii, in Southern France, has become

The changes from the Latin to the modern Romance languages are more simple. The chief correspondences are—

PHONETIC CHANGES.

PRÊJUS; and, in Northern Italy, the same name has been changed to FRIULI. In the Emilia we find FORLI (Forum Livii), FOSSOMBRONE (Forum Sempronii), FERRARA (Forum Allieni), and FORNOVO (Forum Novum). In Central Italy we have FORCASSI (Forum Cassii), FIORA (Forum Aurelii), FORFIAMMA (Forum Flaminii), and FOROLO (Forum Popili). With these compare the German name KLÅGENFURT (Claudii forum), the Dutch VOORBOURG (Forum Hadriani), the French FEURS (Forum Segusianorum), and the Sardinian FORDONGIANUS (Forum Trajani).

Or let us take the changes effected in the Greek word πόλις, a city. Neapolis, in Italy, has become NAPOLI (Naples), in the Morea it has become NAUPLIA; Neapolis, near Cannes, is now NAPOULE; Neapolis, near Carthage, is NABEL, and Neapolis, in Syria, is NÂBULUS or NÂBLUS. HEERAPFEL, near Saarbrücken, is a corruption of the Roman name Hierapolis. TRIPOLI is little changed; Amphipolis is now EMBOLI, Callipolis is GAL-LIPOLI, Antipolis is ANTIBES, and Gratianopolis is GRENOBLE. STAMBOL, or ISTAMBOL, the modern name of Byzantium, is not, as might be imagined, a corruption of Constantinopolis, but of ἐκ τῶν πόλιων, a phrase analogous to that which we use when we speak of a journey to London as going "to town." In like manner STANKO, the modern name of the island of Cos, is a corruption of ἐκ τῶν ἴσταντος. ¹

We find the word Trajectus in ATRECHT or ARRAS (Atrebatum Trajectus), MAESTRECHT (Mosæ Trajectus), and UTRECHT (Ultra Trajectum).

The Romanized Celtic suffix acum, which has the force either of a possessive or a patronymic, is changed into ay in France and ach in Germany, while in Brittany and Cornwall the original form is ordinarily retained. ² Thus Cortoriacum is now COURTRAY, Camaracum is CAMBRAY, Bagacum is BAVAY.

¹ In Spain the Arabic article Al is often incorporated into the name. LUXOR, one of the four villages which stand on the site of ancient Thebes, is a contraction of El Eksor, the palaces. We have occasionally an incorporated article in English names. Thus THAXTED is probably The Axted and THISTLEWORTH The Istle-worth.

² E.g. Bourbriac, Loudeac, and Gourarec in Brittany, and Bradock, Bocconnoc, Isnioc, Ladock, Phillack, and Polbathick in Cornwall.
and Tournacum is Tournay. Antunacum is now Andernach, Olimacum is Lymbach, Vallacum is Wilnepach, and Magontiacum is Mainz.

The manner in which personal names have entered into the names of places has been referred to in a previous chapter. A few instances may be here again enumerated as affording admirable illustrations of diverse phonetic tendencies. Thus the name of Augustus is found in the Spanish Zaragozza (Caesarea Augusta), and Badajoz (Pax Augusta); in the Italian Aosta (Augusta); in the French Aoust (Augusta), Auch (Augusta), and Autun (Augustodunum); in the German Augsburg (Augusta), and Augst (Augusta); and the English Auster passage (Trajectus Augusti). We find the word Julius or Julia in Lillebonne (Julia Bona), in Loudon (Juliodunum), in Beja in Portugal (Pax Julia), in Jülich or Julioys (Juliacum), in Zuglio (Julium), in Ittucci (Victus Julius), in Truxillo (Castra Julia), and in Friuli and Frejus (Forum Julii); and the name of Constantius or Constantinus is found in Conz, Coutances, Côtantin, Constantz, and Constantineople.

The changes that have hitherto been discussed may be considered as natural phonetic changes—changes bringing combinations of letters from one language into harmony with the phonetic laws of another.

We have now to consider a class of corruptions which have arisen from a totally different cause. Men have ever felt a natural desire to assign a plausible meaning to names—to make them, in fact, no longer sounds, but words. How few children, conning the atlas, do not connect some fanciful speculations with such names as the Calf of Man, or Ireland's Eye; they suppose that Jutland is the land which "juts out," instead of being the land of the Jutes; they suppose that Cape Horn has received its name not, as is the fact, from the birthplace of its discoverer, but because it is the extreme southern horn of the American continent; and names like the Orange River, or the Red Sea, are, unhesitatingly, supposed to denote the colour of the waters, instead of being, the one a reminiscence of the extension of the Dutch empire under the house of Orange, and the other a translation of the Sea of Edom.1

1 Similar misconceptions are Blackheath (bleak heath); the Isle of
This instinctive causativeness of the human mind, this perpetual endeavour to find a reason or a plausible explanation for everything, has corrupted many of the words which we have in daily use, and a large allowance for this source of error must be made when we are investigating the original forms of ancient names. No cause has been more fruitful in producing corruptions than popular attempts to explain from the vernacular, and to bring into harmony with a supposed etymology names whose real explanation is to be sought in some language known only to the learned. Names, significant in the vernacular, are constructed out of the ruins of the ancient unintelligible names, just as we find the modern villages of Mesopotamia built of bricks stamped with the cuneiform legend of Nebuchadnezzar.

Teutonic nations, for instance, inhabiting a country covered with ancient Celtic names, have unconsciously endeavoured to twist those names into a form in which they would be susceptible of explanations from Teutonic sources. The instances are innumerable. The Celtic words alt maen mean high rock. In the Lake District this name has been transformed into the

Wight, see p. 208; Trinidad, p. 10; Gateshead, p. 169, supra. FLORIDA is not the flowery land, but the land discovered on Easter Day, (Pascua florida), p. 10. The FINSTER-AAR-HORN is not, as guidebooks tell us, the peak of the Black Eagle, but the peak which gives rise to the Glacier of the black Aar.

1 We may enumerate the well-known instances of buffetier corrupted into beefeater, lustrino into lutestring, asparagus into sparrow-grass, court-cards into shuttle-cards, mahlerstock into maulstick, écrevisse into crayfish, dormeuse into dormouse, dent de lion into dandy-lion, quelques choses into kickshaws, contre danse into country dance, ver de gris into verdigrease, weissager into wiseacre, and hausenblase or sturgeon's bladder into isinglass. A groom used to call Othello and Desdemona—two horses under his charge—by the names of Old Fellow and Thursday Morning. The natives called Miss Rogers (authoress of "Domestic Life in Palestine") by the name of namjus, "the lily," as the nearest approximation to her name which they were able to pronounce. Ibrahim Pacha, during his visit to England, was known to the mob as Abraham Parker.

2 Erroneous etymologies are unfortunately by no means confined to the unlearned. Witness Baxter's derivation of KIRKCUDBRIGHT (i.e. Church of St. Cuthbert). It is, he says, forsan, Caer giu aber rit, i.e. Arx trajectus fluminei Æstuarei!
OLD MAN of Coniston. In the Orkneys a conspicuous pyramid of rock, 1,500 feet in height, is called the OLD MAN of Hoy; and two rocks on the Cornish coast go by the name of the OLD MAN and his MAN. The DEAD MAN, another Cornish headland, is an Anglicization of the Celtic *dod maen.* The tourist searches in vain for mines at MINEHEAD; the name, as we learn from Domesday, being a corruption of Maen-hafod, the booth on the rock. Welli, or wheal, which occurs so often in the mining-share list, does not denote machinery for raising ore, but is a corruption of the Cornish word *huel,* a tin mine. Thus BROWN WILLY, a Cornish ridge, some 1,370 feet in height, is a corruption of *Bryn Huel,* the tin-mine ridge. Abermaw, the mouth of the Maw, is commonly called BARMOUTH; Kinedar has been changed into KING EDWARD; Dun-y-coed, a “wooded hill” in Devonshire, is now called the DUNAGOAT; and EASTBOURNE was, no doubt, the *eas-bourne,* or “water-brook;” the *t* having crept in from a desire to make the Celtic prefix significant in English. Similar transformations of Celtic and Slavonic names are to be found on the Continent. In Switzerland the Celtic Vitodurum, the “white water,” has been Germanized into WINTERTHUR; Noviomagus is now NIJMWEGEN; Alcmana is ALTENHÜL; and the FREUDENBACH, or joyful brook, is, probably, a corruption of the Celtic *ffrydan,* a stream. The Slavonic Potsdupimi has become POTSDAM, Melraz is now MÜLLROSE, and Dubrawice DIMMERWITZ.

Anglo-Saxon and Norse names have not escaped similar metamorphoses. The name of MAIDENHEAD has given rise to the myth that here was buried the head of one of the eleven thousand virgins of Cologne, but the ancient form of the name shows that it was either the “timber wharf” or the “midway wharf”

1 The Cologne legend of St. Ursula and her eleven thousand virgins seems to have arisen from the name of “St. Undecemilla, virgin martyr.” A trifling clerical alteration in the calendar converted this name into the form “Undecem millia Virg. Mart.” Upon this foundation the old Aryan myth of the maiden moon, with her myriad attendant stars, seems to have been grafted. The bones of the eleven thousand, which are reverently shown to the pious pilgrim, have been pronounced by Professor Owen to comprise osseous remains of all quadrupeds indigenous to the district. Again, the name of St. Bernice was Latinized into St. Veronica, and then the well-known legend arose from an assumed mongrel etymology, *vera icon.*
between Marlow and Windsor. So MAIDSTONE and MAGDEBURG are not the towns of maids, but the “town on the Medway,” and the “town on the plain.” HUNGERFORD, on the border between the Saxons and the Angles, was anciently Ingleford, or the ford of the Angles. 1 FITFUL HEAD, in Shetland, familiar to all readers of the Waverley Novels as the abode of Norna in ‘The Pirate,’ has received its present not inappropriate name, by reason of a misconception of the original Scandinavian name Hvit-fell, the white hill; CAPE WRATH, beaten, it is true, by wrathful storms, was originally Cape Hvarf, a Norse name, indicating a point where the land trends in a new direction; and WATERFORD in Ireland is a corruption of the Norse Vedrafjordr, the “firth of rams” (wethers). In the Lake District we also find some curious transformations of Norse names. SILLY WREAY is the happy nook, CUNNING GARTH is the King’s Yard, CANDY SLACK is the bowl-shaped hollow.

As might have been expected, French and Norman names in England have been peculiarly liable to suffer from these causes. Château Vert, in Oxfordshire, has been converted into SHOT-OVER Hill; Beau chef into BEACHY Head; and Burgh Walter, the castle of Walter of Douay, who came over with the Conqueror, now appears in the form of BRIDGEWATER. Beau lieu in Monmouthshire, Grand pont, the great bridge over the Fal in Cornwall, and Bon gué, or the good ford, in Suffolk, have been Saxonized into BEWLEY WOODS, GRAMPOUND, and BUNGAY. Leighton Beau-désert has been changed into LEIGHTON BUZZARD; and the brazen eagle which forms the lectern in the parish church is gravely exhibited by the sexton to passing strangers as the original buzzard from which the town may be supposed to derive its name. The French colony of Beauregard, in Brandenburg, has been Germanized into BURENGAREN or Bauerngarten (“peasants’ garden.”)

In Canada, where an English-speaking population is encroaching on the old French settlers, the same process of verbal translation is going on. Les Chêneaux, “the channels,” on the river Ottawa, are now the snows. So Les Chats and

1 Inglefield, in the immediate neighbourhood, has retained the ancient form.
**Les Joachims** on the same river are respectively becoming the **SHAWS** and the **SWASHINGS**, while a mountain near the head of the Bay of Fundy, called the **Chapeau Dieu**, from the cap of cloud which often overhangs it, is now known as the **SHEPODY Mountain**. The river Quah-Tah-Wah-Am-Quah-Duavic in New Brunswick, probably the most breakjaw compound in the Gazetteer, has had its name justifiably abbreviated into the Petamkediac, which has been further transformed by the lumberers and hunters into the **TOM KEDGWICK**.

**Anse des Cousins**, the “Bay of Mosquitoes,” has been turned by English sailors into **NANCY COUSINS Bay**; they have changed Livorno into **LEG-HORN**; and the nautical mind has canonized a new saint, unknown even to the Bollandists, by the change of Setubal into **ST. UBIUS**. **So Hagenes**, the Norse name of one of the Scilly Isles, has become **ST. AGNES**. Soracte, the mountain whose snowy summit is sung by Horace, has been added to the list of saints by the Italian peasantry, and receives their prayers under the name of **ST. ORESTE**; and in like manner **ST. IGNY** has been evolved by French peasants out of the Celtic name Sentiniacum. The name and legend of **ST. GOAR**, who is said to have dwelt in a cavern on the Rhine, where the river furiously eddies round the Lurlei rock, is supposed by certain sceptics to have originated in a corruption of the German word *gewür*, a whirlpool. In this instance it is not improbable that the hagiologists may be right and the philologists wrong. The name of a well-known saint is sometimes substituted for one less familiar. Thus **St. Aldhelm’s Head**, in Dorset, has become **ST. ALBAN’S HEAD**. Occasionally the name of the saint apparently disappears, submerged beneath some obtrusively tempting etymology, as in the case of **St. Aidan’s Borough**, which has become **MARLBOROUGH**.

The Hebrew name JERUSALEM was reproduced under the form **Hierosolyma**, the holy city of Solomon, owing to a mistaken derivation from the Greek *ἰερός*. A mountain on the eastern coast of Africa, opposite Aden, received the Arabic name of **GEBEL FIEL**, “the elephant mountain,” from a remarkable resemblance in the outline to the back of an elephant. From the resemblance of the sound the name was corrupted in the Periplus into Mons Felix.
Many instances may be cited of the manner in which legends are prone to gather round these altered names. The citadel of Carthage was called Bozra, a Phœnician word meaning an acropolis. The Greeks connected this with βωρσα, an ox-hide, and then, in harmony with the popular notions of Tyrian acuteness, an explanatory legend was concocted, which told how the traders, who had received permission to possess as much land as an ox-hide would cover, cut the skin into narrow strips, with which they encompassed the spot on which the Carthaginian fortress was erected. We find the same legend repeated in the traditions of other countries. The name of Thong Castle, near Sittingbourne, is derived from the Norse word tunga, a tongue of land, which we find in the Kyle of Tongue in Sutherlandshire. This name has given rise to the tradition, that Dido’s device was here repeated by Hengist and Horsa. The same story is told of Ivar, son of Regnar Lodbrok, in order to account for the name of Thong Castor, near Grimsby; and the legend also finds a home in Thuringia and in Russia.

The legend of the victory gained by Guy of Warwick, the Anglian champion, over the dun cow, most probably originated in a misunderstood tradition of his conquest of the Dena gau, or Danish settlement in the neighbourhood of Warwick. The name of Antwerp denotes, no doubt, the town which sprang up “at the wharf.” But the word Antwerpen approximates closely in sound to the Flemish handt werpen, hand throwing. Hence arose the legend of the giant who cut off the hands of those who passed his castle without paying him black mail, and threw them into the Scheldt, till at length he was slain by Brabo, the eponymus of Brabant.

The legend of the wicked Bishop Hatto is well known. It has been reproduced by Southey in a popular ballad, and it is annually retailed and discussed on the decks of the Rhine steamers. At a time of dearth he forestalled the corn from the poor, but was overtaken by a righteous Nemesis—having been devoured by the swarming rats, who scaled the walls of his fortress in the Rhine. The origin of this legend may be traced to a corruption of the name of the maut-thurm, or custom-house, into the mause-thurm, or Mouse-tower. The story of Roland the crusader, and his hapless love for the daughter of
the Lord of Drachenfels, is perhaps a still greater favourite with the fairer portion of the Rhine tourists. It is sad to have to reject the pathetic tale, but a stern criticism derives the name of ROLANDSECK from the rolling waves of the swift current at the bend of the river, which caused the place to be called the rollendes-ecke by the passing boatmen.

Near Grenoble is a celebrated tower, which now bears the name of LA TOUR SANS VENIN, the tower without poison. The peasantry firmly believe that no poisonous animal can exist in its neighbourhood. The superstition has arisen from a corruption of the original saint-name of San Verena into sans venin. The superstitions which avouch that birds fall dead in attempting to fly across the DEAD SEA and the LAKE AVERNUS (ἀορνος) have originated in similar etymological fancies.

In the Swedish language a woman is called quinna, or quinn, a word nearly allied to the obsolescent English word quean, as well as to the appellation of the highest lady in the land. The Finns moreover call themselves Qvöns, a Euskarian word, which is no way related to the Teutonic root. The misunderstood assertions of travellers as to this nation of Qvöns gave rise to the legend respecting a tribe of Northern Amazons ruled over by a woman. This myth must have come into existence even so early as the time of Tacitus, and we find it repeated by the geographer of Ravenna, by King Alfred, and by Adam of Bremen, who says, “Circa hæc litora Baltici maris ferunt esse Amazonas, quod nunc terra feminarum dicitur.” The last-named writer confuses all our notions of ethnological propriety by the assertion that there are Turks to be found in Finland. He has evidently been misled by the fact that Turku was the ancient enchorial synonym for the city of Abo.

PILATUS, the mountain which overhangs Lucerne, takes its name from the cap of cloud which frequently collects round this western outlier of the mountains of Uri. The name has originated the poetic myth of the banished Pilate, who, torn by remorse, is said to have haunted the rugged peak, and at last to have drowned himself in the lonely tarn near the summit of the mountain.

Drepanum, now TRAPANI, in Sicily, was so called from the sickle-shaped curve of the sea-shore—δρέπανον, a sickle. A
Greek legend, preserved by Pausanias, affirms that the name is a record of the fact that it was here Kronos threw away the sickle with which he had killed Uranos. And various myths have clustered round the river Lycus, as if it had been the Wolf river (λύκος, a wolf) instead of the White river (λευκός, white), as is no doubt the case, just as mythologic legends of the wolf-destroyer have collected around the name of the Lycian Apollo—the light-giver.

The names of countries and nations have often suffered in this way. The Celtic name Pehta, or Peicta, “the fighters,” has been Latinized into PICTI, the painted savages of the Scottish Lowlands. In the case of the Berbers, a people in Northern Africa, the e in the enchorial name seems to have been changed into an a, from a desire to establish a connexion with the Greek word βαρβαρος, and the name of BARBARY still remains on our maps to remind us of the error. A similar instance of the change of a single letter in accordance with a fancied etymology occurs in the case of the TATAR hordes, which, in the thirteenth century, burst forth from the Asiatic steppes. This terrible invasion was thought to be a fulfilment of the prediction of the opening of the bottomless pit, spoken of in the ninth chapter of the Revelation; and in order to bring the name into relation with Tartarus, the word Tatar was written, and still continues to be written, in the form Tatar.¹

Our English name of POLAND is likewise founded on a misconception. The country consists of vast plains, and from the Sclavonic polie, a plain, is derived the German plural form Polen or Pohlen, the men of the plains. In the old English writers we meet with the name Polayn, which is an admissible Anglicization of the German word. But the more recent change of Polayn into Poland is due to the desire of substituting an intelligible word for an unintelligible sound. The correct formation, following the analogous case of Switzerland, would be Polenland.

So the Arabic MOSLEMIN, already a plural form, has been corrupted into Mussulman, which is taken for a singular, and

¹ "Plebs Sathannæ detestanda Tartarorum . . . exeuntes ad instar daemonum solutorum a tartaro, ut bene Tartari, quasi tartarei nuncupentur."
from which have been formed those anomalous double plurals—Mussulmen and Mussulmans.

Negropont, the modern name of the island of Euboea, is a corruption due, probably, to Genoese and Venetian mariniers. The channel dividing the island from the mainland was anciently called Euripus, in allusion to the swiftness of the current; and at one time the land on either side projected so far as nearly to bridge the space between the two shores. The town built at this spot received the name of the channel, and was called Evripo, or Egripo, a name which has been converted by Italian sailors into Negripo, or Negropont, the "black bridge;" and, finally, the name of the town was extended to the whole island. So also the name of the Morea seems to have arisen from a transposition of the letters of Romea, the ancient name. The usual explanation is that the name Morea is due to the resemblance of the peninsula in shape to a mulberry leaf. This is too abstract an idea, and it argues a knowledge of geographical contour which would hardly be possessed by the mediæval sailors among whom the name arose.

Some of the most curious transformations which have been effected by popular attempts at etymologizing are those which have taken place in the names of the streets of London. Sheremoniers Lane was so called from being the dwelling-place of the artisans whose business it was to shear or cut bullion into shape, so as to be ready for the die. The name, as its origin became forgotten, passed into Sheremongers Lane, and after a while, from the vicinity of St. Paul's Cathedral, and an analogy with Amer. Corner, Ave Maria Lane, and Paternoster Row, it became Sermon Lane. After the loss of Calais and its dependencies, the artisans of Hames and Guynes, two small towns in the vicinity of Calais, took refuge in England. A locality in the east of London was assigned for their residence, and this naturally acquired the name of the old home from which they had been expelled, and was called Hames et Guynes. The vicinity of the place of execution on Tower Hill probably suggested the change of the name to hangman's gains. Among many similar changes we may enumerate that of the Convent of the Chartreuse into the chartered school now called the Charter
Guthurun Lane, which takes its name from some old Danish burgher, has become GUTTER Lane, the change having been, doubtless, suggested by the defective condition of the drainage. Grasschurch Street, where the old grass market was held, became—first, Gracious Street, and then GRACECHURCH Street. Knightengild Lane has become NIGHTINGALE Lane, Mart Lane is now changed to MARK Lane, Desmond Place to DEADMAN'S Place, Snore Hill to SNOW Hill, Candlewick Street to CANNON Street, Strype's Court to TRIPE Court, Leather Hall to LEADENHALL, Cloister Court, Blackfriars, to GLOSTER Court, Lomesbury to BLOOMSBURY, Stebenhithe to STEPNEY, St. Peter's-ey to BATTERSEA, St. Olaf's Street to TOOLEY Street, St. Osyth's Lane to SISE Lane, and TIBBS Row, in Cambridge, is a corruption of St. Ebbe's Row.  

In New York there is a square called GRAMMERCY SQUARE, a name popularly supposed to be of French origin. But the true etymology is indicated in one of the old Dutch maps, in which we find that the site is occupied by a pond called De Kromme Zee, the crooked lake.

In addition to the corruptions already considered, there are misnomers which are due to mistakes or misconceptions on the part of those by whom the names were originally bestowed. Prominent among these is one which has been already referred to, and which has bestowed the name of Amerigo Vespucci upon the continent which Columbus had discovered. The names of the WEST INDIES, and of the RED INDIANS of North America, are due to the sanguine supposition of Columbus that his daring enterprise had in truth been rewarded by the discovery of a new passage to the shores of India. The name of CANADA is due to a mistake of another kind. Canada is the  

1 The curious transformations in the signs of inns have often been commented upon. For instance, we have the change of the Belle Sauvage to the Bell and Savage; the Pige washael, or the Virgin's greeting, to the Pig and Whistle; the Boulogne Mouth, i.e. the mouth of Boulogne harbour, the scene of a naval victory, to the Bull and Mouth; the Bacchanals to the Bag o' Nails; the vintner's sign of the Swan with two Nicks to the Swan with two Necks; and the Three Gowts (sluices) in Lincoln, to the Three Goats. So, also, we have the change of the name of the German lustgarten, or tea-garden, called Philomelas lust, nightingales' delight, into Viellmann's lust, many men's delight.
enchorial word for “a village.” When the French explorers first sailed up the St. Lawrence, it would seem that, pointing to the land, they asked its name, while the natives thought they inquired the name given to the collected wigwams on the shore, and replied Canada.¹

A notable instance of a name arising from an erroneous ethnological guess occurs in the case of the GIPSIES. Their complexion, their language, and many of their customs, prove them to be a Turanian tribe which has wandered from the hill-country of India. When they appeared in Europe in the beginning of the fifteenth century, their dark complexion and their unknown language seem to have suggested the erroneous ethnological guess that they were Egyptians, a word which has been corrupted into GIPSIES. The name they give themselves, ROMANI, indicates their temporary sojourn in the “Roman” colony of Wallachia. Another curious piece of evidence that they entered Europe by the valley of the Danube, lies in the fact that they call all Germans SSASSO. This seems to shew that the first Teutonic people which became known to them must have been the Saxon colony in Transylvania. A belief that they came immediately from Eastern Europe is also implied by the French name BOHÉMIENS, unless, indeed, as has been suggested, the name Bohemian be derived from an old French word boem, a Saracen. The Danes and Swedes regard them as Tatars, the Dutch call them HEIDEN or Heathen, the Spaniards call them GITANOS (either Gentiles, or a corruption of the name Egyptians), and the Germans and Italians call them ZIGANAAR, ZIGEUNER, or ZINGARI, that is, the “wanderers.”²

¹ The etymology from the Indian words kan, mouth, and adä, a country, has also been suggested.
² On the subject of this chapter there are papers by Förstemann, in Kuhn’s Zeitschrift für Vergleichende Sprachforschung; by Whewell, in vol. v. of the Proceedings of the Philological Society; and by Wedgwood, in the Transactions of the Philological Society for 1855. See also the works of Archbishop Trench, Max Müller, Farrar, Pott, Wedgwood, Cornewall Lewis, and Mone.
CHAPTER XVI.

WORDS DERIVED FROM PLACES.

All local names were once words. This has been the text of the preceding chapters; we have hitherto been endeavouring to make these words—long dumb—once more to speak out their meaning, and declare the lessons which they have to teach. We now come to the converse proposition. Many words were once local names. We find these words in all stages of the process of metamorphosis—some unchanged—some so altered as to be scarcely recognisable. In fact, it is only by watching the process of transmutation in actual progress in the linguistic laboratory of Nature that we are able to trace the identity of some of the products, so strangely are they altered.
Let us take a few familiar instances. So short a time has elapsed since the introduction of French beans or Brussels' sprouts, that the names have undergone no phonetic changes—the information which they convey needs no interpreter. We may now proceed to an analogous case where the first stage in the transformation of names into words has already commenced. We have almost ceased to speak of Swede turnips, Ribstone pippins, Greengage plums, or Savoy cabbages, for the adjectives Swede, Ribstone, Greengage, and Savoy have already become substantives, and the farmer talks of his SWEDES, and the gardener of his RIBSTONES, his GREENGAGES, and his SAVOYS. The names serve to remind us that Ribstone pippins were first grown in the garden of Ribston Hall, in the West Riding, and that the Greengage plum was introduced by one Gage, belonging to the old Suffolk family of that name. In these instances the words themselves have as yet remained uncorrupted; but in the case of the cherries called MAYDUKES a further process of transformation has taken place. The word Mayduke is a corruption or Anglicization of the name Medoc, a district in the Gironde, from which these cherries were introduced. But the word CHERRY is itself a local name, still more disguised, since it has passed through the alembic of two or three languages instead of one. The English word Cherry, the German Kirsche, and the French Cerise, all come to us from the Greek, through the Latin, and inform us that this fruit was first introduced from Cerasus, now, probably, Kheresoun, a town on the Black Sea.

We shall find it instructive to examine in this manner the names of a few of our common plants and animals, with the double object of tracing historically the process by which words become disguised, and of showing the aid which etymology is able to render to the naturalist.

To begin with the PEACH. This word, like Cherry, has had an adventurous life, and has retained still less resemblance to its original form, the initial p alone remaining to remind us of the native country of the peach. The English word is derived immediately from the old French pesche. The s, which has been dropped in the English form, gives us a clue to the origin

1 Compare the Armenian geras, and the Persian carāsiyha.
of the word; and when we find that the Italian name is *pesca* or *persica*, the Spanish *persigo*, the Dutch *persikboom*, and the Latin *persicum*, we discover that the peach is a Persian fruit. The Nectareen comes also from the same region, but tells us its story in a different way, the name being a Persian word, meaning "the best" kind of peach. The Latin name of Apricots, *mala armeniaca*, refers them to a neighbouring district; while the fact that the word Apricot is an Arabic word, reveals the agency through which they reached the West.

The *chestnut* is often improperly spelt chesnut, as if it were the cheese-like nut. But the mute *t*, which could never have crept into the word, whatever may be the danger of its ultimate disappearance, is valuable as an indication of the true etymology, as well as of the country in which the tree was indigenous. The French *Châtaigne* or *Chastaigne*, and still more plainly the Italian *Castagna*, and the Dutch *Kastanie*, point us to Castanæa, in Thessaly, as its native place.

The London urchins, whose horticultural studies have been confined to Covent Garden, probably suppose that the *walnut* is a species of *Wallfruit*. The Anglo-Saxon form *wealh-hnut*, the Old Norse *val-hnot*, and the German *Wâlsche Nusz*, indicate that it is either the foreign nut, or the nut from Wâlschland or Italy. Though the former is, perhaps, the more probable etymology, yet we must remember that the walnut is pre-eminently the tree of Northern Italy, as will be acknowledged by all who have rested beneath the spreading shade of the gigantic walnut-trees of the Piedmontese valleys, or who have crossed the wide plains of Lombardy, where the country for miles and miles is one vast walnut orchard, with the vines swinging in graceful festoons from tree to tree.

The word *quince* preserves only a single letter of its original form. A passage in the "Romaunt of the Rose" shews an early form of the word, and also exhibits chestnut and cherry in a transitional stage of adoption from the French. Chaucer writes:—

"And many homely trees there were
That peaches, *coines*, and apples bere;
Medlers, plumes, peeres, *chestaines*,
Cherise, of which many one faine is,"
It is evident that the English word is a corruption of the French coing, which we may trace through the Italian cotochina to the Latin cotonium or cydonium malum, the apple of Cydon, a town in Crete.

The cherry, the peach, the quince, and the chestnut are very ancient denizens of Western Europe. Not so the damson, which was only imported a few centuries ago. If we write the word according to the older and more correct fashion—damascene—we are able at once to trace its identity with the Prunum Damascenum, or plum from Damascus. The damask rose came from the same city in the reign of Henry VII., and we learn how rapidly the culture of the beautiful flower must have extended from the fact, that in less than a century Shakespeare talks of the damask cheek of a rosy maiden, shewing that the name had already become an English word.

The science of etymological botany has its pitfalls, which must be avoided. The guelder rose, for instance, is not, as might be supposed, the rose from Guelderland, but the elder rose, as is shewn by the natural affinities of the plant, as well as by the ancient spelling of the name. An attempt to give a geographical significance to the name has probably led to the modification of the spelling. The same cause has undoubtedly been at work in corrupting the name of the girasole—the Italian turnsole or sunflower—into the Jerusalem artichoke, out of which some ingenious cook has concocted Palestine soup! The name of the Guernsey lily contains a somewhat curious history. The flower is a native of Japan, where it was discovered by Kæmpfer, the Dutch botanist and traveller. The ship which contained the specimens of the new plant was wrecked on the coast of Guernsey, and some of the bulbs having been washed ashore, they germinated and spread in the sandy soil. Thence they were sent over to England, in the middle of the seventeenth century, by Mr. Hatton, a botanist, and son of the Governor of Guernsey. The small dried grapes called currants were, in the last century, called Corinth grapes, or "corinths," Corinth being the chief port from which they were shipped. The currants of our gardens seem to have received their name from their superficial resemblance to the currants of commerce.
The shallot, a species of onion, comes to us from Ascalon, as will appear if we trace the name through the French form échalotte, and the Spanish escalona, to the Latin ascalonia. It is usually supposed that spinage derives its name from the spines on the seed, but it seems more likely that it is the olus Hispanicum, since the Arabs call it Hispanach, the Spanish plant. Blé Sarrasin, which is the French name of buckwheat, indicates its Eastern origin, and confirms the tradition that its English name is due to the fact that the seeds were brought home by an Eastern traveller concealed between the pages of a book. Coffee has been traced to the mountains of Caffa, south of Abyssinia, where the plant grows wild; and mocha, where it was first cultivated, still gives a name to the choicest growth. In like manner bohea, congou, hyson, kaisow, and souchong are geographical terms on a map of China. Jalap comes from Xalapa, or Jalapa, a province of Mexico. Another Mexican province, Choco, has given us the names of chocolate and cacao. The coco nut, however, has no botanical or etymological connexion with cacao. The Portuguese term for a bugbear is coco, and the word seems to have been applied to the palm nut on account of the appearance of a mask or face which is produced by the three holes at the extremity of the shell. The cacao nibs, which produce the beverage, are beans borne in the pods of a shrub (Theobroma cacao), which has no resemblance or affinity to the palm-tree (Cocos nucifera), which produces the coco nut, or to the coca (Erythroxylon coca), a herb whose leaves are chewed by the Peruvians, as a powerful stimulant-narcotic. The distinctive spelling of these three productions, cacao, coco, and coca, should be carefully observed. Cayenne, chilis, seville and china oranges, peruvian bark, and brazil nuts are examples of names that have remained undisguised by etymological changes. The brazil wood of commerce does not, however, as might have been thought, derive its name from the country; but, on the contrary, that vast empire was so called from the discovery on its shores of a dye wood, the Casalpinia crista, which grows profusely in the forests of Brazil, and which produced the Brazil colour, or colour of glowing coals. The word brazil is found in our literature as early as the reign of Edward I., long before the
discovery of Brazil. It comes from the French braise, or the Portuguese brasa, live coals. Hence the English braser, sometimes improperly written brasier, not a brazen vessel, but a vessel for containing live coals. The slopes of Sinai were formerly overgrown with the Seneh, or wild acacia-tree, a shaggy thorn-bush; and it is more probable that the plant takes its name from the mountain than the mountain from the plant. Caraways, Pliny tells us, are from Caria; squills possibly from Squillace, and myrrh from Smyrna (Greek μῦρον, myrrh). Rhubarb is a corruption of Rha barbarum, or Rha barbaricum (German Rabarbar, Italian Rabarbaro), the root from the savage banks of the river Rha, or Volga. Ammianus Marcellinus tells us: "Huic Rha vicinus est amnis, in cujus superciliis quaedam vegetabilis ejusdem nominis gignitur radix, proficiens ad usus multiplices medelarum." Dragonwort is a curiously corrupted name. It comes from Tarragona in Spain. The word tamarind is from the Arabic tamarhendi, which means the Indian date. Indigo is indicum, the Indian dye; and gamboge is from Cambodia. The lemon, in Portuguese limao, is said to take its name from Lima. Jenjibre, the Spanish form of the word ginger, looks as if the root had been imported from Zanzibar, while the Arabic form Zenjebel seems to point to the mountains of Zend, or Persia. It has been thought that sugar candy is from Candia; and this view is supported by the fact that kand is the Turkish word for sugar of every kind. The cypress tree comes from the island of Cyprus, and the spruce fir is the Prussian fir.

"There is an herbe," says an old voyager, "which is sowed apart by itselfe, and is called by the inhabitants Vppowoc; in the West Indies it hath diuers names according to the seuerall places and countreyes where it groweth and is used; the Spanyards generally call it tobacco. The leaues thereof being dried and brought into pouder, they use to take the fume or smoake thereof, by sucking it through pipes made of clay, into

---

1 In Moslem countries, owing probably to the prohibition of alcohol, an inordinate quantity of sugar is consumed. A very large number of the Arabic words now existing in the Spanish and Portuguese languages denote preparations of sugar.
their stomacke and head. . . . This Vppowoc is of so precious estimation amongst them (the Indians), that they think their gods are marvellously delighted therewith: whereupon sometime they make hallowed fires, and cast some of the pouder therein for a sacrifice." The general estimation in which the growth of Tobago was held has caused the name of this island to become the general designation of the "herbe." Laodicea, the mother of Seleucus Nicator, gave her name to a city on the Syrian coast, and the "herbe" shipped from this port goes by the name of Latakia tobacco—a name which exhibits a curious geographical juxtaposition. Another choice growth is called York River, a Virginian name derived from the Duke of York, afterwards James II. Cubas, Havana, Vevays, and Manillas are also among the "diuers names" derived from "the seuerall places and countreys where the herbe groweth."

The names of wines are, with few exceptions, derived from geographical sources. The Chian and the Samian came from islands of the Grecian archipelago. The Falernian, of which Horace was so fond, was the produce of a volcanic hill-side near Naples. Falernian has already been driven from the cellar to the school-room, and the vine disease threatens to do the same with Canary and Madeira. Cape comes from South Africa. Three of the old provinces of France give their names to Champagne, Burgundy, and Rousillon. There is a vineyard near Rheims called Sillery; Chablis is a town in northern Burgundy, not far from Auxerre, and Sauterne is a village near Bordeaux. Medoc is the name of the vast sandy plain which lies between the Gironde and the ocean. The town of

2 There is also a province of Yucatan called Tabaco. Adelung thinks that the word tobacco is not derived from either of these local names, but vice versa: the word may, perhaps, be derived from the Haitean tambaku, a pipe, or, as some have thought, the word may have been adopted from an Indian name of the plant.
3 Such as Tent, which is derived from the Spanish tinto, in allusion to its rich colour. The name of Claret is derived from its clearness. No Frenchman, however, speaks of, or drinks clairet. This is the mixture manufactured for the English market.
MANZANARES and the VAL DE PENAS, or valley of rocks, are both in the province of La Mancha. ASTI is a town near Marengo. TOKAY is situated in the north-east of Hungary.

Many of the wines of commerce, as BORDEAUX and LISBO, receive their names from the port of shipment rather than from the place of growth. So PORT is the wine exported from Oporto, and the wines of Sicily are shipped from MARSALA, an Arabic name which means “the Port of God,” and which reminds us of the almost forgotten story of the Mahometan conquests in Southern Europe. MALMSEY is a contraction of Malvasia, having been originally shipped from Napoli di Malvasia, a port in the Morea. MALAGA and XERES are also places of export rather than of production. The Spanish *x* being pronounced like the *ck* in German, the word sherris, on English lips, is a very fair approximation to the name of the town of Xeres, which, since Shakespeare’s time, has been the grand emporium of the Spanish wine trade. The sack or sherris sack, upon whose excellent “two-fold operation” Falstaff so feelingly dilates, is Xeres sec, or dry sherry as we should call it. The term sack was applied to all the dry wines of Canary, Xeres, and Malaga: thus we read of Canary sack, Malaga sack, Xeres sack.

It would be curious to trace the progress of the perversion whereby the wines which in the fifteenth century used to be correctly designated “wines of Rhin” have come to be called HOCKS. Hocheim, from which the name is derived, lies on the Main and not on the Rhein, and neither the excellence nor the abundance of the Hocheim vintage seems to afford adequate reason for the fact that the name has become a generic term for the whole of the Rhein wines. It may probably be due to special commercial interests connecting some London firm with Hocheim, for in no European language except English do these wines go by the name of hocks. It might seem that JOHANNISBERG, STEINBERG, NIERSTEIN, RUDESHEIM, ASSMANSHAUSEN, or some other of the venerable towns or smiling villages which delight the eye of the traveller, as he passes the romantic ruins and steep vineyards which fringe the broad rolling stream, might have asserted a better claim to bestow their names upon the delicate vintage of the Rhein, than an obscure village,
which stands upon another river, and which is by no means unsurpassed in the excellence or abundance of its growth. The volcanic slopes of all the river-banks in this district offer a congenial soil and site for the growth of the vine. LAUBENHEIM on the Nahe, LAHNSTEIN on the Lahn, and ZELTINGEN and PIESSPORT on the Moselle, compete with the more celebrated villages on the Rhein and the Main. The Germans have a saw which compares the qualities of their chief growths:

"Rhein-wein, fein wein;
Neckar-wein, lecker wein;
Franken-wein, tranken wein;
Mosel-wein, unnosel wein."

HUNGARY WATER is said to have been first distilled by Elizabeth, Queen of Hungary. CHARTREUSE is prepared from a recipe in the possession of the monks of the celebrated monastery ruled over by St. Bernard. CURAÇAO\(^1\) came originally from the island of that name in the Caribbean Sea. COGNAC is a town in the department of the Charente. HOLLANDS and SCHIEDAM, as their names import, came to us from the Dutch. Since GIN is a contraction of geneva, it might be supposed that it was originally distilled in the city of that name. The word geneva is, however, only an Anglicized form of the Dutch \(\textit{jenever}\);\(^2\) juniper, from the berries of which plant the peculiar flavour is derived. WHISKEY is a corruption of the Celtic word \(\textit{uisge}\), water, a root which, as we have seen, appears in the names of the Wisk, Esk, Usk, Exe, Thames, and other Celtic rivers. USQUEBAUGH is the "yellow water," from the Erse \(\textit{boy}\), yellow. GLENLIVAT is the name of a highland valley in Banffshire, famous for its stills. SPRUCE BEER is either Prussian beer, or beer tinctured with the sap of the spruce or Prussian fir. Colonel NEGUS has been immortalized by the beverage which he first concocted. The etymology of GROC is curious. Admiral Vernon, a sailor of the old school, used

---

\(^1\) Often wrongly spelt Curaçoa. Compare the analogous names Macao, Bilbao, and Callao.

\(^2\) Gin being originally a Dutch drink, the name is undoubtedly derived from the Dutch \(\textit{jenever}\), rather than from the French equivalent \(\textit{genièvre}\), as is usually alleged.
to wear a grogram coat,¹ and hence the seamen bestowed upon him the nickname of "Old Grog," which was afterwards transferred to the mixture of rum and water, which he was the first to introduce into the navy.

The names of animals, like those of plants, are able to supply us, in many cases, with information as to the countries from which they have been introduced, as well as with examples of the curious phonetic changes which the names of those countries have undergone.

The naturalization of the COCHIN CHINA fowl has been too recent to permit any of these changes to take place. The same is the case with DORKINGS and SPANISH FOWLs. The GUINEA FOWL came from the Guinea coast. The GUINEA-PIG is a native of Brazil, but it may probably have been originally brought to this country by some ship engaged in the Guinea trade. The CANARY was brought from the Canary Isles in the middle of the sixteenth century, and from the name of the bird we derive CANARY seed and the CANARY colour. BANTAMS came from the Dutch settlement of Bantam in Java. The PHEASANT is of much older introduction. The name is derived from the Latin *avis phasiana*—the Phasian bird, whence we conclude, with Pliny, that the bird was originally brought from the banks of the river Phasis, in Colchis. The EIDER duck takes its name from the river Eider in Holstein, whence, however, the bird has long disappeared. The TURKEY was so named by a mistake. It is an American fowl, but was popularly supposed to have come from the Levant. The German name, *Kalekuter*, would imply that it came from Calicut, and the French *Dinde*, a contraction of *poulet d’Inde*, appears to endorse the same error.

ERMINE is the fur of the animal of the same name; Chaucer calls it the Armine. By a parallel phonetic change, Ville Har douin calls the Arminians the Hermiones. Hence we may with great probability assign the animal to Armenia, and its scientific name, *Mus Ponticus*, points to the same region. The SABLE, like the Ermine, bears the corrupted name of a large country.

¹ The word Grogram is an Anglicization of the French *gros-grain*, coarse textured.
The English form affords no clue to the etymology, but we find that the word in Italian takes the form *Zibellino*, which appears to be a corruption of Sibelino or Siberino—the fur from Siberia. The *polecat* is from Poland. *Shamoy* leather is often erroneously spelt chamois, as if it were prepared from the hide of the Alpine antelope. But, like *Russia* or *Morocco*, the word shamoy has a geographical origin, and means the leather from Samland, a district on the Baltic.

Many of the breeds of domestic cattle are of such recent origin, that the names have as yet suffered no corruption. Thus the names of *Leicesters* and *Southdowns*, *Devons* and *Herefords*, as well as of *Angolas*, *Cashmeres*, *Shetlands* and *Newfoundlands*, are still in the second stage of word formation. In the third stage we may place the *Spaniel*, which is either the Spanish dog, or the dog from Hispaniola. The *Greyhound* is the Grecian dog (*canis graius*). *Puss* is an endearing corruption of Pers, the Persian cat. The meaning of the word *Barb* (German, *barbar*; Old French, *barbare*) is slowly changing; it was at first used strictly of a horse brought from Barbary, just as an *Arab* was a horse from Arabia. Of kindred blood to Barbs and Arabs is the Spanish horse called a *Jennet*, a name which may not improbably be derived from *Jaen*, the capital of one of the Moorish kingdoms in the Peninsula. Nor have we yet acknowledged all the obligations of our horse-breeders to the Arabian blood. One of the galleons of the Armada, which had succeeded in weathering Cape Wrath and the storm-beaten Hebrides, was lost on the coast of Galloway, and tradition avers that a Spanish stallion, rescued from the wreck, became the ancestor of the strong and serviceable breed of *Galloways*. A curious instance of change of application in a name occurs in the case of the strong Normand horses which were imported from Rouen. They were called *rouens* or *roans*—a word which has now come to denote the colour of the horse rather than the breed.

Collectors of insects often give topic names to rare or local species, such as the Camberwell beauty, the Kentish glory, the Bath white; and there are scores of similar names which might be added to the list. The venomous spider called the *Tarantula* takes its name from Taranto in Southern Italy.
The Cantharides of the druggist’s shop often go by the name of Spanish flies. Mosquitoes, however, do not take their name from the Musquito coast, the word being the diminutive of the Spanish word mosca, a fly. The word musket (Italian, moschetta) is from the same root.

The carp is in Latin cupra or cyprinus, the fish from Cyprus. Sardines are caught off the coast of Sardinia, but we should be wrong in supposing that the sardine stone or the sardonyx came to us from that island, for the true origin of these names is to be sought at Sardis in Asia Minor. The loadstone and the magnet are both local names. The loadstone is a corrupted¹ translation of Lydius lapis, the stone of Lydia. In the same region we must seek for the source of the name magnet, which is derived from Magnesia, a Lydian city. From Magnesia we also obtain the names of manganese, magnesia, and magnesian limestone. Copper is cuprum or æs cyprium, the brass of Cyprus. The Sanskrit name is nearly identical, which would indicate that copper first reached India from the West. The neighbouring island of Crete gave its name to the creta, a sort of pipeclay which the Romans used for seals, the knot with which the packet was tied being enveloped in a ball of clay, and the seal impressed upon it. From the Latin creta the English adjective cretaceous has been formed, and from the same root we get our crayons through the medium of the French craie. Tripoli powder is composed of the flinty skeletons of diatomaceæ, of which large beds exist near Tripoli. The turkey stone on which we whet our razors is derived from the same region, and possibly from the same quarries as the cos, to which the Romans gave the name of the island from which they were accustomed to procure it, unless, indeed, the island derived its name from the stone. In favour of this view it may be urged that the Sanskrit ço and the related Latin word acuo mean to sharpen. The turquoise is a sort of misnomer. It came from Nishapure in Persia, but being imported by the Turkey merchants was supposed to be a Turkish stone. Chalcedony came from Chalcedon, and alabaster from Alabastrum in

¹ The notion of a leading or guiding-stone seems to have influenced the present form of the word. Cf. the loadstar, or leading-star.
MINERALS.

Egypt, as we are told by Pliny, who also informs us that the topaz came from Topazos, an island in the Red Sea. Agates were first found in the bed of the Achates, a Sicilian river. In like manner the Gagates, a river of Lycia, gave its name to the black stone which the French call gagate, jayet, or jaet, a word which we have abbreviated into jet. The crystal called spa came originally from the Belgian watering-place whose name has been transferred to so many mineral springs, and the word chalybeate is itself indirectly derived from the name of the Chalubes, a tribe which inhabited the iron-producing district of Armenia. Seidlitz in Bohemia has given its name to the well-known effervescing draughts, and genuine seltzer water comes from Nieder Selters, near Mainz. On Epsom Common may still be discovered the forsaken, but once fashionable well, from whose waters epsom salts were first procured. Gypsum, when written in its ancient form egipsum, tells us that it came from Egypt. Plaster of Paris was procured in great abundance from the catacombs of Paris, and umber and sienna, as the names import, are earths from Northern Italy. Parian marble is from the isle of Paros, and the names of caen and bath stone have suffered no corruption. Syenite is the granite of Syene in Upper Egypt.

The technical terms used by geologists, such as devonian, silurian, and London Clay, are largely of local origin, and often inform us of the regions where certain deposits were first observed. Two of the newly-discovered metals take their names respectively from yttrium in Sweden and strontian in Argyleshire. Natron and nitre are found in the Egyptian province of Nitria, where natron lakes still exist, though it is fairly open to dispute whether the salt gave its name to the province, or, as Jerome asserts, the province performed the like office for the salt. Ammonia abounds likewise in the soil of the Libyan desert; and in the writings of Syenesius, bishop of Pentapolis, we have an account of the preparation of the sal ammoniacus by the priests of Jupiter Ammon, and its transmission to Egypt in baskets made of the leaves of palms.

A large number, we might almost say the greater number, of the fabrics which we wear, are called by names derived
from the places at which they were originally made. Political
and social revolutions, aided by the invention of the spinning
jenny, the power-loom, and the steam-engine, have, it is true,
transferred the great seats of manufacture from India, from the
Levant, from Holland, from Northern Italy, and from East
Anglia, to the neighbourhood of our English coal-fields, but
the fabrics retain the ancient names which still testify of the
places which saw the earliest developments of industrial
energy. The word shawl is the name of a valley in Afgan-
istan, but our cashmere shawls are now made at Paisley; our
Japannd ware comes from Birmingham, our china
from Staffordshire, our nankeen from Manchester, and we
even export our calico to Calicut, the very place from
whence, three hundred years ago, it used to come.

Names of this class resolve themselves, for the most part,
into three divisions, which indicate in a characteristic manner
the three chief centres of mediaeval industry.

The ingenuity and inventive skill of the Arabs gave the first
impulse to the industrial progress of the West. Thus sarcenet
(low Latin, saracenicum) was a silken fabric obtained from the
Saracens. Mouseline, which is the French form of the word
muslin, clearly refers us to Moussul, in the neighbourhood of
the eastern capital of the Caliphs. In Bagdad, the street
inhabited by the manufacturers of silken stuffs was called Atab,
and the fabrics woven by them were called Atabi. From a cor-
ruption of this word we probably derive the words taffety and
tabby. A tabby cat is so called because it has the wavy
markings of watered silk. The rich figured silk called damask
and the famous damascus swords were produced at the central
seat of the Moslem dominion, while toledo blades remind us
that the Arab conquerors carried their metallurgic skill with
them to the West. From another Moslem kingdom came
cipresse, the black “cobweb lawn” behind which Olivia, in
“Twelfth Night,” “hides her heart,” and which the pedlar Autol-
lycus, in the “Winter’s Tale,” carries in his pack. Gauze was
made at Gaza, as is indicated by gaze, the French, and gaza the
Spanish form of the name; and in the same way we are guided
by the Italian baldacchino in assigning baudekin, which we
read of in old authors, to Baldacca or New Bagdad, one of the
suburbs of Cairo. Baudekin originally meant a rich silken tissue embroidered with figures of birds, trees, and flowers, in gold and silver thread, but the word was subsequently used for any rich canopy, especially that over the altar, and pre-eminently the canopy over the high altar in St. Peter’s at Rome. Previous to the tenth century an important suburb of Cairo was Fostat, where flourished the manufacture of *fustian; fustagno*, the Italian name of the fabric, indicates this more clearly than the English disguise. Dimity is not, however, as has been asserted, the fabric from Damietta, but that woven with two threads (*δις* and *μετρος*), just as twill and drill are respectively made with two and three threads, as the names imply. *Mohair, or moire*, is a fabric of the Moors of Spain; and the same skilful race manufactured *jean* at Jaen. *Merino* is woven from the wool of the Merino sheep, a name which Southey has ingeniously derived from the emirs, or shepherd princes of Spain. The name of *moreen* may be due to the same source, though it is more probably derived from the dark colour. It may also be noted that *scarlet* is an Arabic word. From Cordova came *cordovan* or *cordwain*, a kind of leather prized by the *cordonniers* or *cordwainers* of the Middle Ages as highly as *morocco* is by the leather-workers of the present day. Truly the most elaborate history of the Arabs would fail to give us any such vivid sense of their industry and ingenuity as is conveyed by the curious fact, that the seats of their empire, whether in Europe, in Africa, or in Asia, have stamped their names indelibly on so many of the fabrics in our daily use. To the Arabs we also owe much of the early science of the West, as is shown by the words *chemistry, alchemy, alembic, borax, elixir, alkali, alcohol, azul, lapis lazuli, algebra, almanac, azimuth, zenith*, and *nadir*, which are all of Arabic origin. How feeble, too, would be our powers of calculation without the *arabic numerals*, and the Arabic system of decimal notation. It is also a very suggestive fact that almost every Spanish word connected with irrigation—some dozen in all—is of Arabic origin. Thus we have *alberca*, a tank; *asequía*, a canal; *azena*, a water-wheel; *aljibe*, a well. Many nautical terms used in Spain are also Arabic, such as *saetia*, a boat; the small three-masted vessel called a *xabéque; almadía*, a
raft; arsenal; and almirante, an admiral, which is a corruption of *emir-al-bahr*, commander at sea.

As the energies of the Moslem races decayed, the Flemings, in the twelfth century, began to take their place as the chief manufacturing people. When Leeds and Manchester were country villages, and Liverpool a hamlet, Flanders was supplying all Europe with textile fabrics. The evidence of this fact is interwoven into the texture of our English speech. We have seen that many silken and cotton fabrics come from the Arabs; the Flemings excelled in the manufactures of flax and wool. From Cambrai we have cambric, as is clear from the French form *cambray*, or *toile de Cambray*. Diaper, formerly written *d’ipre* or *d’Ypres*, was made at Ypres, one of the chief seats of the cloth manufacture, as we learn from Chaucer, who says of his wife of Bath:—

"Of cloth making she hadde swiche an haunt,
   She passed hem of Ipres and of Gaunt."

Another colony of clothworkers was settled on the river Toucques in Normandy. From the name of this river a whole family of words has been derived. In German the general name for cloth is *tuch*, and in Old English *tuck*. We read in Hakluyt a description of "Soliman, the great Turke himselfe," who had "upon his head a goodly white tucke, containing in length by estimation fifteene yards, which was ot silke and linnen wouen together, resembling something ot Calicut cloth." White trousers are made of duck, our beds are covered with ticking, and our children wear Tuckerk at their meals. A Tucker was originally a narrow band of linen cloth worn by ladies round the throat. Hence any narrow strip of cloth fastened on the dress was called a Tucker or Tuck, and when this mode of ornamentation was imitated by a fold in the fabric, the fold or plait itself received the same name. A weaver used to be called a tucker, and hence Tucker is still a common surname among us. In Somerset and in Cornwall there are villages called Tucking Mill, and Tucker Street in Bristol was that occupied by the weavers.¹

¹ I have left this paragraph as it stood in the first edition, though I am now far from certain as to the correctness of the etymology suggested. The very early use of the word *tuck* suggests some independent Teutonic root.
From the Walloons we have galloon,¹ that is, Walloon lace, as well as the finer fabrics which take their names from valenciennes and mechlin. Gingham was originally made at Guingamp in French Flanders. From the same region come lisle thread, the rich tapestry called arras, and brussels carpets. In the marshes of Holland the fabrics were of a less costly type than among the wealthy Flemings. From this region we obtain the names of delf ware, brown holland, and homely frieze,² or cloth of Friesland.

Passing from the ingenious Arabs and the industrious Netherlands, we find among the luxurious republics of Northern Italy a third series of names, as characteristic and as suggestive as those we have already considered. The fiddles of cremona, the pistols of pistoja³ in Tuscany, the bonnets of leghorn, the pads and padding of Padua, the rich fabric called paduaso, or Padua silk, the bells for hawks called milans, and the scent called bergamot, are fair specimens of the wares which would be articles of foremost necessity to the fine gentlemen and fair ladies who figure in the pages of Boccace; and it is easy to understand that italian irons might be suitably introduced by those milliners and mantuamakers who derive their names from two cities where their services were so abundantly appreciated.⁴ On the other hand, italics and roman type still bear witness in every printing office that the newly discovered art was nowhere more eagerly welcomed, or carried to a higher perfection than in the country in which the revival of learning first began.

¹ The galleon was probably a Walloon vessel, one of the great Antwerp merchantmen.
² Compare, however, the Welsh fris, the nap of cloth. To frizzle, in French friser, is to curl the hair in the Frisian fashion. The architectural term frieze is probably derived from Phrygia, certainly not from Friesland. The attics of our houses may be traced to the Attic order of architecture, which displayed an upper tier of columns.
³ The name of pistoysers was originally given to certain small daggers, and was afterwards transferred to the small concealed firearms.
⁴ The tureen is not from Turin, but is a terrine, or earthen vessel. We have also polonies or Bologna sausages, and saveloys from Savoy. Compare the names of Périgord pies, Bath buns, and Banbury cakes. The magenta colour derives its name from a Lombard village, but the name commemorates the date, and not the locality of the discovery.
From the rest of Europe we may glean a few scattered names of the same class—though they mostly denote peculiarities of local costume rather than established seats of manufacture. We have the word CRAVATS from the nation of the Cravates, or Croats as they are now called. There was a French regiment of light horse called "le royal Cravate," because it was attired in the Croat fashion, and the word cravat was introduced in 1636, when the neck-ties worn by these troops became the mode. GALLIGASKINS were the large open hose worn by the Gallo-vascones, or Gascons of Southern France. GALLÔCHES, or galloshoes, are the wooden sabots worn by the French peasants, and the name has been transferred to the overshoes of caoutchouc which have been recently introduced. The French city from which we first obtained SHALLOON is indicated by Chaucer in the "Reves Tale," where we read that the Miller of Trumpington

"Made a bedde
With shetes and chalons fair yspredde."

JERSEYS and GUERNSEYS remind us how the mothers and wives of the fishermen in the Channel Islands used to toil with their knitting-needles while their sons and husbands were labouring at sea. TWEEDS were made at Hawick, Galashiels, Selkirk, and other towns on the Scottish border. The name was first suggested by the misreading of an invoice, and the appropriateness of this substitution of Tweeds for Twills gave rapid currency to the new name. WORSTED takes its name from Worstead, a village not far from Norwich, and informs us that the origin of our English textile manufactures dates from the settlement, in the time of Henry I., of a colony of Flemings, who made Norwich one of the chief manufacturing towns of England. The importance of the East Anglian woollen trade is also shown by the fact that two contiguous Suffolk villages, Lindsey, and Kersey with its adjacent mere, have given their names to LINDSEY WOLSEY and KERSEYMERE. GIMP has been

1 The etymology here suggested is doubtful. The word is very ancient, for the Roman caliga, from which Caligula derived his name, and the Lancashire clog, are from the same root. Compare the Old Spanish gallochas, Erse galoig, Brezonec galocho. Spenser speaks of "My galage grown fast to my heel."
thought to be from Guingamp, and Baize is said to be from Bâise near Naples, though this appears to be only an ingenious etymological guess. The village of Bâreges lies in a valley of the Pyrenees, and BAREGES is still made in the neighbourhood. It is said also that DRUGGET was first made at Drogheda, in Ireland, and that BONNETS came from the Irish village of that name. From the name of Hibernia is derived the Italian and Spanish bernia, and the French berne, a blanket, and hence we have obtained the semi-naturalized word BERNOUSE. Llanelly, I believe, was a great place for the Welsh flannel manufacture, though whether the word FLANNEL is derived from the name Llanelly is very doubtful. The word SILK may be traced to the sericae vestes, the garments of the Seres or Chinese, who, ever since the time of Pliny, have been the chief producers of this material.

It must suffice briefly to enumerate a few inventions whose names betray a local origin. The towns of Sedan in France, and Bath in England, have given us SEDANS and BATH CHAIRS. From Kottsee, a town in Hungary, comes the Hungarian word kotczy, and the German kutsche, of which the English word COACH is a corruption.¹ Coaches were introduced into England from Hungary, by the Earl of Arundel, in 1580. The first BERLINE was constructed for an ambassadorial journey from Berlin to Paris. The LANDAU is said to derive its name from the town of Landau in the Palatinate. It seems more probable that it was named after Marshal Landau, as in the analogous cases of the STANHOPE, TILBURY, and BROUGHAM. There is a coachmaker, in Longacre, called Rumball, and a writer in Notes and Queries suggests that the RUMBLE was invented by him. It has been supposed that Hackney coaches were first used at the London suburb of Hackney; but when we find mention in the seventeenth century of the coche à haquenée, there can be no doubt that the true etymology is to be sought from the

¹ The Kutsche was a carriage in which the traveller might sleep, as appears from a passage of Avila. Charles V., he says, "se puso à dormir en un carro cubierto, al qual en Hungria llaman coche, el nombre y la inversion es de aquella tierra." Hence it has been proposed to connect the English word COUCH and the French verb COUCHER with the same root, but the influence is probably only of a reflex nature, the ultimate source of these two words being to be sought in the Latin collocare.
French word *hacquenee*, an ambling nag, of which the English *hack* is an abbreviation.

**Chevaux de frise**, the wooden horses of Friesland, are due to Dutch ingenuity. They were first drawn up at the siege of Gröningen, in 1658, to oppose the Spanish cavalry. A nearly contemporaneous invention is that of the *bayonet*, which was used at the storming of Bayonne in 1665. Grenades, however, have no connexion with the famous siege of Granada, but are so called from their resemblance to the granate or pomegranate. The tallest and strongest men in the regiment, who were chosen to throw them, were called *grenadiers*. The *burgonet*, probably, takes its name from Burgundy, and the *carabine* from Calabria, as is indicated by the obsolete Italian form of the word—*calabrino*. The word *calibre*, though apparently cognate, is really from an Arabic source. The *pole-axe* was the national weapon of the Poles. The oak saplings which grow in a certain wood in the Wicklow parish of *Shillelah* are believed to be of a peculiarly tough and knotty quality, but we may hope that this national weapon will soon be confined to the museums of the antiquary; just as the *Lochaber axe* has disappeared along with Highland warfare. Improved weapons, according to the modern rule of nomenclature, are named after the inventor, as in the case of Congreve rockets, Minié and Whitworth rifles, and Armstrong, Dahlgren, and Parrot guns. An exception, however, exists in the case of *enfields*, which are made in the Government factory at Enfield, just as the obsolete ordnance called *carronades* were cast at the celebrated Carron Foundry on the Clyde.

The word *parchment* is derived from the Latin *charta pergamentum*, or *pergamena*, which was used for the multiplication of manuscripts for the great library at Pergamus. From the Campagna of Rome we have the Italian *campana*, a bell, and the naturalized English word *campanile*, a bell tower. The first lighthouse was built by Ptolemy Philadephus on the island of *Pharos*, near Alexandria. The first *artesian* well was sunk through the chalk basin of the province of *Artois*. *Varnish* is said to be from the city of Berenice on the Red Sea, as is indicated by the Italian form *vernice*, and the Spanish *bernez*. The *bougie*, that constant source of alterca-
tion at Continental hotels, takes its name from Bougia, a town in Algeria which exports large quantities of Beeswax. Venetian blinds, Prussic acid and Prussian blue, Dresden, Sévres, Worcester, Chelsea, and other names of the same class, present no etymological difficulties. MAJOLICA is Majorca ware, and the glass vessel called a DEMIJOHN may possibly take its name from Damaghan, a town in Khorassan formerly famous for its glass works.

Many names of this description are personal rather than local in their origin. For example, the DOILEY is supposed to have been introduced by a tradesman in the Strand, one Doyley, whose name may still be seen cut in the stone over the office of the Field newspaper; and the etymology of the word MACKINTOSH is not likely to be forgotten while the shop at Charing Cross continues to bear the name of the inventor. In like manner JACKET, in French jaque, was so called from Jaque of Beauvais, and GOBELIN tapestry from the brothers Gobelin, dyers at Paris, whose house, called the Hôtel des Gobelins, was bought by Louis XV. for the manufacture of the celebrated fabric. The invention of SPENCERS and SANDWICHES by two noblemen of the last century is commemorated in a contemporaneous epigram, which may perhaps bear transcription:

"Two noble earls, whom, if I quote,
Some folks might call me sinner,
The one invented half a coat,
The other, half a dinner.
"The plan was good, as some will say,
And fitted to console one,
Because, in this poor starving day,
Few can afford a whole one."

The invention of Earl Spencer may be classed with the WELLINGTONS and BLÜCHERS which came into fashion at the close of the European war; and that of the Earl of Sandwich with MAINTENON CUTLETS. It has been suggested that we owe the BRAWN on our breakfast tables to a German cook

1 The invention of Lord Sandwich is said to have enabled him to remain at the gaming-table for twenty-four consecutive hours, without having to retire for a regular meal.
named Braun who lived in Queen Street. The word, however, is doubtless of much greater antiquity, the true etymology being to be sought in the old French *braion*, a roll of flesh.

From two Greek philosophers we derive the terms PLATONIC love, and EPICURE. The GUILLOTINE takes its name from Dr. Guillotin, who introduced it. Dr. Guillotin, however, only introduced the bill in the Convention; a Dr. Louis was the real inventor of the machine, which was at first called the Louisette. The BOWIE KNIFE is due to Colonel Bowie, a Western trapper. The summary proceedings of Judge LYNCH have given our American cousins a verb of which they stood in need. The words BOGUS (Borghese) and BLERKERISM hand down to fame the names of two other Transatlantic worthies, while BURKING is the peculiar glory of this island. The DERRICK, a machine for raising sunken ships by means of ropes attached to a sort of gallows, perpetuates the memory of a hangman of the Elizabethan period. TRAM ROADS and MACADAMIZATION we owe to Outram and Macadam. A strict disciplinarian in the army of Louis XVI. has given us the word MARTINET, and from a French architect we obtain the MANSARDE roof. Mr. PINCHBECK was one of the cheap goldsmiths of the last century, and has left numerous disciples in our own. An ingenious astronomical toy bears the name of the Earl of ORRERY, the patron of the inventor. Galvani and Volta, Daguerre and Talbot have stamped their names upon two of the greatest discoveries of modern times. The value of MESMERISM is more open to question. The same method of nomenclature has naturally prevailed among religious sects. We have ARIANS, ARMINIANS, CALVINISTS, WESLEYANS, SIMEONITES and PUSEYITES. The name of SILHOUETTE was bestowed in the time of Louis XV. on the meagre shadow portraits which were then in vogue, and it contains a sarcastic allusion to the niggardly finance of M. de Silhouette, an unpopular minister of the French monarch. So Mr. Joseph Hume's unpopular fourpenny pieces were called JOEYS by the cabmen; and Sir Robert Peel's substitutes for the inefficient London watchmen are still called BOBBYS and PEELERS.

Paschino was a cobbler at Rome; he was a noted character, and a man of a very marked physiognomy. The statue of an
ancient gladiator having been exhumed, and erected in front of the Orsini Palace, the Roman wits detected a resemblance to the notorious cobbler, and gave the statue his name. It afterwards became the practice to post lampoons on the pedestal of the statue, whence effusions of this nature have come to be called *PASQUINADES*. Pamphylla, a Greek lady, who compiled a history of the world in thirty-five little books, has given her name to the *PAMPHLET*. Octave Feuillet, a living writer, has given his name to the *FEUILLETONS* of the French newspapers. The name of *PUNCH*, or, to give him his unabbreviated Italian title, Pulcinello, has been derived from the name of the person who is said to have first performed the world-known drama, one Puccio d'Aniello, a witty peasant of Acerza in the Roman Campagna. It has also been supposed, with some reason, that Punch and Judy and the dog Toby are relics of an ancient mystery play, the actors in which were Pontius Pilate, Judas, and Tobias' dog. For the word *HARLEQUIN*, in Italian *Arlechino*, a local origin has, however, been suggested; the name being, perhaps, derived from the Arlecamps, or Champ d'Arles, where the performance was first exhibited. The word *CHARLATAN* we may trace through the Italian forms *ciarlatallo* and *cerretano* to the city of Cerreto. *VAUDEVILLE* is from Vau-de-Ville in Normandy, where the entertainment was introduced by Olivier Basselin, at the end of the fourteenth century.

Many analogous derivations which we find in classical authors are obviously fanciful or mythical. Thus we read that the art of grinding was discovered at Alesiae (ἄλεσις, to grind), by Myles (μύλη, a millstone). In like manner we are told that the tinder-box was invented by Pyrodes, and the spindle by Closter; and that the oar was first used at two Boeotian towns—Copae (handle), and Plataeae (blade). This, it need not be said, is as absurd as if a modern Pliny were to assure us that needles were first manufactured at the western extremity of the Isle of Wight, or that the game of draughts was originally played in Ayrshire.

The etymology of the names of coins is often curious. The *GUINEA* was coined in 1663 from gold brought from the Guinea coast. It was struck as a twenty-shilling piece, but from the fineness of the metal the new coins were so highly prized that
they commanded an agio of a shilling. The name seems, however, to have been a revival or echo of the older name of the guianois d'or which were struck at Bordeaux by the Plantagenet dukes of Guienne, and were made current for a time in their English kingdom. The Byzant, a large gold coin of the value of 15s. sterling, was struck at Byzantium. The Dollar was originally the same as the German Thaler, which took its name from the silverworks in the valley (thal) of Joachim in Bohemia. Its currency throughout the New World bears witness to the extension of the Spanish-Austrian empire in the reign of Charles V. The Florin was struck at Florence, and bore the Florentine device of the lily-flower, which has been reproduced on the new English coins of the same name. The Mark was a Venetian coin, stamped with the winged lion of St. Mark; and since Venice was the banker to half the world, it became the ordinary money of account. Cufic coins, silver pieces with Arabic characters, were coined at Cufa. The Jane which is mentioned by Chaucer and Spenser was a small coin of Genoa (Janua). The Franc is the nummus francicus—the coin of the Franks or French, and the Dutch Guilder may possibly take its name from Gelderland. A Ducat is the coin issued by a duke, just as a Sovereign is that issued by a king. A Tester bore the image of the king's head (teste, or tête), and the Penny is, possibly, in like manner, the diminutive of the Celtic pen, a head. The modern Welsh word ceiniog, a penny, is analogously from cenn, a head. A Shilling or skilling bore the device of a Shield or schild, and a Scudo had a scutum. The Pagoda, the gold coin of Southern India, bore the device of a temple. An Eagle, an Angel, and a Kreutzer bear respectively the American eagle, an angel, and a cross. Twenty shillings used to weigh a pound (pondus). So the Italian lira and French livre were of the weight of a libra. English Groats, like the German Groschen, were the great coins, having been four times the size of the penny. A Farthing is the fourthing, or fourth part of a penny, just as the square furlong is the fourthling of an acre, and as the Ridings of Yorkshire were the thridings or third parts of the county.

The words Money and Mint remind us that the coinage of
the Romans was struck at the temple of Juno Moneta, the
goddess of counsel (moneta). The word sterling is a con-
traction of esterling—the pound or penny sterling being a
certain weight of bullion according to the standard of the
Esterlings or eastern merchants from the Hanse towns on the
Baltic. The convenience of the local standard of Troyes has
given us troy weight; and the steelyard is not, as is com-
monly supposed, a balance made with a steel arm, but is the
machine for weighing which was used in the Steelyard, the
London factory of the Hanse towns. That the name ori-
ginated in England is proved by the fact that it is confined to
this country; the French equivalent being romaine, and the
German ruthe.

Not the least interesting, and by far the most instructive, of
the words that have been derived from geographical names, are
those which have been furnished by the names of nations, and
which will mostly be found to have a sort of moral significance,
ethnical terms having become ethical. Thus, when we remem-
ber how the Vandals and the Goths, two rude Northern hordes,
swept across Europe, blotting out for a time the results of cen-
turies of Roman civilization, and destroying for ever many of
the fairest creations of the Grecian chisel, we are able to under-
stand how it has come about that the wanton or ignorant
destruction of works of art should go by the name of van-
dalism, and also how the first clumsy efforts of the Goths to
imitate, or adapt to their own purposes the Roman edifices,
should be called gothic. It is interesting to note the stages
by which this word has ascended from being a word of utter
contempt to one of highest honour. Yet we may, at the same
time, regret that the same word—Gothic—should have been
misapplied to designate that most perfect system of Christian
architecture which the Northern nations, after centuries of
honest and painful labour, succeeded in working out slowly
for themselves, and in the elaboration of which the nations of
pure Gothic blood took comparatively little share.

The fierce and intolerant Arianism of the Visigothic con-
querors of Spain has given us another word. The word Visi-
goth has become bigot, and thus on the imperishable tablets
of language the Catholics handed down to perpetual infamy the
name and nation of their persecutors. From the name of the same nation—the Goths of Spain—are derived, curiously enough, two names, one implying extreme honour, the other extreme contempt. The Spanish noble, who boasts that the *sangre azul* of the Goths runs in his veins with no admixture, calls himself an *hidalgo*, that is, a “son of the Goth” (*hi d’al Go*), as his proudest title. Of Gothic blood scarcely less pure than that of the Spanish Hidalgos, are the *cagots* of Southern France, a race of outcast pariahs, who in every village live apart, executing every vile or disgraceful kind of toil, and with whom the poorest peasant refuses to associate. These Cagots are the descendants of those Spanish Goths, who, on the invasion of the Moors, fled to Aquitaine, where they were protected by Charles Martel. But the reproach of Arianism clung to them, and religious bigotry branded them with the name of *câ Gots* (Provençal *câ=canis*), or “Gothic Dogs,” a name which still clings to them, and keeps them apart from their fellow-men. In the Pyrenees these Arian refugees were anciently called *Christaas*, and in French *Christiens*, or Christians, probably to distinguish them from Jewish or Moorish fugitives. Confinement to narrow valleys, and their enforced intermarriages, often resulted in the idiocy of the children, and the name of the outcasts of the Pyrenees has been transferred to the poor idiotic wretches who, under the name of *cretins*, are painfully familiar to Swiss tourists. The word *goître* is not, as has been thought, derived from the name of these Gothic refugees, but is a corruption of the Latin *guttur*, which we find in Juvenal: “Quis tumidum guttur miratur in Alpibus.” The *marrons* of Auvergne are a race of pariahs, descended from the Mauriens, or Moorish conquerors of the Maurienne. Hence the French word *marrane*, a renegade or traitor, and the Spanish adjective *marrano*, accursed, and the substantive *marrano*, a hog.

When we remember how the soldierlike fidelity and the self-reliant courage of the Franks enabled them with ease to subjugate the civilized but effeminate inhabitants of Northern Gaul, we can understand how the name of a rude German tribe has come to denote the *frank*, bold, open, manly character of a soldier and a freeman, and the word *franchise* to denote
the possession of the full civil rights of the conquering race. In the south-east of Gaul the Roman element of the population had ever been more considerable than elsewhere, and in this region the influence of the Northern conquerors was comparatively transient. Hence the \textit{langue d’oc}, or language of Provence, the Roman Provincia, was called the Romance, retaining as it did a much greater resemblance to the language of the Romans than the \textit{langue d’oïl}, the tongue of that part of Gaul which had been conquered and settled by the Franks. Here, in the region of the Languedoc, civilization was first re-established; here was the first home of chivalry; here the troubadour learned to beguile the leisure of knights and ladies with wild tales of adventure and enchantment—\textit{romances}, \textit{romantic narratives}—so called because sung in the Romance tongue of the Roman province. In the south-west of Gaul, on the other hand, the Celtic or Celtiberic element of the original population was little influenced either by Roman colonization, or by Frankish or Gothic conquest. The Gascons afforded an exhibition of the peculiar characteristics of the Celtic stock—they were susceptible, enthusiastic, fickle, vain, and ostentatious. The random and boastful way of talking in which these Gascons were prone to indulge, has, from them, received the name \textit{gasconade}.\footnote{\textit{Rodomontade}, a word of somewhat similar meaning, is derived from Rodomonte, a braggart who figures in Ariosto’s poem of \textit{Orlando Furioso}. The immortal romance of Cervantes has given us the word \textit{quixotic}. \textit{Hectoring} comes from “Sir Hector” of Troy. \textit{Gibberish} comes from Geber, an obscure Eastern writer on alchemy; and \textit{fudge}, perhaps, from a certain inventive Captain Fudge, who flourished in the reign of Charles II. \textit{Burlesque}, in Italian \textit{burlesco} or \textit{beronesco}, is derived from Francesco Bernia, who invented this \textit{species} of composition. \textit{Alexandrines} and \textit{Leonines} are probably from a French poet, Alexandre Pâris, and the monk Leo, of Marseilles. We speak of the \textit{spenserian stanza}, and a \textit{ciceronian style}.}

The Langobardes, or Lombards, who settled in Northern Italy, were distinguished by national characteristics very different from those of Frank, Gascon, Goth, Visigoth, or Vandal. They seem to have been actuated by the spirit of commercial rather than of chivalrous adventure; and at an early period we find them competing with the Jews as the capitalists and pawnbrokers of the Middle Ages. The Sicilian word \textit{lumbardo}, an
innkeeper, shews that they also exercised this lucrative calling. As we have already seen, Lombard Street—still the street of bankers—marks the site of the Lombard colony in London; and the Lombards have left their name not only in our streets but in our language, as a curious witness to the national characteristics which distinguished them from the other tribes which overran the Roman Empire. There is an old French adjective *lombart*, usurious; and the French word *lombarde* means a pawnshop. The English *lumber-room* is the Lombard room, the room where the Lombard pawnbrokers stored their unredeemed pledges. Hence, after a time, furniture stowed away in an unused chamber came to be called *lumber*; and since such furniture is often heavy, clumsy, and out of date, we call a clumsy man a *lumbering* fellow; and our American cousins have given heavy timber the name of lumber, and call the man who fells it a *lumberer*—a curious instance of the complicated process of word manufacture, by which the name of a barbarous German tribe has been transferred to American backwoodsmen.

When the Ugrian tribes of Bulgarians and Huns, under Attila, overran the Roman Empire, the terror which they inspired was due not only to their savage ferocity, but in part to the hideousness of the Kalmuck physiognomy, with its high cheek-bones, and grinning boar-tusked visage. Their name became the synonym for an inhuman monster. Hence the German *Hüne*, a giant, the French *Bulgar*, or *Bougre*, and the English *ogre*. The Bulgarians, moreover, being given to manichaeanism, we have also the French word *bougerie*, heresy. When the Asi approached Scandinavia they found the shores peopled by wandering Finns, whom tradition represents as malignant imps and deformed demons, lurking among rocks and in the forest gloom. Hence, it has been thought, have arisen the words *fiend* and *fiendish*, and the German *feind*, an enemy. On the other hand, the Norse word for a giant is *jotunn*; that is, Jute or Goth.

The relations of the Slavonic races of Eastern Europe to their western neighbours is also indicated by a curious piece of historical etymology. The martial superiority of the Teutonic races enabled them, as we have seen, gradually to advance
their frontier toward the east, and, in so doing, to keep their slave markets supplied with captives taken from the Slavonic tribes. Hence, in all the languages of Western Europe, the once glorious name of Slave has come to express the most degraded condition of man. What centuries of violence and warfare does the history of this word disclose! The contempt and hatred of race which the use of the word implies, is also strongly shewn by the fact that even so late as the last century no person of Slavonic blood was admissible into any German guild of artisans or merchants. We have, however, an earlier and an analogous case of word-formation, which has not attracted the same attention as the word slave. That Slavonic people which was in the closest geographical proximity to Italy called themselves Serbs or Servians, the "kinsmen," and it seems probable that the Latin word servus, and our own derivatives serf and servant, originated from causes similar to those which have given us the word slave. The probability of this being the true etymology of servus is much increased by the numerous parallel cases of ethnic terms being perverted to be the designation of servile races. The manner in which the words Davus, Geta, and Syrus are applied to slaves in the Græco-Latin comedies, exhibits in a half-completed state the same linguistic process which has given us the words slave and serf, and at the same time indicates that the Grecian slave markets must have been largely supplied by Dacians, Goths, and Syrians. Aristophanes uses the word οἰδήανα in the sense of a female house-servant. The word δώλος is probably derived from the Δόλοτας, a subject race of Thessaly; and the Helots were the aboriginal inhabitants of the Peloponnesus, who were reduced to slavery at the time of the Dorian conquest. The rich treasure-house of language has preserved a curious memorial of the fact that the Saxon conquest of England was accompanied by a reduction to servitude of the indigenous race. Till within the last three centuries the word villain retained the meaning of a peasant.\(^1\) In Domesday the villani are the prædial serfs. The root of the word is, not impro-

\(^1\) The change to the present meaning of the word is analogous to that which has transformed the significations of boor (bauer, or peasant), knave (boy), and imp (child).
bably, the Anglo-Saxon *wealth*, a foreigner; or Welshman, an etymology which, if correct, proves that servitude must have been the ordinary condition of the Celts under Saxon rule. We have a somewhat analogous case in British India, where porters and palanquin-bearers go by the name of *coolies*, a name which has been extended to include the Indian labourers who have replaced the negro slaves in the sugar plantations of Tropical America. The word Coolie is a corruption of the name of a Turanian hill-tribe, the Coles or Kôlas, who occupy the lowest place in the Indian labour-market.

From Thrax, a Thracian, the Romans, by the change of a single letter, derived the word *threx*, a gladiator, a fact which indicates the region from which the arena was supplied with hardy mountain combatants. The word *káρ* is used in Greek to denote a mercenary soldier, the Carians having habitually hired themselves out to fight the battles of their neighbours. In like manner, the Shawi, a tribe of desert nomads, were enlisted by the French after their Algerian conquest, and the name, corrupted into *zouave*, still abides, though the ranks are now filled by the gamins of the streets of Paris.

The stately rites of the Etruscan pontiffs, as performed at the city of Cære, have given us the word *ceremony*. On the other hand, the luxurious sensuality which prevailed at Sybaris has attached a disgraceful signification to the word *sybarite*, and the moral corruption which poisoned the mercantile and pleasure-loving city of Corinth caused the word *koríνθιαζαοθαυ* to become a synonym for *ἐταφεῖν*, just as the more healthy pleasures of the Sicelian peasant made the word *σικελίζειν* equivalent to *ὄρχείσθαι*. The dry upland sheep pastures of the Peloponnesus, and the rich corn-flats of Thebes, have given us the two adjectives *arcadian* and *bœotian*. An heroic man we call a *trojan*, an arbitrary man a *turk*, a benevolent man a *good samaritan*, and “caching a *tatar*” is a process more familiar than agreeable. The terse, pregnant way in which the Spartans expressed themselves still causes us to talk of *laconic* speech,¹ the pithy wit of the Athenians has left us

¹ The Italian word *ladino*, easy, shows that Latin was the easiest language for an Italian to acquire. Compare the German *deutlich*, plain, and our own phrase, “It is Greek to me.”
the phrase ATTIC salt, and the bitter laughter of the Sardinians is commemorated in the expression "a SARDONIC smile."

The word BRIGAND is not improbably derived from the name of the Brigantines, or perhaps from Briga, a border town near Nice. The word brigant first appears in the sense of a light-armed soldier, and then it takes the meaning of a robber. Next we find brigante, a pirate; and the pirate’s ship is called a BRIGANTINE, of which the word BRIG is a contraction. From Tarifa the Moorish cruisers sallied forth to plunder the vessels passing through the Straits of Gibraltar; but discovering the impolicy of killing the goose that laid the golden egg, they seem to have levied their black mail on a fixed scale of payment, which, from the name of the place where it was exacted, came to be called a TARIFF. JEDDART JUSTICE, which denotes the practice of hanging the criminal first and trying him afterwards, is a reminiscence of the wild border life of which the town of Jedburgh was the centre.

The word CANNIBAL is probably a corruption of the name of the Caribs or Caribals, a savage West Indian people, among whom the practice of cannibalism was supposed to prevail. The horrible custom of scalping fallen enemies was usual among the Scythian tribes, and Herodotus gives us a picture of the string of bloody trophies hanging to the warrior’s rein. Hence arose the word ἀποσκυθίζειν, to scalp, which we find in Euripides. St. Paul also uses the word SCYTHIAN as an equivalent of barbarian. The word ASSASSIN probably comes from the name of a tribe of Syrian fanatics who, like the Thugs of India, considered assassination in the light of a religious duty. The name of the tribe, perhaps, comes from the hashish, an intoxicating preparation of hemp with which the members of the sect worked themselves up to the requisite degree of recklessness.

During the last century false political rumours were often propagated from Hamburg, then the chief port of communica-

1 The word to sally is no doubt from salire, though there is a temptation to deduce it from Sallee, another chief station of the Moorish pirates. Corsair is certainly not from Corsica; though, possibly, riff raff may be derived from the Riff pirates.
tion with Germany. "A piece of Hamburg news" seems to have become a proverbial expression for a canard, and it is easy to see how this phrase has been pared down into the modern slang term humbug. The analogous slang word bosh has, I imagine, been imported from the Cape, the metaphor having been taken from the rubbishing and worthless "bush," which is burned regularly every autumn. The expressive American term buncum is due to the member for the county of Buncombe, in North Carolina. In the State Legislature he made a speech, full of high-flown irrelevant nonsense, and when called to order he explained that he was not speaking to the House, he was talking to Buncombe. Castle blarney is, of course, in Ireland, and the famous stone can still be seen and kissed by those who desire to test its virtues. By a good-natured allusion to another peculiarity of our Irish fellow-countrymen, we term a certain characteristic confusion of ideas an hibernianism.

A spruce person was originally a person dressed in the Prussian fashion. Thus Hall, the chronicler, describes the appearance of Sir Edward Haward and Sir Thomas Parre "in dobleettes of crimosin veluet, voyded lowe on the backe, and before to the cannell bone, lased on the breasts with chaynes of siluer, and ouer that shorte clokes of crimosyn satyne, and on their heades hattes after dauncers fashion, with feasauntes fethers in theim: They were appareyled after the fashion of Prusia or Spruce.

Though the pilgrims of the eighth and succeeding centuries were often only "commercial travellers," and still more frequently "vacation tourists," and although the visitation of foreign shrines did much to dispel national prejudices and to unite nations, yet we may be glad, on moral as well as on religious grounds, that the practice of pilgrimages, which formed so noticeable a feature in the life of the Middle Ages, has now ceased, at least among ourselves; for in the word saunterer we have a proof that, in popular estimation, idle and vagabond habits were acquired by the palmers, who returned with their palm branches from the pilgrimage to the Sainte Terre, or Holy Land. A roamer was one who had visited the tombs of the two Apostles at Rome, and this word conveys also in its
present usage an intimation of unsettled habits similar to that which is contained in the word saunterer. The Italian word *romeo* implies no moral censure, but means simply a pilgrim; and hence we may perhaps infer, that where the distance to be traversed was small, the evil effects of the pilgrimage were not so manifest. From the Canterbury pilgrimages to the shrine of St. Thomas comes the word *canter*, which is an abbreviation of the phrase “a Canterbury gallop”—the easy ambling pace of the pilgrims as they rode along the grassy lane which follows the foot of the North Downs of Kent for many miles, and which still retains its title of the Pilgrims’ Road. St. Fiacre (Fiachra) was an Irish saint of great renown, who established himself as a hermit at Meaux, some five-and-twenty miles from Paris. His tomb became a great place of pilgrimage, which was performed even by royal personages, such as Anne of Austria. The miracle-working shrine being frequented by many infirm persons who were unable to perform the pilgrimage on foot, carriages were kept for their convenience at an inn in the suburbs of Paris, which bore the sign of St. Fiacre; and now, long after the pilgrimages have ceased, the hired carriages of Paris retain the name of *fiacres*. St. Etheldreda, or, as she was commonly called, St. Awdrey, was the patron saint of the Isle of Ely. She is said to have died of a swelling in the throat, which she considered as a judgment on her for her youthful fondness for necklaces. Hence, at the fair held at the time of the annual pilgrimage, it was the custom for the pilgrims to purchase, as mementoes of their journey, chains of lace or silk, which were called “St. Awdrey’s chains.” These being of a cheap and flimsy structure, the name of St. Awdrey, corrupted into *tawdry*, has come to be the designation of cheap lace and showy finery. So keys were brought away by the *romeos* who had visited the tomb of St. Peter, palm-branches by the palmers from the Holy Land, and scallop-shells from the seashore near the shrine of St. James at Compostella. St. James’ day is still commemorated by London urchins by oyster-shell grottos, for the construction of which the contributions of

From the Cheviot hills we have the slang verb to *chevy*, a reminiscence of Chevy Chase.
passers-by are solicited. On the various signs of pilgrimage, see the description of a pilgrim in Piers Ploughman:

“A bolle and a bagge
He bar by his syde,
And hundred of ampulles
On his hat seten,
Signes of Synay,
And shelles of Galice,
And many a crouche on his cloke,
And keyes of Rome,
And the vernycle bi-fure;
For men sholde knowne,
And se bi hise signes,
Whom he sought hadde.”

In a wild district of Derbyshire, between Macclesfield and Buxton, there is a village called Flash, surrounded by unenclosed land. The squatters on these commons, with their wild gipsy habits, travelled about the neighbourhood from fair to fair, using a slang dialect of their own. They were called the Flash men, and their dialect Flash talk; and it is not difficult to see the stages by which the word FLASH has reached its present signification. A slang is a narrow strip of waste land by the roadside, such as those which are chosen by gipsies for their encampments. To be “out on the slang,” in the lingo used by thieves and gipsies, means to travel about the country as a hawker, encamping by night on the roadside slangs. A travelling show is also called a slang. It is easy to see how the term SLANG was transferred to the language spoken by hawkers and itinerant showmen. The word BILLINGSGATE, which has spread from England to America, reminds us that the language of London fishwives is not so choice as their fish; and “a BABEL of sounds,” refers to the confusion of tongues at the Tower of Babylon or Babel.

Political parties have sometimes assumed names derived from local sources. The leaders of the GIRONDISTS were the deputies from the department of the Gironde. The JACOBINS took their name from the convent of St. James, in which the meetings of the revolutionary club were held. A TEMPLAR now studies law in the former residence of the crusading Knights of the Temple of Jerusalem. The COURT OF ARCHES was originally held in the arches of Bow Church—St. Mary de Arcubus—the crypt of which was used by Wren to support the present superstructure. When we talk of finding ourselves in a perfect
BEDLAM we do not always remember that the rapacity and the vandalism of the English Reformers were redeemed by some good deeds—one of which was the assignment of the Convent of St. Mary of Bethlehem for the reception of lunatics, who used previously to be chained to a post, if indeed they were not left utterly uncared for. The hospital of St. Lazarus, at Naples, has, in a somewhat similar way, given a name to those who would be its most fitting occupants—the Neapolitan LAZZARONI. The porch of a cathedral is called the GALILEE, probably because to the Crusaders and pilgrims advancing from the North, Galilee formed the frontier or entrance to the Holy Land. An absconding debtor is said to LEVANT, a phrase which casts a curious slur on the administration of Turkish justice.

The winding river MEANDER has given us a verb; and the name of the RUBICON has now almost passed into our vocabulary. From the Moriscoes of Spain we have the words MORRIS boards, and MORRIS dances.

On the Mons Palatinus—a name the etymology of which carries us back to the time when sheep were bleating on the slope—was the residence of the Roman emperors, which, from its site, was called the Palati(n)um, or Palatium. Hence the word PALACE has come to be applied to all royal or imperial residences. The Count Palatine was, in theory, the official who had the superintendence of the household of the Carolingian emperors. As the foremost of the twelve peers, the Count Palatine took a prominent place in mediæval romance, and a PALADIN became the impersonification of chivalrous devotion. His feudal fief was the Palatinate—the rich Rhine valley above Mainz. The counties PALATINE of Chester, Durham, and Lancaster, are so called on account of the delegated royalty—the jura regalia—formerly exercised by the Earls of Chester, the Earl-Bishops of Durham, and the Dukes of Lancaster. It is one of the curiosities of language that a petty hill-slope in Italy should have thus transferred its name

1 So the CERAMICUS, or “Potter's field,” at Athens, was converted into the most beautiful quarter of the city. The name of the TUILLERIES denotes that the site was once a “Tile yard;” and that of the ESCURIAL shows that the palace was built upon a heap of refuse from an exhausted mine.
to a hero of romance, to a German state, to three English counties, to a glass-house at Sydenham, and to all the royal residences in Europe.¹

¹ On this subject see Hume, Geographical Terms considered as tending to enrich the English Language; Beckmann, History of Inventions, Discoveries, and Origins; Knapp, English Roots; Talbot, English Etymologies; Diez, Etymologisches Wörterbuch der Romanischen Sprachen; Pihan, Glossaire des Mots Français tirés de l’Arabe; Wedgwood, Dictionary of English Etymology; Sullivan, Dictionary of Derivations; Hotten, Slang Dictionary; Ménage, Les Origines de la Langue Française; Taylor, Antiquitates Curiosa; Michel, Histoire des Races Maudites de la France et de l’Espagne; Schafarik, Slawische Alterthümer; Pictet, Les Origines Indo-Européennes; the works of Max Müller, Marsh, and Trench, a paper by Whewell, in the Proceedings of the Philological Society, vol. v.; and Notes and Queries, passim.
CHAPTER XVII.

ONOMATOLOGY; OR, THE PRINCIPLES OF NAME-GIVING.

Dangers which beset the Etymologist—Rules of investigation—Names in the United States—List of some of the chief components of Local Names.

The study of local names can, as yet, hardly claim the dignity of a science. With the exception of Ernst Förstemann, those who have written on the subject have too often been contented to compile collections of "things not generally known," without attempting either to systematize the facts which they have brought together, or to deduce any general principles which might serve to guide the student in his researches.

There are few subjects, perhaps, in which such numerous dangers beset the inquirer. The patent blunders, and the absurdly fancifil explanations of etymologists, have become a byword. It may be well, therefore, to clear the way for a scientific treatment of the subject by an examination of some of these sources of error, and by the suggestion of a few obvious rules which should be constantly kept in view by those who attempt the investigation of the meaning of ancient names.

The fundamental principle to be borne in mind is an axiom which alone makes the study of local names possible, and which has been tacitly assumed in the title of this volume, and throughout the preceding chapters. This axiom asserts that local names are in no case arbitrary sounds. They are always ancient words, or fragments of ancient words—each of them, in short, constituting the earliest chapter in the local history of the places to which they severally refer.

Assuming, therefore, as axiomatic, the significance of local names, it need hardly be said that in endeavouring to detect the
meaning of a geographical name, the first requisite is to discover the language from which the name has been derived. The choice will mostly lie within narrow limits—geographical and historical considerations generally confining our choice to the three or four languages which may have been vernacular in the region to which the name belongs. No interpretation of a name can be admitted, however seemingly appropriate, until we have first satisfied ourselves of the historical possibility, not to say probability, of the proposed etymology. For example, LAMBETH, as we have seen, is a Saxon name, meaning the loam-hithe, or muddy landing-place. We must not, as a Saturday Reviewer has amusingly observed, plume ourselves on the discovery that lama is a Mongolian term for a chief priest, and beth a Semitic word for a house, and thus interpret the name of the place where the primate lives as the "house of the chief priest."

In the next place the earliest documentary form of the name must be ascertained. In the case of an English name Kemble's collection of Anglo-Saxon Charters, entitled Codex Diplomaticus Ævi Saxonici, Domesday Book, Dugdale, and county histories must be diligently searched. For Scottish names Innes' Origines Parochiales Scotiae will generally supply the necessary information. For names in France, the Dictionnaire des toutes les Communes de la France, by Girault de Saint Fargeau, may often be consulted with advantage. But if the name to be investigated occurs in Germany, all trouble will be saved by a reference to Förstemann's systematic list of mediæval German names—the Altddeutsches Namenbuch—a work which only a German could have conceived or executed, and which, even in Germany, must be considered a marvellous monument of erudite labour.

If no early form of the name can be discovered, we must, guided by the analogy of similar names, endeavour to ascertain it by conjecture, bearing carefully in mind those well-known laws of phonetic change to which reference has already been made.

This having been done, it remains to interpret the name which has been thus recovered or reconstructed. To do this with success requires a knowledge of the ancient grammatical
structure and the laws of composition which prevailed in the language in which the name is significant—the relative position, for instance, of adjective and substantive, and the usage of prepositions and formative particles. In this department the *Grammatica Celtica*, of Zeuss, will be found indispensable for Celtic names; and for Teutonic names, Grimm's *Deutsche Grammatik*.

Great aid will be derived from the analogy of other names in the same neighbourhood. A sort of epidemic seems to have prevailed in the nomenclature of certain districts. There is hardly a single English county, or French province, or German principality, which does not possess its characteristic clusters of names—all constructed on the same type. The key that will unlock one of these names will probably also unlock the rest of those in the same group.

Having thus arrived at a probable interpretation of the name in question, we must proceed to test the result. If the name be topographic or descriptive, we must ascertain if it conforms to the physical features of the spot; if, on the other hand, the name be historic in its character, we must satisfy ourselves as to the historic possibility of its bestowal.

This scientific investigation of names is not, indeed, always possible. In the case of the Old World, the simple-minded children of semi-barbarous times have unconsciously conformed to the natural laws which regulate the bestowal of names. The names of the Old World may be systematized—they describe graphically the physical features of the country, or the circumstances of the early settlers.

But in the New World, settled, not by savages but by civilized men, a large proportion of the names are thoroughly barbarous in character. We find the map of the United States thickly bespattered with an incongruous medley of names—for the most part utterly inappropriate, and fulfilling very insufficiently the chief purposes which names are intended to fulfil. In every State of the Union we find repeated, again and again,

1 The local names invented by our popular novelists frequently set all etymological propriety at defiance. We have all sorts of impossible compounds: we have *thorpes, holms*, and *thwaites* in Wessex, Cornish names in Wales, and Kentish forms in the Midland counties.
such unmeaning names as Thebes, Cairo, Memphis, Troy, Rome, Athens, Utica, Big Bethel, and the like. What a poverty of the inventive faculty is evinced by these endless repetitions, not to speak of the intolerable impertinence displayed by those who thus ruthlessly wrench the grand historic names from the map of the Old World, and apply them, by the score, without the least shadow of congruity, to collections of log huts in some Western forest. The incongruity between the names and the appearance of some of these places is amusing. Thus Corinth "consists of a wooden grog-shop and three log shanties; the Acropolis is represented by a grocery store. . . . All that can be seen of the city of Troy . . . is a timber house, three log huts, a saw mill, and twenty negroes."

The more ancient names in the States are for the most part far less objectionable. Indian names, such as Niagara, Massachusetts, Missouri, or Arkansas, though not always euphonious, are otherwise unexceptionable. And the same may be said of most of the names given by the trappers and pioneers of the Far West, names such as Blue Ridge, North Fork, Pine Bluff, Red River, Hickory Flats, Big Bone Lick, Otter Creek, and the town of Bad Axe. Henpeck City and Louse Village, both in California, are, to say the least, very expressive, and the town of Why Not, in Mississippi, seems to have been the invention of some squatter of doubtful mind. Such names as Louisiana, Columbia, Pittsburg, Charleston, New York, Albany, Baltimore, Washington, Raleigh, Franklin, or Jefferson, have an historical significance and appropriateness which incline us to excuse the confusion arising from the frequency with which some of them have been bestowed. Much also may be said in favour of names like Boston, Plymouth, and Portsmouth, whereby the colonists have striven to reproduce, in a land of exile, the very names of the beloved spots which they had left. Smithtown and Murfreesboro' may perhaps pass muster, though Brownsville and Indianapolis have a somewhat hybrid appearance. Flos, Tiny, and the other townships which a late Canadian Governor named after his wife's lapdogs, are at all events distinctive names, though perhaps showing a slight want of respect to the inhabitants. But the scores of Dresdens, Troys, and Carthages, are utterly indefensible; they betray quite
as much poverty of invention as Twenty-fourth Street, Fifth Avenue, or No. 10 Island, while they do not possess the practical advantages of the numerical system of nomenclature, and must be a source of unending perplexity in the post-office, the booking-office, and the schoolroom. The geographical etymologist regards a large portion of the names in the United States with feelings which are akin to those experienced by the ecclesiologist who, having traced with delight the national developments of the pointed architecture of Western Europe, beholds the incongruous restorations—so called—for which the last century is to blame, or the Pagan temples, the Egyptian tombs, and Chinese pagodas, with which architectural plagiarists have deformed our cities. Such plagiarisms and incongruities are as distasteful as the analogous barbarisms with which the map of the United States is so wofully disfigured. The further perpetration of such æsthetic monstrosities as those to which reference has been made is now happily impossible. Our architects have taken up the idea of Gothic art, and developed, from its principles, new and original creations, instead of reproducing, usque ad nauseam, servile copies or dislocated fragments of ancient buildings. Would that the same regeneration could be effected in the practice of name-giving! If the true principles of Anglo-Saxon nomenclature were understood, our Anglo-American and Australian cousins might construct an endless series of fresh names, which might be at once harmonious, distinctive, characteristic, and in entire consonance with the genius of the language.

When we attempt a scientific analysis and classification of local names, we find that by far the greater number contain two component elements. One of these, which in Celtic names is generally the prefix, and in Teutonic names the suffix, is

1 Many of the Swabian patronymics which have not been reproduced in England would furnish scores of new names of a thoroughly characteristic Anglo-Saxon type, if combined with appropriate suffixes, such as ham, ton, hurst, ley, worth, by, den, don, combe, sted, borough, thorpe, cote, stoke, set, thwaite, and holt. Thus Senningham, Wickington, Erkington, Frelington, Moringham, Hermione, Lenington, Teppington, Ersingham, Steslingham, Mensington, Relvington, Plenningham, Aldington, Delkington, Ensington, Melvington, are characteristic Anglo-Saxon names, which nevertheless do not appear in the list of English villages.
some general term meaning island, river, mountain, dwelling, or inclosure, as the case may be. Thus we have the Celtic prefixes, Aber, Inver, Ath, Bally, Dun, Kil, Llan, Ben, Glen, Strath, Loch, Innis, Inch; and the Teutonic suffixes, borough, by, bourn, den, don, ton, ham, thorpe, cote, hurst, hill, ley, shiels, set, stow, sted, wick, worth, fell, law, dale, gay, holm, ey, stone, and beck.

This element in names is called the Grundwort by Förstemann. We have already, in the case of river-names, called it the substantival element. The other component serves to distinguish the island, river, or village, from other neighbouring islands, streams, or villages. This portion of the name, which we have called adjectival, has been denominated the Bestimmungswort by Förstemann. There are only about 500 German Grundwörter, which, variously combined with the Bestimmungswörter, constitute the 500,000 names which are found upon the map of Germany. The Bestimmungswort is frequently a personal name—thus GRIMSBY is Grim’s dwelling, ULLSTHORPE is Ulf’s village, Balmaghie is the town of the Maghies, Clapham is the home of Clapha, Kensington the homestead of the Kensings. In a larger number of cases, instead of a personal name we have a descriptive adjective denoting the relative magnitude, the relative position or antiquity, the excellence, or, sometimes, the inferiority of the place, the colour or nature of the soil, or its characteristic productions. A full enumeration, not to say a discussion, of these roots would occupy a volume—we can only append a list of a few of the more important.
LIST OF SOME OF THE
CHIEF ADJECTIVAL COMPONENTS OF
LOCAL NAMES.

I. WORDS DENOTING RELATIVE MAGNITUDE.

From the Celtic word *mor* or *mawr*, great, we have the names of Benmore, and Penmaen-Mawr, the great mountains; Kilmore, the great church; and Glenmore, the great glen. Much Wenlock, Macclesfield, Maxstoke in Warwickshire, Great Missenden, Grampound, and Granville, contain Teutonic and Romance roots of the same import. Similarly *Mississippi* is an Indian term of precisely the same meaning as the neighbouring Spanish name Rio Grande, which, as well as the Arabic *Guadalquivir* (*keber*, great), and the Sarmatian word Wolga, signifies “the great river.” Lakes Winnipeg and Winnipegosis are respectively the great sea and the little sea. From the Celtic *beg* or *bach*, little, we have Bally begg and Inis beg, Glydwr Fach, Pont Neath Vechan, and Cwm Bychan. We find several Teutonic Littleburys, Littletons, and Clintons. Majorca and Minorca are the greater and lesser isles. Boca Chica is the *great* mouth. We find the prefix *broad* in Braddon, Bradley, Bradshaw, Bradford, and Ehrenbreitstein, and some of the Stratfords and Strettons are probably from the root “strait,” and not “street.”

II. RELATIVE POSITION.

The points of the compass afford an obvious means of distinguishing between the places of the same name. Thus we have Norfolk and Suffolk, Wessex, Essex, and Sussex, Northampton and Southampton, Surrey, Westmoreland, Northumberland, and Sutherland; Norton (57) and Sutton (77), Norbury (7) and Sudbury (7), Easton (14) and Weston (36), Eastbury (21) and Westbury (10), Easthorpe and Westhorpe, Norleigh, Sudley and
Westley. The Erse iar, the west, appears in the name of ORMUNDE of West Munster, as well, possibly, as in those of IRELAND and ARGYLE. The ZUYDER ZEE is the southern sea; DEKKAN means the south in Sanskrit; and ALGARBE is an Arabic name meaning the west. The OSTROGOTHS and VISIGOTHS were the eastern and western divisions of the Goths, as distinguished from the Massagetae, or the great Goths, the chief body of the nation. AUSTRIA (Oestreich) is the eastern empire, WESTPHALIA the western plain, and the WESER (anciently Wisaraha) is the western river. From the close resemblance of the sounds it is sometimes difficult to distinguish between roots meaning the east and those meaning the west. Thus OSTEND in Belgium is at the west (ouest) end of the great canal; and OSTEND in Essex is the east end of the land. In Chinese, pih and nan mean respectively north and south. Hence we have PIH-KING and NANKING, the northern and southern courts; PIH-LING and NAN-LING, the northern and southern mountains; NAN-HAI, the southern sea, and the kingdom of AN-NAM, or the “peace of the south.”

PERÆA is the country “beyond” the Jordan. ANTILIBANUS is the range “opposite” Lebanon. TRANSYLVANIA is the country beyond the forest-clad range of mountains which bounds Hungary to the south-east. Hinton (14) is a common name for a village behind a hill, as in the case of Cherry Hinton, near Cambridge. From the German prepositions an, in, and au, we have the names of Amsteg, Andermat, Imgrund, Zermatt, Zerbruggen, and Zermärgern. Many German names beginning with M are due to am or im prefixed to Celtic names. Thus Oersberg has become MARSBerg, Eppenthal is now MEPPENTHAL, Achenthal is MACHENTHAL. From the Anglo-Saxon at, at, we have Atford, Adstock, Otford, and Abridge. From the Celtic preposition ar, upon, by, or at, we obtain such names as ARMORICA, the land “upon the sea,” or ARLES (ar-laeth), the town “upon the marsh.” In the names of POMERANIA, and of PRUSIA, we have the Slavonic preposition po, by. With Netherby, Dibden, Dibdale, Deeping, (the low meadow), Holgate and Holloway, we may contrast High Wycombe, High Ercal, Upton (42), Higham, Highgate, and High-street.

III. RELATIVE AGE.

There are numerous English villages which go by the names of Althorp, Alton, Elston, Elton, Eltham, Elbottle, Alcester, Aldbury, Abury, Albury, Aldborough, Aldburgh, and Oldbury, and on the Continent we find Altorf, Starwitz (Slavonic stary, old), Torres Vedras, Civita Vecchia near Rome, and Citta Vecchia in Malta. On the other hand, there are in England alone more than 120 villages called Newton, besides Newport (12), Newnham (11), Newland (11), Newark, Newbiggen (17), Newbold (11), Newbottle, Newstead, Newbury, Newby, Newcastle (10), Newhall and Newburgh, which we may compare with Continental names like Villeneuve, Villanova, Neusiedel, Neustadt, Novgorod, Neville, Neufchâteel, Nova Zembla, Newfoundland, Naples, and Nablus. These names denote only relative, and not absolute age. Thus the New Castle built by the Normans on the Tyne is now 800 years old, yet still keeps its name; and Nablus
(Neapolis) in Palestine is twice that age, having been founded by Vespasian after the destruction of Samaria. New College is one of the oldest colleges in Oxford, having been founded in 1386; and New Palace Yard, Westminster, is a memorial of the palace built by Rufus.

IV. NUMERALS.

In ancient Anglo-Saxon and German names, the numerals which most commonly occur are four and seven, numbers which were supposed to have a mystical meaning. Such are Sevenoaks, Klostersieben and Siebenbürgen. Nine-elms dates from a later period. We have a mountain group called the Twelve Pins, in Ireland, and Fünfkirchen and Zweibrücken in Germany. Neunkirchen, however, is only a corruption of Neuenkirchen, or New Church, and Ninekirks, in the Lake district, is St. Ninian’s Kirk. The modern names of the ancient Roman stations in the Upper Rhine valley, near Wallenstadt, are curiously derived from the Roman numerals. We find, at regular intervals, as we proceed up the valley, the villages of Seguns, Tertzen, Quarten, Quinten and Sewes. The three cities of Oea, Sabrata, and Leptis in Africa, went collectively by the name of TRIPOLIS. TRIPOLI in Syria was a joint colony from the three cities of Tyre, Sidon, and Aradus. On the Lake Ontario there is the Bay of the Thousand Isles. TERCEIRA, one of the Azores, is the third Island. The LACCADIVES are the ten thousand islands, and the MALDIVES are the thousand isles. The PUNJAB is the land of the five rivers, and the DOAB is the country between the “two rivers,” the Ganges and the Jumna. PLYLIMMON is a corruption of Pum-lumon, the five hills; and MISRAIM, the Biblical name of Egypt, describes either the “two” banks of the Nile, or the “two” districts of Upper and Lower Egypt.

V. NATURAL PRODUCTIONS.

A far larger number of names are derived from natural productions. Mineral springs are often denoted by some corruption of the Latin word Aquæ. Thus we have Aix in Savoy, and Aix near Marseilles; Aix la Chapelle, or Aachen, in Rhenish Prussia; Acqui in Piedmont; and Dax, or Dacqs, in Gascony. The misunderstood name Aquæ Solis, or Aquæ, probably suggested to the Anglo-Saxons the name of Ake mannes ceaster, the invalid’s city, which was changed at a later period to Bath, from a root which also supplies names to Bakewell, anciently Badecanwylla, in Derbyshire, and to the numerous Badens on the Continent. THERMOPYLÆ took its name from the hot springs in the defile; TIERRA DEL FUEGO from its volcanic fires; and REIKJAVIK, or “reek bay,” was the Norse settlement in the neighbourhood of the GEYSERS, or “boilers.” HECLA

1 The ab here is the Sanskrit and Persian word for water, which comes to us from the Persian through the Arabic, and which we have in the word julaφ (gul, rose; and ab, water), as well as in shrub and syrop (scharab).

2 The words geiser, yeast, geist, gas, gust, and ghost, are all from the same root, which signifies something boiling, bubbling up, or overflowing. Compare the cognition of अर्जुन and animus.
was so called from the "cloak" of smoke hanging over the mountain. 
VESUVIUS is an Oscan name, meaning the emitter of smoke and sparks. 
The basaltic columns of STAFFA are well described by its name, "the isle of steps," a Norse name which we have repeated in the case of the basaltic rocks of STAPPEN in Iceland. MISSOURI is the muddy river, and the name may be compared with those of the FOULBECK and the LAMBOURN; while the names of ACCHO or ACRE, and of SCINDE, describe the sandy nature of the country. SANDWICH is the sandy bay: we have many analogous names, such as Sandhurst, Sandon, Sandford, Sandbach, and Peschkow, which last is derived from pesk, the Sclavonic word for sand. ALUM BAY, in the Isle of Wight, is a modern name of the same class. The RIO DE LA PLATA, or river of the silver, took its name from a few gold and silver ornaments which Sebastian Cabot found in the possession of the natives, and which he hoped were indications of an El Dorado, or golden land, in the interior. The GOLD COAST and the IVORY COAST were names appropriately bestowed by early traders. The name of the ANDES is derived from the Peruvian word anta, which means copper.

Many names are derived from animals. We find that of the Ox in Oxley, and perhaps in Oxford; and that of the Cow in Cowley; wooll, the Sclavonic name for an ox, appears in the names of Wollau (14), Wollin (6), and many other places. We find Swine at Swindon, Swinfold, and Swingfield:—Kine at Kinton:—Neat Cattle at Nutford and Netley; and Sheep at Shipton and Shipley. The names of the FAROE ISLANDS, and of FAIRFIELD, a mountain in Westmoreland, are probably from the Norse faar, sheep. Deer, or perhaps wild animals generally (German, Thier; Anglo-Saxon, deor), are found at Deerhurst and Dyrham in Gloucestershire, Dereham in Norfolk, Dereworth in Northamptonshire, and Derby, anciently Deoraby. SCHWERIN, which serves as a name for a German principality and three other places in Germany, is the exact Sclavonic equivalent of Derby.

Other wild animals whose names often occur are: The Stag at Stagbatch and Heurtley: the Roe at Roehampton: the Fox or Tod at Foxley, Foxhill, Foxhough, Todburn, and Todfield: the Wild Boar at Evershot and Eversley: the Seal at Selsey: the Otter at Otterbourn in Hants: the Beaver at Beverley and Nant Frangon: the Badger, or Broc, at Bagshot, at Broxbourne, and at Brokenborough in Wilts, anciently Broken-ebber-egge, or Badger-boar-corner: the Hare at Hornsea, anciently Haraney: the Crane is found at Cranbourne, and the Eagle at Earnley in Sussex, and Arley in Warwickshire, both of which are written Earneleah in the Saxon charters.

ELY was once famous for the excellence of its eels. In the Isle of Ely rents used to be paid in eels. The Norse word for a salmon is lax. Hence we have Laxvoe, or "salmon bay" in Shetland, Loch Laxford in Sutherland, the Laxay, or "salmon river," in the Hebrides, and also in Cantire, the river Laxey in the Isle of Man, and five rivers called Laxa, in Iceland. We have Laxweir on the Shannon, Leixlip, or salmon-leap, on the Liffey, and Abbey Leix, in Queen's County. ZEBOIM is the ravine of hyænas, and AJALON the valley of stags. BERNE takes its name from the
bears with which it formerly abounded. Arlb erg in the Tyrol is the Adlersberg, or eagle's mountain: and Haps burg, the stammschloss of the Austrian dynasty, is hawk castle. Swan River was so called from the number of black swans seen there by Vlaming, the first discoverer. The River Uruguay takes its name from the uru, a bird found on its banks. Chicago is the city of the skunk. The Azores when discovered were found to abound in hawks; the Canaries in wild dogs; the Camaroons in shrimps (Portuguese, camarões, shrimps); the Galapagos islands in turtles; and the Bay of Panama in mud fish. There are five islands called Tortuga, either from the turtles found on the coast, or from their turtle-like shape. The island of Margarita received its name from the pearls which Columbus obtained from the inhabitants. The island of Barbadoes is said to have derived its name from the long beard-like streamers of moss hanging from the branches of the trees; the island of Barbuda from the long beards of the natives; and the Ladrones from their thievish propensities. The Patagonians were so called by Magalhaens from their clumsy shoes. The name of Venezuela, or little Venice, is due to the Indian villages which were found built on piles in the lake Maracaibo.

Names derived from those of plants are found in great abundance. We have, for example, the Oak at Acton, Auckland, Okely, Oakely, and Sevenoaks. From the Erse aoire, an oak, we deduce the names of Derry and Kildare. We have the Elm at Nine Elms, Elm don, Elmstead, and Elmwell; the Ash at Ashton and Ashley; the Beech at Buckland and Buckhurst; the Birch at Berkeley, Bircholt, and Birbeck; the Lime at Lindfield and Lyndhurst; the Thorn at Thornet; the Hazel at Hasilmere; the Alder at Allerton, Aldershott, Allerdale, Olney, and Ellerton; the Apple at Avallon, or Apple Island, Appleby, and Appleton; the Cherry at Cherry Hinton; the Broom at Bromley and Brompton; the Fern at Farnham and Farnborough; Rushes at Rusholme; Sedge at Sedgemoor and Sedgely; Reeds at Rodeney and Retford; and Shrubs at Shrewsbury and Shawbury. The names of Brescia and Brussels have been referred to a root connected with the low Latin bruscia, thicket, or brushwood, though Brussels may be from the Flemish brecksal, a swamp. Among Sclavonic roots of this class are dru, the oak, which is very common: there are 200 places called Dubrau. Brasa, the birch, occurs in the names of 40 places, as Braslaft: lipa, the lime, occurs in the names of 600 places, as Leipzig, the “linden town:” and we have topol, the poplar, at Toplitz.

The Mount of Olives and the Spice Islands are familiar instances of this mode of nomenclature. Saffron Walden took its name from the saffron, the cultivation of which was introduced in the reign of Edward III. and which still to some extent continues. Gulistan is the place of roses. The name of Scio comes from scino, mastic. Tadmor, or Palmyra, is the city of palms. Phoenicia is perhaps the land of palms. En Rimmon is the Fountain of the Pomegranate. Cana, which stands close to the lake, is the reedy. Beth Tappauh is the apple orchard, and Anaab means the grape. Java is the isle of nutmegs (jayah), and Pulopenang means, in Malay, the island of the areca nut. Malacca derives its name from the malaka tree (Phyllanthus emblica), the medicinal properties of whose fruit
caused it to be much sought after. BRAZIL, as we have seen, was named from the red dye-wood, which was the first article of export. KARTOOM on the Upper Nile takes its name from the safflower (Carthamus tinctorius), a valuable oil-bearing plant, locally called the Gartoom. Mount IDA is the wooded height. MADEIRA, when discovered by the Portuguese in 1418, was found uninhabited and covered with dense forests. It received its name from the Portuguese word madera, timber (Latin materia). The RIO MADEIRA, an affluent of the Amazons, still flows through the immense forests from which it took its name.

VI. QUALITY.

Names implying the excellence of the locality are far more common than those implying the reverse. Thus FORMOSA, FUNEN, and JOPPA, in Portuguese, Danish, and Hebrew, mean fine, or beautiful. VALPARAISO is Paradise Valley, and GENNESARETH is nearly identical in meaning. The name of BUENOS AIRES describes the delicious climate of Southern Brazil. The PACIFIC Ocean seems calm to those who have just weathered the tempests of Cape Hoorn. BUNGA is probably from the French bon gué, fair ford; the existence of a French name being accounted for by the adjacent Norman castle of Hugh Bigot. PALERMO, a corruption of Panormus, is the haven sheltered from every wind. The Genoese gave BALACLAVA its name of the beautiful quay, bella chiava. OHIO, in Iroquois, means the beautiful river. The name of BOMBAY is from the Portuguese bona bahia, the good bay, and well describes the harbour, one of the largest, safest, and most beautiful in the world. BAGDAD is the "garden of justice." ISPHAHN the "half of the world," and ASTRAKHAN the "city of the star." CAIRO is the Anglicized form of the Arabic El Kahirah, the "victorious." The real name of Cairo is Misr; El Kahirah or Cairo is only a title of honour applied to the city, just as Genoa is called "La Superba," Verona, "La Degna," Mantua, "La Gloriosa," Vicenza, "L'antica," and Padua, "La Forte." The name of Cairo may be compared with that of VITTORIOSA, a suburb of Valetta which was built at the conclusion of the great siege. The Romans often gave their colonies names of good omen, as Placentia, now PIACENZA; Valentia, now VALANCE, VALENTZ, and VALENTIA; Polentia, now POLENZA; Potentia now S. MARIA POTENZA; Florentia, now FIRENZE or FLORENCE; Vicentia, now VICENZA; Faventia, now FAENZA; Bona, now BONN; and the queenly city Basilia, now BASEL or BALE.

Names of bad omen are rare. From the Anglo-Saxon hæan, poor, we have Henlow, Hendon, and Henley. PERNAMBUCO means the mouth of hell, and BAB-EL-MANDEB the gate of the weeping place. MALPAS is the bad frontier pass. DUNGENESS (danger cape) and Cape PELOURS express the terrors of the sailor. Caltrop, Colton, Caldecote, and Cold Harbour, are all cold places. A volcano broke out on the "most beautiful" island of CALLISTE, which caused the name to be changed to THERA, "the beast." At the time of a subsequent eruption the island was placed under the protection of the Empress St. Irene, whose name it still bears in the form of SANTORIN.
VII. CONFIGURATION.

A few names, chiefly those of islands, bays, and mountains, are derived from the configuration of the land. Thus ANGUILLA is the eel-shaped island. Drepanum, now TRAPANI, is from a Greek word, meaning a sickle. ZANCLE, the original name of Messina, is said to be derived from a Siculian root of the same significance. SICILY perhaps comes from a root allied to SICA, a sickle, and the name seems to have been first applied to the curved shore near Messina, and then extended to the whole island. ANCONA, which preserves its original name unchanged, is built at the place where Monte Conero juts out into the sea and then recedes, forming a sort of bent "elbow" (ἀγκών). The name of GOMPHI, near Pindus, expresses the "wedge-shaped" formation of the rocks, and may be compared with that of the NEEDLES in the Isle of Wight, or the opposite columned cape at STUDLAND (Anglo-Saxon stūda, a pillar). At METEORA the convents are poised "aloft in the air" on the summits of rocky columns. The name Trapezus, now TREBIZOND, on the Black Sea, is identical in meaning with that of TABLE MOUNTAIN at the Cape. MONTE VIDEO takes its name from a conspicuous hill which rises to the height of 500 feet just behind the harbour. The ORGAN Mountains in Brazil derive their name from the fantastic forms of the spires of rock, resembling a row of organ pipes. PHIALA, in Palestine, is the "bowl." RHEGIUM is the "rent" between Sicily and Italy. TEMPE is the "cut" (τεμπό) in the rocks through which the Peneus flows, and DETROIT the "narrrows" between Lake Erie and Lake St. Clair.

VIII. COLOUR.

The adjectival element in names is frequently derived from colour. Names of this class are often admirably descriptive. How well, for instance, the Northmen described a conspicuous chalk cliff, past which they steered to Normandy, by the name of Cape GRISNEZ, or the grey nose. CAPE BLANCNEZ, close by, is the white nose. CAPE VERDE is fringed with green palms. The local name for the Indus is the ILAB, the blue river; and the name of the Blue Nile is, perhaps, an unconscious reduplication.¹ The MINNESOTA is the sky-coloured water. The XANTHUS is the yellow river. The RIO COLORADO takes its name from its deep red colour; RATBY, RUGBY, and RUTLAND, from their red soil. RATCLIFFE, at Bristol, is the red cliff. The Red Sea, the Black Sea, the Yellow Sea, and the White Sea, are translated names. The city of Hatria or ADRIA, from which the Adriatic took its name, is the black town, so called, perhaps, because built on a deposit of black mud. The KEDRON is the black valley. From the Celtic dhū, black, we have the names of DUBLIN, the black pool or linn, and the DOUGLAS, or black water, in Lancashire, Scotland, and the Isle of Man. The RIO NEGRO and the River MELAS are also the black rivers. The River LYCUS is, as we have seen, the white river, and not the wolf river. The

¹ Pott thinks the name of the Nile is only an accidental coincidence with the Sanskrit nīla, blue, whence, through the old French neel, we obtain the verb to anneal. Compare neelah, the Indian name of indigo.
HVITA, a common Norse river-name, is the white water. Names like Blackheath, Blackmore, Blakeley, or Blackdown, are very ambiguous, as they may be either from the English black, or from the Norse blæka, which means white. Compare the English verb to bleach or make white, the German bleich, pale, and the French blanc. The bleak is the white fish. Some of these names, however, may be from the Celtic blaigne, a hill. From the Slavonic bel, white, we have Belgrade and Bolgrad, the "white castles," and scores of names in Eastern Germany, such as Biela, Bielawa, Beelow, Bilau, and Biilow. The Turkish Ak-kerman is the white castle. From the Wendish zarny, black, we have Sarnow, Sarne, and many other names; from seleny, green, come Zielonka and Zelenetz; and so on through the whole range of the spectrum.

The names of mountains are naturally derived in many cases from their prevailing hue. Thus we have the Polgheries, or the "blue hills" of India, the Blue Ridge of Virginia, and the Blue Mountains of New South Wales and Jamaica. From the Gadhelic gorm, blue, we have Bengorm in Mayo, and the Cairngorm group in the Highlands. Roger Williams tells us that the name Massachusetts is an Indian word, meaning the blue hills. The hills of Vermont are clothed to the summit with green forests, while the Sierras Morena of Spain is the "sombre range" (Latin morus), and the Sierra Vermeja is the "red range." From the Welsh coch, red, we have Cribe Goch, the name of the striking peak which overhangs the pass of Llanberis,\(^1\) while Monte Rossi, one of the peaks of Etna, and Monte Rosso, an outlier of the Bernina, are so called from their characteristic russet or rosy hue. A very large number of the loftiest mountains in the world derive their names from their white coverings of snow. From the Sanskrit hima, snow (cf. the Latin hiems, winter, and the Greek χόν, snow), and ala, an abode (cognate with the verbs to lie, and lay, and the common English suffix ley), we have the name of the majestic Himálaja, the perpetual "abode of snow." Himaprastha is the snowly head, Himawat is the snow-covered, and the names of the Haemus and the Imaus are from the same root. Dwajalagiri is the "white mountain," and Cvétaghara, the second highest peak of Dwajalagiri, is the white castle. The Akhtag in Bokhara are the white mountains, and from the Hebrew laban, white, we deduce the name of Lebanon. The hoary head of Djebel Esh Sheikh,\(^2\) the chief summit of the Lebanon, is covered with snow even during a Syrian summer. We are told by Pliny that Graucusus, the old Scythian word from which we derive the name of the Caucasus, means nive candidus. This is evidently cognate with the Sanskrit

\(^1\) Cf. the Latin coccus. The cock is the "red" bird.

\(^2\) This Arabic word seems to have been adopted from the Persian shah, a king. The name of Xerxes (Khshayaoarsha) is the "venerable king;" that of Artaxerxes is the "great venerable king." The English ramifications of this root are curious to trace. We received the game of chess from the Persians through the Arabs. The name of the game is a corruption of shah or sheik. We cry check (king), to give notice that the king is attacked; check mate means "the king is dead." The verb mata, "he is dead," we have in the name of the Spanish matador, who kills the bull. The word checkered describes the appearance of the board on which the game is played. In the Court of Exchequer the public accounts were kept by means of tallies placed on the squares of a chequered cloth. Hence the phrase to check an account, and the other uses of the verb to check.
The former part of the name seems to be related to the Greek 
χπιος, and the latter to the Latin castus. The Mustagh are the ice
mountains. The name of the APENNINES has been explained by a reference
to the Welsh y-pen-ghwvyn, the white head. OLYMPUS derives its name from
its glittering summit (αδυνο), snow-clad till the month of May. The
BILOUKA, the giant of the Altai, is the white mountain; and a range in
China is called SIU-E-LING, or the snow mountains. More obvious are the
etymologies of Mont Blanc, the Sierra Nevada in Spain, the Nevada in
Mexico, Ben Nevis in Scotland, Snowdon in Wales, Sneehattan in Norway,
Sneeuwbergen in the Cape Colony, two Snaefells in Iceland, Sneefell in the
Isle of Man, Schneekoppe, the highest peak of the Riesen Gebirge, Snee-
berg, Sneekopf, and the Eisthaler Spitze, in the Carpathians, and the Weiss-
horn, Weissmies, Dent Blanche, and many other peaks in Switzerland. The
names of the Swiss mountains are often admirably picturesque and descrip-
tive. How well do the words Dent, Horn, and Aiguille describe the rocky
teeth, spires, and pinnacles of rock which shoot up into the clouds. How
appropriate, too, are the names of the SCHRECKHORN, or “Peak of Terror”,
of the WETTERHORN, the “Peak of Storms,” which gather round his head
and reverberate from his fearful precipices; of the EIGHER, who uprears his
“giant” head; the MÖNCH, with his smooth-shaven crown; the JUNGFRAU,
or “Maiden,” clad in a low descending vesture of spotless white; the glit-
tering SILBERHORN; the soft disintegrating rock of the ill-conditioned
FAULHORN; and the DENT DU MIDI, the “Peak of Noon,” over whose riven
summits the midday sun streams down the long Rhone valley to the lake.
PILATUS, the outlier of the Bernese chain, takes his name from the “cap”
of cloud which he wears during western winds. On the other hand, the
MATTERHORN, the most marvellous obelisk of rock which the world con-
tains, takes its name, not from its cloud-piercing peak, but from the scanty
patches of green meadow which hang around its base; and which also give
their name to ZERMATT—the village “on the meadow.”

The root alp, or alb, is widely diffused throughout the Aryan languages.
Al, high, is common in Shropshire names, as Erical, Shifnal, and Peck-
nall. The Gaelic and Welsh word, alp, means a height or hill, and is no
doubt connected with the root of albus. Hence we obtain the name of the
devs, who are the “white beings.” In Switzerland the ALPS are now
not the snowy summits, but the green pasturages between the forests and
the snow line. ALBANIA, as seen from Corfu, appears as a long snowy
range. We may refer the name ALBION to the same root; it may have
been bestowed on the land lying behind the white cliffs visible from the
coast of Gaul. ALBANY (Duke of Albany), the old name of Scotland,
means probably the hilly land.

The name of the PYRENEES is probably from the Basque word pyrje, high;
that of the URAL is from a Tatarian word meaning a belt or girdle.
The name of the CARPATHIANS comes, we have seen, from the Slovonic
chribat, a mountain range, or gor, a mountain, which is related to the Greek
δοσ. HOR means the mountain; PISGAH, the height; SION, the upraised;
HERMON, the lofty peak; GIBEAH, the hill; and SAMOS, the lofty.
LIST OF SOME OF THE CHIEF SUBSTANTIVAL COMPONENTS OF LOCAL NAMES.

I. NAMES OF MOUNTAINS AND HILLS.

PEN; Welsh; a head, hence a mountain. E.g. Pennigant, Ben
CENN; Gadhelic; Nevis, Kenmore, Kent, Cantal. p. 147.
BEN; Gadhelic;
COP; Saxon; a head. E.g. Malcop.
MONADH; Gaelic; a bald head. E.g. Monadh liadh, Inverness;
MYNYDD; Welsh; Mynydd-Mawr, Carnarvonshire.
MULL; Scotland; Gaelic maol; a headland. E.g. Mull of Cantyre.
MOEL; Wales; a round hill. E.g. Moel Siabod.
DODD; Cumbria; a mountain with a round summit. E.g. Dodd Fell.
ARD; Celtic; a height. E.g. Ardrossan.
TOR; Celtic; a tower-like rock. E.g. Mam Tor. pp. 55, 150.
PEAK; England; allied to the words beak, spike, spit. Spithead is
PIKE; England; at the end of a long spit of sand. E.g. Peak of
PIC; Pyrenees; Bec; Piedmont;
PIZ; Tyrol;
SPITZ; Germany; Puy; Auverne;
GEBEL; Arabic; a mountain. E.g. Gibraltar, Gebel Mousa.
BARROW; Anglo-Saxon beorh, a hill. Liable to be confused with
BOROUGH; names from burh, an earthwork. E.g. Ingleborough,
BERG; Brownberg Hill, Queensberry, Erzberg. pp. 81, 172.
GORA; Slavonic; a mountain. E.g. Görlitz, Carpathians.
CARRICK; Ireland;
CRAIG; Wales; Gadhelic, carraig; Cymric, craig, a rock or crag.
CRICK; England; E.g. Craigruigh, Carrickfergus, Cricklade. p. 150.
CRAU; Savoy;
CHLUM; Slavonic; an isolated hill. There are forty-seven places in Bohemia alone which go by this name or by its diminutive Chhumetz.

DAGH or TAGH; Turkish; a mountain. E.g. Altai, Agridagh, Belurtagh (the cloud mountains), Mustagh (the ice mountains).

SHAN; Chinese; a mountain. E.g. Quinsam.

TELL; Arabic; a heap, a small hill.

KOM; Arabic; a high mound.

LOW; England; LAW; Scottish border;\{ Anglo-Saxon hlaw, a mound, a rising ground. \} E.g. Hounslow, Ludlow, Marlow, Moodlaw.

HOW; Cumbria;\{ Norse, haugr, a mound. Old High German houe, of which the German hügel is a diminutive. \} E.g. Fox How, Silver How. p. 125.

HILL; Anglo-Saxon hyl, Norse holl.

KNOTT; a small round hill. E.g. Ling Knott, Amside Knott.

SLIABH or SLIEVH; Erse; a mountain. E.g. Sliev Beg. p. 165.

SLIEU; Manx; \{ FELL; Norse fjeld; a hill-side. E.g. Goatsfell in Arran. \} FELS; German; a rock. E.g. Drachenfels.

DUN; Celto-Saxon; a hill fort. E.g. London, Dunstable.

BRYN; Welsh; a brow, hence a ridge. E.g. Brandon. p. 146.

DRUM; Ireland; Erse druim, a back or ridge. E.g. Dromore, Dundrum.

CEFÆN; Cymric; a back, hence a ridge. E.g. Les Cevennes. p. 146.

RUDGE; \{ England; a back or ridge. Anglo-Saxon hryeg; German rücken, RUDGE; \} a back; cf. the English rick-yard. E.g. Reigate, Rupeley, Rigge; Rudge.

SIERRA; Arabic. Not, as is usually supposed, from the Latin serra, a saw, but from the Arabic sehra, an uncultivated tract. E.g. Sierra Nevada.

CORDILLERA; Spanish; a chain.

HORN; German; a peak. E.g. Matterhorn, Schreckhorn, Wetterhorn.

ROG; Slavonic; a horn.

DENT; French; a tooth. E.g. Dent du Midi.

BLUFF; American. A bluff, as distinguished from a hill, is the escarpment formed by a river running through a table-land.

MONT; France;\{ a mountain. Latin mons. E.g. Mont Blanc, Mont-Monste; Italy;\} martre, Monte Rosa.

KNOCK; Gadhelic; a hill. E.g. Knocknows, Knockduff. p. 203.

ALT; Welsh; a steep place. E.g. Builth, Altcar.

BALM; Celtic; an overhanging wall of rock; a cave: not uncommon in Switzerland and France. E.g. Col de Balm.

SCAR; Norse; a cliff. E.g. Scarborough.

GOURNA; Arabic; a mountain promontory.

NESS; Norse; a nose or headland. E.g. Wrabness, Sheerness. p. 108.

RAS; Arabic; a cape.

ROSS; Celtic; a promontory. E.g. Rossberg, Kinross, Roseneath, Melrose, Ross.

BRE; Celtic; a promontory. E.g. Breton.
II. PLAINS.

GWENT; Celtic; a plain. E.g. Winchester. p. 154.

CLON; Ireland; Erse cluain, a plain surrounded by bog or water. E.g. Clonmel, Cloyne. It occurs four times in Shropshire. E.g. Clunbury.

PLUN; Sclavonic; } a plain. E.g. Plöner See, in Holstein.

PLON; Sclavonic; } a plain. E.g. Plöner See, in Holstein.

LAN; Celtic. p. 153.

LAND; English; } a plain. p. 106.

DOL; Celtic; a plain. E.g. Toulouse, Dolberry.

BLAIR; Gadhelic; a plain clear of wood. E.g. Blair Atholl.

SHARON; Hebrew; a plain.

TIR; Welsh; land. E.g. Cantire.

BELED; Arabic; a district.

GAU; Teutonic; a district. Cf. the Greek γῆ. E.g. Spengay in Cambridgeshire, Wormegay in Norfolk.

MAN; Celtic; a district. E.g. Maine, Manchester.

BRO; Celtic; a district. E.g. Pembroke.

KUND; India; a province. E.g. Bundelkund.

MAT; Swiss;

MAES; Welsh; } a field. E.g. Andermat, Masham, Maynooth, Mar-

MAGH; Erse; } magen.

MAG; Gaulish;

ING; Anglo-Saxon; a meadow. E.g. Ingham.

SAVANNAH; Spanish; a meadow.

AC; France; sometimes a corruption of agh; sometimes of the Celtic agh, or axē, water; sometimes of the Teutonic aha or ahi; more often the Celtic derivative particle. pp. 263, 334.

III. VALLEYS.

GLYN; Wales; } a narrow valley. E.g. Glynneath, Glencoe.

GLEN; Gaelic;

STRATH; Gaelic; a broad valley. E.g. Strathclyde, Stratherne.

THAL; German;

DALE; Northumbrian; } a valley. E.g. Lonsdale, Arundel, Frankenthal.

DELL; Southumbrian; } Names in dol are very common in Bohemia and Moravia. pp. 106, 125.

DOL; Sclavonic;

VYED; Malta; } Arabic, wadi, a ravine, valley, or river. E.g. Guadal-

GUAD; Spain; } quiver. pp. 67, 70.

COMBE; Celto-Saxon; } a bowl-shaped valley. E.g. Wycombe, Cwm

CWM; Welsh;

KOTL; Sclavonic; } a kettle or combe.
IV. FORESTS.

**HOLT**; Anglo-Saxon; a copse. *E.g.* Bagshot, Sparsholt. pp. 125, 244.

**HURST**; England; thick wood. Anglo-Saxon *hyst*. *E.g.* Lyndhurst, p. 244.

**HORST**; Germany; Penshurst.

**HART**; Germany; a forest. *E.g.* Bohrau.

**CHART**; England; a forest. *E.g.* Hunhart, Seal Chart. p. 244.

**BOR**; Sclavonic; a forest. *E.g.* Bohrau.

**DROWO**; Sclavonic; a wood. *E.g.* Drewitz.

**GOLA**; Sclavonic; a wood. *E.g.* Gollwitz.

**WEALD**; England; woodland; related to *holt*. Anglo-Saxon *wudr*., and *weald*; Old High German, *witu*. *E.g.* Waltham, Walden, The Cotswolds, Wootton, Schwarzwald, Emouweude. p. 244.

**WOUD**; Netherlands; *woold*.

**ACRE**; a field. Latin *ager*, Low Latin *acra*. *E.g.* Longacre.

**SHAW**; England; a shady place; a wood. Anglo-Saxon *scaga*; Norse *skogr*. *E.g.* Bagshaw. Liable to be confused with *haw*. pp. 125, 244.

**HAW**; German *gehaw*, a place where the trees have been hewn. Nearly the same as field. Liable to be confused with names from *hlaw*, a hill. pp. 106, 245.

**FIELD**; Anglo-Saxon *feld*, a forest clearing, where the trees have been felled. *E.g.* Sheffield, Enfield.

**ROYD**; Teutonic; land that has been ridded of trees. Low Latin *terra rodata*. *E.g.* Huntroyd, Holroyd, Ormeroyd. Names in *rod*, *rode*, or *roth* are common in Hesse; liable to be confused with *rithe*, running water, and *rhyd*, a ford.

**LUND**; Norse; a sacred grove. *E.g.* Lundgarth. p. 224.

**NEMET**; Celtic; a sacred grove. *E.g.* Nismes, Nymet Rowland. p. 224.

V. ISLANDS.

**VINYS**; Welsh; an island. *E.g.* Inchiquin and Inchkeith in Scotland; Enniskillen, Ennismore, Ennis, and at least 100 names in Ireland, as well, perhaps, as Erin and Albion. p. 239.
ONOMATOLOGY.

EV; Teutonic; an island. From the Anglo-Saxon ea, Norse oe. Eyot
A; is the diminutive of ey, ait the contraction of eyot, and eyre, ayre,
OE; and aire are the plural forms. E.g. Saltaire, Stonaire, Eyre,
AY; Sheppey, Rona, Faroe, Colonsay. pp. 108, 114, 124, 236.
HOLM; Norse; an island in a river. E.g. Flatholm. pp. 108, 125.
JEZIRAH; Arabic; an island. E.g. Algiers, Algeziras. p. 68

VI. RIVERS AND WATERS.

A; Anglo-Saxon ea; Norse a; Old High German aha; Gothic ahva.
AVON; Celtic; a river. p. 132.
DWR; Cymric; water. p. 133.
ESK; Celtic; water. p. 135.
WY; Cymric; water. p. 137.
BURN; England.
BRUNNEN; Germany; a stream. E.g. Blackburn, Tyburn, Hachborn.
BORN; Hesse.
BROOK; Anglo-Saxon bróc, a rushing stream.
BECK; Northumbria; a small stream. E.g. Welbeck, Holbeck, Caude-
BACH; Germany; bec. There are fifty names in batch in Shrop-
BATCH; Mercia; a batch (i.e. Schnell-bach). pp. 106, 124.
BEC; Normandy; a river. E.g. River Regan.
REKA; Sclavonic; river. E.g. River Regan.
WODA; Sclavonic; water. E.g. River Oder.
GOL; Mongolian; a river. E.g. Khara-gol, the black river; Shara-gol, the
yellow river.
RUN; Anglo-American; a brook. E.g. Bull’s Run.
CREEK; Anglo-American; a small river. E.g. Salt Creek.
FORK; Anglo-American; a large affluent. E.g. North Fork.
PARA; Brazilian; a river. E.g. Parahiba, Paraguay, Parana, Paranybuna.
KIANG; Chinese; a river. E.g. Chinkiang.
RITHE; Anglo-Saxon; running-water. E.g. Meldrith, Shepreth.
FORCE; Northumbria; a waterfall. E.g. Airey Force, Skogar Foss. p. 106.
FOSS; Iceland.
FLEET; England; a flowing stream. E.g. North-
FLEUR; Normandy; fleet, Byfleet, Harfleur. pp. 124, 184.
VLEY; Cape.
GANGA; India; a river. In Ceylon most of the river-names terminate in
ganga. The Ganges is “the river.”
BIRKET; Arabic; a lake.
LINN; Celtic; a deep pool. E.g. Lincoln, Linlithgow, Dublin, Lynn. p. 144.
TARN; Lake District; a small mountain lake, lying like a tear on the face
of the hill. Norse tórr, a tear. E.g. Blentarn.
KELL; England; a place whence water flows forth. Cf. the Wel-
WELL; England; land, which is a tidal stream.
QUELLE; Germany;
Al'; Arabic; a fountain. E.g. Engedi, the fountain of the kid; Enrogel, the fountain of the foot. pp. 67, 73.

Be'er; Hebrew; a well. E.g. Beersheba, Beyrouth. p. 67.

Bir; Arabic; a canal.

Bahr; Arabic; a canal.

Bala; Welsh; effluence of a river from a lake.

Aber; Cymric; a confluence of two rivers, or of a river and the sea.

Inver; Gadhelic; E.g. Abergavenny, Inverness. p. 163.

Condate; Old Celtic; a confluence of two rivers. E.g. Conde, Ghent.

Bun; Erse; the mouth of a river. E.g. Bundoran.

Wick; Norse; a bay. E.g. Sandwich. p. 107.

Pool; Welsh pwl, an inlet or pool. E.g. Pill in Somerset, Poole in Pill.

Ford; England; Norse fjord, an arm of the sea. E.g. Orford, Haverford.

Fjord; Iceland; ford, Fjæra Fjord. p. 106.

Over; Anglo-Saxon, ofer; German, über; a shore. E.g. Hanover, Overyssel, Over near Cambridge, Wendover. Andover is not from the root ofer, but waere.

Shore; E.g. Shoreham.

Or; Anglo-Saxon ora, the shore of a river or sea. E.g. Bognor, Cumnor, Oare near Hastings, Elsinore. Windsor was anciently called Windlesora, the winding shore. Oure in Iceland denotes a narrow strip of land between two waters.

Tra; Erse; a strand. E.g. Tralee, Ballintra.

Mere; Anglo-Saxon; a lake, a marsh. E.g. Foulmire, Mersey, Morton.

Moor; Blackmore.

Morfa; Welsh; a marsh. E.g. Penmorpha.

Moss; Anglian; a bog. E.g. Chatmoss.

Jasor; Sclavonic; a marsh.

Ruemme; Celtic; a marsh. E.g. Romney. pp. 142, 237.

Rhos; Celtic; a moor. E.g. Rossall, Rusholme. p. 150.

VII. ROADS, BRIDGES, FORDS.

Gate; England; Gute; Kent; a passage, a road or street. E.g. Reigate, Gatton, Ramsgate, Calcutta. pp. 168, 225.

Ghat; India; Ghaud; India; a ford.

Ath; Erse; a ford. E.g. Athlone.

Rhyd; Welsh; a ford.

Wath; Northumbria; a ford. Related to the verb to wade.

Wash; Southumbria; a ford.

Forde; Hanover; Pont; Welsh and French; a bridge. E.g. Pontaberglaslyn, Pontoise. p. 170.

Most; Sclavonic; a bridge. E.g. Babimost, Motzen, Maust.
BRIDGE; England; } a bridge. E.g. Brixton, Bruges, Innsprück, Wey.
BRUCKE; Germany; } bridge, Briançon. p. 254.
BRIVA; Old Celtic; } E.g. Babelmandeb.
BAB; Arabic; } a gate. street; Latin and Saxon; } a road. E.g. Stretton, Stratford. p. 167.
SARN; Welsh; } a road. E.g. Sarn Helen.

VIII. HABITATIONS AND INCLOSURES.

HEIM; Germany; } a home. E.g. Hocheim, Buckingham, Rysum, Ham.
HAM; England; } burg. p. 82, 92, 101.
HEN; Picardy; }
UM; Friesland;
TON; Anglo-Saxon tun, an inclosure. Hence a village. p. 79.
WICK; Anglo-Saxon wik, an abode. Related to the Latin vicus. p. 107.
WAS; Slavonic; } a village. E.g. Weska, Wasowitz.
WIK; Slavonic; } a market. E.g. Fourteen places called Wick.
WELDER; Germany;
VILLIERS; France; }
VILLE; Normandy; } an abode, a house. E.g. Berweiler, Hardivilliers,
WILL; England; }
WELL; }
BALLY; } Gadhelic baile, an abode. Equivalent to the Cymric tre and
BAL; } the Norse by. E.g. Ballymena, Balbriggan. p. 184.
BALLA; }
ABAD; India; } an abode. E.g. Allahabad.
BY; England; } Norse byr, an abode. E.g. Derby, Elbœul,
BŒUF; Normandy; } Amelsbüren.
BÜREN; Germany; }
BOTTLE; }
BOLD; England; }
BÜTTEL; Germany; } byllian, to build. Rare in Anglo-Saxon names.
BLOD; Friesland; } E.g. Newbottle, Wolfenbüttel, Bothwell.
BUS; Slavonic; } a dwelling. E.g. Trebus, Lebbus, Putbus.
BUDA; Slavonic; } a hut. E.g. Buda, Budin, Budan, Budkowitz.
BOD; }
STAN; Persian; } a place. E.g. Kurdistan, Hindostan, Beloochistan.
STEAD; England; } Anglo-Saxon stede, a place. E.g. Hampstead, stadt; Germany; } Darmstadt.
STOKE; } Anglo-Saxon stoc, a stockaded place. E.g. Bristol, Chepstow,
STOW; } Tavistock, Stockholm. p. 50.
SET; from Anglo-Saxon seta, a settlement. E.g. Dorset.
SETER; Norse; } a seat or dwelling. E.g. Ellanverter, Seatoller, STER; Norse; } Ulster.
SEDLO; Slavonic; } a possession. E.g. Sedlitz.
TRE; Cymric; } a village. E.g. Tredegar, Trêves. p. 152.
THORPE; England; Norse thorpe, German dorf, a village. E.g. Althorp, Ibthorp, Rorup, Wanderup, Dusseldorp. pp. 105, 124.

TROP; Holstein; a house. E.g. the portage at the falls of the Rhine is Schaffhausen, "at the ship-houses.”

DORF; Germany; The dative plural hausen is the commonest suffix in German names.

HOUSE; England; E.g. the portage at the falls of the Rhine is Schaflhausen, "at the ship-houses.”

HAUS; Germany; E.g. Tynycornel. p. 153.

HAUSE; Germany; E.g. Jäschen, Jäschwitz.

DOM; Sclavonic; a house.

DOM; Sclavonic; a house.

ETH; Hebrew; a house. E.g. Bethany (house of dates), Bethlehem (house of bread), Bethsaida (house of fish), Bethel (house of God), Bethhoron (house of caves), Bethphage (house of figs).

COTE; Anglo-Saxon; a mud cottage. Coton is the plural of cote. E.g. Fosscot, Coton Hill in Shropshire.

SELL; Anglo-Saxon; a cottage, a little superior to cote.

HALL; Anglo-Saxon; a stone house. E.g. Coggeshall, Mildenhall, Sall; Anglo-Saxon; Walsall.

CLERE; Anglo-Norman; a royal or episcopal residence on a lofty hill. E.g. Highclere, Burghclere, Kingsclere. p. 126.

SCALE; Norse; a shepherd’s hut. Cf. the Scotch, a shealing. E.g. Portinscale, Scalloway. p. 200.

FOLD; Anglo-Saxon; an inclosure made of felled trees. pp. 80, 106.

TOFT; Danelagh; Norse; an inclosure; related to turf. E.g. Lowestoft, Tot; Normandy; Yvetot, Totness. pp. 105, 124.

THWAITE; Norse; a forest clearing. E.g. Finsthwaite. p. 105.

LEBEN; Germany; a place to live in. This suffix is very prevalent north of the Hartz.

WORTH; Anglo-Saxon and German; an inclosure. E.g. Tamworth, Königsworth. p. 80.

HAGEN; Germany; a place surrounded by a hedge; a park. E.g. Roundhay, Hagendorn, La Haye Sainte. p. 81.

HAIGH; E.g. Cadiz.

GADIR; Phoenician; an inclosure. E.g. Carthage. p. 62.

GARTH; Norse; an inclosed place. E.g. Fishguard, Applegarth.

YARD; Anglo-Saxon; p. 80, 123.

GOROD; Russian; a burgh; related to gora, a mountain, just as burg is related to berg. E.g. Gratz in Styria, Königssgrätz in Bohemia, Novgorod (new town), Belgrade (white castle), Stargard (Aldborough). p. 80.

BURG; from the Anglo-Saxon burh, buruh, and byrig; an earthwork, hence a fortified town. Related to the Celtic briga and the Sclavonic gorod. pp. 81, 172.
CHESTER; Saxon; } From the Latin castra. E.g. Winchester, Leicester, Doncaster. p. 173.
CESTER; Mercian; } Either related to the preceding, or to the Erse cathair, a fortress. E.g. Caermarthen, Carlisle.
CASTER; Anglian; } Anglo-Saxon stan, a stone. Old German stain.
CAER; Welsh; } The steens in Holland are castles built of stone or brick (Dutch gebakken steen). Many of the German steins are stone castles. E.g. Robesteone, Ehrenbreitstein, Brunsteen.
CAR; Welsh; } E.g.
KER; Brezonec; }

STONE; Pembroke; } From the Latin castra. E.g. Winchester, Leicester, Doncaster.
STEIN; Germany; } The steens in Holland are castles built of stone or brick (Dutch gebakken steen). Many of the German steins are stone castles. E.g. Robesteone, Ehrenbreitstein, Brunsteen.
STEEN; Netherlands; }

DUN; Celt-Saxon; a hill fort. E.g. London, Dunmow. p. 173.
LIS; Gaelic; an earthen fort; equivalent to bury. E.g. Lismore, Listowel, and 300 names in Ireland.
RATH; Erse; an earthen fort, or mound. E.g. Rathboyne, Rathlin.
KOTE; India; a fort. E.g. Sealkote.
DRWG; Southern India; a fort. E.g. Nulburg.
KAS; Arabic; a fort. E.g. Kosseir.
KALAT; Arabic; a castle. E.g. Calatafingone, Alcala.
KOTE; India; a fort. E.g. Sealkote.

CIVITA; Italy; } Latin, civitas. E.g. Civita Vecchia, Ciudad Rodrigo.
CIUDAD; Spain; }
MEDINA; Arabic; a chief city. E.g. Medina Sidonia. p. 70.
PATAM; India; a city. E.g. Patra, Seringapatam.
PORE; India; a city; Sanskrit pura, related to πόλις. E.g. Singapoor.
POLIS; Greek; a city. E.g. Constantinople, Grenoble, Naples. p. 263.
HAC; Celtic; derivative particle. It is sometimes the patronymic suffix, sometimes the possessive suffix, and sometimes gives a substantive the power of an adjective. In some parts of France this suffix is almost universal. E.g. Langeac.
ING; England; } sons of. E.g. Reading, Tübingen. p. 71.
AC; Celtic; derivative particle. It is sometimes the patronymic suffix, sometimes the possessive suffix, and sometimes gives a substantive the power of an adjective. In some parts of France this suffix is almost universal. E.g. Langeac.
MENZIL; Arabic; a station. p. 66.
RAHL; Arabic; a village, or house. pp. 66, 67.
KAFR; Arabic; a village.
BENDER; Arabic; a market town.
COLN; Latin, colonia. E.g. Lincoln, Cologne. p. 175.
HIPPO; Phoenician; a walled town. p. 63.
Hazor; Semitic; an inclosure for cattle in the desert. A common prefix in the names of the settlements of the fixed Arabs. E.g. Hazar-Ithman, Hazar-Aman.
STAPLE; England; a market. E.g Dunstable, Etaples. pp. 66, 67.
KAN; Arabic; a market.
MULLEN; Gaelic; a mill. E.g. Mullingar, Mullintra.
MLYN; Slavonic; a mill. E.g. Mlinek.
MASARA; Arabic; a mill.
CHURCH; Southumbria. \{ E.g. Church Stretton, Kirkcudbright. p. 228. \\
KIRK; Northumbria. \\
KIL; Gadhelic; a cell; a church. \{ E.g. Killin. p. 227. \\
LLAN; Cymric; an inclosure; a church. \{ E.g. Llanberis. pp. 153, 227. \\
MOUTIERS; France; \{ a monastery. \{ E.g. Westminster, Monas-
MINSTER; England; \{ terevin in Ireland. p. 233. \\
MONASTER; Ireland, Greece; \{ DEIR; Arabic; a house; a monastery. p. 67. \\
GHAR; Arabic; a grotto. \{ E.g. Trafalgar. p. 71. \\
HITHE; Anglo-Saxon; \{ a wharf. \{ E.g. Greenhithe, Erith, Lambeth, 
HAFEN; Norse; \{ Copenhagen, Kurische Haf. p. 188. \\
WERP; a wharf; from the Danish hverze, to turn, a word which appears in 
the name of Cape Wrath. \{ E.g. Antwerp. pp. 267, 269. \\
MARS; Arabic; a port. \{ E.g. Marsala. p. 67. \\

IX. BOUNDARIES.

TWISTLE; Northumbria; a boundary. \{ E.g. Entwistle, Bichtwistle, Ex.
twistle.

GILL; Northumbria; Norse gil, a ravine. \{ E.g. Dungeon Gill.

STONE; Anglo-Saxon and Norse stan. \{ E.g. Stanton, Godstone. Staines 
is so called from the Stones bounding the river jurisdiction of the 
Lord Mayor.

KAMEN; Slavonic; a stone. \{ E.g. Chemnitz.

HAGAR; Arabic; a stone.

GISR; Arabic; a dyke.

DYKE; Anglo-Saxon; a ditch. \{ E.g. Wansdyke.

HATCH; England; a hitch-gate. Cf. the French hêche. This is a com-
mon suffix in the neighbourhood of ancient forests. \{ E.g. Westhatch, 
Pilgrims’ Hatch.

CLOUGH; Erse cloch, a stone. \{ E.g. Cloghan, Claughton in Yorkshire.

MARK; Indo-European; a boundary. \{ E.g. Denmark, Altmark. p. 176.

DAM; an embankment. \{ E.g. Rotterdam, Amsterdam.
